Telegrams/Telex for Pilot should be addressed to Harbour Master, Vila, or advise through Agents. ETA messages for night arrivals, weekends and public holidays must arrive during office hours, Monday to Friday. VHF watch is kept on Channel 16 during working hours. Contact normally made 2 hours before arrival at Pilot Station.
ANCHORAGES: When a vessel has to await a berth or tide, the Master may anchor in the main bay North of the leading lights (1,200 m. from lower lead) and well clear of vessels leaving Pontoon Bay; or as directed by the Harbour Master.
RESTRICTIONS: No restrictions except that no services will be provided after 2300 hrs. and before 0500 hrs., unless in emergency or by prior arrangements.
MAX. SIZE: Governed by berth size and max. LOA 250 m.
HEALTH: Pratique messages should be addressed to Harbour Master. If vessel not healthy, medical advice should be requested through Agents.

Pratique messages will not normally be responded to if the vessel is healthy.
RADIO: Messages or communications possible via Port Vila Coastal Radio. Call sign YJM.
VHF: Port and radio station keep watch on Channel 16 during working hours.
RADAR: No radar services.
TUGS: One tug available for berthing/unberthing. 780 h.p., 14 tons bollard pull.
BERTHING:
Main Government Wharf: Steel pile and concrete decking construction; with bollards 30 m. from each end of the wharf. Length of wharf 212 m, width 9 m. and depth 10.7 m. alongside. Loading/discharging by ship's gear.

Transit storage 2,000 sq.m.; open storage 1,000 sq.m. Can take Ro/Ro traffic.
Arammadi Wharf: Privately owned. Length 55 m., depth 8.2 m. alongside. Vessels of 150 m. length can berth safely. Ample open storage, but no closed storage.
Town Wharves: 2 small wharves on town waterfront, depth 2.5 m. alongside. Also see "Tankers".
CRANES: None available.
STEVEDORES: *Working Hours:* Monday to Friday: 0700 – 1100, 1300 – 1700, 1800 – 2300. Saturday: 0700 – 1500. Sundays and Public Holidays: No cargo work. Gangs to be ordered previous day by Agent.
MEDICAL: Government hospital with full facilities. Private doctors and dentists available. Arrangements may be made in advance with Agent by telex or on arrival.
TANKERS: Tankers anchor using a "Mediterranean Moor" with 2 lines to the shore. Due to bar at entrance to bay, entry is made at HW only with controlling draft of 7 ft. plus height of tide. Max. size 1,500 d.w.t.

There is an overhead power cable between Iririki Island and the mainland with a vertical clearance of 19 m.
DENSITY: 1025.
FRESH WATER: Available at main wharf at a filling rate of about 38 t.p.h. At the Star Wharf fresh water available at a filling rate of about 2 t.p.h. Water is good quality and potable.
FUEL: Fuel can be supplied by Shell, Mobil and B.P. by road tanker.
CONSULS: Australia, China, France, New Zealand, Papua New Guinea, Sweden and U.K. are represented.

The E.E.C. and E.S.C.A.P. also have resident representatives.
REPAIRS: Small repairs can be undertaken.
DRY DOCKS: None.
SURVEYORS: Classification Societies' Surveyors can be brought from Fiji and New Caledonia at short notice.
GANGWAY/DECK WATCHMEN: Not available or necessary.
OPENING/CLOSING HATCHES: Hatches are normally opened and closed by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes or 100 cigarillos or 50 cigars or 250 grammes tobacco. 2 litres of wine and 1.5 litres of spirits.
CARGO GEAR: Ship's gear used for loading/discharging. 11 forklifts from 2 – 20 tons, 1×22 ton flat-bed truck, 1 flat-bed truck with 19 ton crane, 1×8 ton tipper truck, 1 prime mover, 1×20 ton semi-trailer, 1×10 ton tilt trailer, 3×3 ton trucks and 1×20 ton container top lift frame (20 ft. containers) available.
REPATRIATION: Arranged by Agent.
AIRPORT: Bauerfield International Airport in Vila about 5 km. from port. Daily services to Noumea. Regular services to Fiji, Auckland, Sydney, Brisbane, Honiara, Papua New Guinea and Naura.
TIME: GMT plus 11 hours.
POLICE/AMBULANCE/FIRE: Police, Tel: 22222; Ambulance, Tel: 22100; Fire, Tel: 22333.
TELEPHONES: Available on board at Main Government Wharf through Agent.

There is a public telephone on the main wharf.
SERVICES: Diver available. Tinned, frozen meat and vegetab available, also bonded stores.
BANKS: Available.
SHIP SUPPLY SERVICE: Tug "Roimata" and pilot boat "Tekoni II" ca be used in an emergency for transport of personnel/essential store There are various charter boat operators who can be mobilised throug the Department for Emergency Operations.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Collection service available if requeste through ship's agent.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: Usual local facilities.
CURRENCY: Vatu.
REGULATIONS: No special regulations.
DELAYS: Only when more than one ship in port.
GENERAL: *Charts:* B.A. 1493 and 1494 cover this port.
DEVELOPMENTS: The privately owned 50 m. wharf to be extended b 40 m. and strengthened for container handling. No date yet fixed f commencement of construction.
AUTHORITY: Ports and Marine Department, Private Bag 046, Port Vil Vanuatu, S.W. Pacific. *Tel:* (678) 22339, 22476. *FAX:* (678) 2247 *Contact:* Captain Leith Nosak, Principal Marine Officer/Pil Tel: 23646 (home). Paul Peter Lenis, Harbour Master. Tel: 2438 (home).

SANTO: 15.31 S. 167.11 E.

The Port of Santo is sometimes referred to by the name of the old tow 'Luganville', but nowadays the port and the town are usually calle 'Santo'.
PORT LIMITS: The Port of Santo includes that area of the Segon Channel bounded in the East by a line running due North from Blac Rock Point on Aore Island (from the 'Black Rock' on B.A. Chart 1736 This is known as Pointe Chapuis on French charts. It is bounded in th West by a line running due East from the Renee River on the island o Espiritu Santo.
DOCUMENTS:
Last Port Clearance.
2 Cargo Manifests.
1 Crew Declaration.
2 Animals Lists (Nil if none aboard).
2 Prohibited and Restricted Goods (Arms and Ammunition).
2 Lists of Ship's Stores (Cigarettes, Tobacco, Alcohol, etc.).
6 Crew Lists.
All the above can be provided on ship's paper.
The following is a Vanuatu form which can be filled in on arrival:
Ship's Report and Arrival Declaration (Vessel's Details).
PILOTAGE: Telegrams for the Pilot should be addressed 'Harbou Master Santo' or advice passed through Agents. ETA messages f night-time and week-ends must arrive during office hours Monday t Friday.

Ships calling at Port Vila first, may pass ETA Santo through th Harbour Master at Vila.

VHF watch is kept during office hours on Channel 16 and for 2 hou prior to all advised arrivals. Pilot boat also watches Channel 16.

The pilot boat is a 12 m. boat with white hull and superstructu She has 'Pilot' in black letters on the cabin and exhibits a pilot ja She carries a red flashing light with her pilot lights at night.

The Pilot Station is 1 mile East of Black Rock Point at the Easte entrance to the Segond Channel. By day and in good visibility the Pi may board or disembark at the South-Western end of the Segon Channel South of Georges Philippar Pass, though this is not normal a should be by prior arrangement.

Pilot ladder should be rigged in accordance with the S.O.L.A convention.
ANCHORAGES: Vessels may anchor anywhere in the Segond Chan except in the 'Prohibited Anchorage' close off the Main Wharf (whic shown as 'Dock No. 3' on B.A. Chart 1736). There is a patch wi least depth of 14 fathoms 1 mile S.S.W. of the main wharf whic recommended for anchoring, especially for smaller vessels seek shelter from the S.E. trades. A strong tidal current, normally up to 3 kno runs in the channel and vessels should give plenty of scope.
RESTRICTIONS: There are no restrictions on entry. However, stevedores do not work from 2300 hrs. to 0700 hrs., vessels due to ar between these times are *recommended* to slow down, save fuel a arrive at the Pilot Station at 0530 hrs. or 0600 hrs. to berth in dayli
MAX. SIZE: Governed by berth size only.
HEALTH: Pratique messages should be addressed to Harbour Mas with ETA message. If vessel is *not* healthy, Harbour Master will ad action to take. Pratique messages will not normally be responded t vessel is healthy. Vessels arriving from Port Vila do not require Prati
RADIO: Message should be sent via Port Vila radio, call sign YJM
VHF: A port watch is kept on Channel 16 during office hours Mon to Friday and from 2 hours prior to advised ETAs. Call 'Harbour Mas Santo'. The pilot vessel also watches Channel 16 VHF when on pilo duty.
RADAR: No radar service.
TUGS: None, but one may be obtained in emergency from Port V
BERTHING: Salt water Berth 140 m. long with a depth of 10.5 m LWS, and this is the maximum draft. Vessels can, and usual overhang the ends of the wharf with lines on dolphins or bollards o shore. Dolphins are situated 22.5 m. East and 35 m. West of the W

Also see "General".

CRANES: None.
BULK CARGO FACILITIES: Stevedores are currently interested in experimenting with bulk loading of copra (rather than from bags) and various methods are used to suit different ships. All methods, however, require lifting by ship's gear. There is interest in the construction of a small coconut oil mill, storage tanks for which are already constructed.
BRIDGES: None.
STEVEDORES: Stevedores work 0700 hrs. to 1100 hrs., 1300 hrs. to 1700 hrs. and 1800 hrs. to 2200 hrs. Advice given at least the previous day by Agents should be sufficient. Stevedores do not work on Sundays, or if avoidable on public holidays.
MEDICAL: Medical attention can be arranged after arrival and there is a hospital in Santo. However, medical treatment that is not of an emergency nature should be sought elsewhere.
TANKERS: Tankers berth at the main cargo wharf. The discharge line is 8 in. and the rate of discharge is 150 tonnes per hour.
DENSITY: 1025.
FRESH WATER: Vessels can take up to 500 tonnes if 2 working days' notice are given. Otherwise the maximum amount may be as little as 50 tonnes. Water is good though a little hard.
FUEL: Small quantities can be arranged by truck. Large quantities can be delivered by the 8 in. tanker discharge line, but must be by prior arrangement with Shell or Mobil. Santo is not normally a bunkering port.
FIRE PRECAUTIONS: All normal precautions only.
CONSULS: None.
REPAIRS: No shore facilities suitable for larger vessels.
DRY DOCKS: None. Slipway for vessels up to 50 m. length.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Not considered necessary.
HATCHES: Hatches are opened and closed by either crew or stevedores. Recommended that crew carry out this operation on copra loading ships.
CUSTOMS ALLOWANCES: (Per crew member) 200 cigarettes or 100 cigarillos or 50 cigars or 250 grammes tobacco. 2 litres of wine and 1.5 litres spirits.
CARGO GEAR: Ship's gear only. Ashore: 5 forklifts (from 2.5 to 22 tonnes), 2×3 tonnes flat trucks, 1×6 tonnes dump truck, 8 tractors, 100×2 tonnes trailers and 1×22 tonnes container carrier are available. No lighters available.
REPATRIATION: Possible from Santo Airport via Port Vila.
AIRPORT: Santo International Airport is about 6 km. from town.
TIME: GMT plus 11 hours.
HOLIDAYS: Holidays vary from year to year. It is recommended to seek advice of local Agents. It is not normally possible to work cargo on public holidays or Sundays.
POLICE/AMBULANCE/FIRE: Police tel: 222; Fire tel: 316; Health Officer tel: 419.

Police station is close to the wharf. There is no ambulance service. The fire service consists of 1 fire tender operated by Public Works Department. The Harbour Master has some hoses and a small foam generating machine stationed on the wharf.
TELEPHONES: There is a public telephone in the Post Office near the wharf.
SERVICES: None.
STORAGE: General cargo sheds of 6,000 cu.m.; 9,000 cu.m. of copra storage. Container yard for 200 TEUs. There is a minimum of 1,600 cu.m. of open storage.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: No club. Some local facilities.
CURRENCY: Vatu. U.S.$ 1.00 = 100 Vatu (approx.).
DELAYS: Only for stevedores non-working times or when there is more than 1 ship present in the port.
REGULATIONS: No special regulations.
GENERAL: Tidal stream in the Segond Channel can reach as much as 4 knots, the Westerly flood stream being predominant and the East going ebb stream occasionally absent. The flood stream can set in a North-Westerly direction at the main wharf, thus setting a vessel down onto the wharf and making an apparently simple berthing manoeuvre a little difficult. It is recommended that when S.E. trades are blowing, and a vessel has to berth port side to in order to stem the tide, the starboard anchor should be laid off whilst berthing with about 5 or 6 shackles leading 2 points for'd of the beam. This is to heave the bow away from the wharf on departure.
AUTHORITY: Department of Ports and Marine, Box 148, Santo, Vanuatu. *Tel:* 739 (office); 454 (home). *Contact:* Captain M. Toa, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Venezuela

GENERAL:

BERTHING PRIORITY: The Venezuelan Ministry of Communications has decreed, through the Directorate General for Transport and the Port Captaincies, the following new docking priority system:

1. Vessels owned by the C.A. Venezolana de Navegacion or chartered by that company.
2. Venezuelan vessels belonging to private companies.
3. Vessels of other countries.

Previously, vessels chartered by the C.A. Venezolana de Navegacion did not get priority treatment and it is understood that, with these new priorities, the number of vessels with docking privileges has been tripled, thus resulting in greater delays for vessels operated by foreign companies.

DOCUMENTS: *Prior to Arrival:*

Arrival Notice: The Agent must submit 24 hours in advance of the vessel's arrival, a letter-notification indicating date and time of arrival, name and nationality, name of Master, length, gross and net registered tonnage of cargo for the port, origin, destination, shipper and agency, in 16 copies, with the following distribution:

Captain of the Port, Customs (2), The National Institute of Ports-INP (3), Armed Forces of Cooperation, National Guard, Police Intelligence Service Bureau-DISIP, National Bureau of Identification and Alien-Immigration, Interpol, Ministry of Health and Social Welfare-Public Health Unit, Ministry of Agriculture and Livestock-Animal and Plant Health, Post Office and Chamber of Commerce.

Information on Cargo and Passengers for the Port: The agency must receive by airmail, sufficiently in advance, the following documents to be submitted to the authorities at least 24 hours before the vessel's arrival:

Documents	*Captain of Port*	*Customs*	*INP*	*Agency*	*Total*
Cargo Manifests(a)	–	1	3	3	7
Correction Letter to Manifest	–	1	–	1	2
Bills of Lading	–	–	2	1	3
Stowage Plan(b)	–	–	1	2	3
Cargo List	–	–	10	–	10
Container List	–	–	12	–	12
Dangerous Cargo List	2	–	1	1	4
Passenger List	–	–	–	1	1
Mail List	–	–	1	–	1

(a) As of January 29, 1979, the Cargo Manifest may be submitted on LAFTA/OAS Form 2, instead of on the Venezuelan Freight List (Sobordo).

(b) The Venezuelan Shipping Association is negotiating to have the stowage plan submitted to the National Institute of Ports on the vessel's arrival, instead of 24 hours in advance.

Request for Port Services: 24 hours before the vessel's arrival, the agency must submit to the Captain of the Port the request for pilotage, towage and berthing.

At the same time, it must request permission to disembark and embark passengers and cargo and unload merchandise, on a form addressed to the Customs Administrator, with copies to the INP and the National Guard.

Additional Requests: The agency must draw up and submit to the National Institute of Ports, 24 hours before the vessel's arrival, 12 copies of the cargo index, a document corresponding to tally books.

On Arrival:

Type of Document	*Number and distribution of documents*						
Basic forms	*Captain of Port*	*Customs*	*INP*	*National Guard*	*Public Health*	*Others*	*Total*
General Declaration	1	1	1	1	1	2(a)	7

Vaccination List	–	–	–	–	1	–	1
Narcotics List	–	2	2	1	–	–	5
Firearms List	–	2	2	1	–	–	5

(e) DISIP, Bureau of Military Intelligence, Interpol, Identification and Tourism.
(f) When a vessel returns to the country goods missing in unloading other vessels, it shall submit, in addition to the cargo manifest a return cargo manifest containing the data required for the manifest and the name of the vessels on which the goods were originally manifested (Organic Law of Customs).
(g) Eliminated by the Organic Law of Customs.

Prior to Departure:

Clearance Documents: At least 6 hours in advance, the request t the clearance permit must be submitted to the Captain of the Port.

Request for Pilotage: Also 6 hours in advance, or more, the reque for pilotage must be submitted to the Captain of the Port.

SHIPMASTER'S REPORT: July 1982.

WARNING – CAUTION

You may wish to caution all seafarers who may in the future trade t Caripito, and the other similar jungle areas. The problem in this are used to be mosquitoes, but although they are still around, the proble that we have recently experienced is a moth locally known a 'Palometas'. One doctor referred to it as an insect 'Hylesia Canitia'.

My information is limited, due to language difficulties, but the proble is very real, and I cannot caution the unaware strongly enough to tak precautions. The vessel has traded to Caripito frequently over the pa two years, and this would appear to be the first experience as I can fin nothing about these moths in writing and our first warning was give when an Agent saw some of these moths onboard. This type of mot appears suddenly from the jungle with no regular cycle, and like othe moths is attracted at night by lights, be they from vessels, homes o berth installations. They are about *one inch* in length, their bodies abo pencil thickness and filled with eggs. They flutter in vast numbers aroun the lights, and it would appear that the dust, pollen, hair or whatev comes off them, falls onto the ship's structure or persons nearby. The do not bite and therefore I assume the dust, breathed in or landing o the skin causes a red pimply rash which gradually spreads over th whole body. It affects everyone differently, some crew were covered a very heavy bumpy red rash within a few hours of exposure, othe only in small patches on the arms which spread over the body takin several days, but in all cases causing extreme discomfort due to th itching and constant desire to scratch. At first it was only crew who we on deck that were affected, but as I assume the dust was brought in the accommodation by clothing, fans and the moths which got past th doors, the engine and catering crew were similarly affected.

Over two thirds of the crew were treated locally within 24 hours, wi injections, tablets, lotions & creams but this only brought temporary relie Rashes picked up 10 days ago with the first incident are now clean up, but fresh rash areas appeared when we visited the Caripito ar 3 days ago. We are on a weekly schedule, and one would hope we w build up a resistance to this problem. The local people also suffer fro this rash, but the ones I met only had a very light rash on arms, ne and body. They cannot say how long the moths will be present, vari reports of two weeks to months. However, we are now adopting th following anti-moth measures:

1. Put the air conditioning on recirculation, ensure all openings a closed.

2. At night when underway, blackout the vessel as much as possib During the San Juan River passage to Caripito, navigation lights o situation if possible.

3. When you anchor in San Juan River to wait for the tide or be at Caripito, blackout the vessel and allow no one outside if possible night, anchoring or picking up by torchlight. Having anchor lights o night is debatable, the local dredger does not.

4. Wash the vessel down completely at daybreak, and sweep all de moths off the deck.

5. For night mooring/deck operations, have as few lights on as saf possible, all exposed crew should cover themselves complet particularly around the neck area.

6. After clearing the Maturin Bar (river entrance) wash down the wh ship. The dust off the moths is still active days after leaving the ar Wash all filters of air conditioning units.

Knowing about this problem could have reduced exposure to wha an extremely unpleasant experience, and I have urged the lo installation to include a warning in their Port Information Guide.

UPDATE: 1996
MOTHS STILL IN VICINITY

Treatment: Seafarers, who become exposed to this terrible irritating ra can obtain some relief if they have a swimming pool onboard, spending as much time as possible in the pool to get the dust out of pores of the skin. If no swimmimg pool, stand under the fire main hydr

AMUAY BAY: 11.46 N. 70.15 W. (See Pla

OPERATOR: Lagoven, S.A.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arriv Amuay Bay. During hours of darkness all vessels must ide themselves on arrival either by radio-telephone or Aldis, prefe the former.
2. If a ship originally cleared for another port (including some o Venezuelan port) is diverted at sea to Amuay Bay, co information must be radioed prior to arrival to avoid heavy fine or delays. See "Radio".
3. No dirty ballast may be pumped overside in port or in Venez coastal waters. Ballast disposal facilities are available at Am Terminal.
4. The use of Venezuelan Government Pilots is compulsory for do and for movements inside the bay.
5. The Venezuelan flag should be displayed at the mast-head d daylight hours by ships anchored and berthed in Venezuelan wa
6. In addition to other clearance documents, 2 copies of an ite list of articles in the ship's chest must be presented to Autho on arrival.
7. Emergency fire signal is 5 long blasts on ship's whistle or s No other signal is to be given in the case of emergency.
8. Ratguards must be in place on all mooring lines.

LOCATION: The port of Amuay Bay is located on the Gulf of Venezuela, on the West Coast of the Paraguana Peninsula, Venezuela. The sea buoy marking the entrance to the bay is located in Lat. 11° 44' 25" N., Long. 70° 14' 50" W.

DOCUMENTS: Inward Clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

Clearance from Last Port.
Ballast Certificate from Last Port.
Crew Lists (5 copies).
Passenger Lists (5 copies).
Baggage List (3 copies).
Lists of Personnel Effects (3 copies).
Stores Lists (3 copies).
Lists of Slop Chest (3 copies).
Sailing Permit (Zarpe).

Vessels arriving with cargo to discharge, will also require:

Manifest (Sobordo) (1 original and 2 copies from each loading port).
Bills of Lading, 1 original and 5 copies from each loading port.
Tally Books (6 from each loading port).
Commercial Invoices (3 from each loading port).

Although vessels proceed directly to Amuay Bay, clearance documents should be prepared showing the port as Las Piedras, Paraguana (Amuay Bay). Failure to observe this requirement may result in penalties up to a maximum of Bs.2,000.

Admeasurement Certificate: All ships calling at a Venezuelan port for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, or any other certificate with which Venezuela is in agreement, which is used as a basis for recalculating tonnage under the Venezuelan Regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call. Vessels registered in the following countries are excluded from the above regulations: Denmark, France, Germany, Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to "Lagomar-Judibana" prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival.
Last port of call
Port for which originally cleared
Grade and quantity of cargo to be lifted.

This information is required in order to make in advance special arrangements for Inward Clearance, to avoid payment of fine.

Outward Clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form, delivered on board on arrival, must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information by the Captain of the Port.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Marine Department will arrange for Pilots to board all vessels as necessary.

The Pilot acts in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

ANCHORAGES: For vessels awaiting berth, there is a good anchorage about 1 mile N.W. of the sea buoy in 8 to 12 fathoms with a sand and mud bottom. Ship Masters are requested not to anchor at a distance greater than 3 miles from the sea buoy.

RESTRICTED AREA: A restricted fishing area has been established by the Venezuelan Government which is prohibited for mechanically propelled vessels drawing more than 5 ft. This zone lies within the area off the Paraguana Peninsula from Punta Macolla, Lat. 12° 5' 32" N., Long. 70° 12' 55" W., to Punta Estanques (Los Taques), Lat. 11° 48' 45" N., Long. 70° 16' 45" W., and a line connecting the positions below indicated: Lat. 12° 07' 40" N., Long. 70° 14' 25" W.; Lat. 12° 03' 15" N. Long. 70° 19' 23" W.; Lat. 11° 49' 25" N., Long. 70° 21' 50" W.

MAX. SIZE: Length 1,000 ft.; draft 43 ft. Also see "Berthing".

HEALTH: *Sanitary Inspections:* A close control of veneral diseases has been put into effect by the Government Sanitary Office.

Immediately after docking a Sanitary Inspector will board the vessel and all Crew members will be checked before going ashore.

Those persons found with infection must be sent to the Government Anti-venereal Clinic for proper medical attention and return to vessel before sailing. 20 Bolivares per ship.

Shore passes will be granted to all healthy persons.

Masters are required to co-operate in this campaign.

RADIO: The cable and telegraphic address for the Lagoven S.A. at Amuay is "Lagomar Judibana". Radio messages to and from ships at sea are routed through "Shipward 2 New York" for retransmittal through Aircon system to Judibana (Amuay Bay).

Radio Notice of Arrival should be sent 72 hours prior to arrival at Amuay. The message should include the following:

(1) Vessel's name.
(2) Flag.
(3) Last port.
(4) Next port.
(5) Crew List to include name/nationality/Passport number/time onboard/home address.

Ship-to-shore telephone: Radio-telephone listening watches are maintained on a 24-hour basis in the Marine Office on the following frequencies: 2182 kHz.; 156.8 MHz.

International telephone: International telephone calls are routed through Caracas, Venezuela. Telephone number is Punto Fijo area 069-51557 (It is usually difficult if not impossible to complete a call.). Telex: 54193 Lagoven.

Also see "Documents".

TUGS: Tug assistance is considered essential and is afforded all vessels entering, leaving or shifting in the harbour by 2 × 1,600 h.p. tugs. Disposition and manoeuvres of tug-boat are directed by the Pilot, who uses a "walkie-talkie" to convey orders to the tugs.

BERTHING: 4 finger piers provide 8 berths, numbered 1 to 8, from South to North.

Berth	1	2	3	4	5	6	7	8
Max. Arrival d.w.t. (m.t.)	70	92	24	44	16	30	16	30
Max. departure d.w.t. (m.t.)	112	112	48	48	38	38	94	94
Max. Draft (S.W.)	43'	43'	*37.6'	*37.6'	*37.6'	*37.6'	*37.6'	43'
Max. Length Ship	1000'	1000'	650'	700'	700'	700'	856'	856'
Max. Beam	Unl.	Unl.	Unl.	†	†	†	†	Unl.
Bow to manifold distance	495'	495'	300'	320'	330'	330'	340'	340'

Ballast line, fresh water and all grades bunkers at all berths.

*The max. draft will be increased to 40 ft.

†Max. beam permissible varies dependent upon the beam of vessel berthed on other side of the slip.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

Products handled:

Berths No. 1 & 2: F.O., heating, heavy distillates, TJ-102, topped crudes, all crudes.

Berths No. 3 & 4: Lubes, F.O., LCT asphalts (penetration).

Berths No. 5 & 6: Naphtha, jet fuel, crudes, F.O., heating, MC/RC asphalts, kerosene, TJ-102, topped crudes, LCT (pref.).

Berths No. 7 & 8: Naphtha, kerosene, heating, F.O., jet fuel, MC/RC asphalts, all crudes except TJ-102.

LOADING: Loading rates particulary for low-flash products loaded during the hours of darkness or when topping-off cargo tanks, will be reduced by the terminal to meet existing conditions.

All loading and discharging will be stopped during the passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calm, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping-off, if requested by the ship's officer.

Some of the fuel cargoes are loaded from fuel reservoirs through certified positive displacement meters, and shipping documents are prepared on the metered figures. All reconstituted crudes are line blended with conditions recording of component rates and quantities. Actual loading rates of both this crude and metered fuel cargoes are available at any time upon request of the standby.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on completion of Inward Clearance. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than this 10% limitation it is necessary to cable New York for confirmation.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "stand-by" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Vessels loading Liquid and Flaked Sulphur: *For vessels loading Liquid Sulphur, the following applies:*

Location: Pier 2, Berth 3 at Amuay Bay.

Draft – 40 ft., length overall – 700 ft., beam – no limitation.

Loading will be at the rate of 400 long tons per hour through a 6 in. line and rubber hose.

Maximum cargo size – 25,000 long tons.

Normal loading temperature is 275°F. (Minimum – 265°F. Maximum – 295°F.). Density at normal loading temperature is 112 pounds per cu. ft. Viscosity at same temperature is 8.5 centipoises.

Safety precautions/provisions: Molten sulphur classified as "Grade E Liquid" by U.S. Coast Guard. No naked light, open flames or sparks should be permitted near any tank openings. Molten sulphur is combustible but is handled at temperatures below its flash point (325° – 370° F) and ignition temperatures (476-502° F).

For vessels loading Flaked Sulphur, the following applies: Physical characteristics of the loading facilities:

(a) Location: Lat. 11° 44' N., Long. 70° 14' W. Anchorage approximately 2,000 ft. South Punta Adaro with a depth of 33 ft. 400 yards offshore and dropping off to 50 ft. 1,000 yards offshore. In the rare event that the wind is Westerly vessel would anchor further offshore.

(b) No draft, length or beam limitation. (Vessels loading up to 24 ft. draft may be anchored inside the bay).

(c) Loaded barges whose overall dimensions are 200 ft. × 42 ft. × 17 ft. will be brought alongside with the aid of tugs and removed when required, barges will be equipped with fenders. The hoppers are 160 ft. × 37 ft. × 14 ft. Loading from barges to ship will be done using ship's gear and clam shells of 1.25 ton capacity. Clam shells will be furnished by Lagoven free of charge. Personnel (stevedores) to carry out the loading operation will be supplied by Lagoven or the ship's crew can be used if this is set forth in the charter party. Loading rate 1,000 long tons per day.

(d) The anchorage is sheltered in the lee of the Adaro Peninsula. Wave heights vary between 1 ft. and 2 ft.

(e) Normal Maximum parcel size – 10,000 tons loaded at a rate of 1,000 tons per day, however, an additional 2,500 tons can be supplied at a loading rate of 500 tons per day.

(f) Flaked Sulphur when stored in large quantities varies in density from 55 to 90 pounds per cu.ft. Average density is anticipated to be 70 lbs./cu.ft. Individual flakes are of irregular shape and are less than 0.5 sq.in. in area and less than 0.0625 in. thick. This size data is not a specification nor guarantee and is provided only to indicate the order of magnitude dimensions.

General:

Fee of Bs. 200 will be charged for trips between the Terminal and the anchorage by launch or tug for delivering personnel.

Method of cargo quantity determination: Barge drafts are marked to the nearest inch and capacity tables prepared by Charles Martin. The draft prior to commencement of and upon completion of discharging are noted. The amount transferred is obtained by consulting the tables. The quantity arrived at by totalling the amounts from the barges used is compared to the ships figures and reconciliation reasoned.

BALLAST: Vessels should arrive with sufficient ballast to permit safe handling. The Pilots require a draft of minimum 8 ft. forward, 18 ft. aft, on a T-2 or similar size tanker, 11 ft. forward and 20 ft. aft on a 26,000 d.w.t. or larger vessel. Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously.

Absolutely oil-free ballast may be discharged overside. All dirty ballast must be pumped ashore. A 30 in. ballast line, 2×60,000 and 1×120,000 barrel slop tanks and separator system are available.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the Lagoven concession, operated by the Society of Catholic Medical Missionaries. Several dentists are located in the area.

Italian Crew members covered by Casa Maritime insurance receive medical attention from the appointed medical representative in Punto Fijo.

Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

DENSITY: The usual density of sea water at the berth is 1025, temperature ranges from 78°F. to 85°F.

FRESH WATER: Fresh water can be supplied if necessary; however, supplies are limited to essential requirements. All fresh water is piped from distant sources. Loading rate is about 10 t.p.h.

FUEL: Ship's requirements specifying grade and quantity desired are to be given to the Marine Representative boarding the vessel on arrival. All grades of bunker fuel, intermediate fuels and Diesels are available except Esso diesel. Bunker delivery rates average 2,500/3,500 barrels per hour. Bunkers are loaded through meters which automatically register quantities on bunker receipts.

It is the responsibility of ship's engineer to give "standby" notice to the terminal employee and advise him when to shut down.

CONSULS: Brazil, Great Britain, Italy, the Netherlands, and Norway have consular representatives in the area.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the Stores List. Officers must not carry firearms while the ship is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

While the vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in the officers' mess-room, to avoid difficulties.

TIME: GMT minus 4 hours.

SHORE LEAVE: Also see "Health". Shore passes will be granted to all healthy persons. A representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the Pilot undocking the vessel. Vessels are not permitted to sail until all Crew members are on boar unless hospitalised or prior arrangements made for disembarkin A letter to this effect is required from the Master.

REGULATIONS: (i) *Pollution:* The laws of Venezuela are very strict regard to the pollution of harbour and coastal waters by oil, and hea fines are imposed for violations. No dirty ballast, oil or bilge slops a to be pumped or allowed to escape overboard. All overboard dischar valves from cargo tanks and bilges are to be secured before loading o discharging commences. Loading is to be conducted with the greate care and vigilance in order that errors or delays in handling cargo valve may not result in overflows. All deck scuppers should be plugged befo loading to avoid harbour contamination should an overflow occur. Th Authorities require that a written report be submitted by the ship involve in the event of an oil spill.

(ii) *Gangways:* All vessels using the port of Amuay must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contra to Port Regulations, and Port Authorities will not board except by mea of a safe gangway or accommodation ladder.

(iii) *Passengers:* Passengers will not be permitted to disembark unles in possession of the required visa and documents. To facilitate clearanc if passengers are carried, the Master should include advice to this effe in his radio ETA.

(iv) *Visitors:* All visitors to ships are prohibited except those compa employees, petroleum inspectors, etc., whose duties require the presence aboard.

(v) *Rats:* Rat guards required at all times.

GENERAL: *(a) Weather Conditions:* There is little rainfall at Amuay Ba annual precipitation averages 12 in. The so-called rainy season usual coincides with the Caribbean hurricane season, from August t November, although Amuay lies South of the usual hurricane trac During these months calms are often experienced and winds from a Westerly direction may be expected. Normal winds are steady from th N.E., average Force 4, Beaufort Scale, with a max. of Force Temperatures average about 85°F., with little variation from day to nig or season to season.

(b) Tides: The normal range of the tide is about 12 in.; however, a 28 in. range has been observed during spring tides.

(c) Lubricating oil: Supplies of Essomarine lubricating oils a available. Requirements should be given in vessel's radio notice o arrival.

(d) Bonded Stores: Cigarettes or other stores in bond are n obtainable in Amuay Bay.

(e) Cash Advances: The local currency is the Venezuelan Bolivar an cash advances are made only in this currency. It is requested that an requirement for cash advances be included in the vessel's ETA rad to permit delivery on board on arrival.

(f) Charts: No supplies of charts or sailing directions are available a Amuay Bay.

(g) Laundry: A 6 hour laundry service is available throughout ea working day. Such service should be requested in the vessel's ET message.

(h) Mail: Itemised lists are required for ship's mail, to be signed b the Master. Unless other instructions are given, ship's mail received aft sailing, or for vessels on which no advice has been received, will b held for 30 days and then returned to Owners or Operators at shi expense.

(i) Inspection – Petroleum Products: Chas. Martin & Co. and E. Saybolt, petroleum inspectors, are available if specified. Telepho numbers, Chas. Martin 44665, 44650 and 44211; Saybolt 44639, 446 and 44227.

(j) Norwegian Government Seamen Service: A field representative the above service is stationed at Amuay providing Norwegian a Swedish film exchange and other usual services. His telephone num is 51459.

(k) Personnel – Seamen Left Ashore: In the case of seamen left asho for hospitalisation, repatriation or other reason, all documents a personal effects are to be delivered to the Marine Office before sai A letter is required from the Master advising the maximum advances be made to the seamen, if any, and instructions concerning repatriation. All expenses incurred by seamen left ashore, including co of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law at all times hold the vessel, her Master, Agent or owner, responsible any seamen left behind in Venezuela.

(l) Provisions and Stores: Provisions and stores in limited quan are available, the prices and quality of some items, such as fresh fish, shrimps, vegetables, etc. are competitive; dry stores considerably higher than in most ports. The Port Steward will ass filling requisitions.

(m) Radar and Radio: Radar and radio repairs can be effect Amuay. A service repair man is available, but spare parts are lim

(n) Repairs: Shore facilities are available only for emergency re of a minor nature. The nearest dry docks are those at Puerto Ca and Curacao, N.A. Several contractors in the area provide labou hull painting and for tank cleaning. Contracts for these services are m by the ship's Master directly with the contractor.

(o) Surveyors: There are no appointed surveyors to American Bu of Shipping or Lloyd's in the area. However, with sufficient adv notice, arrangements can be made to have their nearest represen come to Amuay to attend surveys.

(p) Walport Film Exchange: Subscribers to the Walport Servic exchange films at the Marine Office.

(q) Plimsoll Marks: The Captain of the port requires that the Pl Marks of all vessels using the port be clearly visible. Vessels w checked on completion of loading, and if the Plimsoll Marks a readily legible, permission to sail may be withheld.

(r) Landmarks: Three conspicuous radio towers, 350 ft., p alternate red and white bands, with red flashing aircraft warning are located in the refinery area, 1 mile East of the docks.

ATTENDANCE: Representatives of the Marine Department board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ship's requirements. The Marine Office Building is located at the Pierhead Trestle and personnel are available for assistance at all hours. Telephones are located on all docks and the Marine Shift Supervisor can be called on telephone No. 444475 or 444465.

CARIPITO: 10.09 N. 63.02 W. (See Plan)

WARNING

See "General – Shipmaster's Report, July 1982" (Updated 1996).

OPERATOR: Lagoven, S.A.

LOCATION: Caripito is located on the West bank of the San Juan River in Lat. 10° 09' 25" N., Long. 63° 02' 01" W.

Also see "General" before first port.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send to Caripito their ETA Guiria at least 3 days in advance followed by confirmation 48 and 24 hours before arrival.
2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Caripito, certain information must be radioed to Caripito prior to arrival to avoid a heavy fine and/or delays. See "Radio".
3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Limited ballast facilities are available at Caripito Terminal.
4. Vessels calling at Caripito must obtain Government Pilots at Guiria.
5. The Venezuelan flag must be displayed during daylight hours while vessel is within port limits.
6. The emergency fire signal in Caripito dock area is 6 short blasts and 1 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.

DOCUMENTS: (Also see "Radio").

1. *Clearance (inward and outward).* Inward Clearance is effected at Caripito. The Sanitary Inspector boards vessel at anchor or at berth depending on tidal conditions and/or the availability of a berth. The Customs and other Government officials usually board at the berth. However, should there be a delay awaiting berth or tide, the entry will be granted while vessel is at anchor, in which case accommodation ladder must be rigged.

It is necessary that the following documents be ready on arrival:

Ballast List (1 original).
Passenger List (5 copies).
Baggage List (5 copies).
Crew List (7 copies).
Sailing Permit from Last Port (1 original).
Stores List (5 copies).
List of Personal Effects (3 copies).
List of Contents of Slop Chest (3 copies).
List of Passengers in Transit (5 copies).

Cargo documents. These are normally placed on board prior to departure, but in some cases when it is imperative to leave because of the tide, they are delivered at Marieta Pt. while vessel is at anchor awaiting tide to cross the Maturin Bar.

APPROACHES: The traffic in San Juan River is restricted to one-way from Marieta Point to Caripito. Therefore, instructions are issued at Guiria to incoming vessels relative to what action to take on arrival at Marieta Point. Outbound traffic is controlled so as not to conflict with these instructions.

1. Guiria: The town of Guiria is located on South coast of Paria Peninsula on N.W. shore of Gulf of Paria. When approaching from East a signal tower will be observed on a bluff slightly to North of town.
2. Maturin Bar: Buoy E-1, marks the entrance to Maturin Bar Channel and is located in position Lat. 10° 18' 57" N., Long. 62° 28' 16" W. (approx.) and displays a flashing white light every 5 secs.
3. Channel: Maturin Bar Channel is 14 miles in length and 400 ft. in width. The tidal range over the bar varies from 4.6 ft. to 5.7 ft. with currents up 3 knots. The average salinity of water is 1.009; however, this may vary considerably between wet and dry seasons and spring and neap tides dredging of channel to 32 ft. (MLWS) has recently been concluded. Maximum draft permitted by Venezuelan regulations is 34 ft. in fresh water. There is a restriction of 6 in. less for all motor tankers. On leaving Maturin Bar Channel the San Juan River narrows from approximately 1.25 miles in width to about 0.7 miles with slight variations in width up to Marieta Point where it narrows to about 1,200 ft. and varies between 800 ft. and 2,000 ft. up to Caripito. Marieta Point marks intersection of Cano Frances and the San Juan River. It is also at this point that course of San Juan River changes approximately 100° to starboard and it is the beginning of one-way traffic. Frequently, incoming vessels are requested to anchor below this point to await outbound traffic. There are 32 lights marking strategic points in San Juan River between Maturin Bar and Caripito Terminal. These light towers are painted aluminium and are easily visible during daylight hours.

PILOTAGE: Pilots are employees of Venezuelan Government and act in an advisory capacity. The Master retains responsibility for ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

Pilots are compulsory and are embarked and disembarked at port of Guiria through a sub-Agent. Vessels should proceed to the Guiria Sea Buoy (position Lat. 10° 33' 25" N., Long. 62° 15' 05" W., displaying a flashing white light every 5 secs.), and await instructions. If arriving during the hours of darkness, certain instructions are usually transmitted by light signals from the signal tower. Voice radio communications can be established at any time with Guiria or Lagoven Caripito on frequencies 2182 kHz, 2638 kHz and 2738 kHz. The launch which embarks the Pilot will also deliver instructions to the Master relative to the movements of his vessel en route to Caripito, port regulations, facilities, etc. The regular pilotage fees cover the area from the entrance to Maturin channel to and from Caripito. The Pilot is to be provided with sleeping quarters and food, equal to that provided for the officers aboard ship. (A representative from Port Services will assist as interpreter, whenever necessary.)

Note: Complaints or observations concerning the Pilot's handling of vessel should be noted on back of pilotage ticket.

TIDES: The normal range of tide in the dock area is about 12 ft. with currents up to 3 knots during the flood and 4 knots during the ebb in rainy season (May-December). The normal current is 2.5 knots during the flood and 3 knots during the ebb.

ANCHORAGE: For vessels awaiting berth, there is an anchorage about 1,000 m. up-stream from the Caripito Terminal. Vessels awaiting clear channel may at times be requested to anchor at Punta Marieta. Vessels awaiting high tide anchor at Punta Marieta or off Punta Gorda.

MAX. SIZE: Vessels up to 660 ft., 61,000 d.w.t. and max. draft *33 ft. (FW) at Berth No. 2 and LOA 775 ft., 61,000 d.w.t. and max. draft *33 ft. (FW) at Berth No. 3 when vessels are loaded. No restriction on vessel's beam at the berths.

*Safe draft per tide tables.

RADIO: The cable and telegraphic address for Lagoven at Caripito is "Lagomar – Caripito". Messages to and from ships at sea are routed through the Government Radio Station at Maiquetia (La Guaira), call letters "YVG". This station operates on a 24-hour continuous watch, on the following frequencies:

Listening Frequencies: Low frequency, 500 kHz; high frequency, 4178, 6267, 8356, 12534, 16712, 22225 kHz. Transmitting Frequencies: Low frequency, 500, 472, 464, 417 kHz; high frequency, 4322, 4352, 6505.5, 6519.5, 8722, 8730, 12817.5, 17141.6 kHz. Radio Notice of Arrival should be sent 72 hours prior to arrival at Guiria and corrected if weather or other conditions delay the vessel.

Radio telephone listening watches are maintained on a 24-hour basis at Guiria and at Caripito on 2182 kHz. The following frequencies are available for communications after contact: 2638 kHz and 2738 kHz.

All vessels en route to Caripito may also communicate with Amuay or La Salina Marine offices and request that message dealing with corrected ETAs, Pilots and other business be relayed to the Caripito Marine Office.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to Lagomar Caripito prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival
at Caripito

Last port of call
Port for which originally
cleared
Grade and quantity of cargo
to be lifted

This information is required in order to make in advance special arrangements for Inward Clearance, to avoid payment of a fine. It is necessary in such a case that the following documents be ready on arrival:

Crew List (original and 6 copies).
List of Personal Effects (original and 2 copies).
List of Contents of Slop Chest (3 copies).
Stores List (original and 1 copy).

Also required are the original and 2 copies of the radiogram instructing Master to proceed to Caripito. Outward Clearance documents are placed on board the vessel prior to departure from the Caripito terminal.

Masters should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. Caripito has also radio telephone communication with North and South America and Europe. For further information contact Port Services Section in the terminal building, telephone 2335/2336.

BALLAST: Ballast is not required when mooring. Any ballast carried should be in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously. All ballast clean or dirty must be pumped ashore. Contaminated residues may be pumped ashore, where facilities are available for receiving up to a maximum of 20,000 barrels.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

BERTHING: The Marine Office Building is located on the West bank of the San Juan River upstream from the berths. Representatives of the Marine Department board vessel immediately upon arrival and it is particularly requested that Masters indicate at that time all ship's requirements. Personnel are available for assistance at all hours.

Lagoven maintains a deep water terminal, consisting of 2 ocean tanker berths, Nos. 2 and 3. These are T-type piers with breasting dolphins located approximately 10 ft. off the face of each pier.

All terminal facilities are under the control of Lagoven, S.A. The port is open for navigation during day and night. All ocean tankers are moored at Berths No. 2 and 3 on the flood tide only. Vessels may sail from Berth No. 3 at any stage of the tide. Sailings from Berth No. 2 are restricted to flood tide only when Berth No. 3 is occupied.

A vessel entering or leaving port must be assisted by the same Government Pilot taken aboard at Guiria. A Custom guard will board at the same time and remain with the vessel. A Lagoven Representative will deliver to the Master his loading and docking instructions together with any other information pertinent to the vessel's call. He will also sign the Notice of Readiness if requested. The vessel will proceed to anchor to await flood tide to dock, to await berth, or will swing to the flood tide in the turning basin and proceed directly to the berth depending on circumstances.

LOADING: Loading rates, particularly for low-flash products loaded during the hours of darkness or when topping off cargo tanks, will be reduced by terminal to meet existing conditions.

All loading and discharging will be stopped during passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calms, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazard from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from Owners or charterers do not agree with terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than 10% limitation consultation is necessary.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the concession. Several dentists are located in the town of Caripito. Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FRESH WATER: Fresh water is available in any quantity. Delivery is made through 2.5 in. national standard fire hose thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: IFO-180, IFO-380, Marine Diesel and Gas Oil are available. It is the responsibility of ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

CONSULS: There are no consular representatives in the area. Vessels bound for U.S.A. or British Caribbean ports will be provided with a letter stating this fact.

REPAIRS: Only minor repairs of an emergency nature can be made. There are no electronic repair services available in the area.

CERTIFICATES: All ships calling at a Venezuelan port for the first time must be measured for tonnage by Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued is forwarded to the Owners. A fee is charged for this certificate, which is payable only on ship's first call. Vessels registered in following countries are excluded from above regulations: Denmark, France, Germany, Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officals during regular meal hours. Masters are requested to give them the privilege of eating in the officers' messroom, to avoid difficulties.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed 1 per officer, nor can ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the Stores List. Officers must not carry firearms while ship is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to the Lagoven Despatcher undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking.

TIME: Local time is GMT minus 4 hours.

GENERAL:

Gangways: Gangways at Berths No. 2 and 3 are provided by the terminal.

Plimsoll Marks: The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

Surveyors: There are no appointed surveyors to the American Bureau of Shipping or Lloyd's in the area. With 48 hours' notice, non-exclusive surveyors can be obtained from Caracas, or at times from Puerto La Cruz, or qualified Masters or chief engineers may be available for appointment as surveyors when required.

Bonded Stores: Cigarettes or other stores in bond are not obtainable at Caripito.

Cash Advances: The local currency is the Venezuelan Bolivar and cas advances are made only in this currency. It is requested that an requirement for cash advances be included in the vessel's radio ETA to permit delivery on board on arrival. Cash returns can be accepte only during the normal working day – 0700 to 1600 hrs. Sundays an holidays excluded.

Provisions and Stores: Provisions and stores in extremely limite varieties and quantities are available at prices considerably higher tha in most other ports.

Charts: No supplies of charts or sailing directions are available a Caripito.

Personnel – Seamen Left Ashore: In the case of seamen left ashore fo hospitalisation, repatriation or other reason all documents and persona effects are to be delivered to the Marine Office before sailing. A lette is required from the Master advising the maximum advances to be mad to the seaman, if any, and instructions concerning his repatriation. A expenses incurred by seamen left ashore, including cost of repatriatio are for ship's account. It is important that Masters bear in mind that th Venezuelan law will at all times hold the vessel, her Master, Agent o owner, responsible for any seamen left behind in Venezuela.

Laundry; Laundry service is available.

Lubricating Oil: Supplies of marine lubricating oils are available fro Puerto La Cruz. Quantities required should be included in the ETA cabl

Mail: Any pending ship's mail will be delivered on board by the marin dispatcher on arrival at Caripito. At the same time he will receive an ship's mail to be dispatched. The marine dispatcher will accept persona mail only if it carries the proper amount of Venezuelan postage, or Master authorises postage by signing 7 copies of the Company Po Transmittal form. Masters interested in knowing the individual postag amounts to be paid by each crew member, should provide a list, i duplicate, of the senders, and number of letters sent by each on identified by a number written on each letter. Copy of this will be returne aboard vessel when leaving this port outward bound. If not ready o time, it will be air-mailed to the vessel's next port of call.

Inspection – Petroleum Products and Crude Oil: Inspecciones C.A AIVEPET, C.A., Caleb-Brett, C.A. and SGS (Redwood), C.A. petroleu inspectors are available from Puerto La Cruz if specified.

Visitors: All visitors to ships are prohibited except those compan employees, petroleum inspectors, etc., whose duties require the presence aboard.

Passengers: Passengers will not be permitted to disembark unless i possession of the required visa and documents. To facilitate clearanc if passengers are carried, the Master should include advice to this effe in his radio ETA.

Pollution of Harbour and Coastal Waters: The laws of Venezuela ar strict in regard to pollution of harbour and coastal waters by oil, an heavy fines are imposed for violations. No dirty ballast, oil or bilge slop are to be pumped or allowed to escape overboard. All overboa discharge valves from cargo tanks and bilges are to be secured befo loading or discharging commences. Loading is to be conducted wi greatest care and vigilance in order that errors or delays in handli cargo valves may not result in overflows. All deck scuppers should b plugged before loading to avoid harbour contamination should a overflow occur. The authorities require that a written report be submitte by the ship involved in the event of an oil spill. Incidents of this natu should be reported immediately, either by VHF or telephone, to the Po Services Section.

SHIPMASTER'S REPORT: September 1992.

Rio San Juan: Chart No. 1330.

The beacons are considerably different from those shown on the cha Their positions can only be regarded as approximate as they were tak "on the run" by radar. However, they do give a reasonably accurate id of the courses, and the number, position and characteristics of t beacons.

The land appears to have extended seaward. Lights of beacons (wh lit) are as per IALA B and leading lights are white. The entrance is qu confusing if made in the dark for the first time, with the chart as it wa The lights in the Bar Channel are irregular and in the river quite unrelia altogether.

There are no leading lights on the 031° course. One beacon is us for two courses.

The Pilot Station is at Guiria.

Crossing the bar inward will be on the ebb tide and a draft of 17 forward and 23 ft. aft is asked for, 17 ft. to turn the vessel more ea and 23 ft. for crossing the bar at "full" speed. Normally it is necess to reduce speed a little when passing Beacons No. 3, 5 and 6, wh the least depths are located.

Caripito: Only one operational berth (No. 3). Two dolphins at the So end of No. 2 have suffered subsidence. There are new Chicksan ar on the berth itself. No. 3 has 3×10 in. hoses and a shore gangwa

There are no tugs, vessel is turned about 0.75 miles above the ba about 2 hours before high water, by placing the bow on the bank. T Turning Basin is extending slowly into the jungle.

Vessel moors starboard side alongside with moorings 3-3-2. A bre rope aft is used for springing-off when leaving. As there is a rise fall of around 18 ft. at Springs, connections should be ready, to exp loading time, and since there is a variable depth of water alongside not more than 33 ft. at low water. It is sometimes necessary to s loading at low water, and sail at high water. Vessels should sail as to high water as practical, as there is little water down river fro berth. Until clearing Beacon No. 28, virtually no water showed on echo sounder and vessel touched bottom at Beacon No. 31.

Dredging is in progress in Caripito.

Two grades of crude oil are available, Pilon API 13.3 and F API 26-28.

Pilon is used for making asphalt.

VHF Channel 12 used between Caripito and Guiria.

Slop facilities and fresh water available.

On the outward voyage, vessels anchor to await high water at the position marked on the chart.

Vessels nearly always touch bottom when loaded to 33 ft. when passing the bar channel, but the bottom in the river is reputed to be soft.

The night-time river transit can be very difficult due to the very few lights, especially in the rainy season. Vessels occasionally fail to make the turns, especially at Dos Aguas, and on occasions enter the jungle.

There are no chandlers or Agents. The Agents must travel from Puerto La Cruz or Puerto Ordaz.

Repatriation possible from Maturin or Barcelona (via Caracas).

AUTHORITY: Petroleos de Venezuela, S.A., Apartado 169, Caracas 1010-A, Venezuela. *Tel:* 708-4111. *Telex:* 21890, 23489, 24477 PDVSA VE. *Contact:* Lermit Rosell, Marine Corporative Manager.

EL GUAMACHE: 10.52 N. 64.04 W. (See Plan)

SHIPMASTER'S REPORT: October 1978.

LOCATION: The Port of El Guamache is a developing port, located about 1,000 ft. Northward of Pta. Mangle on the Isla De Margarita (See B.A. Chart 230).

DOCUMENTS:

Clearance from Last Port.
Sealed envelope for Customs.
Visaed B/L and Sobordos.
Despatch from last Venezuelan port, if any.
6 Crew Lists.
Vaccination Certificates of Crew.
4 Stores Lists (Deck, Engine, Provisions, Bonded store).
4 Personal Effects Lists.
4 Arms and Ammunition Lists.
4 Passengers Lists.
4 Mail Lists.

PILOTAGE: Pilotage is compulsory. Pilot boards on arrival or at anchorage. Vessels arriving at the anchorage must keep engines on stand-by and wait for shifting or berthing instructions.

Note: As at other Venezuelan ports, vessels must fly the Venezuelan flag at masthead and lower gangway for boarding party – Agents, Customs Officers, Quarantine Officers, Immigration Officers, Pilot and representative of Port Captain, etc.

ANCHORAGE: On the Western side of the Pta. Mangle in Bahia Guamache, depth 8–11 fathoms.

RADIO: As a new developing port, no radio service at Margarita Island, all ETA wireless messages must be sent via ITT or YVG – 72, 48, and 24 hours prior to arrival

The port office is equipped with radio telephone installation, operating 0600-2000 hours, transmitting on VHF frequencies 156.8 MHz (Channel 16.) Vessels calling in Spanish language will be answered promptly; if calling in English will be answered by English speaking person when on duty.

TUGS: Not available.

BERTHING: Length 126 m. with 3 dolphins installed at each end with catwalk to dolphins. Depths of water, 36 ft. at LW and 42 ft. at HW.

STEVEDORES: Arranged by Agents, normal working hours 0700 – 2100, cargo discharged into warehouse.

MEDICAL: Available at Polamar City about 31 km. from the berth.

DENSITY: 1025

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No repair facility available.

GANGWAY/DECK WATCHMAN: Necessary, normally engaged by Customs or Police.

OPENING/CLOSING HATCHES: Normally by crew.

AIRPORT: Distance about 15 km. from port. Connections to other cities.

TIME: Local time is GMT minus 4 hours.

HOLIDAYS: As other Venezuela ports.

PROVISIONS: Fresh and dry provisions supplied through ship chandlers from Polamar City and delivered on board.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of wine or spirit.

TELEPHONE: No telephone connection to vessel at present but provided inside warehouse and port office.

SHORE LEAVE: Shore leave permitted. Passes issued by representative of the "Direccion de Marina Mercante" on arrival. Shore passes to be collected prior to sailing and given to Agent.

DEVELOPMENTS: El Guamache has a development programme to construct new wharves Northward from present pier to accommodate 6 ocean-going vessels and expected to complete within 3 years.

All port facilities will be available. Margarita Island is the only free port in Venezuela. Tourism from the mainland and overseas is increasing day by day as Margarita Island has very good weather and beaches.

EL PALITO: 10.29 N. 68.07 W. (See Plan)

OPERATORS: Corpoven S.A.

LOCATION: The terminal facilities operated by Corpoven S.A. at the port of Puerto Cabello (Punta Chavez), are situated on the Venezuelan coast, 7 miles West of Puerto Cabello. The terminal has a 2,707 ft. pier, part causeway and part trestle, extending out from Punta Chavez along a shallow reef then angling into water 45 ft. deep. Two tankers can tie up simultaneously at the berths.

Position: Lat. 10° 29' 5" N., Long. 68° 07' 13" W.

Jetty: Length 825 m., depth 48 ft.

Charts: B.A. Chart No. 1628 or Charts No. 24453 and 5752.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA 72 hours before arrival at El Palito Terminal and another 24 hours before arrival by telex and communicate by VHF Channel 16, at least 4 hours before arrival advise and/or confirm any change of ETA.
2. If a vessel originally cleared for another port (including some other Venezuelan port) is diverted at sea to El Palito, certain information must be received prior to arrival, to avoid heavy fine and/or delays.
3. No dirty ballast may be pumped overside in port. Limited dirty ballast disposal facilities are available at El Palito Terminal.
4. The use of Venezuelan Government Pilots is compulsory for docking and undocking.
5. The Venezuelan flag should be displayed at the mast-head during daylight hours by vessels anchored and berthed in Venezuelan waters.
6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.
7. The emergency fire signal is 5 long blasts on the vessel's whistle or siren. No other signal is to be given in case of emergency.
8. The radar equipment must be turned off during cargo operations, and radio transmitter aerials must be earthed. Any information should be given to the Agent's representative for transmittal via shore facilities.
9. Loading will not be started until all deck scuppers are properly sealed.
10. Towing wire must be correctly positioned as soon as the vessel is alongside berth.

DOCUMENTS:

Clearance Inward and Outward:

(a) Inward Clearance is effected on board immediately after docking by Government's Port Officials and a representative of Marine Terminal and ship's agency. It is necessary that the following documents be ready on arrival:

1.	Ship's Register.	
2.	Derat Certificate.	
3.	Clearance from last Port.	1 original
4.	Ballast Manifest from Last Port.	1 copy
5.	Crew List.	6 copies
6.	List of Passengers in Transit, if any.	6 copies
7.	Passenger and Baggage List.	6 copies
8.	List of Personal Effects.	6 copies
9.	Stores List (see (c) below).	6 copies
10.	List of Slop Chest.	6 copies
11.	Sailing Permit (issued by Maritime Authority of last Port).	
12.	All Crew Vaccination Cards, Identification Cards or Passports.	

(b) Vessels arriving with cargo to discharge will also require Bills of Lading and Tally Books.

(c) Stores List prepared should indicate separately all deck, engine and cabin stores. The Stores List may be prepared on board prior to arrival.

Clearance Documents Outbound: Outbound Clearance and cargo documents are delivered on board by the Terminal representative.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

APPROACHES: The terminal pier is marked by the following lights: One occulting red light at the top of No. 1 (N.W.) fire fighting monitor tower, 80 ft. above sea level. Lat. 10° 29' 51" N., Long. 68° 07' 13" W., and one green light, flashing every 3 seconds at the top of No. 2 (S.E.) fire fighting monitor tower, 80 ft. above sea level, located 275 ft. S.E. of No. 1 fire fighting monitor tower. A group of 5 crude storage tanks, painted white, visible 20 miles on a clear day, are located 1.25 miles 200° from the head of the pier.

Three large chimneys from a power plant located about 3 miles West of the Terminal, are very conspicuous in the area. They are painted with broad red and white bands.

When approaching, Refinery installations are clearly visible. On clear nights, tanks, Refinery lights and flares provide best landmarks.

White flashing lights are installed at the top of Refinery chimneys and towers for air traffic warning purposes, for the local airport in Puerto Cabello.

Masters approaching the coast should keep a sharp lookout for fishing boats, nets and small crafts.

PILOTAGE: Pilotage is a compulsory government service and is available 24 hours. Pilots from Puerto Cabello meet vessels off the terminal.

The Pilot may decline to moor the vessel if it is not equipped with satisfactory mooring equipment, lines, gear, anchors, etc., or if it is not sufficiently ballasted. It is the responsibility of the Master to notify the Pilot of any special conditions or peculiarities, such as defective navigation equipment, mooring lines, tackle, gear or lack of necessary equipment, which might impose hazards in connection with the handling, mooring, discharging or loading of vessels.

At the berths, vessels must be moored to the entire satisfaction of the Pilot and the Terminal's Loading Master.

The Pilot acts in an advisory capacity. The Master retains responsibility for the vessel at all times. In the event it becomes necessary to disregard the Pilot's advice in order to ensure the safety of the vessel, the Master must forward, through the terminal, a full written report of the circumstances, in triplicate, for delivery to the Port Captain.

The Venezuelan pilotage law stipulates that Pilots and their apprentices must be provided with same accommodation as given to the ship's Officers.

ANCHORAGE: Notice of Readiness can be tendered at anchorage. The suggested anchorage for El Palito Terminal is located 0.5 to 1 mile North or West of the seaward end of the pier for Berth No. 1. The area to the East of the pier is recommended as anchorage for Berth No. 2.

Shipmaster's Report: August 1992.

I was instructed to anchor 1.5 miles from jetty.

RESTRICTIONS: None. Vessels enter day or night and at any state of tide.

MAX. SIZE: The loading facilities consist of 2 berths.

Terminal restrictions and safe drafts are as follows:

Maximum Displacement (Arrival/Departure)	65,000 tonnes
Maximum LOA – Pier No. 1	228.6 m. (750 ft.)
Maximum LOA – Pier No. 2	210 m. (688 ft.)
Minimum LOA	110 m. (360 ft.)
Max. Beam	No limitation
Max. Draft – Pier No. 1 (Arrival/Departure)	12.2 m. (40 ft.)
Max. Draft – Pier No. 2 (Arrival)	11.0 m. (36 ft.)
(Departure)*	11.6 m. (38 ft.)

* Departure Deadweight 50,000 tonnes (approx.).

Minimum Freeboard (Arrival/Departure)	3.0 m.**

** Max. Load – The vessel's manifold must be amidships.

Arrival Draft: Vessels should arrive with minimum drafts as follows:

Length	*Draft forward*	*Draft aft*
110 m. – 146 m. (360 ft. – 480 ft.)	2.7 m. (9 ft.)	5.2 m. (17 ft.)
146 m. – 213 m. (481 ft. – 700 ft.)	3.7 m. (12 ft.)	6.1 m. (20 ft.)
214 m. – 244 m. (701 ft. – 800 ft.)	4.2 m. (14 ft.)	7.0 m. (23 ft.)

HEALTH: No Radio Pratique. Health Officers board vessel at berth.

RADIO: Puerto Cabello, Venezuela, Coastal Station call sign YVL, makes radio contact with all vessels "CQ" on 8722 kHz at the following hours: 1130, 1330, 1530, 1830, 2130, 0030, 0200 GMT. Also "CQ" on 17141 kHz at 1630 GMT and "CQ" on 4322 kHz at 0430 and 0630 GMT.

Arrival Message: Incoming vessel must send ETA 72 hours and 24 hours before arrival at El Palito Terminal by telex and establish contact with the Terminal on VHF Channel 16 at least 4 hours before arrival, confirming or advising any change of ETA.

The original ETA messages should include the following:

(a) Name of vessel and Master.
(b) Vessel's flag and Summer deadweight.
(c) Number of crew and passengers.
(d) Last Port from which originally cleared.
(e) Dirty ballast and deballasting time.
(f) Slops quantity, if any.
(g) Sickness on board.
(h) Any additional information that in Master's opinion is necessary.

If a vessel, cleared for another port (including some other Venezuelan port), is diverted at sea to El Palito, telex advising the amended orders must be sent at least 48 hours before arrival, to avoid heavy fine and/or delays.

Communications: El Palito Terminal can be contacted by the following ways:

Radio: VHF Channels 16 and 6, and SSB 6218.1 kHz.
Telex: CPV 28013.
Fax: 042-604381.
Telephone: 042-604249, 042-604250.

VHF: Master should call El Palito Marine Terminal, 3 hours before arrival, on Channels 16 and 6.

TUGS: Tugs from Puerto Cabello assist at the Terminal. Two tugs are used for berthing and unberthing. The tugs are equipped with water monitors and foamite.

BERTHING: The use of both anchors is required for docking at both berths. It is considered prudent to have both anchors hove-out prior to entering the harbour in order to facilitate speedy release while mooring. The Pilot will advise whether the vessel is to be moored port or starboard side to the dock.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

East Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and the West berth at a distance from it equal to the distance of the North buoy. Drop the starboard anchor at the point of intersection of the ship's fore with a line formed by the two East shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the East berth. Drop the port anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by Pilot and with the help of the ship's engines and tugs under Pilot's instructions.

West Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and West berths and at a distance from it equal to the distance of the North buoy. Drop the port anchor at the point of intersection of the ship's fore with a line formed by the two West shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the West berth. Drop the starboard anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by the Pilot and with the help of the ship's engines and tugs under Pilot's instructions.

General: Chicksan loading arms with 12 in. connections, 2 for Fuel oil, 1 for diesel products, 1 for leaded and 1 for unleaded gasolines. All dirty ballast to be pumped ashore through the fuel oil loading arms.

Mooring Lines to be used: Vessels of any deadweight must secure with at least:

Forward: (a) 2 breast lines
(b) 2 springs
Aft: (a) 2 breast lines
(b) 2 springs
(c) 1 seabuoy line

All ropes must be fibre, polypropylene or wire of 1.25 in. minimum diameter each connected by a 2.5 in. shackle.

BALLAST: Due to the exposed location of the oil piers, vessels are required to be ballasted with minimum ballast necessary for safe berthing manoeuvres at El Palito.

The ballast quantity should be carried in a minimum number of tank in order to minimise deballasting time whilst alongside.

Vessels equipped with a special separate and clean ballast syste or segregated ballast can discharge their ballast into the sea, after fi being inspected and passed by Terminal representative. According regulations (Marpol 73/78), a maximum of 15 ppm is permitted.

Dirty ballast must be pumped ashore. El Palito facilities can handle maximum of 20,000 bbls. through a 20 in. line and 2×12 in. Chicksa arms to the shore tanks.

Also see "Max. Size" – "Arrival Draft".

LOADING:

Cargo Information: On completion of Inward Clearance, informatio regarding the number of Chicksans, loading rate, temperature and A from cargo will be given to the Master and Chief Officer. A 15 minu stand-by is required prior to finishing any grade. During ballast discharg supplementary information will be given to the Chief Officer.

Draining Chicksans: Chicksans are drained by gravity on all produc (except iso-butano, Tel, benzene, methanol, ortho-xilene). Ship personnel must cooperate with Terminal personnel in this operation ensure complete draining of Chicksans into ship's tanks.

Scuppers: Loading will not be started until all deck scuppers are prope sealed to the satisfaction of the Terminal.

Simultaneous Deballasting and Loading: Vessel's equipped wi separated and completely segregated ballast tanks, lines and pump which are never used for oil may be permitted to discharge ballast an load simultaneously, providing approval has been obtained from th Terminal.

Chicksans: There are 6 Chicksans on each berth. Loading ar connections are 12 in., except for iso-butane, benzene and ortho-xilen which are 8 in. and Tel, which is 4 in.

The products benzene, methanol ortho-xilene and Tel can be load only on Berth No. 2.

Approximate Gravities and Temperatures of Products to be delivered received by El Palito Marine Terminal:

Product	*API Specific Gravity*	*Temperature (approx.)*
Iso Butane	0.564	−11.5°C
Alquilate	70.8	86°F
Fuel Oil	11.5	140°F
Diesel Oil	32.0	90°F
Crude	28.0	90°F
Gasoil	36.5	90°F
Premium Gas	64.0	86°F
F.C.C.	58.0	105°F
U/L Gasoline	63.0	84°F
V.G.O.	23.5	117°F
Jet Fuel	45.5	95°F
Natural Gas	82.0	80°F
Benzene	0.8833	83°F
Ortho-xilene	0.8828	85°F

Average Rates of Products to be delivered or received by El Palito Mar Terminal:

Product	*Loading Rates* bbls./hr.
Alquilate	7,500
Fuel Oil	16,000
Diesel Oil	8,000
Crude	25,000
Premium Gas	7,500
F.C.C.	7,500
U/L Gasoline	12,000
V.G.O.	12,000
Jet Fuel	7,500
Natural Gas	7,500
Benzene/Ortho-xilene	1,800
Iso-Butane	5,000
Methanol	2,500

MEDICAL: Medical and dental treatment and hospitalisation, if requi are available in Puerto Cabello. Authorisation for any medical and dental treatment must be made by the Master through the Agent.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Bunkers are available only for vessels loading or discharg cargo.

Bunker supply should be arranged between owners and Corpove Head Office prior to vessel's arrival. A telex must be received El Palito Terminal indicating quantity and gravity of the bunkers be received.

CUSTOMS: El Palito is a port of entry. The Custom house is locate Puerto Cabello. While the vessel is in port, Venezuelan National Gu officials are assigned at the refinery's gate to ensure compliance Customs regulations. The law requires that meals be supplied to th officials during regular meal hours.

Venezuelan laws are strict in regard to contraband and Masters requested to instruct their crews not to take cigarettes or other art ashore.

Cigarettes in cartons, cigars, tobacco, etc., should be listed deposit in the slop chest, which will be sealed.

CONSULS: French, Norwegian, Danish, Italian and Panama Consu are represented in Puerto Cabello. There is no American Consul is necessary for Masters of Panamanian flag vessels to visi Panamanian Consulate at Puerto Cabello to present documents receive dispatch as required by law. Regular office hours are from to 1200 hrs. and from 1400 to 1700 hrs. Mondays through Fridays dispatch issued outside of regular office hours is billed at double Agent will arrange transportation to Puerto Cabello upon request.

REPAIRS: No engine repairs may be made while the ship is in Any operations which may produce sparks are prohibited in the proximity of loading operations.

DRY DOCKS: The nearest dry docks are located at Puerto Ca 8 miles East from El Palito, and Curacao.

GANGWAY/DECK WATCHMEN: Compulsory day and night. A sufficient number of crew members should be on board at all times for manoeuvring the vessel or for emergency situations.
HOLIDAYS: *National Holidays:* By order of the local Port Authorities, it is requested that all ships in port be fully dressed on the following holidays: January 1st (New Year's Day); April 19th (Declaration of Independence); June 21st (Merchant Marine Day); July 5th (Independence Day); July 24th (Birth date of General Simon Bolivar); October 12th (Columbus Day); December 25th (Christmas Day).
REPATRIATION: The documents and personal effects of seamen left ashore for hospitalisation, repatriation or other reason, must be delivered to the Terminal Office before sailing. A letter from the Master is required advising the maximum amount of advances to the seaman and any other instructions concerning his repatriation. All expenses incurred by the seaman, including the cost of repatriation, are for the vessel's account. Venezuelan law at all times holds the Master, Agent or Owner responsible for any seaman left behind in Venezuela.
AIRPORT: Distant about 4 miles.
TIME: Local time is GMT minus 4 hours.
SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes.

Vessels are not permitted to sail until all crew members are on board, or special permission has been obtained to sail without a crew member.
GARBAGE/WASTE OIL DISPOSAL: No facilities available (Contact Agent).
SEAMAN'S CLUBS: None.
CURRENCY: Bolivar. No local currency restrictions.
REGULATIONS:
Engines: No engine repairs will be made while the ship is in dock. Engines are to be kept at standby at all times while the ship is in port.
Rat-guards: Vessels must use rat-guards on all mooring lines.
Visitors: All visitors to vessels are prohibited, without written permission in each case by the Port Captain or Terminal Office.

Petroleum inspectors, dispatchers, and terminal employees may board ship in performance of their duties.
Pollution: The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast or oil is to be pumped or allowed to escape over the side. No engine-room or pump-room bilges may be pumped overboard. All pump-room sea suctions and overboard discharge valves must be secured prior to loading or discharging cargo. Loading must be conducted with the utmost care and vigilance so that errors or delays may not result in spills. All deck scuppers must be plugged tight before loading so that in the event of a spill pollution of the harbour may not result.
Garbage: No garbage is to be thrown over the side while the vessel is in port.
Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include this information in his ETA.
Firearms: Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer. All firearms and ammunition must be noted on the Stores List. Officers must not carry firearms while the vessel is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody.
Alcoholic Drinks: We would kindly request Masters to advise their crew members that the introduction of alcoholic drinks through the company's gates is strictly prohibited.

If anyone found with alcoholic drinks within the company's area, it will be confiscated without payment of indemnities. Drunkards are not allowed to board any vessel, unless accompanied by an authorised ship's officer.
Bar Service: Please be advised that we have received instructions from the Custom Authorities, that all vessels maintaining a "Bar Service" on board for the use of officers, crew, passengers and visitors, must keep this "Bar" closed during the vessel's stay in port.
Photographing: Photography within the boundary fence of this Terminal is prohibited. Taking cameras inside refinery's installation is likewise prohibited.
Fishing and Painting: Fishing and painting of ship's side from the piers is strictly forbidden while tied up at El Palito.
WEATHER: Winds are normally from the N.E. with an average Beaufort Scale Force of 2-3. Average temperature about 85°F.

The months of January to March have the roughest sea and swell, and vessels may not be able to dock due to the weather.
TIDE: The normal range of the tide is 1 ft.
GENERAL:
Bonded Stores: No cigarettes or bonded stores are available at El Palito.
Cash Advances: Cash advances are available in Venezuelan Bolivares only and should be included in the vessel's radio ETA, to permit delivery on board on arrival.
Charts: No charts or sailing directions are available at El Palito.
U.S.S. Club: There is no U.S.S. Club available at El Palito or film exchange service.
Inspection of Petroleum Products: Outside inspectors of petroleum products are available in the area. However, inspectors shall be nominated by shippers/suppliers/owners prior to vessel's arrival, and notice shall be given to El Palito Terminal, in order to permit access to nominated inspectors.
Laundry: Laundry facilities are available at Puerto Cabello, and should be requested through the Agent.
Lubricating Oil: Certain types of Corpoven lube oils only are available. Requirements should be sent by radio with ETA to Agent.
Mail: Mail service posted from El Palito arranged by Agent.
Provisions: Provisions are available at El Palito.
Radio and Radar: Repairs possible through Agent.
Gangways: Gangways are provided by El Palito Terminal.

AGENCY: Corpoven S.A. does not, as Operator of the Terminal, act as Agent for any vessel or for firms or agencies engaged in coastwise or international transportation operations. All services in connection with the arrival, loading, or departure of vessels are performed as a representative and for the account of the shipper in the case of cargoes loaded, and as the consignee, in cases where cargo is received.

SHIPMASTER'S REPORT: July 1988.

Two tugs are used for berthing, one astern on tug's line and the other to illuminate the forward buoy and push as required.

The aft buoy line is the first line sent away and is used to check the vessel's swing into the berth.

There is a constant swell running, and positioning vessel in the berth is very long and drawn out as the loading arms are restricted in vertical and horizontal movement.

The swell causes the ship to move out of position, all moorings need to be adjusted simultaneously and with the small numbers onboard this was very difficult.

Leaving the berth was fairly straightforward, with one tug on aft main deck to pull vessel off while recovering anchors.

Chart B.A. 1966 leaves a lot to be desired for approaching a port. El Palito Terminal can be identified by 3 towers, each with a high intensity light near the top and a flare. There is a mass of background lights and the navigational lights are completely obscured. Coming from the North, these lights are visible at 20 miles and with the flare make the pattern, light, flare, light, light from port to starboard. The berth is situated right below these lights.

The radar picture shows 2 similarly shaped jetties, so the lights are a good guide to the correct berth.

Captain of the Port, Puerto Cabello (Pilot Station).

GUANTA: 10.15 N. 64.35 W. (See Plan)

SHIPMASTER'S REPORT: 1978.

LOCATION: Lat. 10° 15' N., Long. 64° 35.5' W. About 5 miles East of Puerto La Cruz.
DOCUMENTS:

6 Crew Lists.
6 Passenger Lists (or negative).
6 Ship's Stores Lists.
6 Crew Personal Effects Lists (well detailed).
1 Declaration of Health.
Clearance from Last Port.
Cargo Manifests.
Full set of Manifests and B/Ls.

Entry Formalities: Normally carried out after docking unless there are no berths available; then vessel can be cleared at anchorage in Bahia Pozuelos, during daytime. At night only in case of emergency.

Accommodation ladder must be rigged.

Hours of entry: From 0700 – 1100 hrs. and from 1300 – 1700 hrs. Overtime outside these hours.
APPROACHES/PILOTAGE: A vessel bound for Guanta has to enter Bahia Pozuelos as she must first call at Puerto La Cruz to embark a Pilot. The anchorage area for waiting berth turn is also in Bahia Pozuelos. This anchorage is in depths of 48 ft. to 80 ft. and is well protected from swell by surrounding islands. No size limitation.

Bahia Pozuelos is the anchorage and Pilot embarking area for 3 ports: Puerto La Cruz, Guanta and Pertigalete.

The use of Government Pilot is compulsory for all vessels docking or undocking. ETA: 48 and 24 hours in advance via the vessel's Agent.

Pilot boarding hours: From 0530 – 1700 hrs. every day. Vessel cannot dock after sunset. Sailing may be arranged at any time.
HEALTH: All vessels boarded by Port Doctor. No automatic Pratique.
RADIO: Curacao Radio PJC. No local station.
VHF: All Agencies maintain radio watch on Channel 16 during office hours. Tugs and launches also equipped with VHF (call: "Ramrey").
TUGS: 3 tugs available: 1×1,700 h.p. and 2×1,200 h.p. All privately owned. Sometimes vessels bound for Guanta or Pertigalete have to wait for 2 or 3 hours as these private tugs have contracts with oil companies in Puerto La Cruz and are available only when no tanker is docking or undocking. Tug's lines used. Normally tugs join the vessel inside Guanta Bay.
BERTHING/MAX. SIZE: One concrete pier on piles, 763 ft. in length where vessels normally dock starboard side to. The apron is 20 ft. wide in centre, 42 ft. at ends.

One modern concrete pier on piles, 1,056 ft. in length where vessels normally dock port side to. The apron is 115 ft. wide in centre and 85 ft. at ends. The piers are well fendered with rubber hoses and used tyres.

Height of piers above HW: 10 ft. Mean tidal range: 1 ft. 6 in. Max. draft alongside small pier: 23 ft. 08 in. Minimum draft alongside long pier: 26 ft. 08 in. Depths varies from a minimum of 27 ft. to a max. of 34 ft. at the Western end of the long pier.
CARGO HANDLING FACILITIES: All cargo normally discharged by vessel's own gear, directly on to truck or trolleys. The piers are not connected to the railroad. No floating crane.

The following mobile cranes are available in the port area: 1 crane max. 120 tons; 1 crane max. 30 tons, with telescopic extension boom, max. 60 ft.; 2 small cranes max. 6 tons with a boom length of 30 ft.

Forklifts: 15 forklifts capacity 3.5 tons; weight 5.2 tons with fixed counterweight. To use these forklifts on board, the hoisting gear should lift over 6 tons.

2 forklifts capacity 5 tons, weight 12 tons; 1 forklift capacity 20 tons, weight 25 tons, specially for containers.

Flatbed trolleys: 30 trolleys capacity 8 tons; 1 trolley capacity 70 tons.

No lighters available.

All discharging gear normally supplied by Agency. For heavy lifts, it is recommended to have special slings on board.

BULK CARGO FACILITIES: On the Eastern side of the Guanta Bay, there is a berth for loading coal by means of a fixed chute. Depth alongside 30 ft.

Grain Cargo: Receivers supply suction machines. There are 2 machines available, capacity 1,000 tons per machine during 24 hours. Grain vessels work round the clock.

Liquid Cargo: Sometimes tallow and liquefied gas are handled. Discharged by vessel's pump into tank trucks. Hoses normally supplied by vessel.

CONTAINER HANDLING FACILITIES: No container berth. No crane. 1 forklift capacity 20 tons. There is a small container stacking area.

STEVEDORES: Normal working hours: 0700 – 1100 hrs. 1300 – 1700 hrs. (Monday to Friday); 0700 – 1100 hrs. (Saturdays).

Overtime: Monday to Friday, 1800 – 2300 hrs. (night shift); Saturday, 1300 – 1700 hrs.

Normally port does not work after 1700 hrs. on Saturdays or Sundays.

Ordering of gangs: For 0700 hrs. requested previous day before 1500 hrs. For 0900 hrs. requested same day at 0700 hrs.

Overtime rates: 50% for the night shift (Monday to Friday); 100% for Saturday afternoon shift.

The gangs consist of 12 longshoremen and 12 stevedores, including 2 winchmen, 1 signalman and 1 checker.

Capable supervision only available from Agency.

Rigging or cleaning gangs are available.

MEDICAL: Private hospitals at Puerto La Cruz. Private doctors generally do not visit ships. If medical attention is required on board, the Port Doctor will attend patient, unless he authorises another doctor to make the visit.

In case of emergency, when the vessel is anchored in Bahia Pozuelos, a launch can be arranged to pick up the sick crew member.

DENSITY: Salt water all the year round.

FRESH WATER: Available at 5 Bolivares per ton at the main pier only. Hoses supplied by ship. Rate: about 5 t.p.h.

Presently there is no water available at Berth No. 3 (Western end of pier).

FUEL: No Bunker "C".

Diesel: Delivered by trucks; arrangement must be made at least 24 hours in advance.

Gas Oil: Delivered by trucks under previous arrangement.

CONSULS: See "Puerto La Cruz".

REPAIRS: Only minor engine or electric motors can be repaired.

DRY DOCK: Not available.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Not available. No shore gangway available.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 open bottle spirits.

REPATRIATION: Can be arranged. No special requirements.

AIRPORT: At Barcelona, about 15 miles by road. 3 flights daily to Caracas.

TIME: 4 hours slow of GMT, all the year round.

HOLIDAYS: New Year's Day, Holy Thursday, Good Friday, Holy Saturday, April 19th, May 1st, June 24th, July 5th, July 24th, October 12th, November 24th, Christmas. No labour available on these days.

TELEPHONES: No facilities at Guanta. Private calls can be made from the central office at Puerto La Cruz (5 miles) during the following hours: 0700–2100. Long distance calls dispatched quicker from the Hotel Melia at Puerto La Cruz.

SHORE LEAVE: From a ship anchored in Bahia Pozuelos: Allowed if the vessel has been cleared and if every crew member has shore pass. One private launch available but very expensive.

From Guanta berths: Allowed with shore passes.

IDENTIFICATION CARDS: Passes for shore leave are issued by officials of the Port Captain's Office, when boarding the vessel for clearance. These passes should be filled out on board. They are valid for the duration of the vessel's stay in port only and have to be returned before sailing.

In order to comply with Immigration Regulations, crew should be carefully checked before departure and any missing seaman reported to the Agent. The same applies to passengers in transit.

GARBAGE DISPOSAL: No facilities.

DELAYS: Presently, Guanta is somewhat congested and the waiting time varies from a few days to 15 days, especially during the rainy season.

GENERAL: Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast or throwing garbage or dunnage in territorial waters. Heavy fines are imposed for pollution of waters and sometimes fishermen are quick to report any infringement.

Berthing Turn: On the basis "first come, first served" but Venezuelan vessels have some priority.

Supplies and Laundry: Several private firms based at Pto. La Cruz. Nearly all kinds of fresh provisions are available.

Laundry service available; may be completed in 8 to 10 hours.

General: Guanta is a natural harbour surrounded by mountains which protect the bay completely in bad weather. The port has never been closed for bad weather.

Venezuelan Flag: Upon arrival at Pozuelos Bay ship should display the flag from the foremast at all times. When anchored or docked, the flag should be displayed only between sunrise and sunset.

Warehouses and Cargo Sheds: No transit cargo shed. No refrigerated storage available.

There are 5 warehouses with a total floor space of 75,000 sq.ft.

Open Space: A total of 5.7 acres, mostly covered with asphalt or concrete.

Weather: The rainy season starts in mid-May and ends in Novemb December. During the rainy season it is usually calm in the early ho of the day followed before mid-day by light Westerly or variable breez In the afternoon the breezes change to North-Easterly at about 12 kn until midnight. During the dry season the cycle is similar but the No Easterly wind may reach 25 knots. This can prevent all communicatio between anchored vessels and the shore.

AUTHORITY: "INP" Instituto Nacional de Puertos.

SHIPMASTER'S REPORT: 1975.

LOCATION: Lat. 10° 14.7' N., Long. 64° 35.5' W.

Guanta is located in the Bay of Guanta. It is a well protected p against currents and winds.

The port is entered between 2 well lighted islets.

DOCUMENTS:

Maritime Declaration of Health (together with inoculation list of cre
10 Passenger – (or non-passenger) Lists.
10 Transit passenger – (or non-transit passenger) Lists.
10 Crew Lists.
4 Personal Effects Lists. (new clothes, etc., to be mentioned).
4 Ship's Stores Manifests.
Clearance from Last Port.

PILOTAGE: Government pilotage is compulsory. Pilot is embarked a disembarked near the Sea Buoy of Puerto La Cruz, in position: L 10° 15.5' N., Long. 64° 41' W.

ANCHORAGE: On the Pto. La Cruz Roads.

RESTRICTIONS: Entering: In daylight hours only: 0600 – 1800 hrs.

Sailing: Day and night.

TUGS: One powerful tug available, compulsory to use when ship's leng more than 90 m.

BERTHING: New Pier: Length 322 m. Old Pier: Length 233 m.

Water Depth: According to Pilots information: Old Pier: 29 New Pier: 34 ft.

STEVEDORES: *Working Times:* Monday to Friday: 0700 – 1100 hr 1300 – 1700 hrs., 1800 – 2300 hrs. Saturday: 0700 – 1100 hrs., 13 – 1700 hrs. Sunday: No work is done.

Gangs have to be ordered by 1500 hrs. the day before required.

FRESH WATER: Ships can replenish their fresh water tanks witho charge (Included in port charges). Own hoses to be used.

OPENING/CLOSING HATCHES: Opening/Closing hatches, sett derricks: Special Rigger gangs take care of this. It is absolutely forbidd for ship's crew to touch these kind of jobs.

GENERAL: *Waste Water:* Special care should be taken to prevent was water, from sanitary or engine-room systems fouling the jetty. Hea fines are made in case this happens and a special shore gang might ordered to clean same.

Customs: 2 Customs Officers have to be provided with food.

OPERATORS: Servicio Portuario de Guanta.

GUARANAO: 11.40 N. 70.13 W. (See Pla

SHIPMASTER'S REPORT: January 1983.

LOCATION: The port of Guaranao is located on the Gulf of Venezu on S.W. coast of the Peninsula de Paraguana, Venezuela. It lies betw Amuay Bay to the North and Punta Cardon to the South.

DOCUMENTS: Inward Clearance is effected on board immediately a docking by Government Port Officials and a representative of the Ma Department.

The following documents must be ready on arrival:

Clearance from Last Port.
Crew Lists (7 copies).
Passenger Lists if any (5 visaed copies).
Baggage Lists if any (3 visaed copies).
List of Personal Effects (4 copies).
Stores Lists (2 copies).
Sailing Permit (Zarpe).

APPROACHES: Masters when approaching the coast should kee sharp lookout for fishing boats, nets, small craft or sunken wrecks. F Punta Zarobon the coast, which is bordered by cliffs from 85 ft. to 6 (25.9 m. to 19.8 m.) high, trends about 2 miles SSW to Punta Gor

PILOTAGE: Compulsory. Vessels have to wait for Pilot about 0.5 m offshore at anchorage. Ship's can make contact with Pilot Statio VHF on Channels 16 and 68.

Maracaibo Pilots board and leave in position marked on chart.

Also see Punta Cardon (Pilotage – Shipmaster's Report dated Jan 1989).

ANCHORAGE: Generally ships must anchor about 0.5 miles offs to wait for Pilot. Good anchorage is obtained in depths of 28 ft. (8.5 muddy bottom and depths of less than 18 ft. (5.5 m.) extend up to a 0.25 miles offshore in this bay, and depths of less than 36 ft. (1 extend about 7 cables NNW from Punta Zarobon (Guaranao).

RADIO: Arrival notices and radio messages to and from ships a are usually transmitted through Curacao (PJC) and routed thr Agent's head offices at Caracas, Venezuela. The port radio con Las Piedras Paranagua.

TUGS: One tug is available to assist with berthing/unberthing.

BERTHING: A pier extends about 3 cables Westward from sho Salinas, Guaranao, and the Southern half of this pier is for Ro-Ro ve stern to. A floating pier about 1 cable distance South of and para the former, extends Westward from shore about 810 ft. (247 m.) a 164 ft. (50 m.) wide.

CARGO HANDLING FACILITIES: There are fork lift trucks of all s 6 mobile cranes at the floating pier, and some towing vehicles.

MEDICAL: Services available.

FRESH WATER: Not available.

FUEL: Available if advance notice is given. Fuel/diesel oil and lubricating oil can be obtained from either Amuay Bay or Punta Cardon.

FIRE PRECAUTIONS: This port is used for discharging general cargo, especially waste paper and timber. Waste paper is considered as dangerous cargo, therefore Masters are called to pay attention to their fire-fighting equipment and to have it ready during discharging waste paper.

WATCHMEN: Not available.

SHORE LEAVE: Permitted, but shore passes must be carried and passes returned before the vessel sails.

GENERAL: *Stores:* Provisions, deck and engine stores available but not bonded stores.

Garbage Disposal: No facilities.

SHIPMASTER'S REPORT: December 1990.

Tanker of length 135 m. berthed port side alongside.

Vessel arrived with clean ballast with the intention of discharging ballast to sea. Port authorities advised that this was not permitted even though the ballast was clean. The shippers arranged and received the ballast by shore trucks of 44 cu.m. capacity each. Deballasting (780 cu.m.) into the trucks took 26 hours and involved 19 trips by the trucks.

Cargo was delivered to the pier by trucks and was pumped on board by 2 small portable pumps through 2×4 in. diameter hoses. Loading was eventually reduced to one pump due to the viscosity of the cargo.

Final cargo figure was 6,000 tons short of the 10,000 tons that the vessel had expected to load and the 4,000 tons that was loaded took 120 hours.

AUTHORITY: Las Piedras-Guaranao Port Captaincy, P.O. Box No. 2, Codigo Postal 4102-A, Punto Fijo, Edo. Falcon, Venezuela. *Tel:* (069) 402008. *Telex:* 54119. *Cables:* Capipuerto Las Piedras. *Contact:* Captain David Jimenez Quintero, Harbour Master.

JOSE TERMINAL: 10.06 N. 64.51 W. (See Plan)

FLAG: Venezuelan flag must be displayed from the foremast when entering Pozuelos Bay and when manoeuvring or docking, regardless of the hour; however, while at anchor or while moored at berth, it needs to be displayed only between sunrise and sunset.

LOCATION: The Terminal of Jose is located West of Pozuelos Bay at: Lat. 10° 06' 19" N., Long. 64° 51' 10" W. on the N.E. coast of Venezuela. The usual hurricane path is several hundred miles to the North.

The lighthouse marking the entrance to Pozuelos Bay is located at: Lat. 10° 18' 18" N., Long. 64° 41' 07" W. Visibility is 20 miles.

DOCUMENTS: Arrival Clearance is effected on board vessel shortly after docking by Government Officials and a representative of the Company. The following documents are required and should be prepared prior to arrival.

Ship's Register.
Ballast Manifest (1 copy).
Crew List (6 copies).
Passenger and Baggage List, if any (5 copies).
List of Passengers in Transit, if any (5 copies).
List of Personal Effects (4 copies).
*Stores List (5 copies).
List of Slop Chests (4 copies).
Sailing Permit issued by Marine Authority at last port of call.

*Store List should indicate separately all deck, engine and cabin stores.

APPROACHES: Puerto Jose is approached through a channel 150 m. wide, with a minimum depth of 13.6 m. There is a turning area 460 m. in diameter.

PILOTAGE: The use of Government pilots is compulsory for all vessels docking or undocking. This service will be arranged at all times. If it becomes mandatory for the Master of the vessel to disregard Pilot's order in order to ensure safety of the ship, a written report in Spanish shall be submitted promptly by the Master of the ship to the Government Port Captain.

RESTRICTIONS: No restrictions are made on arrival/sailing time.

MAX. SIZE: The loading facilities consist of one Berth.

The docking characteristics are as follows:

Max. Deadweight	42,000 tons
Max. Ship Capacity	75,000 cu.m.
Min. Ship Capacity	11,000 cu.m.
Max. Draft	39 ft.
Max. LOA	800 ft.
Max. Lightship weight	22,000 tons

SPM: See "Shipmaster's Report" dated September 1994.

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.

RADIO: Masters are requested to advise Corpoven Puerto La Cruz by radio 72 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, bunkers, name of Master, port of departure, draft (arrival), Venezuelan gross tonnage, flag of ship and dates that ships' certificates expire. Vessels may contact the terminal of Puerto La Cruz by radio-telephone on 2182 kHz, SSB and VHF Channel 16. There is standby attention 24 hours a day. The terminal also has the frequencies 2080, 2120, 2638, 2738 and VHF Channels 6, 12, 13, 16, 17, 73 and 74.

Ship-to-shore radios are installed on the oil dock and on both tugs.

TUGS: There are 2 tugs at the port for mooring or unmooring and use is compulsory for all vessels. The tugs available are radio equipped and are 3,000 h.p. or more. Generally the Government Pilot will not begin manoeuvers until he is assured that the tugs are on stand-by.

BERTHING: *Arrival at Dock:* While alongside the berth the following rules must be observed:

(a) Master must ensure that mooring lines are properly tended, and that sufficient personnel are onboard at all times to handle lines. Loading will be temporarily suspended upon infringement of this regulation.

(b) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore loading arms by company personel. Vessels are requested to have their derrick and gangway ready for use.

NOTE: Vessels normally dock with starboard side to dock, unless advised otherwise.

(c) While docked, the discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(d) Rat-guards must be placed on all ropes connected with the shore.

(e) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(f) Meals must be provided in officer's messroom for Venezuelan National Guard personnel who may be assigned to the vessel during her stay in port.

(g) Masters are requested to display on top of mast a red flag in daytime and red light at night indicating that ship is handling dangerous cargo.

(h) Unregulated crafts should not be allowed to come alongside ship moored at Terminal without the permission of the Terminal Operator. It will be the responsibility of the ship's Master to ensure that this regulation is obeyed.

LOADING: *Products Handled:* Natural gas, propane, isobutane, normal butane and pentane.

Loading rates:

Propane	12,000 gallons p.m.
Butane	6,000 gallons p.m.
Gas/Pentane	4,150 gallons p.m.

Only one commodity handled at one time.

After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions with respect to the cargo.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo, cargo lines are displaced at controlled rates prior to disconnecting.

Shortly after completion of loading, company personnel and an independent inspector, together with a vessel's officer, will take ship's ullages and later, deliver cargo and sailing papers to the Master of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage in Pozuelos Bay.

For information regarding completion of loading, the dock supervisor can be contacted by telephone from telephone booth at berth.

MEDICAL: All requests for medical or dental treatment must be accompanied by a written request from the Master to the vessel's Agent.

BALLAST: There are no facilities for deballasting.

FRESH WATER: Not available locally.

Fresh chlorinated water is available in limited quantities at an average rate of approximately 2 tons per hour at the Puerto La Cruz Terminal.

FUEL: Bunkers are not available at this Terminal.

Bunker "C" and Heavy Diesel Fuel and a complete range of intermediate fuels are available in reasonable quantities at Puerto La Cruz Terminal, subject to safety and operational restrictions. Delivery rates to the ships are approximately as follows:

Bunker "C"	200 t.p.h.
Heavy Diesel	150 t.p.h.
Intermediate Fuels	100 t.p.h.

Meters are installed in all bunker systems and are calibrated in net barrels; except diesel meters which indicate gross barrels.

The dock valves on the bunker lines on the docks of Puerto La Cruz Terminal will only be opened and closed upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

CONSULS: The following foreign countries have consular offices in the vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
France
Great Britain
Italy
Netherlands
Norway
Spain
Sweden

Vessel's Agent should be appraised of vessel's consular requirements promptly upon docking.

SURVEYORS: 1. Saybolt, Caleb-Brett, Aivepet and others are available at Puerto La Cruz.

2. Lloyd's Register, American Bureau, Bureau Veritas, P & I available at Puerto La Cruz or from Caracas via the ship's agent.

CUSTOMS: Crew members should be warned against taking knives or other lethal weapons ashore, as this is strictly prohibited. All firearms and ammunition must be noted on Stores List. They cannot exceed 1 per officer and 18 cartridges per gun. No arms may be carried while ship is in Venezuelan waters or tied up at dock. Contraband of any description will be confiscated. Each man is allowed 1 package of cigarettes on his person and this package must be opened. No liquor is to be taken ashore. It is prohibited to carry liquor from shore to ship without authorisation from Master of vessel. It is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras ashore. However, upon written request to the National Guard contingent on the oil dock, special permission may be obtained. This is subject to 2 limitations: (1) that the camera is returned to the ship; (2) that no photographs are taken of the petroleum installations.

REPATRIATION: Seamen discharged from hospital for transfer to another port, seamen arriving from another port or those being repatriated are handled by the vessel's Agent, who must comply with all Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances if any, and instructions for repatriation. Venezuelan regulations, at all times hold the vessel responsible for a seaman during his stay in the country. Close contact is maintained by radio with ship owners regarding disposition of their seamen.

TIME: GMT minus 4 hours all year round.

EMERGENCY CO-ORDINATION CENTRE: Seccion de Seguridad, Busqueda y Salvamento Maritimo. Telex: 31154. Tel: (02) 513395, 512156.

TELEPHONES: There is a telephone booth on dock. The supervisor on duty may be contacted at any time.

IDENTITY CARDS: Passes for shore leave are issued by the officials of the "Capitania de Puerto", who board with the Customs Authorities upon the vessel's arrival at dock. These passes are valid for the duration of the vessel's stay in port and must be returned before sailing to the guard assigned to the vessel.

In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing seamen reported to the vessel's Agent.

Crew members left behind when the vessel sails will be held in custody until deported at the vessel's expense.

REGULATIONS: *Excessive Smoke:* It is absolutely prohibited to exhaust heavy smoke through a ship's funnel while tied up at the Company's dock. It is also prohibited to blow boiler tubes. Failure to comply with this regulation will result in any or all of the following actions:

1. The loading operation will be immediately shut down.
2. Vessel will be subject to fine.
3. Vessel may be removed from dock.
4. Ship's Agent will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution: Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws and customs.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is at anchor or dockside. Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a major spill and can pinpoint the responsible vessel or source.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries are exempted from Arqueo compliance and payment of fees: Denmark, Great Britain, France, Germany, Netherlands, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL: *Dockmaster's Office:* Loading and marine personnel offices of Corpoven S.A. are located at the entrance of the dock. Any matter concerning loading and/or bunkering, is handled through this office, which is open 24 hours every day.

The Documentation Section is located at the Puerto La Cruz Terminal.

On the dock there is a telephone booth and the supervisor on duty can be contacted at any time.

Cash: The local currency is the "Bolivar". Foreign exchange may be secured from local banks. Local banks are open Monday to Friday 0830 – 1130 hrs. from 1400 – 1630 hrs. except holidays.

Ship's Requirements: All ship requirements such as chandlery supplies, mail, cash advances, medical attention, dental care, consular services, repair work, laundry service, bonded stores, transportation, etc., should be obtained through the vessel's Agent.

No charts or sailing books are available in the Terminal. These should be forwarded by airmail to the vessel's Agent for delivery to the ship.

Movement of Passengers: Inasmuch as the Company's Terminal is not a public port, only bona fide crew members and Corpoven employees are permitted to join or leave ship in Jose.

AGENCY: All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

Corpoven as operator of the Terminal charges a fixed fee for General Services such as:

Complete documentation service.

Preparation of disbursement accounts for the Agent of Vessel.

Dispatch of vessel.

Control over marine units which service vessel.

Assistance and supervision in docking of vessel. Supervision over connecting of loading system and related cargo facilities.

Offices of Corpoven loading and marine personnel are located on the first floor of the building between Berths No. 1 and 2. Any matter concerning loading, bunkering, is handled through this office, which is open 24 hours of every day. On the ground floor of this same building is the Documentation Section.

SHIPMASTER'S REPORT: September 1994.

Charts: B.A. Charts No. 1480, 230, 1498. U.S. NOAA Chart No. 244

Approaches: From North, East or West, the approach is easily identifia with the many islands, principal of which is Isla Margarita to the N.E. Puerto La Cruz.

Approaching Bahia de Pozuelos, the Racon on Cayo Borracho a light on Morro Pelatos (LL 6480) are not operating.

The light Morro de Robledal (LL 6500) Isla Margarita is not operati

Using Canal de Margarita from and to the East to reduce the distan to Puerto La Cruz is not advised for large tonnage due to numero fishing craft/ferries and Corpoven Oil Jetty adjacent to the strait. Smal vessels under about 10,000 d.w.t. can safely navigate the passage, a we have done on a number of occasions.

Anchorage: For Puerto La Cruz and Puerto Jose in Bahia Pozuelos

Anchorage area is marked on B.A. Chart No. 1498, the Southern li 2.5 miles North of the city. A number of ships were observed to anchored South and East of the charted limits.

Light buoys off Punta Puinare (Lat. 10° 17.4' N., Long. 64° 40.7' W and off Punta Baregan (Lat. 10° 14.8' N., Long. 64° 39.1' W.) are both position and operating.

The bay is well sheltered and holding ground good with mud/sa bottom.

On our visit, another 4 vessels were anchored over the whole bay

Pilot: For Puerto La Cruz, Pilot officially boards in position marked o B.A. Chart No.1498 in the anchorage area, but it was seen that tanke proceeding to Guaraguao Oil Terminal embarked their Pilot near the lig buoy off Punta Baregan. Oil Terminal pilotage is throughout 24 hours

For Puerto Jose, Pilot again officially boards at the above positio but this depends if a Pilot is disembarking off an outbound vessel fro Jose Terminal. In this case, the Pilot will board at Jose Fairway Bu He generally disembarks at Jose Buoy and returns to Puerto La Cr by launch.

Pilots for both Puerto La Cruz and Jose Terminal come from the Pi Station near the Ferry Terminal in Puerto La Cruz. Two black hull white upperworks fast launches with boarding platforms are used.

Pilotage for Jose Terminal is 24 hours. Although Pilot berthing (75,000 cu.m.) at Jose advised that maximum sized vessels at Jo would be berthed in daylight only and with wind speed not ov 15 m./sec. (Force 7).

With maximum draft and size, berthing Pilot at Jose seem competent and reasonable English spoken.

Accommodation gangway/ladder arrangement required for ballast vessel when boarding/disembarking.

VHF/Telex: All pilotage arrangements through the Agent. In fact t boarding arrangements at Jose came through the Agent with little di contact with the Pilot.

Pilot station to monitor Channel 16, and works on Channel 12.

Corpoven Control Telex No. 031-81147 as listed in ALRS operational.

Agemar Agency monitors VHF Channel 16 throughout and works Channels 11 and 13 generally.

Cosmos Shipchandler monitors VHF Channel 16 from 0730 hrs 1900 hrs. and works on Channel 8.

Jose Terminal – Approach Channel: There does not seem to be Venezuelan chart available of the Jose Terminal and approaches. T best chart is U.S. NOAA Chart No. 24430. The depths from Ba Pozuelos to and from Jose are accurate.

New SPM Buoy in position Lat. 10° 09.0' N., Long. 64° 50.2' W. w outlying mooring marker boys, painted yellow, radiating N.E./S.E./S N.W., 0.75 miles each side of SPM. Pilot reports buoys will be ligh On our visit, lights not observed.

Vessel will always approach Jose from the N.E., that is from Ba de Pozuelos, across Bahia de Barcelona (after formalities). Fairway Bu is in position Lat. 10° 06.3' N., Long. 64° 50.6' W. and is best approach on a course of 228°, thereby leaving the SPM and outer mooring bu to starboard.

Fairway/channel buoyage is IALA "B" with good lights.

Depths: We found minimum channel depths, when reduced to C.D. (0 of 14.3 m. by echo sounder. This is also valid for the Western Tur Basin off Berth No. 8. Alongside Berth No. 8, we found a minimum 13.8 m. when reduced to C.D. (0.2), by hand lead line. Pilots say Be No. 9 (East/Methanol) has been dredged to same depth as Berth No

Tugs: One tug of 1,500 h.p. on stand-by 24 hours whilst ve alongside. Tug moors on Western side of pier (See "Plan").

For mooring medium sized vessels, this tug and one of 3,000 h.p. fr the Corpoven Terminal in Puerto La Cruz used. For mooring maxi sized vessels, 3 tugs used, 1×1,500 h.p. pushing and 2×3,000 h.p. tugs' lines fore and aft.

Two tugs with tugs' lines used for unberthing.

Berthing: Maximum draft quoted is 39 ft. and maximum size 75,000 c

This vessel, with draft 38 ft. 08 in., 75,000 cu.m., 226 m. length 34 m. breadth, had no difficulty in swinging in the Turning Basin berthing head-out on Berth No. 8. Always berth head-out on both be

Terminal very well fendered. Plenty of mooring hooks.

Moorings 2-2-2 each end, first lines run by pilot boat. Aft stern for maximum sized vessels more like breast lines.

Gangway: Shore hydraulic gangway from tower on both berths. Wi freeboard of 11.5 m. shore gangway stayed onboard throughout

Berth: One berth either side of platform (length 270 m.) lying 024° directly connected to pipe/roadway trestle pier of 1,440 m. long 002°/182° to shoreline. Total length 1,700 m. (approx.).

Berth No. 8 is on Western side and handles LPG/Pentane.

Berth No. 9 is on Eastern side for Methanol/MTBE.

As per "Plan", LPG arms are 2×10 in. 300 ASA connections vapour 2×8 in. 300 ASA. Configuration V-L-L-V. Pentane has 1 300 ASA connection. Methanol 2×8 in. 300 ASA.

Discharge rate for LPG averaged 800 tonnes/hr. Due to power fa ashore and shore tank pressures, there were 2×2 hour stopp Generally only small amounts of LPG are imported and larger am exported (both Propane/Butane) from the adjacent refinery onboard experience, the LPG loading rate is about 10,000 bbls./hr. Cooldown on berth allowed. Vapour return charge.

Ship in contact with Loading Master by walkie-talkie provided by Terminal. English and level of understanding varied a great deal. Surveyor had a good level of English.

Preliminary survey conducted at anchor off Puerto La Cruz, together with sampling, but believe this was due to the unusual nature of our shipment.

Terminal: Three separate shore facilities – East to West. "Orimulsion" storage facility with undersea line to SPM, then LPG storage/refinery at base of pier, and Methanol/MTBE storage and refinery. The LPG facility has a storage capacity of about 520,000 bbls., refrigerated plus pressure storage.

The pier is owned and managed by the state corporation Corpoven, which markets the product from and to other state companies Pequiven/Lagoven.

SPM: A new SPM Buoy, 1.8 miles N.N.E. of the Fairway Buoy, has been positioned to load tankers of 150,000 d.w.t. for the export of "Orimulsion", a crude oil emulsion used in power stations.

The SPM is due to load its first tanker in October 1994.

The emulsion (API of 8) is piped some 300 km. from the Orinoco basin near Puerto Ordaz.

Depth around the SPM is a minimum of 12 fathoms.

Stores: No storing can take place at the Terminal. Stores can only be loaded at Puerto La Cruz Anchorage. Launch charge for storing is U.S.$35.00 per hour, normally a minimum of 2 hours.

Numerous chandlers available, the two principal ones are Cosmos (Telex: 81281 Cosma Vc. Fax: 081-674448. Tel: 081-686276), run by a Korean couple and a British lady. Prompt service and good quality provisions. The other chandler of note is Mermaid (Telex: 81396 Memai Vc).

Bunkering: No bunkers available at Jose Terminal. No barges allowed alongside. Bunkers can only be taken at Puerto La Cruz Anchorage. All grades available by barge. Pumping rates HFO (380 cst.) 140 tonnes/hr., gas oil 45 tonnes/hr. Figures accurate. High water content in HFO 380 cst.

Fresh Water: No fresh water at Jose Terminal, although small bore line to control rooms was observed.

Fresh water can be obtained at Puerto La Cruz Anchorage at U.S.$15.00 per tonne from a tug. Good notice required through Agent.

Repatriation: From Barcelona Airport, about 10 miles to East of Jose Terminal. Frequent flights to Caracas International Airport. Daily flights by American Airlines to Miami.

Telephone: Not available on jetty. A card phone is available at base of pier (but no card selling point). Nearest international telephone is Barcelona Airport or Puerto La Cruz with numerous card points, or can obtain home country direct.

Formalities: Vessel cleared at anchor off Puerto La Cruz, generally during daytime hours only, unless immediately berthing. Customs Officer also boards at Jose Terminal as in different Customs district.

Initial boarding party of 5 Customs/Immigration/Coast Guard. Agent handles all formalities. Ships/IMO forms accepted.

6 copies Manifest.
8 copies Crew List.
3 copies Crew Effects List.
3 copies Stores/Bond List.
2 copies Ports of Call List.
2 copies Ship's Particulars.

1 copy Health Declaration.
1 copy Vaccination List.
1 copy Arms/Ammunition List (Nil).
1 copy Passenger List (Nil).
1 copy Ship's Register.
1 copy All Ships Certificates.

Official Shore Passes required, and they do not have to be returned. Bond sealed. Beer not sealed.

General: Watch for females boarding at Puerto La Cruz Anchorage. Persons using Jose Jetty, all require passes.

Rate Bolivar to U.S.Dollar: 170 B. = U.S.1.00 (1st September 1994).

Taxi fares from Jose Terminal to Puerto La Cruz vary. Officially authorised taxis allowed to use jetty, charge U.S.$30.00 to City. Loading Master will arrange. From City to Jose (if they understand where you want to go to) is U.S.$10.00 – 20.00.

U.S. Dollars accepted ashore, but smaller shops/bars only accept Bolivars. Money changers available along seafront.

Not allowed to walk down jetty from Turning Basin to main gate, must arrange terminal transport.

OPERATOR: Corpoven S.A. *FAX:* (081) 603099.

LA GUAIRA: 10.36 N. 66.56 W. (See Plan)

PORT LIMITS: Between the points 10° 37' 40" N., 66° 48' 30" W. and 10° 37' 40" N., 67° 07' 07" W. and the coast line.

DOCUMENTS:

Sealed envelopes for Customs.
Visaed B/L and Sobordos not in envelopes.
Despatch from last Venezuelan port, if any, or
Zarpe from last foreign port, if arriving directly from abroad.
Fumigation Certificate.
Bill of Health.
Vaccination Certificates of Crew.
4 Stores Lists (with arms and narcotics).
4 Lists of Personal Effects.
6 Crew Lists.
12 Lists of Passengers for La Guaira, or negative Passenger List.
8 Lists of Passengers in Transit.
2 Lists of Luggage (only for passenger luggage).
1 Master's Declaration.
1 List of Stowaways, if any.
8 Cargo Lists.

PILOTAGE: Compulsory and vessels have to wait for Pilot in the pilotage zone N.W. of the entrance. Ships can make contact with the Pilot Station by VHF Channel 16 or 12.

MAX. SIZE:

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
01-E	176	10.95	Roll-on/Roll-off
01-D	176	10.95	General Cargo
01-C	176	9.55	12 ton electrical cranes
01-B	176	8.55	12 ton electrical cranes
01-A	176	8.80	12 ton electrical cranes
01	155	9.15	12 ton electrical cranes
02	155	9.75	12 ton electrical cranes

19-A	72	4.55	Passenger Berth
20	150	3.00	Fishing Berth
21	290	6.10	Warship Berth

ANCHORAGES: Generally ships must anchor in the N.E. area of the entrance, the depth varies from 8 to 20 fathoms. The bottom is sand and occasionally rocks.

RESTRICTIONS: There are no restrictions imposed upon entry.

HEALTH: Ships from Venezuelan ports obtain Free Pratique. Ships from abroad must send a cable to Health Authorities requesting Free Pratique, or advising illness.

RADIO: In order to enable Agents arrange for quick entry and berthing, Masters should give their ETA message at following intervals, via Curacao Radio (ITT): 72, 48 and 24 hours prior to arrival, indicating in the 48-hour message, the quantity of parcels (or tonnage if bulk cargo) per hatch. This is imperative for applying for the necessary personnel of the Instituto Nacional des Puertos (I.N.P.). Also, draft, passengers, requirements for bunkers, fresh water, provisions, repairs, medical assistance, etc. This telegram the Master to sign with his full name.

VHF: Communication with the Port Authorities and the Pilot Station are possible by VHF. Ship must make contact on Channel 16 and change after to some Channel between 1 and 70, Channel 12 is normally used for this manoeuvre.

TUGS: The use of tugboats within the port is compulsory, both for entering and leaving port, as well as for manoeuvres in the port area. Ships longer than 139 m. must be assisted by 2 tugboats.

Ship's lines are used in the manoeuvre. The Port of La Guaira has 2 tugboats of 1,800 h.p. each. Normally they join the vessel at the entrance of the port.

BERTHING: Normally a minimum of 24 ocean-going vessels can berth at one time. Berths No. 01-E, 01-D, 01-C, 01-B, 01-A, 01, 02 and 03 are along the Breakwater Pier East-West, parallel to the coast. At Piers No. 01-C, 01-B, 01-A, there are 12 electrical cranes of 12 tons. At Pier No. 03 ships discharge grain directly to a silo by 2 grain towers, average daily rate 2,000 tons. Silo capacity 12,000 tons.

Within the port is a finger pier, parallel to the Breakwater Pier, with 2 Customs warehouses alongside, with berths North and South, 2 each. The main pier is parallel to the coastline, East-West, with Berths No. 10, 11, 12, 13, 14 and 15,, along which piers there is ample Customs warehouse space, including outdoor space on the roofs as well as ample uncovered storage area. There are 15 × 6 ton electrical cranes at this pier.

The Passenger Terminal is on a finger pier, in direction North-East with its land end in the corner of Berth No. 15. There are 2 berths each side, namely Nos. 16 and 17 in the inner basin and Nos. 18 and 19 in the outer basin.

Passenger vessels have priority for berthing and they have to leave port within 24 hours.

BULK CARGO FACILITIES: Bulk carriers only discharge, at Piers 01-D, 01-C and 03. There are no facilities for cargo.

SPECIALISED CARGO HANDLING FACILITIES: The only berth specially equipped for Roll-on/Roll-off traffic is Pier 01-E, but Piers No. 04, 09 and 16 are also used for this kind of cargo.

There is no fixed equipment for handling containers but the Instituto Nacional des Puertos has some mechanical equipment for handling containers.

This port does not have any other facilities for specialised cargo handling.

BRIDGES: There are no bridges.

STEVEDORES: Supplied exclusively by Instituto Nacional des Puertos at costs per weight of cargo in accordance with governmental decrees.

The Port Agent applies for the necessary number of gangs per ship. Each gang consists of 11 stevedoremen (estiba) and 11 longshoremen (caleta).

Switching of gangs from one hatch to another is not permitted.

There are no longshoremen costs for cargo handled during straight time, but only for that handled during overtime.

(a) *Straight time*

Monday – Friday	0700 – 1100 hrs.
	1230 – 1630 hrs.
Saturday	0700 – 1200 hrs.

(b) *Overtime*
Monday – Friday 1800 – 2300 hrs.

(c) *Saturday afternoon* work is not permitted, but if a vessel could terminate operation and sail within a maximum of 3 additional working hours, a special permit would be granted by Customs and Port Authorities. In such a case, the additional working hours are considered as overtime.

(d) *Work on Sunday* is not permitted except for passenger vessels (officially those carrying 69 passengers, but exceptionally vessels with fewer passengers might occasionally obtain same consideration by authorities).

EQUIPMENT:

(a) *Electric Shore Cranes:* Berths 01-C to 01-A have 12 electrical cranes on rails of 12 tons capacity each. Berths 10 to 15 have 15 on rails of 6 tons capacity each. The Instituto Nacional des Puertos allow 2 × 12 tons cranes to lift pieces up to 20 tons or 9 tons weight. At Pier 10 the arms of the cranes reach the roofing of the warehouses.

Use of shore cranes is not compulsory, unless the Technical Board of the Instituto Nacional des Puertos rules to use them. Other piers have no shore cranes.

(b) *Diesel-Driven Rolling Cranes:* There are a considerable number of these cranes which can lift heavy pieces of about 17 tons.

(c) *Floating Cranes:* Not available.

(d) Special lumber carriers of about 20 tons capacity.

(e) Tow trucks, fork-lifts, trucks and trailers up to 10 tons capacity.

LOADING/DISCHARGING: Cargo is discharged on the pier, when free it is taken away by fork-lifts and/or other mechanical equipment supplied by Instituto Nacional des Puertos. The use of such equipment is included in the handling fee for weight.

There are 2 grain towers on Berth No. 3 leading via conveyor belts to storage silos of 12,000 tons capacity. Average daily discharge rate 2,000 tons approximately.

At Berths No. 10 to 15 discharge to the roof of the warehouse or on the pier is possible.

MEDICAL: There are several hospitals in the town and all the medical attention necessary. Should medical assistance be needed on board, contact the Agent.

DENSITY: The average density of water in the port is 1025.

FRESH WATER: Available through pipeline on the pier, day or night, by water trucks of up to 10 tons capacity in day time only.

CONSULS: The following countries have consuls in La Guaira; Belgium, Germany, Mexico, Norway, Panama and Sweden. The following countries have Vice-consulates; Denmark, Italy, Portugal and Spain.

REPAIRS: All kinds of deck and engine repairs are possible.

DRY DOCKS: There are no dry docks in this port. (The nearest is at Puerto Cabello).

SURVEYORS: All Classification Societies and P&I Clubs are represented in the port.

GANGWAY/DECK WATCHMEN: The watchmen service is not necessary. It is recommended to use a seaman as watchman.

OPENING/CLOSING HATCHES: Not performed by the Instituto Nacional de Puertos but by either the ship's crew, or the assistance labour of the Agent.

REPATRIATION: There are all kinds of facilities for making crew changes and arranging any necessary repatriation.

AIRPORT: The distance to the International Airport at Maiquetia is 10 km., this is served by different regular airlines.

TIME: GMT minus 4 hours. No change.

HOLIDAYS: January 1st, (New Year); February 18th/19th, (Carnival); April 3rd/4th (Easter); April 19th, (Independence Day); May 1st, (Labour Day); June 24th, (Carabobo Battle); July 5th, (Independence Day Declaration); July 24th, (Simon Bolivar's Birthday); September 4th, (Public Funcionary Day); October 12th, (America Discovery); December 25th, (Christmas).

POLICE/AMBULANCE/FIRE: *Police:* 26148, 26347 and 27098. *Ambulance:* 22165. *Fire:* 22165 and 22587.

TELEPHONES: It is not possible to place telephones on board, however calls can be made in the "CANTV" office.

SERVICES: There are no special services available. Radar repairs possible.

SHORE LEAVE: Crew members can go ashore with shore passes issued by the Port Authorities.

IDENTIFICATION: Shore passes are sufficient to go ashore.

REGULATIONS: *Dangerous Goods:*

1. Dangerous goods should be discharged directly to trucks.
2. When goods are grain or powder in bags, these should not exceed 50 kg.
3. Cargo with damaged packing will not be discharged and it should be repacked on board.
4. Cargo should be duly identified and with their dangerous goods labels.
5. Cleaning of the piers after loading or unloading should be done by the importer or exporter, otherwise they should cover the expenses if the INP has to do this cleaning.

OFFICIALS: Once the vessel is anchored at La Guaira, Representatives of Customs, Port Captain, National Guard, Health Service, Immigration and Agency board the vessel.

DEVELOPMENTS: Increase in draft to 35 ft. expected.

AUTHORITY: Harbour Master, Capitania de Puerto, Terminal de Pasajeros de La Guaira.

GENERAL: The following "Depth Bulletin", dated June 1978, w received from a Shipmaster in February 1979.

REPUBLIC OF VENEZUELA
NATIONAL INSTITUTE OF CANALIZATIONS
ZULIA ZONE

Depth Bulletin No. BP – 6-78 Dated: 13-06-78

The following data represents the latest information reported and re to the date shown for each section of the channel. Depths are express in metres and are related to the same level of the local Navigation Cha 1001, 1002, 1003 and 1004 of the M.M.M. Mean Monthly Lowest Lo Water.

The controlling depths refer to the centre area of the channel demark by parallel lines on either side at a distance of 60 m. in the outer chann and 45 m. in the rest of the channel. The Puerto Miranda Channel is 30 m. The theoretical position of the buoys in the aforemention navigation charts are located at a distance of 30 m. from the edge the channel.

Main Channel

(N.B. Certain information common to all Vessels entering Maraca Lake is given below. For specific details of ports/terminals within t Lake, see relative Section as indicated above).

FLAG: Local authorities require that the Venezuelan ensign be flow vessel's masthead, from the time of entering the outer channel until c of the outer channel outbound.

DOCUMENTS: *(a) Inward Clearance for Scheduled Vessels:* Vess arriving in ballast or with cargo in transit require following docume

1 copy Sailing Permit from Last Port.
2 copies Ballast Certificate.
4 copies Passenger Lists.
4 copies Baggage Lists.
4 copies List of Passengers in Transit.
4 copies List of Slop Chest.
4 copies List of Personal Effects.
4 copies Stores Lists.
5 copies Crew Lists.

Vessels arriving with cargo should have, in addition to the forego

4 copies Sobordos (Venezuelan Inward Manifests).
6 copies Bills of Lading.
2 copies Inward Manifests.

(b) Inward Clearance for Diverted Vessels: Vessels divert Maracaibo Lake Ports to load cargo, should submit all docu indicated above, except consular mail, which they will not have.

Vessels diverted at sea to Maracaibo Lake Ports which do not a Venezuelan clearance on board, must advise loading port via ra arrival, the name of vessel, Master's name, vessel's flag, Venez net tonnage (if available, if not, the registered net tonnage), last p call, destination port for which originally cleared, ETA San Carlos station and grade and quantity of cargo to be lifted. This inform required in order that Inward Clearance may be arranged government officials in ample time prior to vessel's arrival. Also 3 c of the Diversion Telegram received by vessel and signed by M together with copies of those documents listed under *(a)* shou presented to the Port Authorities upon arrival at Maracaibo. absence of this information, or of presentation of each of documents to the Port Authorities the vessel will be subject to Please note, that the documents covered under *(a)* have to be pres upon arrival, regardless, if the vessel is not arriving with Co Clearance or arriving after being diverted at sea.

(c) In Maracaibo 2 Clearances from Custom's authorities are needed: One for proceeding from Maracaibo to loading berth, and another after loading for proceeding from Maracaibo to destination. For this reason Custom Dispatch charges may be incurred twice.

(d) American Crew List. All non-American vessels loading for a U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service Form No. I. – 418 (Crew List Manifest) and should contain 2 sections:

Section 1 should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 should list, in the alphabetical order of their last names, those alien crew men who lack United States visa documentation and therefore require inclusion in the visa of the Crew List.

Only one name may be placed on each line of the Crew List. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the Crew List presented must be legible. Occasionally the names of the crew men included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition.

The information requested under columns 1, 2 and 3 should be filled in completely. Column 1 should always contain the complete first name and middle initial of the crew man. Column 2 should show the nationality of each crew member and the number of his travel Document. Column 3 should always include the name of the port where the crew man was shipped, not simply the country.

At the time of vessel's first application for a Crew List, the Crew List must be presented in four copies: Original and 1 copy should contain only information requested under Columns 1, 2 and 3. 2 copies must include following information of those crew men to be included on Crew List Visa. Column 4 should list date, city and country of each crew man's birth. Column 5 should show place of issuance of Seaman's Travel Document and name of Government which issued travel document. (It is not necessary to list date of issuance of travel document).

Below is a sample line correctly entered on the Master Crew List.

(1)	(2)	(3)	(4)	(5)
Bello, Tomas E.	Z.23455 Venezuelan	Maracaibo Venezuela	December 8, 33 Caracas, Venez.	Cabimas, Venez

Upon subsequent Crew List applications by same vessel within same year, the Crew List need be presented in duplicate only, and the information in Columns 4 and 5 need be provided only concerning any new crew members who require visa documentation. When twelve months have elapsed since presentation of Original Crew List, a Crew List should again be prepared in 4 copies and should contain all the information required in columns 1 – 5. Such a Master Crew List is required after each 12 months' period.

APPROACHES: Also see "General" above. The channels leading to the Lake of Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel. The controlling depths of the Outer Channel, Inner Channel and the channel Southward to Buoys M1 and M2 are normally 45 ft. At certain times the controlling depth may be less. At such times suitable notices are published advising mariners of these temporary reductions of controlling depth.

Outer Channel. The Outer Channel starts at the E.M. Buoy in position 11° 13' 47" North and 71° 33' 31" West. The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles. The distance from E.M. Buoy to the Southern end of the Outer Channel, marked by Buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and has a normal controlling depth of 42 ft. minimum monthly observed lowest water (MMOLW) with tidal range varying about 2 ft. 3 in. This depth is maintained by periodical dredging. Tankers are required to have a keel clearance of at least 2 ft. and dry-cargo vessels a keel clearance of at least 3 ft. Vessels navigating the channel at the maximum allowable draft are confined from 2 hours before to 2 hours after high water. There are no turns in the channel and the course is 189°.

There is a breakwater 0.5 mile East of, and parallel to, the Outer Channel and extending 1.6 miles Northward from the North side of Zapara Island. The end of this breakwater is marked with a skeleton steel tower with a light 27 ft. above sea-level. Light characteristics – flashing white light every 8 seconds; visibility about 3 miles.

On Zapara Island there is a skeleton iron tower with a height of 136 ft. above sea-level.

Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at low water when the cross currents are strong. Overtaking at these points should be avoided.

There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge.

Inner Channel. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°. Entire length of the Inner Channel is about 12 miles.

The beginning of the Inner Dredged Channel is marked by Buoys B – 29 and B – 30. Channel is marked by beacons, and terminates at beacons T – 55 and T – 56. The channel is 800 ft. wide and the normal controlling depth is 43 ft. MMOLW with tidal range varying from 1.5 ft. to 2.5 ft.

The channel from beacons T – 56 to Maracaibo Harbour is a dredged channel, the end of which is marked by Buoys No. B – 73 and B – 74.

About 0.2 mile South of Buoys B – 29 and B – 30, there are located 2 towers – 1 on each side of the channel, and about 1 mile further South are 2 more towers. These 4 towers are marked E – 31 and E – 32 (North) and E – 33 and E – 34 (South). Towers No. E – 31 and E – 32 are of single steel pipe construction on a concrete pile base. Towers No. E – 33 and E – 34 are of skeleton steel construction (former oil-well derricks) each mounted on 4 concrete piles. The characteristics of these towers are:

Tower No.	*Height above LWS (ft.)*	*Light*
E – 31	43	Green – Fl.
E – 32	43	Red – Fl.
E – 33	123	Green – Fl.
E – 34	128	Red – Fl.

Vessels are not allowed to overtake each other in the Inner Channel between Buoys B – 29 and B – 30 and Light Beacons T – 25 and T – 26. Vessels may overtake each other in the Inner Channel between Light Beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight.

Lake Channel. The channel starting at Light Beacons T – 39 and T – 40 and leading to Maracaibo Roads is called the Lake Channel. This is a natural channel 3,000 ft. wide and 11 miles long.

The Main Channel through Maracaibo Lake is approximately 83 miles long, not less than 244 m. wide and with a greater depth than the outer channels.

The access channels to the various ports and terminals branch off from the main channel as described under Section for each port.

CHANNEL NAVIGATION:

(a) Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

(b) Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

(c) Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

(d) Approaching vessels are to reduce speed in order to minimise the suction force of the displacing waters.

(e) Vessels must maintain a distance of 5 ship's lengths by day and 8 ship's lengths by night from other vessels navigating in the same direction.

(f) No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

(g) A grounded vessel is not allowed to start any manoeuvre when another vessel is passing.

(h) Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime

Black cylinder hoisted on side of yardarm: You can overtake me on the side on which the cylinder is shown.

Two black balls over the bridge: The channel is blocked.

Night

Green light on side of yardarm (a white light on mast-head helps to show on which side the green light is placed): You can overtake me on the side on which the green light is shown.

2 red lights over the bridge: The channel is blocked.

The tidal range is 4 ft. at neaps.

(i) Maximum speed for vessels navigating in lake channels has been limited to 10 knots. Masters should exercise the utmost care in complying with this regulation as heavy fines may be imposed to offending vessels.

PILOTAGE: (N.B. Maracaibo Pilotage Regulations require that inbound tankers, in ballast, while crossing the Bar, shall not have greater than 8 ft. difference between fore and aft draft. The Government Pilot will not take the vessel if this requirement is not met, unless he is satisfied that the actual draft of the vessel will permit safe navigation through the Outer and Inner Channels).

Every Master of a vessel navigating in Lake Maracaibo who desires to enter the main ship channel in Pilotage Zones No. 1 or No. 2 must first ensure that said Channel is free of traffic.

The limits of the Main Ship Channel in Pilotage Zone No. 1 are from Buoys B1/B2 located at the entrance to the Outer Bar Channel and Buoys B73/B74, of the city of Maracaibo. Pilotage Zone No. 2 begins approximately 1 mile below Maracaibo and extends Southward to Lightfloats M36/M37. All other channels are considered as access channels to their respective port zones and subject to special local rules. Every vessel navigating to or from any port in Lake Maracaibo must follow the prescribed routes through the main and access channels leading to or from such ports, (unless special permission has been granted to do otherwise).

(a) Pilots are employees of the Venezuelan Government and act in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must prepare a full written report of the circumstances, for delivery to the Captain of the port.

(b) Inbound vessels have the option at present to embark government Pilot at the following areas:

(i) In the channel off San Carlos Pilot Station between Buoys B – 24 and B – 26.

(ii) Anchorage area approximately 5.5 miles N.E. of Pilot station, San Carlos Island. Position 11° 04' 22" N., 71° 33' 48" W. East of Buoy B – 17. This area is demarcated with green light buoy equipment with radar reflector.

(iii) At the E.M. Buoy.

(iv) At Punta Cardon. See "Note", "Agent's Notice" and "Shipmasters' Reports" – August 1979, July 1981, August 1981 and June 1991.

(c) The Port Captaincy of Maracaibo is unable to guarantee embarking or disembarking Pilots at the E.M. Buoy or at anchorage area position. For this reason Masters should communicate with San Carlos Pilot Station for necessary instructions as to where to pick up Pilot, who usually embarks between Buoys B – 24 and B – 26. The communication

system between San Carlos Pilot Station and vessels will be by Morse lamp and radio-telephone. The stand-by frequency at San Carlos is 2182 kHz. Other existing frequencies are 2120 kHz and 2080 kHz; 156.6 and 156.8 MHz. Each pilot launch has a radio-telephone with 2182 kHz. frequency. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance between buoys and San Carlos is approximately 6 miles or 10 km.

(d) Pilot Permit to navigate the Outer Channel without aid of a Government Pilot will be granted to those Masters who desire to obtain same. In order to fill the application required, a blank sealed paper and 3 copies should be signed by Master on arrival. Copy of this solicitude duly endorsed by Port Captain of Maracaibo, will serve the Master as temporary permit until the official one has been received. Masters in possession of permits to cross the Outer Channel without a Pilot, have the option to enter channel either at the E.M. Buoy or between any other buoy, taking into consideration the heavy traffic of the channel. Government pilotage through the Inner Channel is compulsory at all times.

(e) Outbound vessels will receive Pilot in Maracaibo, who will Pilot vessel up to San Carlos area approximately between Towers E – 31 and E – 33, where he will disembark. The Port Captain of Maracaibo has instructed that all Masters should always in ample time identify themselves with the San Carlos Pilot Station by radio-telephone regardless of time of day. While inbound – between Buoys B – 17 and B – 19 and sailing outbound – between Markers T – 42 and T – 40. These instructions are obligatory and are required in order for the Pilot service to be aware, at any moment, of any emergencies which may arise, and also to avoid, especially during the night, the launch departing with an official Pilot aboard believing that the ship in sight needs his services, in which case, even though the launch or Pilot services are not rendered, the same will be charged to the company owning the ship, or its representative.

Note: A Master approaching the port for the first time must pick up a Pilot in Punta Cardon before entering Maracaibo Lake Channel. In the case of contravention the vessel will be intercepted by San Carlos Pilot Station and returned to Punta Cardon with a resulting loss of at least 1 day and the Master may also run the risk of a possible fine.

Furthermore, the Master should cable ETA via Curacao Radio 72, 48 and 24 hours before arrival in order to allow sufficient time for Agents at Maracaibo to send a Pilot to Punta Cardon.

Agent's Notice: September 1987.

Subject: Pilot Service from/to Punta Cardon.

Harbour Master's Office has issued new regulations mentioned below.

1. Pilot service from Punta Cardon is only compulsory when Masters are crossing the channel of Lake Maracaibo for the first time. If this is not the case, the pilot should be then embarked at San Carlos.
2. Upon your request this pilot service can be arranged by the agency.
3. On departure, pilot service to Punta Cardon is not required.
4. If official pilot is unable to disembark at San Carlos due to difficulties on board or by Force Majeure, or if you decide to change the instructions given to the agency with regard to Pilot to disembark in San Carlos, a letter addressed to the Harbour Master stating your reasons should be handed to the Pilot before he disembarks in Cardon.

TONNAGE: Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e.:

(a) On Registered Net Tonnage. Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement. As of this date, such countries are:

Denmark
France
Germany
Great Britain
Ireland
Netherlands
Norway
Portugal
Sweden
U.S.A.

(b) On Venezuelan Nett Tonnage. Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

(c) In practice, the procedure for stating the tonnage of all ships entering the Lake of Maracaibo is as follows: The inward Pilot boarding the ship presents Master a form on which among others the Master should fill in the tonnage of ship. Pilotage charges are based on this tonnage given by the Master. Master's attention is drawn to the fact that the Venezuelan nett tonnage is usually higher than the International nett tonnage. Care should be taken if an old Venezuelan Nett Tonnage Certificate is on board, because the country in which the ship is registered might later have signed the reciprocal tonnage agreement with Venezuela. If the pilotage charges are made on basis of a higher tonnage than the one that should be applied, it is later very difficult, if not impossible, to get a refund.

CUSTOMS: *(a) Customs Watch.* While vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with customs regulations. The Law requires meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in officers' messroom, to avoid difficulties.

(b) Firearms and Ammunition. Firearms must not exceed one per officer nor may the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be carefully declared on Stores List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

(c) Contraband. Strict compliance with the Customs law of the country is enforced by the authorities, and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to very strict enforcement of the Customs regulations, it is recommended that no goods be carried which are not shown on Sto List. Any new articles (clothes, shoes, etc.) should be included in Sto List and marked as personal belongings. If during a check-up Customs, articles considered as contraband are found, this will not o mean confiscation of these articles, but also hours or days of lost ship time, while the case is handled at court.

CONSULS: The following nations maintain consular representative Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Netherlands
Nicaragua
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland
United States of America

TIME: Local time is GMT minus 4 hours.

VISITORS: All visitors to ships are prohibited except those compa employees, petroleum inspectors, etc., whose duties require the presence aboard.

POLLUTION: The Laws of Venezuela are very strict in regard to t pollution of harbour and coastal waters by oil, and heavy fines a imposed for violations. No dirty ballast, oil or bilge slops are to be pumpe or allowed to escape overboard. All overboard discharge valves fro cargo tanks and bilges are to be secured before loading or discharg commences. Loading is to be conducted with greatest care and vigilan in order that errors or delays in handling cargo valves may not result overflows. All deck scuppers should be plugged before loading to avo harbour contamination should an overflow occur. The Authorities requ a written report to be submitted by the ship involved in the event of a oil spill.

PASSENGERS: Passengers will not be permitted to disembark unle in possession of the required visa and documents. To facilitate cleara if passengers are carried, the Master should include advice to this effe in his radio ETA.

SEAMAN LEFT BEHIND: Sailing may be withheld until all cre members are aboard with exception of those ashore for justified reason It is important that Masters bear in mind that the Venezuelan Law w at all times hold the vessel's Master, Agent, or Owner responsible f any seamen left behind in Venezuela.

SHIPMASTER'S REPORT: August 1979.

MARACAIBO/EL TABLAZO AND APPROACHES

Approaches: If making for the "EM" Buoy direct, positions can be a vague due to the low lying coast.

A distance off the coast can be obtained before the "EM" Buoy b no real firm position.

Often there is a strong N.E. wind.

Pilot: In the 'Pilot Book', etc., mention is made of picking up the Pilot Punta Cardon.

From the Pilots and Agent I have a clearer idea of the official viewpo and requirements.

There is NO compulsion to take a Pilot before San Carlos.

If you are unsure of the area and the visibility is poor from all sour and in my personal viewpoint it is advisable to take a Pilot at Pu Cardon, giving ETA 12 hours in advance.

If vessel is to pick Pilot up at San Carlos send cable 24 ho beforehand through Curacao "PJC" to 'Piloto San Carlos' request permission to use Canal Exterior, ETA at "EM" Buoy and at San Car Reconfirm 12 hours before "EM" Buoy and by VHF an hour before arr on Channel 12.

The difficulty lies in language, although there is meant to be a tra control system in Canal Exterior it is only in Spanish and the Co-ordina speaks little English. Little information is required or given if you speak English.

The Punta Cardon Pilot costs about U.S.$150 extra plus trans charges and entails extra distance of 70 miles from the West a 15 miles from the East.

The San Carlos Pilot boards from a fast launch at "B28" Buoy a usually leaves just before the buoy. He will use hoist, in spite of offi regulations which require gangway ladder arrangement, and leaves port side outward (boards on starboard side inward). This is nea always the case with situation of Pilot Station and wind, but may chan

Communications: Venezuelan station La Guaria (YVG – ALRS 62 Most vessels use Curacao "PJC", very good. Agents reply thro "PJC". Telex very good.

VHF: Call 'Piloto San Carlos' on Channel 16 (working Channel 12). A at Maracaibo on Channel 16 (works Channel 14, only during o hours). Agent at La Salina on Channel 16 (works Channel 14, 24 h service but very distorted at El Tablazo).

Canal Exterior: Leads from "EM" Buoy to San Carlos Pilot Sta A speed of 10 to 12 knots essential to keep vessel in channel on acc of strong N.E. winds and currents across channel. Takes about 1 h 10 minutes from "EM" Buoy to San Carlos.

The least advertised depth at LW is 12.8 m. but shoals quickly at s of channel. We found 11.0 m. LW to West side of channel at " Buoy.

Buoys "B14", "16" and "18" had shifted about 200 m. to West (Au 1979). On the outer section of channel between "B4" to "B8" Buo Westerly set right across channel very apparent and near Mai Breakwater. At "B22" Buoy an Easterly set experienced. Wind 4 – 5, tide 1 hour before and 1 hour after HW Malecon both case

The "E 34" pylon light off Pta. Diablo is very conspicuous. A dredger 'Wado' works this section with North end Canal Interior. A suction dredger, pulls to side of channel to let vessel pass. Only Sp and German spoken. The old 'Zulia' dredger has stopped wo Another dredger is being completed for the Government.

Canal Interior: About 1.5 hours pilotage to Puerto Miranda, speed a manoeuvring. This channel is generally deeper than Canal Exterio advertised depth of 12.8 m. seems reliable. Pilot told me they ha get both channel Interior and Exterior deepened to 15 m. LW in the future.

Pile Light Beacons "T46" and "T40" have been replaced by b

Pratique: Given on berth.

Notice of Readiness: Can be tendered on arrival at berth. It is finally brought down with Bill of Lading on completion. This is normal practice. As we were cooling down it was received at completion of cooldown. Normally on berthing with lines connected.

EL TABLAZO:

Pilot: A Docking Pilot boards just before berthing and unberthing of vessel.

Tugs: 2 tugs of 1,800 h.p. Secure in "American" style using their lines.

Situation: For all intents and purposes part of Puerto Miranda but operated by different company.

Located just S.E. of Puerto Miranda berths. El Tablazo consists of 3 piers. Bulk, liquid and a small soda pier.

Anchorage: At El Tablazo – off berth, just East of main Maracaibo channel. Good holding – 3 shackles.

Pier: The bulk pier handles bulk and bagged urea fertiliser through 4 shiploaders fed from a conveyor. Three on the South side and 1 on the North side. Two of the loaders on the South side handle bagged urea down corkscrew chutes.

The liquid pier is to the South of bulk pier – berth both sides and handles ammonia, butane, propane, propylene.

Two Chicksans each side. The inshore being of 10 in. both sides and seaward being of 8 in. but fed by 10 in. line. Couplings are 300 ASA but 150 ASA spool pieces generally fitted.

Vapour lines are flexible stainless braided with rubber covering – ship's derrick required, 300 ASA coupling with 150 ASA spool piece. All berths – head IN. On the South side the outer edge of the dredged channel is marked by buoys.

All berths have good rubber fenders. Liquid pier outer end has two full faced mooring dolphins connected to main pier by catwalk. The least depth at all berths at LW is 6 fathoms, except small soda berth which has 2 fathoms at LW.

Moorings: 2-3-1 each end. Ship put alongside pier before moorings out. Plenty of mooring gangs. Very particular on position to within 0.5 m. Gangway no problem.

Fresh Water: At 15 t.p.h. from pipe at manifold amidships. There is a pumped supply at 70 t.p.h. used for loading small tankers to take to outports where supply is limited.

Operations: Language problems. There is one Loading Master who speaks good English. Surveyor on arrival and departure. Very co-operative. Venting allowed up riser.

Vapour return line goes to flare at ship's expense and can only be used if 100% product.

Max. rate ammonia 500 t.p.h., but initially can get plenty of stops. S.G. given at 15°C. The control of the rate is not very fine. You can get down to 20 t.p.h. but increase very broad. Usual notice for completion.

Dock Density: 1003.

Documentation: Carried out at berth inward, sometimes vessel taken off berth outward to local anchorage and clearance given there. Sometimes in the past Inward Clearance done at Maracaibo, NOT NOW.

There is much written in publications and passed around about visaed Crew Lists and deviation cables. I have tried, in talking to the Agent and to the Authorities to clarify the situation.

Visaed Crew Lists are NOT required now. But there is still a requirement that because the ship has no visaed Crew List she must have deviated on passage.

Basically what is required is that the ship should be cleared on sailing for Venezuela to say, Trinidad, for orders or Curacao not Maracaibo, then on passage receive a message deviating her to Maracaibo. If she does not have Deviation Message a fine could be imposed but the Agent says all ships have required cable so do not know of fine being imposed.

Required:

7 Crew Lists.
3 Stores Lists. Victualling only, can include bond.
3 Slop Lists. Could probably combine with above.
2 Ballast Lists. To give amount and cleanliness.
1 Vaccination List.
3 Crew Manifests.
1 Health Declaration.

I cabled in a Pratique message as a matter of practice.

Shore Passes: Given by Agent for each crew member, no photos needed. Not required to be handed back on departure. Valid 3 days. After completion there seems to be a normal documentation delay to obtain clearance of up to 12 hours.

Shore Leave: The Agent will lay on a launch, but not really necessary as at El Tablazo liquid berth vessel is near the boat pier and fast launches run frequently to Maracaibo (takes 15 minutes). Arrange through Loading Master.

Can change sterling or dollars in local hotels, rate 4.3 Bolivars to the U.S. dollar.

Films: Change Walport films at Puerto Miranda. Agent will send launch. Crew member has to go with films to change.

Agent: Only Agent on departure – no officials. Bill of Lading given by Terminal before Agent arrives.

SHIPMASTER'S REPORT: July, 1981.

Experienced following when entered Maracaibo Lake, mid-July, 1981.

Arrived EM Buoy and obtained permission from San Carlos Pilot Station via VHF to enter outer channel and pick up Pilot at Buoy No. 26. During the piloting the Pilot asked asked me whether I had previously entered outer channel, which I confirmed with the remark *many years ago.*

After berthed my Agent informed me that a new regulation required Ship Masters to pick up Pilot at Punta Cardon inward bound, unless the Master with said vessel had actually entered Maracaibo Lake *within the past 6 months,* for which he was automatically permitted to enter outer channel and pick up Pilot at Buoy No. 26.

Fines might be enforced upon Masters neglecting this new regulation.

SHIPMASTER'S REPORT: August, 1981.

If the Master of a vessel enters the channel for the first time, or even if *more than six months* since the last visit, he must embark the Pilot close to Punta Cardon. The distance between Punta Cardon and "EM" Buoy is approximately 80 miles.

If less *than six months* since the last visit, Master is authorised to pick up the Pilot when passing Buoy No. 26.

In the first case 24 hours prior notice should be given to the Pilot, and when approaching Punta Cardon vessel should call "Marina Cardon" on VHF Channel 16.

SHIPMASTER'S REPORT: June 1991.

Pilotage: At present, all foreign flag vessels bound for ports in the Maracaibo Lake have to pick up Pilot off Salina Guaranao in position Lat. 11° 40' N., Long. 70° 15.5' W. Call Guaranao Pilots on VHF Channel 16.

Upon departure, pilot service up to Salina Guaranao is compulsory.

The above pilot service is necessary every time a vessel is bound for Maracaibo Lake, and not just for the first visit.

Section A

BAJO GRANDE: 10.29 N. 71.38 W. (See Plan)

(1) OPERATOR: Maraven, S.A. Oil Terminal.

(2) OPERATOR: Maraven, S.A. Natural gas liquids processing facilities.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

(1) **OPERATORS:** Maraven, S.A.

LOCATION:

Maracaibo: On the North-Western shore of the Lake Maracaibo: Position: Lat. 10° 40' N., Long. 71° 38' W.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at terminals in the Lake of Maracaibo. Upon arrival at Maracaibo, a representative of the appointed Agency will go on board to assist vessel.

Bajo Grande: Loading Pier: Position: 10° 30' 50" N., 71° 36' 8" W., about 8 miles (12.8 km.) South of Maracaibo on the Western shore of the Lake and about 9,000 ft. (2,743 m.) offshore with its centre line North-South. Three vessels can berth simultaneously. Two outside at Berth No. 1 and Berth No. 3, and one inside at Berth No. 2, to load different cargoes. Except for the Boscan Crude, two vessels can load at same time.

DOCUMENTS: The following documents should be presented by the Master:

Clearance from Sailing Port with the following attached:
Stores List.
Crew List.
Slop Chest Inventory.
Ballast Certificate.

Special ballast report made up by Master.

The Maracaibo Port Captaincy, requires that the Masters of all vessels entering this jurisdiction, deliver to the Maracaibo Port Captain's representative, during his visit to ships in the Port of Maracaibo, a report which must answer the following questions concerning ballast:

(1) Port or place where ballast was taken.
(2) Quantity taken.
(3) Type of ballast and condition of same.
(4) Where deballasting operation was or is to be carried out.
(5) Approximate deballasting time.
(6) Any other pertinent information that may be required.

Crew List.	6 copies
Stores List.	6 copies
Slop Chest Inventory (Deck, engine and cabin stores listed separately).	6 copies
List of Personal effects.	6 copies
Derat Exemption Certificate.	Original
Venezuelan Net Tonnage Certificate.	Original
American Crew List.	4 or 2 carbon copies

(If required: See under "American Crew List").

Boarding Party: The boarding party usually consists of the following persons:

One Quarantine Official.
Two Customs Officials.
One Sanitation Department Official.
One Port Captain's Representative.
One Foreign Service Department Official.
One Vessel's Agent.

American Crew List: All non-American vessels loading for U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The Crew List should be prepared on Immigration and Naturalization Service Form No. 1–418 (Crew List Manifest) and should contain two sections:

Section 1 – Should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 – Should list, in the alphabetical order of their last names, those alien crewmen who lack United States visa documentation and therefore require inclusion in the visa of the Crew List.

Only one name may be placed on each line of the Crew List. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the Crew List presented must be legible (Occasionally the names of the crewmen included on the carbon copies of some Crew Lists presented at the consulate are blurred beyond recognition).

The information requested under column 1, 2 and 3 should be filled in completely.

Column 1 – Should always contain the complete first name and middle initial of the crewman.

Column 2 – Should show the nationality of each crew member and the number of his travel document.

Column 3 – Should always include the name of the port where the crewman was shipped, not simply the country.

At the time of the vessel's first application for a Crew List, the Crew List must be presented in 4 copies:

Original and 1 copy – Should contain only the information requested under Columns 1, 2, and 3.

Two Copies – Must include the following information of those crewmen to be included on the Crew List visa.

Column 4 – Should list the date, city and country of each crew member's birth.

Column 5 – Should show the place of issuance of the Seaman's Travel Document and the name of the Government which issued the Travel Document. (It is not necessary to list the date of issuance of the travel document).

Cargo Documents:

1. *Master's copy of Bill of Lading* – The Bill of Lading form used is the usual Warshipoilvoy form. Masters wishing to use another form should furnish 20 blanks on arrival in Bajo Grande. Master is requested to sign 3 negotiable Bills of Lading (Originals).
2. *One copy of the Certificate of Quantity and Quality (Q. & Q.).*
3. *One copy of the Ullage Report.*
4. *Time Sheet.*
5. *Certificate of Origin.*
6. *Cargo Manifest.*

Outward Clearance:

Following documents are delivered on board by the local Agent before sailing:

1. *Customs Clearance* – Duplicate of "Conocimiento de Embarque" and Duplicate of "Manifiesto de Carga". (Both stamped and signed by Customs) or any other document specifically requested by the consignee or nominating source.
2. *Communication* – A letter from Maracaibo Customs Authorities to Authorities in port of destination.
3. *Zarpe* – Permission to sail signed by Maracaibo Port Captain. This is brought on board in Bajo Grande by the outbound Pilot.

Customs Guard: The Customs Guard will request Master to countersign his time on board the vessel. This is counted from the time the first hose was connected until all hoses were disconnected, regardless of whether the vessel was receiving cargo or not.

Accommodation Ladder: Vessels must provide an accommodation ladder. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations. Port authorities will board only by means of an *accommodation* ladder. it is recommended to rig this in advance in order to avoid unnecessary delays.

In order to guarantee the security and safeguard the lives of the officers that board the vessel inbound in Maracaibo, it is imperative that Masters strictly comply with the following precautionary measures:

(1) Each of the components and functional parts that holds together or supports the gangway ladder must be maintained in excellent condition.
Therefore, wire ropes, guide blocks and bolts etc., found to be defective or in bad condition must be immediately replaced.

(2) For maximum security, each time that your vessel arrives in this jurisdiction, the above mentioned mechanisms should be thoroughly checked and tested by the personnel aboard vessel before the gangway ladder is used by the boarding party.

APPROACHES:

Channels leading to Lake Maracaibo: The channels leading to the Lake Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel.

Outer Channel: The Outer Channel starts at the E.M. Buoy position: Lat. 11° 13' 47" N., Long. 71° 33' 31" W. and ends at the Zapara Island, a distance of about 14 miles. (About 22 km.).

The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles.

There are no turns in the channel and the course is 189°. The channel is 100 ft. wide and has a normal controlling depth of 44 ft. LWS with tidal range varying about 2 ft. 3 in. Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at LW when the cross currents are strong. Overtaking at these points is forbidden. There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

The Southern end of the Outer Channel is marked by Buoys B – 27 and B – 28.

Inner Channel: The beginning of the Inner Channel is marked by Buoys B – 29 and B – 30. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°, The entire length of the Inner Channel is about 12 miles. Beacons T – 55 and T – 56 mark its Southern end. The normal controlling depth is 44 ft. LWS. The channel is 800 ft. wide. Vessels are not allowed to overtake each other in the Inner Channel between Buoys B – 29 and B – 30 and light beacons T – 25 and T – 26.

Vessels may overtake each other in the Inner Channel between light beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight. From Beacon T – 56 to Maracaibo harbour the channel is 800 ft. wide, depth 44 ft., its end is marked by Buoys B – 73 and B – 74.

Navigation through Channels:

Inbound vessels leave to starboard side the buoys and beac marked with even numbers and to port side the buoys and beac marked with odd numbers.

Outbound vessels shall leave to port side the buoys and beac marked with even numbers and to starboard side the buoys and beac marked with odd numbers.

Vessels should pass as close as possible to the channel's edge starboard side. Loaded vessels have preference.

Approaching vessels are to reduce speed in order to minimise suction force of the displacing waters.

Vessels must maintain a distance of 1 nautical mile (1,852 m.) by d or night from other vessels navigating in the same direction.

No vessel should start to manoeuvre to overtake another vessel bef having received clearly the affirmative signal from the ship to be pass

A grounded vessel is not allowed to start any manoeuvre when anot vessel is passing. Dredgers are frequently at work in the channels a caution should be exercised in passing them. Signals used by t dredgers are as follows:

Daytime: Black cylinder hoisted on side of yardarm:

You may overtake me on the side on which the cylinder is show

Two black balls over the bridge:

The channel is blocked.

Night:

Green light on side of yardarm (A white light on mast head helps show on which side the green light is placed).

You can overtake me on the side on which the green light is show

Two red lights over the bridge:

The channel is blocked.

The tidal range is 4 ft. at neaps. Observed squat in the channels about 1 ft.

Maracaibo Lake Channel Guard Service Corps have had evidence vessels travelling out of the navigation channel in the vicinity Buoys B – 3, B – 5 and B – 7; this risky procedure is considered ve dangerous to the safety of the channel buoys and its installations.

Masters of all ships are reminded that all vessels inbound or outbou *must* pass the EM Buoy on the port side. This operation will be register and controlled by their electronic devices installed at San Carlos Pi Station.

Violators of this regulation, in addition to being economica responsible for damages to the buoys and related accessories, will prosecuted in accordance with Article 118, Section I of the Venezuel Law of Navigation.

In view of the above, and keeping in mind the protection of the interes of your owners, we ask that you comply at all times with this regulat emanated from the Port Captaincy.

PILOTAGE: Compulsory. Vessels proceeding direct to the Bajo Gran Terminal must enter outer channel and embark Pilot between Buoys and 27. After vessel arrives in vicinity of channel entrance, Master m contact *San Carlos Pilot Station* by radio telephone on Channel requesting Pilot at Buoys 25 – 27. The launch that leaves San Car Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes cover distance, and distance, between Buoys and San Carlos approximately 6 miles (10 km.).

Master must advise Maraven, S.A. and Agent ETA Buoys 25 – 72, 48 and 24 hours prior to arrival there.

Masters of Vessels entering Lake Maracaibo for the first time m cable their Local Agent notifying this fact, in order that the Agent m comply with the Port Regulations. This security measure make necessary for the ship to pick up a Pilot at Punta Cardon.

The Master should notify Agent or contact Maraven, Punta Cardon radio on Channel 12. As no Pilots are available at Punta Cardon, Local Agent for the vessel requires 48 hours' notice in advance facilitate making arrangements to fly a Pilot to Cardon and then h Maraven place the Pilot on board the ship.

The co-ordinates of Punta Cardon are approximately Lat. 11° 36' Long. 70° 15' W. Maraven will charge approximately Bolivares 1100 for this service. In addition, the ship will have to pay air fare, h expenses, and a higher Pilotage fee for this service. However, i Master of a ship has previously entered the channel as an officer ship, he is not required to pick up a Pilot at Punta Cardon.

Masters are reminded that Pilots are authorised to leave Jurisdiction, only when they are disembarked in Venezuelan ports. this understanding, when special circumstances arise in which the cannot be disembarked at San Carlos and the ship is unable to the nearest Venezuelan port to disembark the Pilot, in this case the of "Las Piedras", it is required that the Agent as well as the Mas the vessel, forward to the Port Captaincy at the earliest opportu detailed report giving the reasons that compelled the Master to take Pilot abroad.

Pilots act in an advisory capacity only, and therefore the Mas the vessel retains full responsibility at all times. In the event it bec necessary to disregard the Pilot's instruction in order to ensure the s of the ship, Master must forward to Local Agent a full written repo the circumstances for delivery of same to port authorities.

The Venezuelan Pilotage Law stipulates that Pilots must be pro with the same lodging as is given an officer. In case no extra o cabin is available, suggest the hospital be used by the Pilot. Also should be seated at the officers' mess for his meals.

In case of accident to Pilot while performing his duty on boar the responsibility of the Master to furnish the Pilot with a full w report on the accident before the Pilot leaves the vessel. The Pilo be able to present such a report in case of a legal claim.

Note: According to new Port Regulations for vessels proceeding Bajo Grande Terminal, the Official Pilot (Conduct Pilot) will bo conduct the vessel to Bajo Grande and disembark; vessel will the up the other Official Pilot (Docking Pilot) for berthing manoeuvre

As a result of accidents that caused the loss of lives, the Maracaibo Port Captaincy issued a Regulation with the view of safeguarding human life at sea and other navigable waters; Official Pilots that must embark on or disembark from undocked ships, must use an automatic-inflated type life vest. This procedure is also compulsory for all persons from private or public entities that are required to go aboard vessels that are anchored, stopped or navigating in the waters of Lake Maracaibo. Likewise, at the side of the boarding ladder where the Pilot boards or disembarks, a hoist or boatswain's chair shall be placed there, and within it a life line and a gas light ready to be used in case it becomes necessary. The Port Captaincy will see to it that this Regulation is strictly complied with.

Docking Pilot: The Government's Pilot will assist in docking operations. It should be borne in mind that Pilot acts as adviser only. The Master retains full responsibility at all times. Any damage incurred to vessel or loading platform which may be deemed to have been caused by the Mooring Pilot's fault or negligence, may be held against the ship.

Undocking: Government's Pilot will assist in undocking. Two tugs will be used as for docking and undocking.

Pilot Ladder: All vessels with a freeboard over 9.0 m. must supply a combination of pilot ladder and gangway (SOLAS 74, Rule 17).

ANCHORAGE: The Pilot will not manoeuvre the ship into anchorage, but will indicate the proper location to anchor. Care should be taken because of small boat traffic.

MAX. SIZE: The following restrictions in size and draft upon loading exists for vessels docking at Bajo Grande:

	Maximum Loading Draft	*Maximum Vessel Size (tonnes)*	*Max. displacement upon Berthing (tonnes)*
Outside Berth (No. 1)	39 ft. 06 in.	*55,000 d.w.t.	42,000
Inside Berth (No. 2)	32 ft. 00 in.	36,000 d.w.t.	20,000
Berth (No. 3)	39 ft. 06 in.	85,000 d.w.t.	105,000

* Vessels up to 61,000 tonnes d.w.t. will be accepted as long as they do not exceed other characteristics.

Also see "Berthing".

RADIO: *Information to be cabled to Local Agents 3 days prior to arrival:*

1. *Flag:* If the vessel has loaded in Bajo Grande before or is listed in the Tanker Register published by H. Clarkson & Company Ltd., London, the nationality of the vessel need not be cabled.

2. *Sailing port and at which other port vessel will call in this area:* For clearing the vessel in and out of Maracaibo, local ship Agents must know beforehand from where the ship comes and which other port it will call in this area. Therefore, it is of importance to inform Agents whether the vessel will load part cargo or bunker, at which terminal, and whether inbound or outbound.

3. *Port for which vessel is cleared:* In case the vessel was diverted *en route* and consequently is not cleared for Maracaibo or one of the terminals in the Lake of Maracaibo, the Local Agents must obtain from authorities special permit for the vessel to enter the Lake of Maracaibo.

4. *Ballast Certificate:* If the vessel arrives in ballast a "Ballast Certificate" is mandatory. A fine against the vessel will issued by the Port Authorities if vessel does not have this certificate.

5. *Estimated Time of Arrival:* Cable ETA San Carlos Pilot Station Buoys 25 – 27 (See "Pilotage") or, if the vessel is taking part cargo or bunkering inbound, cable ETA, bunker or first loading port. Please use local time if possible (4 hours behind GMT).

6. *Tonnage:* If the vessel has not loaded at Bajo Grande before, also cable the Gross and Net Tonnages. To determine whether the International or the Venezuelan tonnage should be mentioned, see General – "Tonnage Applicable".

7. *Master's Full Name:* Please sign your first message with Master's name and surname, which is also needed to clear the vessel in Maracaibo.

8. *Changed ETA:* An additional cable should be sent about 48 hours and 24 hours prior to arrival at Pilot Station Buoys 25 – 27 stating ETA.

Proper use of Radio Frequencies: We have received several circulars from the Maracaibo Port Captaincy, requesting Terminal Operators to caution all Masters of vessels calling at Bajo Grande Terminal on the improper use of the International Distress Frequency of (2182 kHz) for personal conversations. This procedure is contrary to the security of vessels.

A letter containing such caution will be delivered to the Master of each vessel loading at Bajo Grande by the Agent, requesting that the Master sign a copy signifying his acknowledgement of said letter of notice.

The International Distress Frequency was established specifically and exclusively for emergency calls such as shipwreck, fire and accidents. It is also used by ships and shore stations to make first contact (VHF Channel 16) but immediately after contact is made, the operator should switch to one of the 52 Channels available.

9. *Compulsory use of Single Side Band Radio:* A circular letter from the Venezuelan Ministry of Communications, states that no licence will be granted for the installation of radiotelephone stations of modulated amplitude (A3). The installation and use of Single Side Band radiotelephone equipment is obligatory.

In consequence, the Ministry has requested that the terminal inform all users of Double Side Band (A3) radiotelephone equipment in order that they proceed immediately to install in their ships, launches and all other marine vessels Single Side Band equipment with the same frequencies that are presently in authorised use, which is VHF Channel 16.

The listening and Safety Station YXW – 3 installed at the Venezuelan Nautical School is equipped to answer any calls on the International Distress Frequency with their transmitter of 1 kW.

As a result of the foregoing, a letter containing the above information has been prepared by the Terminal which will be delivered to the Masters of all vessels calling at the Bajo Grande loading terminal. The Masters of all vessels are required to sign a copy of this letter in acknowledgement of receipt.

TUGS: The Venezuelan Government has ruled mandatory the use of 2 tugs for docking and undocking. Vessels over 60,000 d.w.t. will use 3 tugs for docking and undocking.

NOTICE OF READINESS: Masters are free to tender their ships as being ready to load at any place and time which, in their opinion, conforms with the terms of the charter party. Terminal personnel authorised to countersign the Notice of Readiness have been instructed to indicate the time vessel was all fast. This does not imperil in any way the rights of the shipowner in his negotiations with the charterer and it limits the Terminal's liability to the consignee.

BERTHING:

Berth No.	*Dock Length (ft.)*	*Vessel Nominal Length (ft.)*	*Max.Draft Arrival (ft.)*	*Minimum Depth (ft.)*
1	929	751	35.0	40.0
2	929	751	32.0	35.5
3	898	853	39.5	40.0*

* In April 1993, the Pilot advised a Master that the depth was 45 ft., but echo sounder reading indicated 42 ft. – 43 ft.

CARGO OPERATIONS:

Loading Arm System:

Berth No.	*Loading Arm No.*	*Diameter in.*	*Boscan Crude and Products*	*Connection*
1 and 2	1 Black	8	Asphalt Cement (PAS), Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Vacuum Gas Oil, Distillated Oils.	Flange 8 in. 150 ASA
	2 Black	8	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 8 in. 150 ASA
	3 Black	8	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 8 in. 150 ASA
	1 White	8	Leaded Gasoline, Catalytic Gasoline.	Flange 8 in. 150 ASA
	2 White	8	Gasoline Leaded, Light and Heavy Naphtha.	Flange 8 in. 150 ASA
	3 White	8	Light Gas Oil, Industrial Gas Oil, Jet A-1.	Flange 8 in. 150 ASA
	Bunker	6	Bunker "C", Intermediate Bunker Fuel (IBF), Marine Gas Oil (MGO), Diesel.	Flange 6 in. 150 ASA
3	1+2	10	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 10 in. 150 ASA
	Bunker	6	Bunker "C", Intermediate Bunker Fuel (IBF), Marine Gas Oil (MGO), Diesel.	Flange 6 in. 150 ASA

Inert Gas System: The use of an inert gas system will be compulsory for all vessels fitted with the system, whilst operating at the Terminal.

Deballasting Facilities: A Circular letter from the Venezuelan Ministry of Communications, Maracaibo's Port Captaincy, states that as of October 1976, no ballast (either clean or dirty) can be discharged into Lake Maracaibo waters. Therefore, all ballast must be pumped ashore to the petroleum terminal on which vessel is to take cargo. Heavy fines are assessed for vessels violating this law and therefore we strongly recommend Masters to be particularly careful in this regard.

Shore deballasting facilities are available at Bajo Grande and are subject to no special regulations and procedures as yet. Tanker ballast water is pumped through 2×8 in. hose connections into 1×24 in. line of about 9,000 ft. in length to a 90,000 bbls. receiving basin situated on shore at a maximum rate of 2,000 tonnes/hr.

The deballasting basin is limited to receiving *only* petroleum hydrocarbons and petroleum hydrocarbons derivates. Emulsifiers, caustics, acids and chemical slops are absolutely unacceptable. Contamination of Lake Maracaibo waters with oily or chemical materials of any nature is strictly prohibited by Venezuelan Laws. The terminal is required to report to the Authorities any such contamination by vessels docked at Bajo Grande. HEAVY FINES ARE THEN ASSESSED AGAINST THE SHIPS. Vessel's cooperation is requested to prevent contamination from tank overflows, bilge oil, line leaks or from any other source.

Tank Cleaning and Drying: Precautions as are common for any heavy oil should be taken to ensure that no ballast is left in any tank. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lbs. per 1,000 bbls. for every 0.10% contamination by sea water. All cargo compartments must be stripped extremely dry.

Cargo pipeline should be drained and or purged of water. On standard T – 2 type vessels, this can be done by draining the fore and aft main cargo lines, both suction and discharge sides, into the pump room bilges followed by opening of main suction valves on each individual compartment, thereby releasing water retained in dead and transverse lines. After this procedure is completed, each compartment should be restripped with stripping pumps and lines, followed by draining the stripping line to pump room bilges. On other ships equipped with looped systems it is possible to blow the system with air and drain water into the bilges. In other situations, fresh water might be used to flush cargo piping systems of salt water and in turn strip salt water and fresh water as outlined for T – 2 vessels. All deck scuppers should be securely plugged and all precautions should be taken to avoid pollution of lake.

Inspection of Tanks: Before loading can commence, tanks and loading system must be inspected and passed. This is usually done by the Terminal's own Cargo Inspector but, if consignee so requests, third party inspection can be arranged.

Inspection Companies available in Maracaibo are the following:

E. W. Saybolt & Co., S.A.
Redwood Petroleum and Petrochemical Division
Analistas e Inspectores Venezolanos de Petroleo C.A.
Inspecciones, S.A.
Caleb Brett Venezuela, C.A.

Line Displacement: When a vessel is loading crude and products, it is usually necessary to displace lines once or twice during loading. Masters will be advised of necessary line displacements before loading starts and are required to take note because NOTICE HAS TO BE GIVEN BY VESSEL when pumping should be stopped and tanks changed. Once shore tanks have been changed, it will not be possible to change the quantity of the product already in the ship, as shore lines will then contain a product different from the one already loaded. *Ship's gauges and/or draft should be carefully checked when calculating required quantities.*

Spillage: In case spillage occurs, the Terminal Port Supervisor must be advised immediately, as any spillage must be reported to the Authorities without delay.

There has been considerable discussion in Venezuela concerning oil spillages resulting in contamination of Lake Maracaibo. Considerable pressure is being exerted by Government agencies to eliminate all spillage, and the Terminal is making every effort to avoid contamination of Lake Maracaibo.

While vessel is at Bajo Grande take special precautions to avoid dirty ballast, bilge water or any other contaminant entering the Lake.

If a spill should occur and Terminal representative, the Government's representative of the National Guard observes that the waters of the Lake are being contaminated by any substance from the vessel the Terminal will request that vessel suspends deballasting, loading or discharging operations immediately and all consequences that might arise from this operation such as short loading, the unmooring of your vessel, fines, damages to fishermen, clean up costs, etc., *will be strictly, for vessel's account.*

We strongly recommend to Masters to emphasise to the officers on deck to endeavour to avoid spillages and to make certain that the scupper plugs are installed prior to commencement of loading operations in order to withhold on deck any spillage that might occur.

After Loading: All Butterworth plates, tanks tops and ullage plugs should be inspected to ensure against entry of water. Inspection of ullage plugs should follow on completion of temperature readings because of the necessity of taking temperatures en route. Sea suction valves should be secured by positive means until all cargo has been discharged. This may be accomplished by numbered seals, chains and padlocks. The method of securing should be noted on the inspection documents. Regardless of which method is used, appropriate log entries should be made indicating the date, time and method used and under whose supervision, both vessel officer and/or Cargo Inspector, such method was applied.

About 2 hours is required for the preparation of the cargo documents which are normally delivered on board before sailing.

Temperature of Boscan Crude and Boscan Products at Sea: On short voyages, as for instance to the U.S.A., it has proved most practical to maintain the loading temperature. On longer voyages, as for instance to Europe, the temperature may be dropped to 130°F., which does no harm as long as sufficient time is given to bring the temperature up again to that required for discharging. Masters should, however, not expect a temperature rise of more than 5°F. per day, especially if the sea temperature is low. The heat transfer properties of Boscan Crude are very poor as are those of the heavy products made from this crude. Many ships have been delayed in the discharge port due to too low cargo temperature. A temperature of 160°F. is suggested for discharging Boscan Crude, Topped Boscan and Cutback Asphalts.

Discharge Cargo: Boscan Crude has a flash point of 110°F. – 160°F. and a maximum viscosity of 1400 SSF at 140°F. The viscosity at other temperatures follows the pattern of other petroleum products. Boscan Crude has been successfully handled in ships fitted with both reciprocating and centrifugal type pumps with forward and after pumprooms respectively. It is generally found that this crude can best be handled at a temperature which brings its viscosity to about 600 SSF – 160°F. Vessels with forward pumproom should control stern trim so that it does not exceed about 4 ft. while stripping the after tanks. Also a 5° list is very helpful when stripping. Once the cargo gets below heating coils, tanks must be pumped empty as fast as possible. At times it has been found helpful to gather tanks strippings into a single tank for discharge ashore, as it is very difficult to strip against heavy back pressures. Watch reciprocating pumps for vapour lock. Because of high viscosity, proper care should be taken that no oil is left in vessel discharge lines at low temperature.

Tank Cleaning After Discharge Cargo: Many Masters have expressed concern over tank cleaning after discharge. Assuming that the ship proceeds to sea for this operation and has sufficient time for proper execution, vessel may be cleaned quite thoroughly using the Butterworth system. However, it is of vital importance that the system be used at maximum pressure and temperature (not below 160 p.s.i. and 170°F respectively). At these conditions and with 2 machines, it has been found that about 4 hours are required for each tank. It is of importance to keep the tanks well stripped during the Butterworthing. Some prefer to steam out the tanks before Butterworthing. If this course is adopted care should be taken that the steaming does not last more that 1 hour as the heat will drive off the light ends of the oil and leave a rubbery residue that is very difficult to remove.

It has been found helpful to keep the machines in LOW position for about 1 hour and the HIGH – MIDDLE and LOW in order, in the usual manner.

Boscan Crude and Products/Light Products:

Loading Product	*API Gravity*	*Temperature °F*	*Loading Lines used*	*Unloadin Rate (bbl./hr*
Boscan Crude	10.0 – 11.0	165	2×18 in.	15,000*
Cutback Asphalt	11.0 – 15.0	170	2×18 in.	15,000
Asphalt Cement (Pas)	5.0 – 6.0	300	1×14 in.	5,000
High and Low Visc. Residue	10.0 – 19.0	160	2×18 in.	16,000
Bunker "C"	10.0 – 16.0	160	2×18 in.	16,000
Gasoline	61.0 – 67.0	85	2×12 in.	6,200
Ind. Gas Oil	29.0 – 31.0	95	1×12 in.	6,200**
Light Gas Oil	32.0 – 38.0	95	1×12 in.	6,200
Light Naphtha (LSR)	70.0 – 73.0	85	2×12 in.	6,200
Heavy Naphtha (HSR)	52.0 – 55.0	85	2×12 in.	6,200
Jet A-1	45.0 – 51.9	85	1×12 in.	6,200

* Loading Rate.
** Loading and unloading rate.

DENSITY: 0.977 – 1003.

FRESH WATER: Delivery of boiler and potable water is made by barg *minimum quantity 100 tons.* The barge holds about 160 tons and t pumping rate is about 25 t.p.h. Requirements should be cabled advance to the Agent of the vessel in Maracaibo.

FUEL:

Advance Notice of Requirement: Should a vessel arriving at Bajo Grand require any bunkers, Owner or Operator must place their nominati with Maraven, S.A. via Telex No. 23535 Mara Vc as much in advanc of the delivery date as possible. Telex should indicate name of vesse ETA at Bajo Grande and quantity and quality of Marine Fuels require A cash deposit in U.S. Dollars covering the nomination must be mad prior to the delivery date into the following account:

Chase Manhattan Bank,
Chase Manhattan Plaza,
34th Floor,
New York, N.Y.
Current Account No. 001-1-992773.

Owner or Operator must also request Chase Manhattan Bank confirm via Telex to Maraven, S.A. that such deposit has been made order to cover the cost of bunkers to be delivered to vessel arriving Bajo Grande at the current ETA. Only after this Telex has been receiv will delivery actually proceed.

Bunker Facilities: Bunkers are available from pipeline at Bajo Gran Terminal for vessels loading and unloading cargo at Berths No. 1, and 3. Bunkering rate is about 2,500 bbls.p.h. for Bunker "C intermediate bunker fuels and marine gas oil.

Marine Fuels and Lubricants Available: Bunker fuel (sometimes cal Bunker "C"), intermediate bunker fuels and marine gas oil.

Lubricants are generally available in the Maracaibo area. Should y require any, we recommend that vessel's local Agent be contacted.

Lighterage: Bunker fuel, intermediate bunker fuels, marine diesel a gas oil are also available for ships in the Maracaibo area. 72 hou advance notice is required for barge deliveries of all products.

CONSULS:

Following countries have consular representation in Maracaibo: Argentina, Austria, Belgium, Bolivia, Colombia, Costa Rica, Denma Dominican Rep., Ecuador, El Salvador, France, Germany, Great Brita Guatemala, Italy, Mexico, Netherlands, Nicaragua, Norway, Panam Peru, Puerto Rico, Spain, Sweden, U.S.A.

REPAIRS: No major repair facilities are available in Maracaibo but sm repairs can be undertaken by local machine and electric shops. Sh labour can be furnished if required. Technicians are available for mi radio repairs. Nearest dry docks are at Curacao for vessels up to 30,0 d.w.t. and at Puerto Cabello, Venezuela for vessels up to 18,000 d.

CUSTOMS: *Contraband:* Strict compliance with the Customs Law of t Country is enforced by the Authorities and Masters are strongly advis to caution crew members against attempting to smuggle cigarettes open package per person is allowed to be carried ashore, but a grea quantity will result in fine and imprisonment of the offender as wel lost ship's time. Due to the very strict enforcement of the Custo Regulations, it is recommended that no goods be carried which are shown on the Stores List. Any new articles (clothes, shoes, etc.) sho be included in the store list and marked as personal belongings. If du a checkup by Customs, articles considered as contraband are fou this will not only mean confiscation of these articles, but also hours days of lost ship's time, while the case is handled at court.

SURVEYORS: American Bureau of Shipping and Lloyd's Register h Agents in Maracaibo. Their services may be procured by cab requests to the local Agent at Maracaibo.

HOLIDAYS: The Terminal office will be closed on the following d New Year's Day (January 1st); Easter Thursday/Friday (March/A Declaration of Independence (April 19th); Labour Day (May 1st); B of Carabobo (June 24th); Independence Day (July 5th); Birthda Simon Bolivar (July 24th); Columbus Day (October 12th); Chiquinq Day (November 18th); Christmas Day (December 25th); All Satur All Sundays.

SHORE LEAVE: Shore Leave is permitted at the discretion of the Authorities; required number of shore passes will be brought on b on arrival in Maracaibo and have to be returned to the Customs G again before the vessel leaves Bajo Grande.

GENERAL:

Tonnage Applicable on Fees: On ships registered in countries w have a reciprocal tonnage agreement with Venezuela, the gross ton registered in such countries will be applied for calculating pilotage Such countries are:

Denmark, France, Germany, Ireland, Netherlands, Norway, Por Sweden, United Kingdom, U.S.A..

On ships registered in countries not listed above, such ships c at Venezuelan ports for the first time must be measured for Venez tonnage by the Port Captain. It is usual practice to take ashore the Panama Canal or Suez Canal International Gross Registered To

Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

Firearms and Ammunition: Firearms must not exceed 1 per Officer nor may the ammunition exceed 18 cartridges per Officer. All firearms and ammunition must be carefully declared on the Store List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

Guards: Customs Guards are stationed on the platform at Bajo Grande. They must be provided with sleeping quarters on the ship and seated in the Officers' mess for their meals. Non-compliance may cause cargo stoppage and fines. Masters are reminded that these guards are representatives of the Venezuelan Government and any uncourteous action on the part of the crew or passenger will be regarded as a slight against the Country itself.

Gangways: The ship is to supply a safe gangway, which allows easy access to the vessel. The Terminal has a gangway which may be used on request with the understanding that any damage to the gangway or ship or shore personnel through its use may be held against the ship.

Safety: Vessel must be in readiness to move at all times. The attention of Masters of turbine steamers are called to this regulation.

Ship's fire fighting equipment must be ready for instant use while vessel is alongside. Shore personnel will render assistance in an emergency but, since no fireboats are stationed in the immediate area, vessels should be prepared to combat fire without outside assistance. It is necessary to obtain Terminal's approval for repairs of propelling machinery.

Normal safety precautions apply. Smoking is not allowed on the pier. No hotwork is permitted on vessels alongside without *written* permission from the Port Supervisor. *Swimming alongside pier is dangerous and absolutely prohibited.*

Launch Service: The launch is primarily for the use of the port staff.

Taxi: Taxi service will be generally available upon request to vessel's Agent.

Visitors: According to Port Regulations concerning access to ships and loading terminals and in the interest of industrial safety, only persons directly concerned with loading operations will be permitted to board vessel or visit the loading platform at Bajo Grande.

Plimsoll Marks: The Port Captaincy requires that Plimsoll Marks be readily visible. If they are not clearly legible, permission to sail may be withheld and a fine imposed. This is applicable to inbound and outbound vessels.

We therefore, request your full compliance with this Regulation from the Maracaibo Port Captaincy.

Marine Stores/Charts: Marine stores are available in limited supply. Marine charts are not available.

Compass Adjusters: There are no compass adjusters in Maracaibo.

Seamen Left Behind: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

Crew in Transit: In case a crew member is left ashore for a justified cause, such as hospitalisation, repatriation, etc., his documents and personal effects are to be delivered to the vessel's Agent before sailing. A letter is required from the Master with detailed instructions as to maximum cash advance, etc. All expenses incurred by such members are for vessel's account.

Port Supervisor: Masters or their representatives are invited to call at the Port Supervisor's Office on shore in Bajo Grande or over the telephone on the pier, for any further help, information or complaints.

Terminal: Cable Address: Maraven, S.A., Maracaibo.

NOTICE: Issued by Maraven, S.A., Bajo Grande Refinery, Maracaibo.

PROCEDURE FOR BERTHING AND UNBERTHING MANOEUVRES

To the Masters of all the tanker ships arriving at Maraven's Refinery, Bajo Grande Marine Oil Loading Terminal, Lake Maracaibo, Venezuela.

Instructions concerning approaching and manoeuvres for berthing/unberthing at this Terminal.

With a view to prevent any possibility that your ship may cause damage to our installations, we shall highly appreciate it if Masters pay attention and respect to the following procedures:

1. Entrance Bajo Grande Refinery Terminal (Lat. 10° 30' 50" N., Long. 07° 36' 08" W.) is between the Main Navigation Channel Marker Buoys B86 – B88 and leaving between the Buoys BG2, BG1 and B86.

2. On ship's arrival at the Terminal Entrance Buoys, the Official Pilot, a Marine Officer, acting as a Liaison Officer of Maraven, will board the ship in order to assist her Master and the Official Pilot in all matters concerning inter-communications and co-ordination with the Terminal and on basis of his technical and local knowledge and experience give advice relative with the vessel's safe berthing/unberthing and safe mooring/unmooring to/from the pier.

3. For best manoeuvrability, ships arriving on ballast or partially laden, must arrive with a draft forward which should not be less than given in the following table and a trim by the stern of about 0.75% of ship's length on ships of 400 ft. length or more.

Length	*Draft Forward*	*Trim by Stern*
400 ft.	10 ft.	3 ft. 00 in.
500 ft.	12 ft.	3 ft. 09 in.
600 ft.	14 ft.	4 ft. 06 in.
700 ft. ideal	16 ft. (nor less than 14 ft.)	5 ft. 03 in.
750 ft. ideal	17 ft. (nor less than 14 ft.)	5 ft. 08 in.

The ship's total displacement in any case should not exceed 42,000 tons for ships mooring at Berth No. 1 and 20,000 tons for ships berthing at Berth No. 2.

4. For more information please consult the instructions and information for the port which will be issued to you opportunely on your arrival for first time to this Terminal, please comply with them, and see that they are complied with.

5. *Mooring Lines:* Prior to arrival at the Terminal, the vessel shall have all the necessary mooring lines ready for use together with a sufficient number of heaving lines and the equipment and the personnel required for mooring. All the lines used for securing the ship to the berth should be of the same material, construction and of approved characteristics.

5A. *Recommended Mooring Lines:*

Forward	Aft
3 head lines	3 stern lines
2 breast lines	2 breast lines
2 springs	2 springs

5B. *Winches:* The use of tension winches is not allowed.

6. *Tugboats:* Minimum 2 twin-screw tugboats of adequate horsepower for the size of ships ordinarily berthing at this Terminal will assist the vessel in the berthing/unberthing manoeuvres. If the Master so request or in the case of the size of vessel and wind and/or current conditions so require, the Terminal may order the use of 3 tugboats for the manoeuvres. The tugboats, on arrival, will come alongside the ship before entering in the Terminal.

The first communication with the tugs is via VHF Channel 16 as first contact and then changed as per instructions.

7. *Berthing:* At Bajo Grande ships berth bow to North.

On approaching the berth, approaching bow to or at any angle with the berth is to be avoided.

No. 1 Berth (Outer Berth): The ship will be put in a position parallel and abeam to the berth at a minimum distance of about 50 m. or more, depending upon the prevailing conditions of wind and current.

Once in this position and with the ship motionless or almost motionless, the Liaison Officer will assist you and the Official Pilot in the manoeuvres to nurse the ship alongside sideways with the tugs which, generally, will be alongside the ship's side opposite to the side the ship will berth, already made fast and ready to push.

When the manoeuvre is carried out for berthing to No. 1 or Outer Berth, the starboard anchor will be in cockabill position ready for use in case needs arise and in such case the aft tugs or both immediately ordered to pull on reverse.

It will be avoided to haul the mooring ropes secured to the North platform bollards in order to pull the vessel forward. If need arises the ship's engines may be used to move the ship.

8. *Unberthing:* The use of spring lines must be avoided in order to veer the ship on the mooring platform for clearing the vessel's bow or stern while unberthing. These spring lines will be only used in case of extreme emergency.

After all the mooring lines have been cast off, the ship will be towed sideways away from the berth to a distance where she can safely proceed under own power.

The Official Pilot for manoeuvres and Liaison Officer will disembark when the ship is safely free away and offering no risk to the dock.

Maraven will not permit berthing or unberthing without a Maraven Liaison Officer being onboard.

Note: According to new Port Regulations for unberthing, 2 Official Pilots will board; for unberthing manoeuvres and to conduct the vessel to the Outer Channel, respectively. The undocking Pilot disembarks at Bajo Grande.

9. *Berth No. 2* (Inner Berth): The same procedure hereinbefore described for berthing at Berth No. 1 will be followed for berthing at Berth No. 2. The ship will be put first parallel to the berth and then the vessel nursed alongside with the tugs. For unberthing, manoeuvres will be the reverse. During berthing and unberthing manoeuvres, ship's engine(s) will be used only when it becomes necessary.

At this berth anchors must not be used because of submarine pipelines laid there. In this berth the distance from it must not be more than 50 m.

10. *Emergency Towing-Off Wire:* Whilst berthed alongside the platform, emergency towing-off wire-ropes should be rigged both on the offshore bow and quarter of the ship, with their loops kept near the waterline at all times where the tugs can easily and quickly pick them up.

The wire-ropes should be in good condition and of suitable strength for the ship's size. The wires should be properly led outboard through the nearest fairleads leaving sufficient wire-rope coiled on deck and free to go when the tug hauls and of adequate length to tow her safely off the Terminal.

The overboard length of rope should be adjusted as the drafts decrease or increase.

11. *Mooring Lines Whilst at Berth:* Mooring lines should be periodically inspected and attended to ensure that they are kept taut in order to minimise and movement of the ship along or away from the berth.

In the case of ships equipped with automatic tension winches, the brakes of the winches should be applied and the mooring lines handled on manual operation when required to take up slack or pull them taut.

12. *Safety Practices:* While the ship is lying at the Terminal the Master will ensure that all the safe practices in loading or discharging oil products and related operations are complied with on his ship and also ensure the maximum co-operation between the vessel's crew and the Terminal personnel in their mutual interests of safe and efficient operations.

AUTHORITY: Maraven, S.A. – Bajo Grande Refinery, P.O.Box 93, Maracaibo, Venezuela 4033A. *Tel:* (061) 202673. *Telex:* 61254, 61161. *Contact:* Captain N. Arceo, Terminal Supervisor.

Head Office: Maraven S.A., Apartado 829, Codigo Postal 1010A, Caracas, Venezuela. *Tel:* 908-2111. *Telex:* 23535, 23536.

(2) OPERATORS: Maraven, S.A.

LOCATION: S.W. of channel Buoys B – 87 and B – 88.

The installations for processing natural gas liquids at Bajo Grande processes liquids for Maraven, S.A., and they are known as Product Owners. The Plant is situated in Bajo Grande, approximately 10 miles to the South of the Port of Maracaibo, on the West bank of Maracaibo Lake.

FLAG: The local authorities require the Venezuelan flag to be hoisted to the top of the vessel's mast from the time it enters the outer channel on arrival, until it leaves the outer channel on departure.

DOCUMENTS: *Customs Clearance for Programmed Vessels:*

Vessels which arrive in ballast or with cargo in transit, require the following documents (with additional file copies if these are required):

(A) Clearance from the last port
2 copies – 1 visaed Ballast Certificate
4 copies – 2 visaed Passenger List
4 copies – 2 visaed Lists of Equipment
4 copies – 2 visaed List of Passengers in Transit
4 copies – 2 visaed List of Mess Equipment and Spares
4 copies List of Personal Effects
4 copies – 2 visaed List of Stores
5 copies Crew Lists.

Vessels which arrive with cargo must have, apart from the foregoing:

(B) 4 copies – 2 visaed Venezuelan Entry Manifests
6 copies – 2 visaed Bill of Lading
2 copies visaed Entrance Manifests.

In the absence of a Venezuelan Consul at the last port, the Customs clearance documents must be signed by the Consul of a friendly nation, one of the Port Authorities, Notary Public, the Chamber of Commerce, or by two recognised signatories.

Clearance Through Customs of Diverted Vessels:

Vessels diverted on the high seas to Maracaibo to load at Bajo Grande must present all the documents indicated in (A) above, except the consular correspondence, which they will not have.

Vessels diverted on the high seas to Maracaibo (Bajo Grande) which do not have a Venezuelan Customs Clearance on board, must advise their Agents by radio prior to their arrival, the name of the vessel, the name of the Master, nationality of the vessel, net Venezuelan tonnage (if available, if not, the net registered tonnage), last port of discharge, port to which it was originally sailing and the ETA at the Pilot station at San Carlos. This information is required to obtain the Entry Permit prior to the arrival of the vessel. Three copies of the diversion telegram received by the vessel, signed by the Master, together with those documents detailed above, must be presented to the Port Authorities on arrival at Maracaibo. Non-presentation to the Port Authorities of the documents or the information mentioned will occasion a fine to the vessel.

Inspection by Customs: All vessels arriving from foreign ports destined for the dock at Bajo Grande must anchor in the Port of Maracaibo for Customs inspection by the Port Authorities before proceeding to Bajo Grande. The vessel's gangway must be in position prior to arrival at Maracaibo.

A member of the National Guard of Venezuela will come on board every vessel at Bajo Grande to observe the activities in connection with the operations of loading and unloading. This official is authorised as representative of Customs and is known as the "Vigilante de Aduana". He must be fed and lodged at the same standard as ship's officers.

Loading Documentation: The loading and Customs papers will be delivered to the Master by the Agent of the ship on his arrival at the Port of Maracaibo, on his voyage outwards.

PILOTAGE: Vessels entering currently have the option of taking on the official Pilot at:

(a) The channel in front of the Pilot Station at San Carlos, between the Buoys B – 24 and B – 26.

(b) In front of Amuay Bay or Punta Cardon. However, to arrange this service, Agents must be advised at least 48 hours in advance of this requirement.

The Pilot who boards the vessel in front of San Carlos will take it to Maracaibo, where he will disembark.

Due to weather conditions, the Port Captaincy of Maracaibo cannot guarantee the embarkation or disembarkation of the Pilots at the "EM" Buoy. For this reason, Masters must communicate with the Pilot Station of San Carlos to receive necessary instructions as to where the Pilot will be embarked, the latter usually coming on board between Buoys B – 24 and B – 26. The system of communication between the Pilot Station of San Carlos and the vessels will be via radio-telephone. The San Carlos frequencies are: 2182 kHz. and 156.8 MHz. (VHF Channel 16). Other frequencies are: 2122 and 2080 kHz. and 156.6 MHz.

Pilotage to navigate through the inner and outer channels is compulsory at all times. The maximum speed of navigation in the dredged channels is 10 knots.

Vessels leaving will take the Lake Pilot on board at Bajo Grande and on reaching the Port of Maracaibo the Pilot will be changed for another to take the vessel through the channel. The Channel Pilot will pilot the vessel up to the San Carlos Bank, generally between Towers E – 31 and E – 33, where he will disembark. The Port Captain of Maracaibo has issued instructions to all ships' Agents so that they may inform the Master and/or Owners of the vessels that all vessels must identify themselves with the Pilot Station of San Carlos by radio-telephone, regardless of the time of day, when they are entering between Buoys B – 17 and B – 19 and when they are leaving between Buoys T – 42 and T – 40.

Every time a launch with an official Pilot on board leaves to attend to a vessel in sight, the costs will be charged to the company which owns the vessel or to its representative, even when service has not been given.

A government Pilot will assist each vessel from Maracaibo to Bajo Grande and on the outbound trip to Maracaibo. The government Pilot will also assist in the berthing and unberthing operations. The ship's Agent will inform the Master of each vessel, as well as the government Pilot, the schedule for berthing the vessel.

The Plant Mooring Supervisor will board each vessel prior to approaching the dock. Mooring Supervisor will assist in the mooring and unmooring operations. It should be understood that the Mooring Supervisor acts only in an advisory capacity to the Master. The vessel's Master retains full responsibility at all times. The Plant assumes no responsibility in connection with any acts or advice given by the Mooring Supervisor.

APPROACHES: The buoy which marks the entrance to th channel (Buoy "EM") is situated in approximately position 11° 13 71° 33' 31" W. The characteristics of the light of the "EM" Bu white flash every ten seconds, visibility approximately 5 mil distance between the "EM" Buoy to the Southern extremity of t channel, marked by the Buoys B – 27 and B – 28, is appro 15.75 miles. The channel is 1,000 ft. wide and normally has a 42 ft. minimum at low tide observed at the time of neap tides wi amplitude varying 2 ft. 3 in.

There is a breakwater 0.5 miles to the East of and parallel to t channel which extends 1.6 miles to the North from the Northern the Island of Zupara. The end of this breakwater is marked by frame tower with a light 25 ft. above sea level. Characteristics of are: white flash every 8 seconds, visibility about 3 miles.

Commencement of the inner dredged channel is marked by th B – 29 and B – 30. The length of this channel, which is marked b is approximately 12 miles, and ends at Buoys T – 55 and T – channel is 800 ft. wide and the normal checked depth is 43 ft. ne with a tidal amplitude varying between 1.5 ft. to 2.5 ft.

The channel from the Buoys T – 56 as far as the Port of Ma is a dredged channel, whose end is marked by Buoys B – 73 and It is some 800 ft. wide and has a depth of at least 43 ft. The is about 11 miles and the tidal amplitude range is insignificant.

RESTRICTIONS: Bridge clearance at MHHW 146 ft.

MAX. SIZE: The maximum permissible fresh water draft at the 36 ft. and the maximum overall length vessel the dock will a 700 ft. Vessels with a berthing displacement up to 20,000 long be accepted, providing the approach velocity can be controlled per second or less.

Vessels with an overall length greater than 700 ft. or with a fres draft of more than 26 ft. or a displacement greater than 20,000 lo will not be accepted for loading at Bajo Grande, unless the obtained the prior authorisation of Maraven, S.A. If the vesse equipped to moor, load and unmoor in a safe manner, the ve not be loaded. In such cases, there will be no responsibility on of Maraven, S.A.

RADIO: Maraven, S.A. Export Department also has radio-tele with the following frequencies: 2080, 2120, 2182 (stand-by), 26 2738 kHz and 156.8 (stand-by) and 156.6 MHz. operated in acc with the following schedule:

Monday – Friday:	From 0730 until 1130
	From 1300 until 1700
Saturday, Sunday and Holidays:	From 0730 until 1030 appr

Any tanker or vessel bound for Bajo Grande shall cable Mara least 5 days in advance of its scheduled arrival time in Maracaibo notice of its estimated time of arrival, loading capacity, amount a of product to be lifted and condition of ship's tanks.

At least 48 hours in advance of arrival at the San Carlos Pilot the vessel's estimated time of arrival, nationality, Venezue tonnage (if available, otherwise its registered tonnage), quantity a of cargo required, condition of ship's tanks, name of Agent, la Master's name and all requirements of the vessel while in port be cabled to "Maraven, Maracaibo" and to the ship's Agent. As th office in Maracaibo is not able to communicate directly with ve sea, messages to "Maraven, Maracaibo" and to Agent should be via PJC Curacao, and should be prefixed "Via AAC" (All America and Radio Inc.). Failure to give such proper notices shall abs Plant from any claim for delays or demurrage.

TUGS: 2 × 1,600 h.p. tugs used for mooring and unmooring ope

BERTHING: The dock proper may be identified by the overwater trestle that connects the dock with shore.

The dock is located approximately Lat. 10° 30' N., Long. 71° which is 2 miles off shore from the Bajo Grande Natural Gas Processing Plant and S.W. of channel Buoys B – 87 and B – 88 Maracaibo channel. The dock is single sided and consists of 4 br pilings, 4 mooring dolphins and a loading platform.

The dock is equipped with a compressor and auxiliary equip assist the ship in compressing and re-condensing the ship's va No liability will be assumed by the Plant Operator for unavailab the Dock's vapour compressor. The dock is also equipped with system to dispose of contaminated vapours.

A tie-up crew will handle all mooring lines before and after lo

The Plant tie-up crew will assist the ship's crew in positioni connecting the cargo loading arms and in removing same on com of loading. The dock loading arms are equipped with 10 in. ASA RF flanges. It shall be the responsibility of the ship to furnish fittings to mate with the dock's 10 in. ASA 300 lb. FR flanges.

Mooring Procedure: Any vessels calling at Bajo Grande mu equipped with mooring hawsers of sufficient length and strength a line to each of the 2 bow and 2 stern mooring dolphins and sh such equipment while at the dock. Vessels equipped with winches and cables shall utilise these in addition to the mooring ha or alone if the vessel has sufficient cables to meet the mi requirements of running a cable to each of the bow and each stern mooring dolphins. For added security of those vessels not eq with tension and/or cables, 1 steel cable will be furnished for a bo another for a stern mooring dolphin by the Plant. It should be reco by all parties that while the use of these cables is strongly recomme the Plant accepts no responsibilities for loss or damage to any or to any facility or to any person that may result from the failure equipment.

For the convenience and safety of all personnel board disembarking while at Bajo Grande it is recommended that the accommodation ladder be rigged on the port side, this being normally laying against the dock. The ladder should be suspend the Mooring Master boards and during docking operations to avo fouled.

BALLAST: There are installations for unloading dirty ballast. Vessels which arrive at Bajo Grande with dirty ballast must advise 48 hours in advance with regard to any emulsifiers, detergents or chemicals which may be present in the ballast and which are going to be unloaded. If these emulsifiers, detergents and chemicals are not acceptable, Maraven will advise the ship and the latter must arrive at Bajo Grande with clean ballast.

The ballast will be unloaded at a rate of approximately 5,000 bbls.p.h., nevertheless in the case of unexpected damage or malfunction of the system at Bajo Grande, Maraven will give instructions to the Master of the vessel so that he may arrive with clean ballast and Maraven will not be responsible for the delays which may be suffered by vessels in cleaning their tanks prior to arrival.

It is strictly prohibited to discharge into the lake any liquid or solid waste resulting from tank cleaning. Therefore it is recommended that the Master gives instructions to all personnel so that they avoid any possible leak or contamination in the lake.

In the event that the representative of the Plant or the National Guard observe that dirty ballast is being discharged into the lake, or even residues or other contaminatory organisms whilst clean ballast is being unloaded, such operations will immediately be suspended and the consequences will be strictly for the account of the ship.

LOADING: *Notice of Readiness:* On arrival at Bajo Grande and after inspection by the Customs Authorities, and having obtained any other official approval required before loading, the Master of the vessel will notify Maraven in writing that the vessel is ready to load. This notification must include a report of the conditions of the tanks of the vessel, specifying in detail the temperature, pressure, last loading, list of vessel and trim, possibility of contaminatory organisms and any other conditions which may affect the loading.

The Master of the vessel may request any equipment and/or service which he considers necessary for the safe and efficient loading of his vessel and Maraven will make every effort to fulfil this request.

It will be the responsibility of the vessel to provide its own connections to join up with the RF 10 in. 300 ASA flanges of the dock.

It will be the responsibility of the ship's Master to ensure that prior to commencement of loading, the atmosphere inside the tanks, which are to receive products are within the safety limits stipulated. Nevertheless, Maraven reserves the right to inspect at any time, to verify the fulfilment of these safety precautions and to refuse to load any vessel which in the opinion of Maraven does not fulfil the safety requirements stipulated.

LPG refrigerated vessels will not be considered ready to load at Bajo Grande unless all the LPG tanks contain LPG vapours and are sufficiently cooled to permit shipment of the nominated products.

Vessels which receive completely refrigerated products must be capable of receiving at their boiling point from 0.5 to 2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all the vapours resulting from the shipment at the rate specified and including those vapours which form as a result of the heat gained by the vessels' tanks.

Loading Procedure: The positioning and connection of the loading arm must be effected to the satisfaction of the personnel in charge of the vessel. After approval of the personnel in charge of the vessel, the loading valves may be opened to check that the connections do not have leaks and loading may commence.

The maximum loading rate is 8,000 bbls.p.h. (750 – 775 tonnes p.h for completely refrigerated products and petrol) and a minimum loading rate of 250 bbls.p.h. (23 tonnes p.h.).

The pumps are designed to supply a minimum flow of 250 bbls.p.h. at a pressure of 225 p.s.i.g. and, since the installations at the Bajo Grande Dock do not have facilities for controlling the pressure of LPG which is being loaded, they are not responsible for any damage or delay which may occur due to the request for reduction in flow and pressure of LPG in order to cool or purge the vessel's tanks.

There are no installations for generation of inert gases. LPG vessels which require cooling, purging or any other assistance in Bajo Grande can be accepted after prior request in writing from the Master of the vessel; however, these services will be charged to the vessel. The responsibility for helping to effect purging and/or cooling is charged at 733 Bolivares per hour, during the time that such operation of purging or cooling causes the vessel to exceed the permitted period of stay.

The quantity of products used in such purging or cooling will be for the account of the vessel.

In the event that the dock vapour compressor is operated at the request of the vessel's Master for a purpose other than for purging or cooling, this will be charged at the rate of 500 Bolivares per hour to the ship.

All loading and unloading operations must be suspended whilst there is bad weather and the tank covers of the vessel must be closed and secured. During periods of calm, petrol or other products with a low flash point can be loaded at reduced rates or the loading operation can be interrupted if the heavy vapours are not being dispersed with sufficient speed to avoid dangers of gas accumulation. Officers on the vessel must be alerted so that they may be on watch whilst such conditions apply.

Under normal operational conditions it may be necessary to displace the loading line. This will require the person in charge of the vessel advising the representative of the Plant when the loading is nearing completion in order to complete an equal quantity to the capacity of the loading line.

Permitted Period of Stay: (a) The permitted period of stay, as is defined hereunder, shall commence to be counted from 6 hours after arrival of the vessel at Bajo Grande. The permitted period of stay will be terminated when the final mooring cable has been withdrawn from the quay.

For the purpose of these instructions, the Notice of Readiness, may be delivered after the vessel has tied up at the dock; nevertheless, the arrival at Bajo Grande shall be defined as the time when the vessel passes between Buoys B – 87 and B – 88, which mark the Maracaibo navigational channel and are situated approximately 1,000 m. in front of the Bajo Grande Dock.

(b) In the event that a vessel arrives at a different time to that confirmed in the shipping programme, and unless Maraven has approved a different arrival time, vessel must await mooring of other programmed vessels before arriving and which vessels may have arrived at that time and the permitted period of stay will commence when the loading operation commences, or 6 hours after receiving Notice of Readiness, whichever is the later. It is agreed that a vessel shall be included in the loading programme if it arrives at Bajo Grande between the hours of 12.01 hrs. on the accepted date and 0600 hrs. of the following day.

(c) Except for the provisions in (b) above, all vessels arriving at Bajo Grande will have the right to moor in the order in which they appear in the shipping programme. Maraven at their discretion may change the order of shipment when it may be necessary for reasons of safety or for the purpose of obviating a closure of the Plant or reduction in production.

(d) The waiting time permitted shall be 24 hours, plus one (1) hour for each 6,000 bbls. of product loaded in excess of 114,000 bbls. This waiting time shall be that permitted to load the complete cargo or part of the cargo of the vessel, it being understood that any time spent in deballasting operations will not be taken as waiting time. If the loading operations are delayed or interrupted by *force majeure,* which shall include the closure of the shipping terminal due to bad weather, the time thus lost will not be counted as permitted waiting time.

(e) The loading operations shall be considered as terminated when the loading hoses are disconnected. Every vessel will leave the quay as quickly as may be practically possible after having completed shipment of the cargo and the personnel of the vessel and those on land have arrived at an agreement as to the quantity of products shipped.

(f) In the event that a vessel is moored at the quay for 6 consecutive hours after Maraven has notified the Master of the ship that the installations are ready to deliver the product, if the vessel on completion of this time is not in a position to receive products, then at the discretion of Maraven the vessel may be withdrawn from the quay, to prevent the products burning or a reduction in production.

A vessel may be withdrawn from the quay at any time for reasons of safety.

Verification and Measurement: Determining factors to arrive at the official figures of a shipment:

(A) Petrol and Butane:

(1) Correction factors of the individual meters less than 1%. In this event the terminal shall always use the figures of the meters as official (and not take into account the absolute difference in barrels) taking always the precaution of carrying out a comparison between the figures of the ship and those of the land.

(2) Factor of correction in any of the meters greater than 1%. In this event the vessel's figures will be used, comparing them in all aspects with the figure of the meters without applying the correction factor and with the land tanks.

In those cases in which the vessel's figures are used, it is appropriate to suggest that they check their figures.

(3) In the event of the measuring system not operating, and the vessel cannot give its own figures, as a last recourse the figures of the shore tanks will be used.

(B) Propane:

(1) The vessel's figures will be taken proceeding in exactly the same way as in point (2) of sub-section (a) above.

(2) In the event that the vessel cannot supply figures, the figures of the shore tanks will be used.

All volumes will be adjusted to the volume equivalent to 60°F in accordance with the applicable sections of Standard API 2534 and the corresponding tables of the Measurement Tables of Oil ASTM (latest edition) or other methods or standards selected by Maraven.

If the product delivered is LPG, the content of the ship's tanks will include the quantity of the product in the form of vapour.

All volumes will be calculated in U.S. liquid barrels at 60°F and the adjustments at this temperature will be made in accordance with the Oil Measurement Tables ASTM – 1P, American Edition 1952 (or the ruling tables which may replace these).

In the event of the products being loaded in a vessel whose tanks, pipes and equipment are empty when loading commences, the gross volume of products which may remain in the pipes and equipment on completion of shipment and at the time of final measurement, shall be calculated on the basis of the volumetric capacity of those pipes and equipment, adding the calculated volume loaded in the vessel's tanks and including in the total volume delivered to and received by the vessel at that time. In the event that the procedure described is used to determine the volume of products delivered and if during the time of this delivery vapours from the vessel's tanks be vented then the quantity of vapours vented shall be determined as shall also be the liquid volume equivalent to these vapours in normal conditions and this will be added to the quantity determined in (a) and (b) above.

Permissible Composition of the Atmosphere of the Tank for Purging: Maximum percentage per volume of air or oxygen permissible for the safe shipment of the product when the vessel's tanks are purged with CO_2 or N_2:

	%Air		*%Oxygen*	
Product	(CO_2)	(N_2)	(CO_2)	(N_2)*
LPG	50	40	8	7
Petrol	50	40	8	7

*The percentages of nitrogen do not include the nitrogen of the air in the mixtures.

Example: If a vessel is going to load LPG and it is going to be purged with N_2, it must add sufficient N_2 to ensure that the mixture does not contain more than 40% by volume of air. The other 60% will be N_2.

Ref. Principles & Practices of Purging, 1954. American Gas Assoc. – Chapter 2, page 28.

FRESH WATER: Available at Maracaibo Harbour.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available in the area. Lubricating oils in limited quantities are also available from local contractors. All bunker, lubricating oils, water and other requirements should be cabled to the ship's Agent. For reasons of safety, no bunkers may be taken on the vessel while berthed at Bajo Grande.

MEDICAL: Complete medical services are available in Maracaibo.

CONSULS: The following nations have Consular representation in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Netherlands
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

REPAIRS: Maracaibo: No major repair facilities are available, minor repair jobs can be taken care of through local machine and electrical shops. Shore labour can be furnished if required. Radio, radar and gyro compass technicians are available upon request.

Bajo Grande: No repair facilities are available, but when required, personnel from shops in Maracaibo will travel to Bajo Grande to effect repairs.

SHORE LEAVE: Launch service for official business purposes and emergencies is readily available in Maracaibo. Launch service for shore leave can be arranged through contact marine service and will be the responsibility of ship's personnel. Arrangements for shore leave transportation can be made through the ship's Agent. No shore leave facilities are available at Bajo Grande.

CLASSIFICATION SOCIETIES: American Bureau of Shipping and Lloyd's Register of Shipping, U.S. Salvage Association, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale, and Germanischer Lloyd have Agents in Maracaibo. Surveyors are available by appointment from any of these Agents.

CURRENCY: The Venezuelan unit of currency is the Bolivar (Bs) and is the only currency recognised as legal tender within the country. Masters desiring a cash advance should make the request to their Agent when advising ETA.

MAIL: Outgoing mail for ship's account may be given to the Agent's representative who boards the vessel on arrival at Maracaibo inbound. Personal mail will be accepted only if carrying the correct amount of Venezuelan postage, or if postage is authorised by the Master for the vessel's account.

GENERAL: *Maracaibo Port Captaincy:* Directive which must be observed by vessels entering and leaving Maracaibo Lake:

OBJECTIVES:

To increase the safety of Human Life at Sea, to take all necessary measures to avoid marine accidents in general and to ensure that vessels are navigated with safety in the navigable channels and waters of Maracaibo Lake.

1. All radio-telephone communications between the Control Offices of Maritime Transit under the control of the Port Captaincy of Maracaibo and vessels, shall be made, for the first contact, via Channel 16 (156.8 MHz) and immediately it shall be agreed that for the transmission of required information they will change to Channels 12 or 14. Also this procedure will be adopted in communication from ship to ship.

2. Any vessel which navigates in the vicinity of the Buoy "EM" of the outer channel being 10 miles from the latter shall call the Pilot Station at San Carlos, requesting permission to enter the zone and will supply the following information:

(a) Name and type of the vessel.
(b) Nationality.
(c) Draft.
(d) Last port of call
(e) ETA at the "EM" and "B – 26" Buoys.

3. The Port Captaincy will authorise by radio, via the Pilot Station of San Carlos, to Masters of vessels who have reported to that station request to cross the outer channel, or part of it, with the assistance of the Official Pilot, in accordance with the sequence of arrival.

4. Every 5 miles, the Master of the vessel will call up San Carlos, indicating any information which he may have and giving his position within the channel, by reference to the buoys which are on his starboard side.

5. When communication in item 1 has occurred, San Carlos will inform the vessel as follows:

(a) The location of any dredger (mobile or stationary) which is operating in the outer channel, buoys whose lights are out, changes in buoys' positions or where buoys have disappeared, vessels which have sunk, etc.

(b) If there are vessels leaving the port, to give the position of these by reference to the odd numbered buoys.

6. Vessels shall establish radio-telephone communications with the dredger when they are 5 miles from it. In this communication, they will indicate the place they estimate that the vessel will meet the dredger and any other information which they consider necessary for the safety of navigation of both.

7. San Carlos will keep vessels informed of all the circumstances mentioned above, especially the time and place that each of them estimate to pass close to any dredger which is operating in the outer channel, and in order that they do not meet the dredger simultaneously.

8. Masters of vessels will inform the Pilot Station at San Carlos of any other information which the latter may request.

9. Masters of vessels will keep a watch on Channel 16, on the order of the Official Pilot, until their arrival at port of destination in Maracaibo Lake and on leaving until the Pilot has left the vessel.

10. Pilots, when they are bringing a vessel into the port, at the level of the parallel of Palmas del Norte Point (Buoys T – 55 and T – 56), will call up the Port Captaincy and transmit the following information:

(a) Name of vessel
(b) Time
(c) Port where operations will be effected
(d) Name of Pilot calling.

11. When the vessel continues to navigate to the South of Gene Rafael Urdaneta Bridge, the Pilot will inform the Control Offic Maritime Transit in Maracaibo, the time at which the vessel will p Buoy "B – 79".

12. The average speed of the vessel in the navigable channels wil ten (10) knots, Masters being authorised as are also Official Pilots alter this, when the safety of navigation may require it.

13. San Carlos will check by radio-telephone the transit of vess from the Entrance Buoy "EM" to the level of the parallel which pass in front of Palmas del Norte Point (Buoys T – 55 and T – 56 and v versa).

14. Loaded vessels navigating outwards, and being in the ou channel, will have priority over vessels coming in to the same chann provided that these do not meet with those coming out in the crit zone, included between Buoys B – 21 and B – 22 and E – 33 a E – 34. For this purpose, the San Carlos Pilot Station will inform enter vessels the situation of leaving vessels so that they may take necess measures to avoid meeting those vessels coming out in the refer zone.

15. The Port Captaincy will check via the office of Control of Mari Transit, the Navigation of vessels, from the parallel passing Palmas Norte Point (Buoys T – 55 and T – 56), as far as the terminals and po to the South of General Rafael Urdaneta Bridge and vice versa.

16. Every Official Pilot navigating outwards when passing Buoy B – 72, will call up San Carlos by radio-telephone and will sup the following information:

(a) The time that he is passing Buoy B – 72.
(b) The time that he is arriving at San Carlos.

17. When the dredger receives any call from a vessel it will g information as follows:

(a) Location where it is at that time.
(b) Direction of dredging (South North or North South).
(c) The side on which the vessel must pass.
(d) Time necessary to make the manoeuvre indicating on which s of the channel dredging will continue after the manoeuvre.

18. The Pilot Station at San Carlos will be attentive to communications made and will take note of them, in the event that t intervention may be required by dredgers or by vessels.

19. Any vessel sailing from any port in the No. 2 Pilotage Area Maracaibo, will inform the Port Captain as follows:

(a) Type and name of vessel.
(b) Where from and time of leaving the port.
(c) Speed and port of destination.
(d) Estimated time of passing Buoy B – 72.

Signed – Port Captain.

Section B

LA ESTACADA: 10.42 N. 71.32 W.

TERMINAL NOT IN USE. BUOYS HAVE BEEN REMOVE

Section C

LA SALINA (Lacustre): 10.22 N. 71.28 W. **(See Pl**

(N.B. For important details of Documentation, Pilotage, etc., "Maracaibo Lake").

OPERATORS: All terminal facilities are under the contro Lagoven, S.A.

APPROACH: Entrance and leaving this terminal is made between B B – 97 and B – 98.

LOCATION: La Salina located on Eastern shore of Lake Maracai Lat. 10° 22' 18" N., Long. 71° 27' 49" W. about 60 miles from Entrance Buoy "EM".

DOCUMENTS: These are generally placed on board prior to depar Vessels whose Master accepts the early departure procedure ma with documents in blank. Figures are then radioed for inclusion in t documents. Outward Clearance documents are placed on boar vessel prior to departure.

PILOTAGE: In the event that no contact can be made with San C Pilotage Station, or if there is a language problem, contact shou made with Vensport, at La Salina by voice radio on VHF Chann (156.8 MHz).

The Docking Master boards by tug or launch at the waiting anch or in the outer part of the navigation channel leading to the termi

ANCHORAGE: The waiting anchorage off La Salina is lo immediately Eastward of Buoys B – 97, AS – 1 and AS – 3 (Old nu M – 1, M – 1a and S – 1); it has a depth of between 40 ft. and and fair to poor holding ground in soft mud.

RESTRICTIONS: None. The port is open for navigation during th and night, allowing ships to enter and sail at any hour.

MAX. SIZE: Up to 112,000 d.w.t., LOA 900 ft. and max. draf (brackish water) at Berths No. 6N, 6S, 7N and 7S. Max. distanc to manifold 450 ft.

Pier No. 3 (West Side) LOA 690 ft., draft 26 ft. and 36,000 d
Pier No. 3 (East side) LOA 575 ft., draft 26 ft. Max. 18,000 d

No restrictions on vessel's beam at any of the berths.

The access channel to La Salina has a least depth of 41 ft.

Special Note: Maximum draft for loading vessels at La Salina Lacustre Terminal is actually restricted to 39 ft. Vessels loading at this maximum draft of 39 ft. must cross the outer bar channel at HW.

RADIO: The cable and telegraphic address for the Lagoven, at La Salina is "Lagoven La Salina". Radio messages to and from ships at sea are routed through the Government radio station at Maiquetia (La Guaira) call letters YVG. This station operates on a 24 hour continuous watch on 500 kHz and 2182 kHz.

Listening frequencies: long wave: 500 kHz; medium wave 2182 kHz; short wave Channels 5 and 6.

Working frequencies: long wave 417 kHz and 464 kHz; medium wave 2120 kHz; short wave 4222 kHz, 6351.5 kHz, 8461 kHz and 17141.5 kHz.

Answering frequencies: long wave 500 kHz.; medium wave 2182 kHz.

Hours of watch:

4222, 6531.5 kHz	0100 – 1300 hrs. GMT
8461, 17141.5 kHz	1300 – 0100 hrs. GMT

Cables for vessels may also be routed via Curacao Radio, call sign PJC.

Radio notice of arrival should be sent 72 hours prior to arrival at La Salina and corrected if weather or other conditions delay the vessel.

Vensport La Salina handle all communications between vessels and Lagoven Terminal control tower. VHF radio-telephone Channel 16 (156.8 MHz) may be used for initial contact. Channels 6, 10, 13 and 14 are also available on a 24 hour basis.

All vessels en route to La Salina may also communicate with Lagoven Amuay or Caripito Marine Offices and request that messages dealing with corrected ETAs, Pilots and other business be relayed to Vensport La Salina.

VHF: Transmit on VHF when passing Aruba or Amuay Bay updated ETA messages to either Lago Marine or Amuay Marine for relay to La Salina. Contact Vensport La Salina on VHF when within reach (normally after passing General Urdaneta Bridge) for latest berthing instructions.

TUGS: Lagoven S.A. maintains one 3,000 h.p. diesel tug and one 1,300 h.p. diesel tug. Tug-boat assistance is considered essential and is afforded to all vessels entering, leaving or shifting in the harbour.

Additional tugs can, in an emergency, be ordered from Maracaibo. The tugs are usually employed in the alongside mode and are made fast using their own ropes (2.5 in. diameter nylon).

BERTHING: At La Salina, Lagoven maintains a deep-water terminal (Lacustre) consisting of an island where are located 2 finger piers, each 1,100 ft. in length and 500 ft. between piers, providing 4 berths to accommodate tankers up to 112,000 d.w.t. Berths are numbered 6N, 6S, 7N and 7S, from North to South. At these berths various products can be loaded simultaneously namely – 6N and 6S – Crude, Naphtha and Butane; 7N and 7S – Crude; Pier No. 3 (West side), Propane and Butane; Pier No. 3 (East side), same as West side but not concurrently with West side. In addition there is an offshore platform (Pier No. 3) where liquefied petroleum gases (Butane and Propane) can be loaded.

Instructions concerning berthing are given by Vensport La Salina by means of radio-telephone.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

The tugs are made fast on the seaward side, one forward and one aft. Vessels berth under normal circumstances always with head in, which is a relatively simple manoeuvre. Vessels are berthed starboard side alongside Berths 6 North and 7 North; portside alongside at Berths 6 South and 7 South.

When the vessel's bow is between two and three ships' lengths from the head of the pier, the engines are stopped or reversed. The vessel then slowly enters the berth parallel to and about 40 ft. from the continuous fender face. When the vessel's bow is just past the berth's manifold area, the forward spring line is sent in by heaving line. The vessel is then positioned by using its ropes and is pushed alongside by tugs. The current sets mostly in a general Northwesterly direction with a velocity between 0 and 2 knots. This should be taken into account, particularly when berthing at the South facing berths where the vessel may be set onto the pier.

Moorings: Mooring bollards spaced with 80 ft. intervals are located on both sides of the pier, and provide the basis for a potentially excellent mooring configuration consisting of:

3 Head lines
3 Stern lines
2 Breast lines
1 Forward, Spring line and
1 Aft Spring line.

BALLAST: Vessel should arrive at La Salina with sufficient ballast to permit safe handling. Government Pilot requirements in this connection under normal weather conditions are interpreted as drawing approximately 8 ft. forward, 18 ft. aft, on a T – 2 or similar type tanker, and 11 ft. forward, 20 ft. aft on a 26,000 d.w.t., on larger type vessels the minimum draft required is 14 ft. forward and 22 ft. aft.

Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

It has been established that one of the major causes of contamination of crude oil is the relatively small amount of salt water remaining in the ship's tanks, pumps, and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and downtime to refining equipment, besides presenting many other processing problems.

It is therefore requested that the full co-operation of the Master and Officers of ships loading for Aruba, be given to ensure that all ballast tanks and lines are flushed with lake water and stripped as dry as possible.

Vessels equipped with a separate and completely segregated system of ballast tanks, lines and pumps, will be permitted to discharge ballast and load cargo simultaneously, providing approval of both the pier foreman and Petroleum Inspector is secured.

A Pier Supervisor who is in direct communication with the loading pumphouse is stationed at each pier during the entire time the vessel is discharging ballast or cargo or receiving cargo.

All dirty ballast must be discharged ashore. The terminal has a 100,000 bbl. reservoir connected to two high capacity separator units. Max. ballast discharge is 40,000 bbls./hr. with max. 130 p.s.i. at rail. One or two hard arms (12 in.) are usually connected for ballast discharge.

If it is desired to follow the "load-on-top" procedure it is requested that the marine representative be informed on arrival.

POLLUTION: There are no shore facilities to recover an oil spill. The Venezuelan authorities take a very serious view of oil pollution and heavy fines are imposed for violations of the strict pollution rules. A government representative is stationed at the terminal. It is therefore important that all precautionary measures be taken and spills avoided. In case of a spill, the port services section should be informed immediately by VHF or telephone, which is located on the pier. The use of dispersants or detergents on the water is not permitted.

LOADING: Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on arrival. Supplementary information including number and size of lines and Chicksan arms will be furnished to the Chief Officer before loading commences. Loading rates will be reduced as required when topping off. If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Shut-down controls for all crude oil pumps are available at each loading berth at ship's rail of loading vessels for use in case of emergency only.

LOADING RATES: Loading operations at La Salina Terminal are normally carried out at relatively high pumping rates; up to an average of 40,000 bbls.p.h. Ship's officer will be advised by the pier supervisor at what rate the cargo will be loaded. LPG is loaded up to an average max. rate of 7,500 bbls.p.h. at Platform No. 3.

During periods of calm, loading of gasoline or other similar low flash products may be at lower rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ships' officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Cargo Handling: The terminal is mainly a crude exporting facility, but also LPG, bunkers, condensate and gasoline are handled.

The cargo transfer facilities are:

Berth 6 North and South:
3 × 12 in. Chicksan arms for crude loading.
1 × 8 in. Chicksan arm for bunkers (located aft of manifold).

Berth 7 North:
4 × 12 in. Chicksan arms for crude loading.
1 × 8 in. Chicksan arm for bunkers (located aft of manifold).

Berth 7 South:
4 × 12 in. Chicksan arms for crude loading.
3 × 12 in. Chicksan arms for pressurised gas loading (located forward of crude loading manifold)
1 × 8 in. Chicksan arm for bunker (located aft of manifold).

Gasoline, condensate and pressurised butane are handled at Berth 6 at both sides of the manifold.

All connections are standard 150 ASA bolt hole flanges.

The emergency cargo stop button is located in the operators' shelter on both piers.

Crude loading rates up to 50,000 bbls./hr. can be provided.

The loading and discharging of all crude petroleum and its products will be stopped during the passage of an electric storm and ullage covers must be closed and dogged down.

Cautionary Advice: Whenever non-matching flange sizes necessitate the use of reducers (spool pieces), Masters should insist that the reducer or hard arm be adequately supported by a proper jack, and should refuse to let cargo transfer operations commence before a satisfactory vessel manifold and hard arm connection has been provided.

MEDICAL: Complete medical, dental and hospitalisation facilities are available at La Salina. Medical treatment is provided at a private clinic.

Authorisation forms for medical treatment are provided which require the Master's signature. Transportation will be supplied by Vensport La Salina.

If the patient does not speak Spanish or English, an interpreter should accompany him.

DENSITY: Average density at the berth is 1002 but varies dependent upon amount of rainfall. The temperature ranges from 82°F. to 86°F.

FRESH WATER: A limited supply of fresh and boiler water is available at La Salina Lacustre Terminal. Delivery is made through 2.5 in. National Standard Fire Hose Thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker C fuel oil, marine diesel and intermediate fuels are available at La Salina Terminal Lacustre. Delivery is made alongside Piers 6 or 7 by 8 in. diameter Chicksan hose, located about midships.

Loading Rates: Bunker "C" and intermediate – 3,000 bbls.p.h. Diesel – 2,000 bbls.p.h.

It is the responsibility of the ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

Supplies of lubricating oils in drums are available. Delivery will be effected while loading and requirements should be incorporated in the radio ETA.

FIRE PRECAUTIONS: The recognised fire alarm signal is 4 long blasts with ship's or tug's whistle. An 8 in. fire water main line runs alongside and other requirements should be cabled to the ship's Agent. For reasons of safety, no bunkers may be taken on the vessel while berthed at Bajo Grande.

MEDICAL: Complete medical services are available in Maracaibo.

CONSULS: The following nations have Consular representation in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Netherlands
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

REPAIRS: Maracaibo: No major repair facilities are available, minor repair jobs can be taken care of through local machine and electrical shops. Shore labour can be furnished if required. Radio, radar and gyro compass technicians are available upon request.

Bajo Grande: No repair facilities are available, but when required, personnel from shops in Maracaibo will travel to Bajo Grande to effect repairs.

SHORE LEAVE: Launch service for official business purposes and emergencies is readily available in Maracaibo. Launch service for shore leave can be arranged through contact marine service and will be the responsibility of ship's personnel. Arrangements for shore leave transportation can be made through the ship's Agent. No shore leave facilities are available at Bajo Grande.

CLASSIFICATION SOCIETIES: American Bureau of Shipping and Lloyd's Register of Shipping, U.S. Salvage Association, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale, and Germanischer Lloyd have Agents in Maracaibo. Surveyors are available by appointment from any of these Agents.

CURRENCY: The Venezuelan unit of currency is the Bolivar (Bs) and is the only currency recognised as legal tender within the country. Masters desiring a cash advance should make the request to their Agent when advising ETA.

MAIL: Outgoing mail for ship's account may be given to the Agent's representative who boards the vessel on arrival at Maracaibo inbound. Personal mail will be accepted only if carrying the correct amount of Venezuelan postage, or if postage is authorised by the Master for the vessel's account.

GENERAL: *Maracaibo Port Captaincy:* Directive which must be observed by vessels entering and leaving Maracaibo Lake:

OBJECTIVES:

To increase the safety of Human Life at Sea, to take all necessary measures to avoid marine accidents in general and to ensure that vessels are navigated with safety in the navigable channels and waters of Maracaibo Lake.

1. All radio-telephone communications between the Control Offices of Maritime Transit under the control of the Port Captaincy of Maracaibo and vessels, shall be made, for the first contact, via Channel 16 (156.8 MHz) and immediately it shall be agreed that for the transmission of required information they will change to Channels 12 or 14. Also this procedure will be adopted in communication from ship to ship.

2. Any vessel which navigates in the vicinity of the Buoy "EM" of the outer channel being 10 miles from the latter shall call the Pilot Station at San Carlos, requesting permission to enter the zone and will supply the following information:

(a) Name and type of the vessel.
(b) Nationality.
(c) Draft.
(d) Last port of call
(e) ETA at the "EM" and "B – 26" Buoys.

3. The Port Captaincy will authorise by radio, via the Pilot Station of San Carlos, to Masters of vessels who have reported to that station request to cross the outer channel, or part of it, with the assistance of the Official Pilot, in accordance with the sequence of arrival.

4. Every 5 miles, the Master of the vessel will call up San Carlos, indicating any information which he may have and giving his position within the channel, by reference to the buoys which are on his starboard side.

5. When communication in item 1 has occurred, San Carlos will inform the vessel as follows:

(a) The location of any dredger (mobile or stationary) which is operating in the outer channel, buoys whose lights are out, changes in buoys' positions or where buoys have disappeared, vessels which have sunk, etc.

(b) If there are vessels leaving the port, to give the position of these by reference to the odd numbered buoys.

6. Vessels shall establish radio-telephone communications with the dredger when they are 5 miles from it. In this communication, they will indicate the place they estimate that the vessel will meet the dredger and any other information which they consider necessary for the safety of navigation of both.

7. San Carlos will keep vessels informed of all the circumstances mentioned above, especially the time and place that each of them estimate to pass close to any dredger which is operating in the outer channel, and in order that they do not meet the dredger simultaneously.

8. Masters of vessels will inform the Pilot Station at San Carlos of any other information which the latter may request.

9. Masters of vessels will keep a watch on Channel 16, on the order of the Official Pilot, until their arrival at port of destination in Maracaibo Lake and on leaving until the Pilot has left the vessel.

10. Pilots, when they are bringing a vessel into the port, at the level of the parallel of Palmas del Norte Point (Buoys T – 55 and T – 56), will call up the Port Captaincy and transmit the following information:

(a) Name of vessel
(b) Time
(c) Port where operations will be effected
(d) Name of Pilot calling.

11. When the vessel continues to navigate to the South of Gene Rafael Urdaneta Bridge, the Pilot will inform the Control Offic Maritime Transit in Maracaibo, the time at which the vessel will p Buoy "B – 79".

12. The average speed of vessel in the navigable channels wil ten (10) knots, Masters being authorised as are also Official Pilots alter this, when the safety of navigation may require it.

13. San Carlos will check by radio-telephone the transit of vess from the Entrance Buoy "EM" to the level of the parallel which pass in front of Palmas del Norte Point (Buoys T – 55 and T – 56 and v versa).

14. Loaded vessels navigating outwards, and being in the ou channel, will have priority over vessels coming in to the same chan provided that these do not meet with those coming out in the crit zone, included between Buoys B – 21 and B – 22 and E – 33 a E – 34. For this purpose, the San Carlos Pilot Station will inform enter vessels the situation of leaving vessels so that they may take necess measures to avoid meeting those vessels coming out in the refer zone.

15. The Port Captaincy will check via the office of Control of Marit Transit, the Navigation of vessels, from the parallel passing Palmas Norte Point (Buoys T – 55 and T – 56), as far as the terminals and p to the South of General Rafael Urdaneta Bridge and vice versa.

16. Every Official Pilot navigating outwards when passing Buoy B – 72, will call up San Carlos by radio-telephone and will sup the following information:

(a) The time that he is passing Buoy B – 72.
(b) The time that he is arriving at San Carlos.

17. When the dredger receives any call from a vessel it will g information as follows:

(a) Location where it is at that time.
(b) Direction of dredging (South North or North South).
(c) The side on which the vessel must pass.
(d) Time necessary to make the manoeuvre indicating on which s of the channel dredging will continue after the manoeuvre.

18. The Pilot Station at San Carlos will be attentive to communications made and will take note of them, in the event that t intervention may be required by dredgers or by vessels.

19. Any vessel sailing from any port in the No. 2 Pilotage Area Maracaibo, will inform the Port Captain as follows:

(a) Type and name of vessel.
(b) Where from and time of leaving the port.
(c) Speed and port of destination.
(d) Estimated time of passing Buoy B – 72.

Signed – Port Captain.

Hours of watch:

4222, 6531.5 kHz	0100 – 1300 hrs. GMT
8461, 17141.5 kHz	1300 – 0100 hrs. GMT

Cables for vessels may also be routed via Curacao Radio, call sign PJC.

Radio notice of arrival should be sent 72 hours prior to arrival at La Salina and corrected if weather or other conditions delay the vessel.

Vensport La Salina handle all communications between vessels and Lagoven Terminal control tower. VHF radio-telephone Channel 16 (156.8 MHz) may be used for initial contact. Channels 6, 10, 13 and 14 are also available on a 24 hour basis.

All vessels en route to La Salina may also communicate with Lagoven Amuay or Caripito Marine Offices and request that messages dealing with corrected ETAs, Pilots and other business be relayed to Vensport La Salina.

VHF: Transmit on VHF when passing Aruba or Amuay Bay updated ETA messages to either Lago Marine or Amuay Marine for relay to La Salina. Contact Vensport La Salina on VHF when within reach (normally after passing General Urdaneta Bridge) for latest berthing instructions.

TUGS: Lagoven S.A. maintains one 3,000 h.p. diesel tug and one 1,300 h.p. diesel tug. Tug-boat assistance is considered essential and is afforded to all vessels entering, leaving or shifting in the harbour.

Additional tugs can, in an emergency, be ordered from Maracaibo. The tugs are usually employed in the alongside mode and are made fast using their own ropes (2.5 in. diameter nylon).

BERTHING: At La Salina, Lagoven maintains a deep-water terminal (Lacustre) consisting of an island where are located 2 finger piers, each 1,100 ft. in length and 500 ft. between piers, providing 4 berths to accommodate tankers up to 112,000 d.w.t. Berths are numbered 6N, 6S, 7N and 7S, from North to South. At these berths various products can be loaded simultaneously namely – 6N and 6S – Crude, Naphtha and Butane; 7N and 7S – Crude; Pier No. 3 (West side), Propane and Butane; Pier No. 3 (East side), same as West side but not concurrently with West side. In addition there is an offshore platform (Pier No. 3) where liquefied petroleum gases (Butane and Propane) can be loaded.

Instructions concerning berthing are given by Vensport La Salina by means of radio-telephone.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

The tugs are made fast on the seaward side, one forward and one aft. Vessels berth under normal circumstances always with head in, which is a relatively simple manoeuvre. Vessels are berthed starboard side alongside Berths 6 North and 7 North; portside alongside at Berths 6 South and 7 South.

When the vessel's bow is between two and three ships' lengths from the head of the pier, the engines are stopped or reversed. The vessel then slowly enters the berth parallel to and about 40 ft. from the continuous fender face. When the vessel's bow is just past the berth's manifold area, the forward spring line is sent in by heaving line. The vessel is then positioned by using its ropes and is pushed alongside by tugs. The current sets mostly in a general Northwesterly direction with a velocity between 0 and 2 knots. This should be taken into account, particularly when berthing at the South facing berths where the vessel may be set onto the pier.

Moorings: Mooring bollards spaced with 80 ft. intervals are located on both sides of the pier, and provide the basis for a potentially excellent mooring configuration consisting of:

3 Head lines
3 Stern lines
2 Breast lines
1 Forward, Spring line and
1 Aft Spring line.

BALLAST: Vessel should arrive at La Salina with sufficient ballast to permit safe handling. Government Pilot requirements in this connection under normal weather conditions are interpreted as drawing approximately 8 ft. forward, 18 ft. aft, on a T – 2 or similar type tanker, and 11 ft. forward, 20 ft. aft on a 26,000 d.w.t., on larger type vessels the minimum draft required is 14 ft. forward and 22 ft. aft.

Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

It has been established that one of the major causes of contamination of crude oil is the relatively small amount of salt water remaining in the ship's tanks, pumps, and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and downtime to refining equipment, besides presenting many other processing problems.

It is therefore requested that the full co-operation of the Master and Officers of ships loading for Aruba, be given to ensure that all ballast tanks and lines are flushed with lake water and stripped as dry as possible.

Vessels equipped with a separate and completely segregated system of ballast tanks, lines and pumps, will be permitted to discharge ballast and load cargo simultaneously, providing approval of both the pier foreman and Petroleum Inspector is secured.

A Pier Supervisor who is in direct communication with the loading pumphouse is stationed at each pier during the entire time the vessel is discharging ballast or cargo or receiving cargo.

All dirty ballast must be discharged ashore. The terminal has a 100,000 bbl. reservoir connected to two high capacity separator units. Max. ballast discharge is 40,000 bbls./hr. with max. 130 p.s.i. at rail. One or two hard arms (12 in.) are usually connected for ballast discharge.

If it is desired to follow the "load-on-top" procedure it is requested that the marine representative be informed on arrival.

POLLUTION: There are no shore facilities to recover an oil spill. The Venezuelan authorities take a very serious view of oil pollution and heavy fines are imposed for violations of the strict pollution rules. A government representative is stationed at the terminal. It is therefore important that all precautionary measures be taken and spills avoided. In case of a spill, the port services section should be informed immediately by VHF or telephone, which is located on the pier. The use of dispersants or detergents on the water is not permitted.

LOADING: Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on arrival. Supplementary information including number and size of lines and Chicksan arms will be furnished to the Chief Officer before loading commences. Loading rates will be reduced as required when topping off. If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Shut-down controls for all crude oil pumps are available at each loading berth at ship's rail of loading vessels for use in case of emergency only.

LOADING RATES: Loading operations at La Salina Terminal are normally carried out at relatively high pumping rates; up to an average of 40,000 bbls.p.h. Ship's officer will be advised by the pier supervisor at what rate the cargo will be loaded. LPG is loaded up to an average max. rate of 7,500 bbls.p.h. at Platform No. 3.

During periods of calm, loading of gasoline or other similar low flash products may be at lower rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ships' officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Cargo Handling: The terminal is mainly a crude exporting facility, but also LPG, bunkers, condensate and gasoline are handled.

The cargo transfer facilities are:

Berth 6 North and South:
3 × 12 in. Chicksan arms for crude loading.
1 × 8 in. Chicksan arm for bunkers (located aft of manifold).

Berth 7 North:
4 × 12 in. Chicksan arms for crude loading.
1 × 8 in. Chicksan arm for bunkers (located aft of manifold).

Berth 7 South:
4 × 12 in. Chicksan arms for crude loading.
3 × 12 in. Chicksan arms for pressurised gas loading (located forward of crude loading manifold)
1 × 8 in. Chicksan arm for bunker (located aft of manifold).

Gasoline, condensate and pressurised butane are handled at Berth 6 at both sides of the manifold.

All connections are standard 150 ASA bolt hole flanges.

The emergency cargo stop button is located in the operators' shelter on both piers.

Crude loading rates up to 50,000 bbls./hr. can be provided.

The loading and discharging of all crude petroleum and its products will be stopped during the passage of an electric storm and ullage covers must be closed and dogged down.

Cautionary Advice: Whenever non-matching flange sizes necessitate the use of reducers (spool pieces), Masters should insist that the reducer or hard arm be adequately supported by a proper jack, and should refuse to let cargo transfer operations commence before a satisfactory vessel manifold and hard arm connection has been provided.

MEDICAL: Complete medical, dental and hospitalisation facilities are available at La Salina. Medical treatment is provided at a private clinic.

Authorisation forms for medical treatment are provided which require the Master's signature. Transportation will be supplied by Vensport La Salina.

If the patient does not speak Spanish or English, an interpreter should accompany him.

DENSITY: Average density at the berth is 1002 but varies dependent upon amount of rainfall. The temperature ranges from 82°F. to 86°F.

FRESH WATER: A limited supply of fresh and boiler water is available at La Salina Lacustre Terminal. Delivery is made through 2.5 in. National Standard Fire Hose Thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker C fuel oil, marine diesel and intermediate fuels are available at La Salina Terminal Lacustre. Delivery is made alongside Piers 6 or 7 by 8 in. diameter Chicksan hose, located about midships.

Loading Rates: Bunker "C" and intermediate – 3,000 bbls.p.h. Diesel – 2,000 bbls.p.h.

It is the responsibility of the ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

Supplies of lubricating oils in drums are available. Delivery will be effected while loading and requirements should be incorporated in the radio ETA.

FIRE PRECAUTIONS: The recognised fire alarm signal is 4 long blasts with ship's or tug's whistle. An 8 in. fire water main line runs alongside all 4 berths with numerous double 2.5 in. outlets for connection to ship's hoses. Four elevated water/foam monitors are located on each pier providing relatively good fire fighting protection for the main deck area.

The 2 tugs are also equipped with elevated fire water/foam monitors, though on board foam storage capacity is relatively limited.

CONSULS: The following countries have consular representatives in the area:

Belgium
Chile
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Netherlands
Nicaragua
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

REPAIRS: Vensport's Port Staff will assist with emergency repairs as may be required in each case depending upon availability of competent personnel and equipment. The company's shop facilities while not equipped for extensive ship repairs, may be made available to fabricate or repair items that are urgently required.

The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

Radio technicians are available for minor repairs. With sufficient advance notice a radar specialist can be arranged to board the ship at La Salina.

TIME: GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to Pilot undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking. No launch service for liberty parties is available while vessel is anchored off La Salina awaiting berth.

GENERAL: Representatives of Vensport La Salina board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ships' requirements. The office building is located at the Pier Head Trestle and personnel are available for assistance at all hours.

(a) Bonded Stores. Cigarettes or other stores in bond are not obtainable in La Salina.

(b) Cash Advances. Cash advances are made in local currency, the Venezuelan Bolivare. Cash requirements should be included in the radio ETA.

(c) Charts. On first arrival of each tanker, the Agency Dispatcher will furnish a set of local charts if required. No supplies of U.S. Hydrographic or British Admiralty charts, or sailing directions, are available.

(d) Classification Societies. American Bureau and Lloyd's Register have non-exclusive Agents in Maracaibo, and qualified Masters and Chief Engineers are available for appointment as Surveyors when required.

(e) Gangways. All vessels using the Port of La Salina must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(f) Plimsoll Marks. The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels may be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(g) Port Services. On arrival at La Salina Terminal, a company representative boards vessels, so it is particularly requested that Masters make known to him all ship's requirements. Master should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. La Salina also has radio telephone communication with North and South America and Europe. For further information contact Vensport in the terminal building, Tel. 88491 and 88492.

(h) Rat-guards. By order of the Port Authorities, vessels are required to use ratguards on all mooring lines.

(i) Personnel – Seamen left ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason, documents and personal effects are to be delivered to the Vensport Office in La Salina before sailing. A letter is required from the Master advising maximum advances to be made to seamen if any, and instructions concerning repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or Owner, responsible for any seamen left behind in Venezuela.

(j) Provisions and stores. Fresh and dry provisions are supplied by various Ship Chandlers in Maracaibo and Cabimas (La Salina). Master should deliver his signed requisition to the Vensport Office representative who boards on arrival. Provisions would then be delivered to the vessel while loading. The prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc., are competitive; dry stores are considerably higher than in most ports. The Fleet Steward will assist in filling requisitions. It is important that the Master sign the Ship Chandlers invoice as authorisation for the Marine Department to make settlement.

(k) Mail. Any pending ship's mail will be delivered on board by the Vensport Dispatcher on arrival at La Salina. At same time he will receive ship's mail to be dispatched. The Vensport Dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises the postage by signing 7 copies of the Company Postal Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter.

Copy of this list will be returned aboard the vessel when leaving port outward bound. If not ready on time, it will be airmailed to the vesse next port of call.

(l) Inspection of Petroleum Products and Crude Oil. Chas. Marti Company and E. W. Saybolt petroleum inspectors are availabl specified.

(m) Laundry. Laundry service is available between 0700 hrs. a 1700 hrs. on week-days. No guarantee can be given on time of delive

AGENT'S NOTICE: December 1987.

TO ALL MASTERS CALLING AT LA SALINA

We would like to draw your attention to the following:

(a) Terminal of La Salina is an artificial island. For safety reaso during your vessel's call, a permanent (24 hours) taxi service been arranged to take you and your crew from island to main g and vice-versa.
(b) This taxi service MUST NOT be paid for by you or your crew.
(c) No idling or walking around the island and/or terminal is allow
(d) It is impossible to go through La Salina's main gate without Harbour Office Shore Pass duly filled in with name, nationa vessel's name, passport number and date.
(e) Your agent's call name at branch office of La Salina is "Agem La Salina", standing-by 24 hours on VHF Channel 16, telepho numbers 45665 and 43089, direct line of Lagoven 3235. Agenc call name at main office also standing-by 24 hours on V Channels 12, 14 and 16 is "Agemar Maracaibo".
(f) Whenever calling "Agemar La Salina" and no reply is obtain please contact "Agemar Maracaibo" and leave your message.
(g) If an emergency arises concerning bunkers or cargo, you m contact Lagoven's employee-in-charge of the pier at the sm house beside the vessel or call by the telephone of the pier to t Loading Master, Tel. No. 3587, 3304 or 3258.
(h) Launch operator's call name is "Servicios Portuarios" on V Channel 16 (24 hours), Tel: 3491 and 3492. In case you need contact Lagoven, there is always an employee on the pier wi telephone. Bunkers or water facilities are available at this pier.
(i) Water and bunkers are available at Piers No. 7 and No. 6. Wa is taken through vessel's hose while bunkers by shore's Chicks or rubber hose.
(j) Two hours before loading operation finishes, a radio call sho be made to "Agemar La Salina", so that arrangements for p tugboats and other sailing procedures can be made. (*)
(k) In case of oil spillage, an immediate call should be made "Agemar La Salina" or "Agemar Maracaibo", giving the name your P & I Club. We will contact the area representative a request their assistance.
(l) It is recommended that a crew member stands-by on VHF, o hour after vessel finishes loading.
(m) Maximum sailing draft is 39 ft. 00 in. even keel – NOT ONE IN MORE.
(n) Crew Disembarking – In order to obtain 25% discount on air tick and to cover IATA Regulations, Master must issue a le addressed to Agemar requesting the tickets and mentioning na destination, passport number, nationality, age. If any exc luggage (only 40 kgs. allowed per person), Master has to autho same and inform agents. Our agent at Maiquetia Airport will t charge of this expense on behalf of Owners. Weighing of bagg should be done onboard and letter must be done on vessel's offi paper, signed by Master and with the vessel's stamp on it. C members disembarking have to keep their Shore Passes. *All c shore passes must be returned to the Agent and he must informed whether all crew members are on board.*
(o) Medical Attendance – Call immediately "Agemar La Salina" a send the person that is sick to the hospital, by the taxi, also Lagoven's Control Tower. Taxi has a visible identification that s "Linea Zulia". Taxi driver will not only take the crew membe the hospital but will also pick up Agemar's agent and service o as well.
(p) No external painting of vessel (hull) is allowed while berthe anchored. It is forbidden to deballast from cargo tanks (clea dirty) into the lake. Heavy fines will be imposed on those complying with these regulations. Smoking is not allowed o piers.

(*) Please call by VHF Channel 16 to "Agemar La Salina", toda 1800 hours local time, informing the estimated time of completio loading.

Section D

MARACAIBO: 10.42 N. 71.39 W.

On the N.W. shore of the Lake Maracaibo.

Maracaibo is the capital of the State of Zulia and seat of all Govern and Consular Offices, as well as the port of entry for all vessels lo at one of the Terminals in the Lake of Maracaibo.

(N.B. For information details of Documentation, Pilotage etc. "Maracaibo Lake").

Also see "Shipmaster's Report" before Bajo Grande.

ANCHORAGE: The Pilot will not con the ship into the anchorag will indicate the proper location to anchor. Care should be taken be of small boats and ferry traffic.

ACCOMMODATION LADDER: Vessels must provide accommodation ladder. The use of trunk ladders, pilot ladders, e contrary to port regulations. Port Authorities will board only by m of an accommodation ladder. It is recommended to rig this in a to avoid unnecessary delays.

BOARDING PARTY: The boarding party usually consists of the following persons: One Quarantine Official, Two Customs Officials, One Port Captain's Representative, Two representatives (Agent and Mooring Master).

RADIO: "Radio Marina" transmits information of interest to navigation every day from Monday to Friday from 1000 hrs. to 1015 hrs. and from 1600 hrs. to 1615 hrs. on frequency of 4,420.7 kHz in the 60 m. band, output 1 kW. All bunker, lubricating oils, water and other requirements should be included in the cable giving ETA of the vessel.

TUGS: Service not compulsory, assistance is rendered if required by the Harbour Master.

BERTHING: The manoeuvring area within Maracaibo harbour has a depth of 26 ft.

		Length	*Depth alongside*
Wharf No.	1	106 m.	15 ft.
" "	2	106 m.	15 ft.
" "	3	159 m.	15 ft.
" "	4	159 m.	22 ft.
" "	5	135 m.	25 ft.
" "	6	135 m.	26 ft.
" "	7	135 m.	26 ft.
" "	8	135 m.	26 ft.
" "	9	120 m.	25 ft.
" "	10	120 m.	22 ft.
" "	11	120 m.	22 ft.
National Brewery Wharf		125 m.	19 ft.
Regional " "		120 m.	21 ft.
New Pier (2 berths)		—	30 ft. – 33 ft.

STEVEDORES: Normal working hours 0700 – 1100; 1300 – 1700 and 1800 – 2300 hrs.

MEDICAL: Complete medical services are available.

FRESH WATER: All wharves supplied with fresh water by 2 in. hoses. Rate 15/20 t.p.h. Fresh water also available from local contractors with barges.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available at Maracaibo from local contractors with barges. Supplied only by barge at the wharves or anchorage. Lubricating oils are also available.

CONSULS:

	Telephone		Telephone
Belgium	3235	Italy	—
Colombia	72232	Mexico	6781
Costa Rica	6511	Netherlands	4621
Denmark	6531	Nicaragua	76703

Germany	76061	Spain	71118
Great Britain	6169	Sweden	6511
Guatemala	71193	United States	2123

REPAIRS: No major repairs facilities are available; however, repair work can be done through local machine and electrical shops, and shore labour can be furnished if required. Radio and radar technicians are also available.

AIRPORT: International Airport "Granode Oro" situated N.W. of Maracaibo City served by many national and international airlines. A second airport with cargo and passenger services is situated at Santa Barbara del Zulia, on the banks of the Escalante River.

HOLIDAYS: All Sundays; 1st January; Good Thursday and Friday; 19th April; 1st May; 24th June; 5th July; 24th July; 12th October; 24th October; 18th November; 17th December; 25th December.

POLICE/FIRE/AMBULANCE: Police tel. 3821; Fire tel. 6585; Ambulance tel. 2209.

TELEPHONES: There is no service for connecting telephones on board vessels. Public telephones are situated in the warehouses adjacent to all wharves.

PROVISIONS: Fresh and dry provisions are available through ship chandlers in Maracaibo for delivery at Maracaibo Harbour or at the terminal.

SHORE LEAVE: Launch service in the Maracaibo harbour is readily available for official ship business. For personnel shore leave, depends on launch availabilities on arrival.

SHIPMASTER'S REPORT: 1976

Communication: Considerable difficulty was experienced raising La Guaira Radio Station (YVG) for transmitting the necessary ETAs. Our messages were transmitted via Portishead (GKR). Agents, however, advised that messages are normally transmitted through Curacao (PJC).

Pilotage: Masters making their first visit to the port are to embark the Pilot at Punta Cardon (Paraguana Peninsula). Ample notice must be given to the Agents as the Pilot has to be flown there from Maracaibo. Masters making their first visit to Maracaibo must also disembark the Pilot at Punta Cardon on departure. Masters may thereafter proceed directly to San Carlos Pilot Station.

Communications can be made through the Harbour Master's Office Punta Cardon.

Delays experienced off Punta Cardon did not occur on this particular occasion. Pilot boards and normally rests in the pilot's cabin until 30 minutes from the "EM" Buoy.

Berthing: 2 tugs are compulsory for vessels berthing/unberthing when the vessel's length exceeds 476 ft. All other vessels 1 tug compulsory.

Stevedoring:

Normal working hours (Monday – Friday)	0700 to 1100 hrs.
	1300 to 1700 hrs.
	1800 to 2300 hrs. (Overtime)
(Saturday)	0700 to 1200 hrs.
(Sundays & Public Holidays)	*No work.*

Vessels must be fully rigged and hatches open and ready in all respects to load or discharge at least 15 minutes before stevedores arrive. If necessary shore labour is available to assist.

SHIPMASTER'S REPORT: 1975.

Arrival Messages: Cable Agent – Maracaibo via La Guaira Radio on departure Cristobal with ETA Punta Cardon, draft, cargo stowage, gangs required and requirements. (For subsequent calls vessel will be permitted to proceed to San Carlos Pilot Station to embark Pilot).

24 hours prior to arrival repeat ETA Punta Cardon, to be sent as described above.

2 hours before arrival at Pilot Station – Punta Cardon call on VHF Channel 12 to update time of arrival.

Pilotage: Pilot boards at Punta Cardon about 1 mile off the tanker berths from a launch with a "roof landing", therefore the pilot ladder must be about 6 ft. from the water. This Pilot travels from Maracaibo to meet the vessel at Punta Cardon and takes the vessel all the way to Maracaibo. Punta Cardon to "EM" Fairway Buoy – 78 miles. "EM" Buoy to Maracaibo – 35 miles.

Once the vessel has made a call at Maracaibo the Master is then exempt and may take his vessel direct to the "EM" Buoy and negotiate the buoyed channel for 12 miles to San Carlos Pilot Station. The channel is straight, wide and the buoys are well lit and marked. A Westerly set is said to prevail across this channel from the "EM" Buoy to San Carlos Pilot Station but it was not evident on our passage in or out. However, a strong ebb tide was noticed running out to sea off San Carlos Pilot Station. The channel from the "EM" Buoy to Maracaibo is dredged to 41 ft. but off the berths at Maracaibo the maximum draft is 26 ft. There had been a lot of unseasonal rain prior to our call and we noted that the density of the dock water was 1001.

Documents:

1 Health Declaration.
8 Stores Lists.
8 Crew Lists.
6 Passenger Lists (If no passengers these papers have to be entered as "Nil" passengers).
8 Crew Declaration Lists.
2 Venezuelan Manifests (Sent from N.Z.).
2 Sets Bills of Lading (Sent from N.Z.).
12 Sets Tally Books (Sent from N.Z.).

Stevedores: "Servicios Portuarios de Maracaibo".

They have 24 gangs in the port and mechanical equipment to support 16 gangs. Normal working hours are 0700 – 1130 and 1300 – 1630 hrs. Overtime 1800 – 2230 hrs. Saturday 0700 – 1200 hrs. No work on Sunday.

The labour works well but is not accustomed to working refrigerated ships and when the gangs work into the wings the Agent had to supply the men with warm clothing and hot coffee. Their discharge rate for cartons of frozen cream was 18 t.p.h. In hindsight I would suggest that it would be advisable to stow frozen cream for Maracaibo in a hatch square if possible to obviate the need for the labour to go into the wings as the complaint about the "cold" does not arise until this happens. They had 14 open trucks laid on to take the cartons of cream direct to the butter works and they had an unbroken flow so the "hook" was not held up on this account.

Berthing: There are berths for 6 ocean going ships and they say they can berth these ships up to 26 ft. Tugs are available and because of berthing starboard side to we used 2 tugs. The berths are concrete with rubber fenders and there is plenty of working space for the mechanical vehicles. The Pilots speak a little English but sufficient to make themselves understood and are capable. Fresh water is available alongside but I understand if bunkers are required they have to be brought by barge and there is a minimum charge of $1,000 irrespective of the amount of fuel required. They have a repair facility which is in the hands of a local engineering company. Fresh vegetables are available and can be recommended, supplied by the only providore. He maintains a listening watch on Channel 16 VHF and has a liaison with Agents for any messages sent prior to arrival at the berth. His station is called Automercado Venezia.

Section E

EL TABLAZO: 10.45 N. 71.32 W. (See Plan)

(N.B. for important details of Documentation, Pilotage, etc., see "Maracaibo Lake".)

Also see "Shipmaster's Report" before Bajo Grande.

LOCATION: S.E. part of Puerto Miranda. Entrance by Buoys 63 and 64. Distance from San Carlos Pilot Station 16.5 miles.

MAX. SIZE:

Monovinyl Chloride	420	,,	37.8°C
Ethylene	80	,,	−104°/−70°C

Cargo Equipment:

North Berth:	One urea in bulk loader Cargo capacity 650/700 t.p.h.
South Berth:	Three urea in sacks conveyors. Cargo capacity 2,400 sacks of 50 kg. each per hour.

DENSITY: 997 – 1003.

FRESH WATER: Available, 8 t.p.h., but expensive.

OPERATOR: Petroquimica de Venezuela, S.A., (Pequiven) – El Tablazo, Apartado 159, Manejo de Productos, Maracaibo, Estado Zulia, Venezuela. *Tel:* 311-388. *Telex:* 23206. *Contact:* Captain Antonio Parcero.

PUERTO MIRANDA: 10.46 N. 71.34 W. (See Plan)

(N.B. For important details of documentation, Pilotage, etc., see "Maracaibo Lake").

LOCATION: Situated at Eastern shore of entrance to Lake of Maracaibo, in position Lat. 10° 46' N., Long. 71° 34' W.

OPERATOR: Maraven, S.A.

DOCUMENTS: On arrival the Master must present to the Port Authorities the following documents:

1 copy Clearance (Note: If the vessel was diverted, Master has to present a telegram in which vessel received instructions to proceed to Puerto Miranda).
8 copies Crew List.
3 copies Stores List.
1 copy Vaccination List.
3 copies Personal Effects Lists.

Vessel sailing for U.S. ports requested to have American Crew List ready on arrival so it can be forwarded to U.S. Consulate without delay.

PILOTAGE: Compulsory. On arrival Puerto Miranda under Government Channel Pilot's assistance, the vessel will be boarded by Government Berthing Master, who will assist Master in docking and undocking.

For Channel Pilot see "Maracaibo Lake".

ANCHORAGES: North anchorage area is situated at Northern par the exit channel and is marked by the Buoys No. B57B, AP1, AP2 a AP4. Maximum depth 10.0 m.

South anchorage area is situated at Southern part of the exit chan and is marked by Buoys No. B59, AP3, AP5 and B63. Maximum de 10.36 m.

RESTRICTIONS: There are restrictions for docking and undocking wh strong currents are running.

MAX. SIZE: Length 910 ft., breadth 147 ft., draft 39.5 ft.

HEALTH: On arrival, when Pratique is requested, all vessels should international flag signal "Q", or show a yellow light during hours darkness. Customs will grant Free Pratique only when they are on boa

RADIO: All information such as ETA, ballast, etc. may be sent throu Curacao Radio. Telex No. 1143-6472.

Puerto Miranda can be contacted by Telex No. 61115.

VHF: Channels 16 and 12. Vessels are requested to call Puerto Miran about 3 hours before arrival at the port. Calls made in Spanish langua will be answered promptly, as there is always a Spanish-speaking cl on duty. Calls in English will be answered by the Supervisor on du except when he is occupied, in which case the call should be repeat later. As an alternative, the Master could ask Government Pilot to rep in Spanish his arrival to Puerto Miranda.

TUGS: 2 motor tugs of 4,200 h.p. assist all vessels in docking a undocking. Tugs always used as required by pilots.

BERTHING:

Jetties/Berths	Depth M.M.O.L.W. (ft.)	Maximum Permissible Draft (ft.)	Maximum Permissible Length (ft.)	Maximum Permissible Displacemen (tons)
Jetty No. 2				
1 (North Outer)	42	39.5	910	90,000
2 (South Outer)	42	39.5	910	90,000
3 (North Inner)	35	34	†575	62,000
4 (South Inner)	28	27	‡575	62,000
Jetty No. 3				
5 Inshore (North Seaward)	42	39.5	910	90,000
6 Inshore (South Seaward)	42	39.5	910	90,000

Remarks: Alongside UKC for ships up to 700 ft. LOA = 1 ft.
Alongside UKC for ships over 700 ft. LOA = 2 ft.

(†) LOA in Berth No. 3: This can be increased up to 620 ft. whene vessel on Berth No. 1 has LOA up to 555 ft.

(‡) LOA in Berth No. 4: This can be increased up to 610 f Berth No. 2 or 5 are empty when vessel arrives, then Berth No. 2 h to be temporarily restricted to vessels up to 665 ft. LOA

The alongside drafts are subject to reduction owing to depth in in and outer channels.

Vessels drawing over 37 ft. 06 in. will proceed according to mo sailing draft table issued by Maraven, S.A.

MEDICAL: Written request for medical attendance, as well as a sh pass, is always required. Master must inform by telex how many c members will be sent to Maracaibo through the Agent. Ample hosp facilities available at Maracaibo.

TANKERS: Discharge lines 12 in.

Tank cleaning and dirty ballast facilities up to a maximum of 25% vessel's deadweight.

Discharge of waxy slops and sewage water is forbidden.

Maximum receiving rate for ballast discharge 1,000 t.p.h.

Maximum loading rate 6,000 t.p.h.

Winds are mainly from the N.E. quadrant.

Vessels of any deadweight must secure with at least:

Forward: 4 headlines; 4 breasting fibre ropes and 1 spring in Be No. 1 and 2.

Aft: 2 stern lines; 4 breasting fibre ropes and 1 spring in Berths N and 2.

In Berths No. 3, 4, 5 and 6. Forward: 2 head lines; 4 breasting and 1 spring.

A suitable gangway will be provided by the shore installation. W it is out of order vessel's gangway has to be used.

The terminal assist in the event of any vessel spillage; but the Ma is obligated to make his own arrangements to control the spillage.

BALLAST: *Agent's Notice:* September 1987.

For your guidance please note Maraven's tariff stipulates an addi charge of U.S.$515.00 per hour for extra berth occupation coverin delays attributable to the vessel (tank cleaning, repairs, etc.).

It is important that vessel arrives with tanks in suitable condi load as per charter party.

If tanks are not accepted by Inspector, the Terminal will ch additional berth occupancy as per above, and if vessel procee anchorage for further cleaning, Terminal fee (tugs and launch for ru lines) will be charged again in full for second docking.

The volume of ballast accepted without extra charge to the ves up to 25% of her Summer deadweight.

For vessels over 115,000 S.D.W.T., volume in excess of 28,75 ballast also applies.

DENSITY: Density of water at berths 997-1003.

Density of water in outer channel 1015-1025.

FRESH WATER: Available at all jetties at a loading rate of be 20 t.p.h. to 30 t.p.h., depending on number of vessels being sup any one time. Approximate cost is U.S.$4.0 per ton.

FUEL: Available ex-wharf: Bunker "C", thin fuels from 200 to seconds Redwood, and marine diesel. Delivery rate 400 t.p 80 t.p.h. respectively.

Gas oil, fuel oil and thin fuels may be supplied by barge ex-Mara delivered at anchor at a maximum rate of 110 t.p.h. and 140 t.p

Notice in advance is requested for delivery.

FIRE PRECAUTIONS: Any hot work is forbidden whilst alongs Pier. Terminal approval is compulsory for any special requirem

CONSULS: On all Italian vessels, the Consul comes on board on Other Consulates are at Maracaibo: Colombia, Netherlands, P

Peru, Spain, Great Britain, Guatemala, Switzerland, U.S.A., Chile and Portugal.

REPAIRS: There are small workshops in the area. Contact Agent on arrival.

SURVEYORS:

(1) Cargo Inspectors:

Saybolt. Telex 61120 Maracaibo. Tel: 76975.

Caleb Brett. Telex 23333 Caracas. Tel: (02) 325875.

Inspecciones C.A. Telex 62292 Maracaibo. Tel: 78642.

AIVEPET. Telex 21050 Caracas. Tel: (02) 9860422.

Chas. Martin. Telex 62451 Maracaibo. Tel: 78651.

S.G.S. Telex 23324 Caracas. Tel: (02) 338569.

(2) Surveyors:

Lloyd's Register, American Bureau, Bureau Veritas and Norske Veritas.

CUSTOMS ALLOWANCES: One opened packet of cigarettes allowed to be taken from vessel by each crew member when going ashore. When a crew member signs off, he must present his personal effects to the Customs.

REPATRIATION: Crew changes and repatriation possible. All the arrangements are made by the Agent.

AIRPORT: An International Airport is situated in Maracaibo City. It is served by National and International Airlines. All arrangements through the Agent.

TIME: GMT minus 4 hours.

HOLIDAYS: Do not affect port operations, port works throughout 24 hours, 7 days a week.

POLICE/AMBULANCE/FIRE: All contact must be made in Spanish language. The supervisor will assist in making contact.

Telephones: Police 169. Fire 166. National Guard 168.

EMERGENCY CO-ORDINATION CENTRE: Port Captaincy at Maracaibo, Tel: 9-0-223279 or VHF Channel 16.

TELEPHONES: Whilst alongside, a telephone is placed on board for operational purposes, emergency and internal communication with Maraven telephones. There is no charge.

SERVICES: Radar repairs, R/T repairs, gyro-compass adjusting and all types of electronic repairs.

BANKS: The nearest bank is located at Los Puertos de Altagracia or at Maracaibo City.

STORING: Vessel can be stored by barge or truck; but it is strictly prohibited by barge during loading or discharging, likewise it is prohibited for truck to proceed alongside the ship during loading or discharging.

SHIP SUPPLY SERVICES: Available in Maracaibo. Contact to be made through the Agent.

SHORE LEAVE: Not granted until shore passes are stamped and signed by Authorities. Passport and shore pass required by all crew members going ashore. Passes must be shown to guards at gangway and gates. Crew members must be properly dressed before proceeding ashore. Master must collect all passes and return them to Agent before vessel's departure.

DELAYS: Delays can be expected during deballasting if the levels in the pits are high.

GENERAL: *(a) Tides:* In view of the changing depth in the channels which allow navigation to vessels up to about 70,000 d.w.t. fully laden at high water, permanent predictions of sailing draft tables have been prepared by Maraven S.A., and they will send these on board ships of over 47,000 d.w.t.

(b) Currents: The tidal current (Lunar tide) at this port can at times be very strong and subject to changes. Usually the outgoing tide runs for 7 to 8 hours against 4 to 5 hours for incoming tide. Direction approx. at right angles to jetty.

(c) Movement of Passengers: Embarkation or disembarkation of passengers through this port is not allowed by Venezuelan Law, as this Terminal is only authorised by the Treasury Ministry (Ministerio de Hacienda) exclusively for exporting crude oil.

(d) Failure to Rejoin Vessel: If any member of crew is not aboard at sailing time, Authorities will not clear vessel although permission may be given to proceed to anchorage if the berth is required. If sailing permission is granted, Master is required to sign letter accepting all costs in connection with this matter being for Owner's account.

(e) Launch Service: Masters who have to go on business to Maracaibo can make use of public service launches. Please contact your Agent.

(f) Guards: Custom Guards (Guardia Nacional) will be posted on all vessels and Masters are reminded that these guards must be accommodated and treated in the same manner as ships' officers. Non-compliance entails not only a fine but will result in delays in clearance and cargo operations.

(g) Visitors: Only persons on business allowed on piers. Visitors, as guest of Master, allowed to board vessels provided a written and signed request presented by Master to Port Services Department. Further particulars covering procedure for obtaining permits for visitors can be obtained from Port Services Office.

(h) Charts – Nautical Publications: On arrival of each tanker the Agency Representative will furnish a set of lake charts if required. No supplies of U.S. Hydrographic or British Admiralty charts or Sailing Directions, Nautical Almanac, etc., are available at this port.

(i) Films Exchange: Films may be exchanged at Maracaibo.

(j) Fire Alarm: Each Thursday morning at 1100 hrs. there will be a test of fire alarms including sirens at the wharves.

(k) Cash Advances: Local currency is Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in vessel's radio ETA, to permit delivery on board on arrival.

REGULATIONS: Following regulations should be strictly observed by the vessel's crew whilst alongside or at anchor. Non-compliance with these instructions entails not only a fine but delays in cargo operations.

1. Use of rafts for painting the ship's sides is strictly prohibited.
2. Lifeboats should not be lowered without the special permission of the Government Port Captaincy.
3. Swimming in the harbour is strictly prohibited.
4. Waste water, sanitary or other must not be discharged on jetty.
5. It is strictly prohibited to paint ship's name or others on jetties. When this occurs the vessel will be charged for the cleaning.
6. Painting in ships alongside is strictly prohibited.
7. Before start of cargo operations it is compulsory to execute all requirements established in the Check List.
8. It is necessary to keep a close and constant watch on moorings and to adjust when necessary. When adjusting, call for assistance of tugs before slackening off any mooring lines, if the current is setting the vessel off the pier.

SHIPMASTER'S REPORT: December 1992.

Gangway: It is advisable to ask Agent if gangway available, as some are not in working order.

Moorings: Normal tie-up is 2-5-2. Springs are sent first, followed by breasts by shore messenger and finally head and stern lines.

AUTHORITY: Maraven, S.A. Apartado 829, Codigo Postal 1010A, Caracas, Venezuela. *Tel:* 908.2111. *Telex:* 23535, 23536. *Cables:* Maraven Caracas.

Section F

PUNTA DE PALMAS: 10.24 N. 71.34 W. (See Plan)

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake".)

OPERATORS: Maraven, S.A.

FLAG: The Authorities require the Venezuelan flag to be flown from the mast head from the time the vessel enters the outer channel to come into the port until it leaves again by the same channel.

LOCATION: The terminal is located at Punta de Palmas del Sur, approximately 13 miles South of the Port of Maracaibo on the West shore of Lake Maracaibo. The terminal proper may be identified by a 300 ft. radio tower, having 2 small red lights 200 ft. from the base, and 1 large red light on top of tower. The top light flashes every 2 seconds.

PILOTAGE: Vessels which arrive have the option of taking on the Official Pilot at the following places:

(a) In the outer channel of the Lake of Maracaibo, between Buoys B-24 and B-26.

(b) In the anchorage area, located approximately 5.5 miles to the N.E. of the Island of San Carlos and to the East of the Buoy B-17. This area is identified by a green light buoy, equipped with a radar reflector (position: Lat. 11° 04' 22" N., Long. 71° 33' 48" W.).

(c) On the "EM" Buoy (i.e. Entrance to Maracaibo), there is also a radar reflector (position: Lat. 11° 13' 47" N., Long. 71° 33' 31" W.).

The Official Pilot who comes on board at San Carlos will take the vessel to Maracaibo. At times, due to bad weather, the Maracaibo Port Captaincy cannot guarantee the embarkation or disembarkation of Pilots at the "EM" Buoy or in the anchorage at Lat. 11° 04' 22" N., Long. 71° 33' 48" W. For this reason, Masters must contact the pilots station at San Carlos so that they may give him appropriate instructions as to the place of boarding or disembarkation of the Official Pilot, who, generally speaking embarks between Buoys B-24 and B-26.

The system of communications which vessels use with the pilots station of San Carlos will be the morse lamp, radio-telephone or radio.

The frequencies on which San Carlos listens out are: Radio 2182 kHz. Radio-telephone 156.6 MHz. It also operates with frequencies 2080, 2120, 2638, 2738 kHz R/T and 156.8 MHz VHF.

Vessels sailing from Punta de Palmas will take on the Official Pilot at the mooring where they are located after having terminated their loading operations. This Pilot must be requested one hour and forty-five minutes before the estimated time of being ready to sail. Vessels which embark their Official Pilot at Punta de Palmas to sail to Maracaibo will change their Pilot again on arriving at that port. The Pilot who embarks will guide the vessel to the proximities of the Island of San Carlos, between the towers E-31 and E-33, where he will disembark onto a pilot launch. The Port Captaincy of Maracaibo has given instructions to shipping Agents for the purpose of informing Masters and Owners of vessels that every Master must identify himself in advance to the Pilot Station at San Carlos at any time of the day, when they are arriving at Buoys B-17 and B-19, and when they are sailing at T-42 and T-40. These instructions are of an obligatory nature in order to keep the Pilots' service informed at all times of any emergency that may arise. Also to avoid an Official Pilot going out unnecessarily from his base, especially during the night in the belief that the vessel which is in sight requires his services; in this case both the service of the launch and that of the Pilotage not given will be charged to the ship's Agent or Representative.

Lake Pilotage: An Official Government Pilot will assist every ship in crossing from Maracaibo to Punta de Palmas and in its exit voyage from Punta de Palmas to Maracaibo. This Pilot will also assist in the operations of mooring and unmooring. The Agent will inform the Master and the Official Pilot of the time determined for berthing the vessel when it arrives at Maracaibo. Vessels which load in Punta de Palmas must request a Pilot for their exit journey at least 1 hour 45 minutes in advance of the time at which they consider the vessel will sail.

CARGO DOCUMENTS: Vessel's clearance and cargo papers will be delivered to the Master on arrival in Maracaibo Harbour outbound. Maraven will accept no responsibility for delay in clearing a vessel due to unavailability of personnel from offices of the Port Authorities.

APPROACHES: The buoy which indicates the entrance to the outer channel ("EM" Buoy) is located in the geographical position: Lat. 11° 13' 47" N., Long. 71° 33' 31" W. The light of the "EM" Buoy has the following characteristics: white light, with 1 flash every 10 seconds, visibility approximately 5 miles. The distance between the "EM" Buoy and the inner extremity (South) of the inner channel, marked with Buoys B-27 and B-28 is approximately 15.75 miles. The outer channel has a width of 300 m. between the limit on both sides. The navigable portion for loaded vessels is 240 m. wide. The average depth which has been checked at low tide is 13.72 m. (45 ft.) and the tidal amplitude is up to a maximum of 1.49 m. (4.9 ft.). There is a breakwater located a half a mile to the East and parallel to the external channel which extends for 2,574 m. (1.6 miles) to the North from the Northern coast of the Island of Zapara. In its outer extremity there is installed the lighthouse of the steel lattice type construction, with a height of 7.62 m. (25 ft.). The characteristics of its light are: white, with 1 flash every 8 seconds, visibility approximately 5,556 m. (3 miles).

The commencement of the internal dredged channel is marked by Buoys B-29 and B-30. The extension of this channel is 19.31 km. (12 miles) approximately and ends at Towers T-55 and T-56. The channel is 244 m. (800 ft.) wide and its normal checked depth is 13.72 m. (45 ft.) at average low tide, with a tidal amplitude which varies between 0.49 m. and 0.89 m. (1.5 ft. and 3 ft.), at Tower T-66, and from 0.82 m. to 1.46 m. (4.5 ft.) at Buoy B-29.

The channel from Tower T-56 as far as the Port of Maracaibo is dredged and its termination is marked by Buoys B-73 and B-74. It is 244 m. (800 ft.) wide and has a depth of 13.72 m. (45 ft.). Its distance is 17 km. (11 miles).

The depth in all the channels may vary in accordance with the sedimentation to which they are subjected and the formation of sand banks. The Port Captaincy at Maracaibo issues Notices to Mariners keeping them informed as to changes in depths in the channels. Navigators are advised to keep themselves up-to-date with these notices of variations of depth when they calculate their exit draft of their respective vessels.

MAX. SIZE:

Berth	*Max. LOA*	*Max. Draft*	*Max. d.w.t.*
No. 1	835 ft.	38 ft.	80,000 tons
No. 2	835 ft.	37 ft. 6 in.	80,000 tons
No. 3	890 ft.	42 ft.	100,000 tons

Also see "Berthing".

RADIO: *Time of Arrival (ETA):* When a vessel leaves its previous port destined for the Terminal of Punta de Palmas, it must inform both its Agent and Maraven S.A. in Maracaibo as to its best estimate of the date and time of arrival in Maracaibo. Then at least 24 hours prior to arrival at the San Carlos pilots' station, it must send another message to confirm the time of arrival at Maracaibo. The nationality of the vessel, name, nett Venezuelan tonnage (if it does not have this, its registered tonnage), last port, name of Master, permanent ballast or cargo in tanks or both, and any other information which is pertinent must be included in this message. The cable address of Maraven S.A. is as follows: Maraven, Maracaibo, Telex 61126. By virtue of the circumstances that the Cable Office in Maracaibo is not equipped to communicate with vessels on the high seas directly, messages sent to Maraven S.A. and to the Agent of the vessel must be transmitted through "PJC" (Curacao), with the prefix "Via ACC" (All American Cables and Radio, Inc.).

We wish to emphasise that by virtue of the fact that our undertaking rents a part of its equipment which it uses for mooring vessels in accordance with the last message of arrival of the vessel, this message must be compiled with the greatest accuracy possible. Any alteration in the time and date of arrival affecting the vessel before or after the time indicated in its message, will be for the account of the vessel as will be the cost of rental of the equipment used.

Maraven S.A. is in no way obligated to carry out the mooring of any vessel, except at the estimated time of its arrival at Punta de Palmas, although exception is made where the vessel may have been delayed in Maracaibo by virture of reasons beyond the control of the Master.

TUGS: Tug service consisting of 2 tugs of not less than 1,600 h.p. each is provided by the terminal operator for all vessels. Both tugs will assist all vessels in mooring and unmooring operations. Should it be deemed necessary by the terminal operator to require a tug in addition to the 2 terminal tugs for mooring or unmooring vessels exceeding 750 ft. in length, charges for this additional service will be for the account of vessel.

Vessels which exceed 835 ft. overall length, and destined for Berth No. 3, require the assistance of at least an additional tug. This additional tug will remain at the convenience of the Terminal for the time that the vessel remains at the berth.

In all cases where there are adverse weather conditions, without taking into account the size of the vessel, the Operator of the Terminal, at his convenience, may request the services of an additional tug to protect the installations of the Terminal and the ship, which will be for the account of the vessel.

The Terminal Department will make the necessary arrangements through the intermediary of the ship's Agent, for contracting additional tugs. These services will be charged to the ship's Agent by the tug operator who is contracted.

MOORING: *Berth No. 1:* Located approximately 8.85 km. (5.5 miles) from the Terminal and 2 km. (1.25 miles) to the West of Buoys D-95 and D-96 in the Maracaibo Channel. Distance between the bow and stern buoys is 364.90 m. (1,200 ft.).

This berth is equipped, apart from the mooring buoys, with a transversal mooring pile on its Eastern side, submerged, with chain and cable the same as those of the Buoys. This does not interfere with the operations of mooring and unmooring.

Berth No. 2: Located approximately 8.85 km. (5.5 miles) from the Terminal and 2 km. (1.25 miles) to the East of the Buoys D-95 and D-96 and to the N.E. of Berth No. 1. Distance between the bow and stern Buoys is 350.50 m. (1,150 ft.).

This berth is equipped, apart from the mooring buoys with a transversal submerged mooring pile equal to that of Berth No. 1.

Berth No. 3: Located approximately 9.65 km. (6 miles) from the Terminal, 1.2 km. (0.75 mile) to the West of the Buoys D-95 and D-96 and approximately 914 m. (3,000 ft.) to the East of Berth No. 2. Distance between the bow and stern buoys is 365.76 m. (1,200 ft.).

This berth is equipped similarly to Berths No. 1 & 2 with a transversal submerged pile on the Western side of the berth.

Conditions applicable to all berths: (a) Vessels which have a total overall length of 239.26 m. (785 ft.) or more must be equipped with 2 tension capstans at the bow and on the after deck, with sufficient cable to reach the stern and bow buoys respectively.

(b) Every vessel loading at any of the berths must take i consideration that due to Government regulations, the vessel must ha a minimum clearance of 0.984 m. (3 ft.) below the keel at any point dur its transit through the Maracaibo Channel, without taking into acco the limitations of the channel assigned to the 3 berths by the Term Operator. In view of this regulation and the constant variations of t depths of the channel, Masters must be guided by the most recent "De Bulletins" which are issued by the National Channel Institute, and by t tide tables when they are planning their transit time through the chann and the maximum draft to which they may load their vessel.

Mooring procedures and rules applicable to mooring points: Every vess carrying out mooring operations at any of the 3 berths must arrive w a minimum draft of 3.65 m. (12 ft.) forward and respect the follow procedure and rules for berthing:

(a) Anchor: Vessels approaching the berths from the East, in the mo convenient manner and safely as possible they must drop their starboa anchor in its location once the vessel has been berthed, the chain fac East, with a length of not less than 137.16 m. (450 ft.).

(b) Mooring cables: One of the following alternatives for moor cables at each side of the vessel must be fulfilled:

1. Two cables of synthetic fibre (Nylon or Polypropylene) with 9 circumference and 1 steel cable which has a minimum diameter 1.25 in.
2. One cable of synthetic fibre (Nylon or Polypropylene) with 9 circumference and 2 steel cables also supplied by the vessel a which have a minimum diameter of 1.25 in.
3. One cable of synthetic fibre with a 9 in. circumference and safety cable of 1.5 in. diameter which will be supplied by the Termin

(c) Countertension cables: A countertension cable will be attached the stern or fore deck. Vessels which have a length exceeding 800 must use countertension cables on both sides of the de simultaneously.

(d) Transversal cable: The transversal cable which will be supplied the Terminal will be attached to the after deck on the starboard si Vessels mooring at Berth No. 3 must also attach an additional transver cable to the after deck on the port side.

(e) All cables which are attached to vessels must have 6 turns arou the bitts, and these must be secured so as to prevent them fr unwinding.

(f) The pressure capstans must be secured in the braked positi once all other cables for mooring the vessel have been secured. The mooring cables must be maintained tight as the vessel goes down the water whilst it is being loaded.

(g) Vessels must be supplied with sufficient cables as spares wh can be used as the Terminal may require. All cables must be maintain in good condition and are subject to acceptance by the representat of the Terminal. Vessels must maintain sufficient personnel on de during the whole time that the vessel is at the berth to attend to t cables for mooring purposes whenever this may be required by t Terminal.

It is understood by both parties that, when the Terminal may requ safety cables to be used, and where such are required, Maraven S accepts no responsibility for damages or losses occasioned to a vessel, installation or person due to the use or failure of this equipme

The vessel's gangway must be in position so that the moor supervisor or other personnel from the Terminal can come on board t vessel when it arrives at Punta de Palmas.

This gangway must be suspended whilst manoeuvres are be carried out, this for the purpose of obviating any damage to it occasion by tugs or launches.

Berthing Supervisor: The Berthing Supervisor of Maraven S.A. will co on board every vessel prior to its entrance to the berth to establish ra contact between the vessel, the Marine equipment and the Office at t Terminal.

Mooring gangs and equipment: The mooring equipment will be hand by the launches employed in the manoeuvres. The tug service wi available 24 hours of the day through the intermediary of the Term Port.

The mooring gangs will assist the vessel personnel in the operat of hoisting, connecting and disconnecting the 2×12 in. diameter load hoses. The approximate weight of the loading hoses is 4 tons.

The launches used for the manoeuvres will place on board equip to facilitate the work of connecting the hoses. This equipment will b the disposal of the vessel's personnel when required as are also launches to transport personnel.

Responsibility: The Master may request any equipment or service w he may consider necessary for a safe and efficient operation of his ve and the Terminal Operator will do everything within his power to this requirement. Therefore all owners and operators of vessels arr at Punta de Palmas will accept the responsibility of the safety inhe in the manoeuvring of their vessels and their movements to and f the Terminal. Maraven S.A. will accept no responsibility for losse damages occasioned to the ship, its installations and others unless s loss and damage be occasioned due to the faults in the instal belonging to the Terminal or operated by the Terminal with the exce of the security equipment.

Operational check list: At the time when the vessel is moored an hoses are connected, prior to the commencement of the operatio loading, the representative of Maraven S.A. on board will deliver t Master an operational Check List. The Master is require whomsoever he may appoint to carry out this work together with Ter representative, to check very carefully that all the safety regulations been fulfilled.

Berthing Supervisor: The Berthing Supervisor will have charts and which will be at the disposal of the Master and his advice if he s require it. The representative will also be available to inspect the ve tanks and to act as liaison between the Master of the vessel a Agent or with the Terminal of Punta de Palmas, to transm information relative to the ship. This supervisor must receive lodgi treatment at the same level as the ship's officers.

Unmooring procedure: When the loading operations are completed, the launches will proceed to remove all mooring cables from the buoys under the supervision of the official entrusted with the vessel or the Official Pilot, assisted by the Berthing Supervisor of Maraven S.A.

Documentation: The departure and loading documents will be delivered to the Master by his Agent or his representative, when he passes through the Port of Maracaibo.

BALLAST: *Deballasting:* It is understood that it is not permitted to discharge ballast in the lake, even though this may come from tanks used solely for ballast. Ballast will be discharged with the pumps of the vessel to the deballasting system which exists at the Terminal. As soon as the loading hoses are connected, the personnel of the Terminal will align the system with its respective valves. Once these operations are completed the Berthing Supervisor on board will inform the Master that he may commence deballasting and in turn will keep him informed as to the pressures which will be used in the operation. Once the deballasting operation has been completed, the personnel of the Terminal will align the system again and its valves so that the vessel can receive cargo through the same hoses which are used for unloading ballast and simultaneously the personnel of the vessel will align their systems on board to receive cargo. The personnel of the vessel responsible for receiving the cargo will inform the Representative of Maraven S.A.(Berthing Supervisor) when the vessel is in a condition to receive and he in turn will inform the personnel of the Terminal that they may commence pumping.

LOADING: *Oil leakage:* In order to obviate contamination of Maracaibo Lake and possible legal actions, we recommend strongly that Masters of vessels emphasise to their deck officers in order to obviate leakage that they make sure that all necessary measures have been taken on board to this end prior to commencing the loading operations. The purpose of this is to maintain on deck any leak or wastage which may occur in the vessel.

Guarantee of responsibility: In the event of an oil leakage or any other contamination or any other damages to installations caused by a vessel, the operator of the Terminal, prior to the vessel sailing, will require the Agent to deposit bond in favour of Maraven S.A. to cover the fine or other charges which may be incurred in collecting, cleaning, repairing the installations of the Terminal and also to cover any claims from third parties.

Loading procedure and pumping rates: The position of the loading hoses, supports and connections must be to the satisfaction of the personnel on board. The valves of the hoses for loading purposes will be opened in order to test the connections, detect leaks and then ultimately to commence operations.

The responsibility and custody of the cargo passes to the personnel of the ship from the moment when the cargo arrives at the connection which is the property of the ship.

The minimum loading rate at Berths No. 1 and 2 is 4,000 b.p.h. The average pumping rate, under normal conditions is 13,000 b.p.h. Sudden stoppages in loading will not be permitted during loading except in cases of emergency.

Personnel on board, responsible for the loading operations, must notify the Terminal representative, not less than 30 minutes in advance of the completion of loading. This will enable the representative to instruct the operator to reduce the rate of pumping or to continue loading by gravity as he sees fit.

For reasons of security, loading may be suspended and the hoses disconnected from the vessel's manifold when weather conditions are not favourable or at any time that the Terminal considers it convenient to do so due to *force majeure* or other reasons.

Displacement of the line: Sometimes it will be necessary to displace the submarine line in combination with the loading operation. To carry out this operation it is required that the personnel responsible for receiving the cargo notify sufficiently in advance the Berthing Supervisor when the amount of cargo lacking is equal to the capacity of the line.

The capacity of the line is a fixed quantity. Therefore it must not be considered with shortcomings or excesses.

Therefore when it is necessary to effect a displacement, the loading must be calculated carefully by the vessel personnel responsible for this operation.

It is understood that any error or negligence on the part of the vessel personnel in calculating the initiation point of the displacement of the line, will require a land pump to correct the displacement. Due to the submerged manifold it will be necessary to employ a diver to operate the valves and this operation may result in a fairly costly procedure and involve a lot of time. All costs involved in fulfilling this operation, together with the time lost will be for the account of the vessel.

Increase in pumping rates: At the request of the Master and subject to the approval of Maraven S.A., it is possible to suppy a pumping rate of 17,000 b.p.h. up to a maximum of 30,000 b.p.h., provided the operations of the Terminal permit this to be done.

MEDICAL: *Maracaibo:* Complete services are available.

Punta de Palmas: Emergency cases only will be transferred to Maracaibo for treatment, at the request of the official in charge of the vessel.

FRESH WATER: Available from local contractors with barges. Pumping will be affected during daylight hours and with prior permission of the Terminal.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil available. Lubricating oils also available. Pumping will be affected during daylight hours and with prior permission of the Terminal.

STORES: Fresh and dry provisions procurable through ship chandlers in Maracaibo for delivery at the Terminal.

CONSULS: See "Maracaibo".

REPAIRS: *Maracaibo:* There are no facilities available for carrying out major repairs. Nevertheless, repair work may be carried out through local workshops and labour can be supplied if this is required. Technicians in radio, radar, gyro compass repairs are also available.

Punta de Palmas: No type of repair will be effected here, which may prevent the unmooring of the vessel without the authority of the Marine Supervisor. Neither may boiler tubes be "blown" whilst the vessel is moored.

SHORE LEAVE: Launch service for business purposes and emergencies is readily available. Launch service for shore leave can be arranged through contract marine service and will be responsibility of ship's personnel. Arrangements for shore leave transportation can be made through Loading Master on board.

CUSTOMS: All vessels entering from foreign ports and bound for Punta de Palmas Terminal are required to anchor in Maracaibo Harbour for formal customs clearance and visit of government port authorities prior to proceeding to destination.

The vessel's accommodation ladder should be rigged prior to the vessel's arrival at Maracaibo. A member of the National Guard will board each vessel at Punta de Palmas to observe all activities connected with loading or unloading operations. This official is authorised as the customs representative, and is referred to as Customs Watch. Food and accommodation similar to officers should be made available to him by vessel.

GENERAL:

Transportation: Transportation will be supplied by launch between vessel and Punta de Palmas to the following persons, without exception:

1. Master of the vessel or the Chief Engineer, to attend to matters relating to the ship.
2. Sick personnel who require emergency medical attention.
3. Official Pilot.
4. Members of the National Guard and other Government Officials whose services relate to the tanker.
5. Doctors, when these may be required by Master, in the event of emergency only.
6. Inspectors of the oil industry.

Consular representatives, ship's suppliers, engineers, naval experts, representatives of the oil companies, suppliers of fuel and water and any other person who requires to come on board tankers when they are in Punta de Palmas must make their own arrangements for transportation to and from the ship through the intermediary of the ship's Agent. Also Agents must make their own arrangements for their own transportation.

Personnel of the ship with licence to disembark: The transportation of personnel with licence, when this is required by the Master, must be arranged through the intermediary of the Agent. Also passengers must embark and disembark at the Port of Maracaibo.

Personnel with licence are not permitted to go ashore at the Terminal of Punta de Palmas.

Classification Societies: American Bureau of Shipping, Lloyd's Register of Shipping, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale and Germanischer Lloyd have Agents in Maracaibo or in Caracas. There are experts available through the intermediary of the Agents mentioned above.

Monetary System: The monetary system of Venezuela is the Bolivar (Bs.), and is the only money legally recognised in the country. A Master who requires a cash advance must request same from his Agent when he notifies his ETA. Payment of all invoices for Terminal charges must be made in Bolivares at the Office of Maraven S.A. in Maracaibo, unless other instructions are given.

Mail: Mail for the vessel can be delivered to the representative of the Agent who comes on board the vessel at the time of its arrival or sailing from Maracaibo.

AUTHORITY: Maraven S.A.

Capitania de Puerto, La Ciega – Maracaibo, Venezuela. *Tel:* 226488.

Section G

SAN LORENZO: 09.47 N. 71.05 W.

OPERATOR: Maraven, S.A.

LOCATION: S.E. side of Lake Maracaibo.

APPROACHES: Vessels have to arrive at Maracaibo Roads through a dredged channel with controlling depths of 45 ft. in outer bar, inner channel and Punta Palmas area. In vicinity of terminal the controlling depth is 36 ft.

PILOTAGE: It is compulsory from San Carlos to Maracaibo. Pilot normally boards vessel at Buoy B–26 (Position Lat. 11° 01' N. Long. 71° 35' W.). It is also compulsory for all vessels which have to load at any terminal located South of the bridge Rafael General Urdaneta. This bridge has a horizontal clearance of 656 ft. and a vertical one of 148 ft. at 45 ft. MMOLW level. Pilots have to embark and disembark at Maracaibo.

When Masters have no Pilot exemption Certificate for crossing outer bar, permission has to be requested by VHF or 2182 kHz prior to arrival, which is being granted on request.

ANCHORAGES: Masters may use the following:

(a) Near E.M. Buoy, (not recommended because of the distance from San Carlos. The pilot launch never reaches this point).

(b) At Maracaibo Roads.

(c) At terminal approaches, in accordance with depths available in the area, and ship's draft.

LIGHTENING POSITION: In the Southern lake Area, arrangements have to be made in advance. Also at Maracaibo.

HEALTH: Quarantine officials board vessels at Maracaibo Roads. Pratique cannot be granted by radio.

RADIO: San Carlos Pilot Station on VHF Channels 12 and 16. Emergency call 2182 kHz. Terminal has VHF Channel 12.

TUGS: Compulsory. When vessel is over 25,000 d.w.t. a second tug is required, which is available in the area, 1,200 h.p. each. There is also a launch to assist the vessel during manoeuvring.

BERTHING: Continuous wharf 2,340 ft. in length with dolphins. This terminal is only for handling crude and its products. Maximum berthing displacement: 20,000 tons.

	Berth No. 1	*Berth No. 2*	*Berth No. 4*
Max. LOA	560 ft. 00 in.	665 ft. 00 in.	
Max. Depth	24 ft. 06 in.	35 ft. 06 in.	Out of Service
Max. Draft	23 ft. 06 in.	34 ft. 06 in.	
Loading Rate	1,450 t.p.h.	2,000 t.p.h.	

These depths are referred to the minimum monthly observed lowest water level (MMOLW).

DENSITY: At berths 998 and at outer bar between 1020 and 1025.

FRESH WATER: Available ex-barge at Maracaibo Roads.

FUEL: Any grade. In case vessels require grade not available at berth it may be supplied ex-barge at Maracaibo, which has mixing equipment able to supply the grade involved. Rate 20 – 140 t.p.h.

MOORING-UNMOORING: Carried out by Official Pilots. Mooring is Head-out to facilitate departure.

DEBALLASTING: Installations have ballast pit with capacity 650 cu.m. Max. discharge rate 600 t.p.h.

TANK CLEANING FACILITIES: Carried out by outside contractor.

REPAIRS: Minor repairs only, including electronics.

LA CEIBA: 09.28 N. 71.04 W.

SHIPMASTER'S REPORT: 1979.

BERTHING: There is a cement loading installation about 2 cables South of the 160 m. long pier at La Ceiba suitable for vessels up to 120 m. in length.

The approach channel is dredged to 9 m.

END OF MARACAIBO SECTION.

MORON: 10.32 N. 68.11 W.

This Terminal finished operations in 1981. All installations have been dismantled.

Vessels loading/discharging operations are now performed at El Palito Marine Terminal operated by Corpoven, S.A.

ORINOCO RIVER

Including Section A – MATANZAS
Section B – PALUA
Section C – PUERTO ORDAZ
(CVG Ferrominera Orinoco)
Section D – PUNTA CUCHILLO
(Lagoven S.A.)
Section E – VENALUM TERMINAL

IMPORTANT: VHF compulsory. Vessels without at least a VHF radio aboard will not be attended to by the Pilots at the Barima Pilot Station and so will not be allowed to enter the Orinoco River.

GENERAL:

1. As early as possible, advise Puerto Ordaz Radio Station, (Radio Marina) call letters YVM, giving ETA at Buoy 0.1 of South (dredged) Channel.
   Shipmaster's Report: October 1982 (Updated 1988).
   Contact with YVM was made 48 hours before arrival Buoy 0.1; accordingly, 72 hours ETA sent via Curacao Radio.
2. 24 hours prior to arrival, send another ETA to YVM.
3. Upon arrival, adhere to following procedure:
   (a) Request permission to enter from "Barima Pilot", via Channel 16. *Do not enter* until granted permission; while awaiting, lay to or anchor at least 1 mile outside of Buoy 0.1.
   (b) All vessels must also communicate with the Point Barima Pilot Station, call sign "Barima Pilot" 2182 kHz HF or 43.18 VHF to be informed of traffic.
4. While navigating waterway, inbound or outbound, report position to YVM hourly on the hour.
5. No Pilot required nor available for navigation along channel at the Boca Grande of the Orinoco River.
6. The International Rules for Preventing Collisions at Sea apply outside of Buoy 27.
7. Anchoring in channel is forbidden.
8. Throughout Orinoco waterway, the down-bound loaded vessel is the privileged vessel.
9. It is compulsory to fly Venezuelan ensign inside of Buoy 0.1.
10. Vessels can only carry clean ballast within Orinoco Waterway.
11. Pilotage compulsory within Pilotage Zones No. 1 and No. 2 of Orinoco. Pilots board at outer boundary of said pilotage zone upstreamward vicinities of Buoy 27 up to Mile 128.1. Zone No. 2 from Mile 128.1 up to Matanzas.
12. Regulations for the Pilotage Zone No. 1 of the Orinoco apply ins of Buoy 27.

APPROACHES: (Also see "Radio" – paragraphs *(b)* and *(c)*).

1. *The Waterway*

A Radio Direction Finder (non-operational October 1982), located Lat. 08° 03' 45" N., Long. 60° 28' 28" W., transmits following sig continuously: YV – AYV. The transmitter has an output of 500 watts w a range of about 200 miles and operates on a frequency of 305 k While navigating the waterway, ships should favour the shore on th starboard side to the extent possible, giving preference of manoeu to loaded vessels in all cases. Ships navigating upstreamward (inbou upon approaching narrow channels should await the passing and g way to downbound vessels. It follows, therefore, that downbound load vessels are the privileged vessels.

2. *The Boca Grande (Barima Bar) Channel*

There is 1 navigable channel across the Boca Grande (Barima Ba Vessels navigating the dredged channel are privileged, regardless of direction in which they travel.

The Dredged Channel

The channel is a 400 ft. wide dredged channel. Depths there accommodate the maximum draft authorised by the Port Captain. T approach from the sea is marked by a battery-operated electric flash black buoy, identified with the number 0.1. This buoy is located in 4 of water at Lat. 08° 55' 52" N., Long. 60° 11' 17" W. Its characteris are: colour of light, white; flash, 0.5 seconds; eclipse, 11.5 secon height above water, 25 ft.; visibility, 11 miles. From Seabuoy 0.1, t channel develops along 4 different courses over a total distance 27.7 Miles to Buoy 27. The course reduces by about 7° True at each 3 turning points, located at Miles 9, 15 and 21 respectively. The in course of 234° 18' True continues to Mile 9 where it changes to 227° True. Upon reaching Mile 15, the course again changes to 219° 51' T to Mile 21. At Mile 21, the course changes to 212° 45' True to Buoy at Mile 27.7. The centreline of the channel on all courses is visu marked by range structures fitted with green flashing, direction beamed lights. The West (right ascending) side limit of the chan through Mile 21 is also visually marked by range structures fitted w amber flashing, directionally beamed lights; the alignment given by side ranges develops 200 ft. to the West and parallel to the centre of the channel. Battery operated electric flashing navigation aids located along both sides of the channel. All navigation aids along East (left ascending) side of the channel are located 325 ft. f centreline or 125 ft. outside of the channel lateral limit. White flash navigation aids are located at 1 mile intervals through Mile 25.1; all a along this side are black buoys, except Beacons 8.1, 9.1, 14.1, 1 20.1, 21.1, 22.1, 23.1, 24.1, 25.1, 27.1 and 27.7 (Buoy 27). All naviga aids along the West (right ascending) side of the channel are loca 200 ft. from centreline or on the exact lateral limit of the channel. F flashing buoys painted red are located at 1 mile intervals from Mile to Mile 11.6. From Mile 11.6 to Mile 27.7, there are only 2 aids; buoys 13.6 and 26.0.

3. *The River Channel*

From Mile 27.7, the navigable channel develops upstream. The r channel is generally deep and wide, except for the following 12 reac which require periodic dredging: Miles 27.7 to 36.5; Miles 37.3 to 3 Miles 53.1 to 54.2; Miles 99.0 to 106.5; Miles 109.1 to 111.0; Miles 1 to 131.9; Miles 136.6 to 139.0; Miles 141.2 to 145.8; Miles 146. 149.4; Miles 167.6 to 170.8; Miles 178.4 to 182.4; Miles 183.5 to 18 Dredged channels are normally 300 ft. in width, but occasionally ca restricted to a minimum of 250 ft. The depth maintained therein accommodate the maximum draft authorised by the Port Captain Notice to Mariners, the Port Captain has instructed all Masters and P to reduce speed and to proceed with caution while navigating aforesaid reaches, especially during the low water season.

4. *River Stages*

In response to the cycle of wet and dry seasons, the flow of the Ori River follows a relatively regular pattern of rise and fall each year. river normally begins rising in late March or early April and continu rise until it peaks at crest in late August. In September, the river be a fairly steady recession until the extreme low-water stage is reac generally in March. The amplitude of stage variation above the low plane of reference (0.0 ft.) at Palua (Mile 181.7) averages about with min. variations of 31 ft. and max. variations of 39 ft. The effec the flood rise decrease progressively below Palua and practically in the upstreamward vicinities of the Boca Grande.

5. *Tides and Currents*

(a) The indicated mean tidal range is 5.4 ft. Tidal influence i experienced above Mile 60 during high river stages. At low stages, a tidal effect can be observed throughout the wat although it progressively diminishes, moving upstream However, the tidal effect is still significant at Puerto Ordaz, Mi where a max. semi-diurnal change of 1.7 ft. has been recor

(b) The strength of river currents is generally commensurate wi the strongest currents occurring at high river stages. The v of currents at any one time generally decreases m downstreamward. However, in certain locations, this pat affected by particular characteristics of river width and sha well as by bottom gradient. Max. velocities of about 6 knots been recorded.

6. *Navigation Aids*

(a) The navigation aids installed along the waterway consist of beacon and ranges. All aids are lighted. Identification is p by means of numbers representing the approximate mileage aid, to the nearest one-tenth of a mile. The last digit of nu identifying green lighted aids is odd, while the last digit of nu

identifying red lighted aids is even. Green lighted aids mark the left ascending limit of the navigable channel, while red lighted aids mark the right ascending limit. Aids are placed as to be intervisible, to the extent that — when abreast of any one aid — the preceding and following ones can be sighted. Consecutive aids always carry different light characteristics. Buoys are normally placed on the exact lateral limit of the channel (except for black buoys along the South Channel at the Boca Grande); beacons, instead, are located at variable distances outside of the channel.

(b) During the execution of dredging along any of the reaches which require periodic maintenance, buoys are generally moved 100 ft. outside the channel lateral limits. This information is made available to ships by YVM.

(c) The Ministerio de Comunicaciones, Direccion de Transporte Aguatico, publishes semi-annually a complete list of navigation aids. Monthly lists of changes are also published so that the complete current list can be maintained up to date.

(d) Upon encountering damaged, inoperative, or misplaced navigation aids, vessels should immediately notify YVM.

(e) Vessels are forbidden to make fast to any navigation aid.

7. Dredging Aids

Range structures, generally located close to shore or over the bank, are normally used to mark the lateral alignments of the channel along the reaches which require periodic dredging. These ranges are generally fitted with amber flashing, directionally beamed lights. The lights are extinguished except during execution of dredging. Dredging ranges *are not* to be used for navigation.

8. Navigation Charts

Navigation charts of the Orinoco Waterway should be aboard vessels for use by the Master. These charts are sold by the Instituto Nacional de Canalizaciones and are also available for purchase from the CVG Ferrominero Orinoco. If requested, CVG Ferrominero Orinoco will, if possible, arrange to make the charts and latest revisions available through the Pilot who boards at Punta Barima, provided such request is received by radio (YVM) at least 48 hours in advance of the Pilot's boarding. A set of navigation charts, corrected to latest revisions, is maintained in the office of the Traffic and Ships' Agency of CVG Ferrominero Orinoco in Puerto Ordaz. Masters may use this facility to keep their charts up to date.

Report: 1986.

Deficient Navigational Aids:

The deep draft New Barima (South) dredged channel is officially a 400 ft. wide dredged channel, but in reality it is considerably less in portions. Many of the red buoys showing a flashing red light which should be placed 200 ft. from the centre of the channel or exactly on the lateral limit, are either missing, out of position or unlit. The light on the black buoy which marks the entrance of the channel is inoperative. Several of the gauge structures fitted with green, flashing, directionally beamed lights, are inoperative. This makes it hazardous for a deep draft vessel to navigate the narrow and shallow channel during the hours of darkness. During the rainy period the authorised drafts declared by the Port Captain are in excess of the depths in certain portions of the channel.

We have been informed that about 20 vessels grounded in this area during the first 6 weeks of this year (1986).

DOCUMENTS: (Clearance, documentation and other requirements).

1. Consignment of Inbound Vessels

The official documents of all vessels proceeding to Puerto Ordaz and Palua should show the following consignment: to: CVG Ferrominera Orinoco, Ciudad Guayama.

2. Customs Requirements

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require the following documentation:

The vessel must have a Clearance Certificate (Certificade de Zarpe) or sailing authorisation issued by the Customs Authorities of the port of departure, representing the government of the country the vessel is departing from. No consular certification need be placed upon this document.

Spare Parts List (Lista de Repuestos). It must contain a note of all the spare parts and objects for the service of the vessel, including fuel. To be signed by the Master and to be current as of the day of entering the Venezuelan port.

List of Effects for use of Captain and Crewmen (Lista de efectos personales de la dotacion). To be signed by the Master and to be current as of the day of entering the Venezuelan port. The Customs are very strict and will confiscate any article that appears new.

3. Health, Immigration, and Police Requirements

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require following documentation.

(a) Current individual International Vaccination Certificates for each member of the crew.

(b) Derat Exemption Certificate.

(c) Crew Lists (original and seven copies).

(d) Panama or Suez Canal or any comparable type measurement certificate.

Contraband: The Venezuelan law is very strict on this subject. It cannot be emphasised too strongly that all new articles, clothing, cigarettes, liquor, etc., must be declared and sealed-up upon arrival.

Meals for Pilots and Government Officials. It is requested these men be granted the privilege of eating in the officers' dining salon.

N.B. Masters of vessels calling at Trinidad for bunkers before proceeding to Venezuela must also have the documents stamped by the Venezuelan Consulate at Port of Spain.

PILOTAGE: In order to expedite the movement of shipping in the waterways, Masters are requested to establish contact with YVM station as soon as possible, giving ETA Seabuoy 0.1. At the same time a radio-telegraph message must be sent to Agents giving ETA Barima and cargo required. When vessels is 24 hours from Pilot Station, send another ETA via YVM.

After reporting the ETA in advance of arrival, try to contact directly, by VHF, "Barima Pilot" when the ship approaches Seabuoy 0.1 off the bar entrance (about 2 hours before arrival at the Pilot Station). (It is possible to contact Pilots 100 miles before arrival Seabuoy 0.1.)

After taking the Pilots aboard, report to Radio Marina (YVM) and continue giving the ship's position according to the mile, up-river, at exactly every hour on the hour, and receive from Radio Marina the pertinent information concerning the traffic in the river waterway. If no communication can be established by voice radio aboard, comply by radio-telegraph by way of the YVM station. See "Ship's Officer's Reports" in 1st Section – "General" and "Shipmaster's Report", June 1991.

Ship's Officer's Report: July, 1980.

Hourly position reports are made on W/T to YVM when the Pilot is aboard (He writes the telegrams in Spanish).

Pilots are the employees of the Venezuelan Government and act in an advisory capacity. The Master retains responsibility for the ship at all times.

(1) Pilotage is not required and Pilots are not available for navigation outside the pilotage zone. Masters will take charge of inbound and outbound navigation on the South Channel outside Buoy 27 at the Boca Grande, without Pilot's assistance.

(2) Pilotage is mandatory within the Pilotage Zones No. 1 and No. 2 of the Orinoco. Inbound vessels will embark the government River Pilot in the upstreamward vicinities of Buoy 27. It is important that vessels pass Buoy 27 and be in sight of the Pilot Station at Barima in order to avoid any delay, as Pilots may not proceed until vessel is sighted. The government River Pilot will pilot the vessel while navigating the waterway; a special government Docking Pilot will generally take the vessel into and out of the Puerto Ordaz harbour.

Signals

(1) All signals used outside of the Pilotage Zone No. 1 (that is to say, seaward of Buoy 27 – Mile 27.7) shall conform to the International Rules for Prevention of Collisions at Sea.

(2) Within the Pilotage Zones (that is to say, inside of Buoy 27 – Mile 27.7) the signals used shall be in accordance with the "Regulations for the Pilotage Zones No.1 and No. 2 of the Orinoco". It should be noted that these signals are peculiar to the Orinoco Waterway, and are not necessarily in conformance with the International Rules.

(3) Within the Pilotage Zone, special signals are used for passing dredgers at work along the waterway.

Speed

The Captain of the Port has the authority to impose speed restrictions. By means of "Notices to Mariners", the Port Captain has ordered that all vessels reduce speed while navigating by the following locations: San Felix Dock, Mile 179.8; El Toro, Miles 95.4 to 96.6. It is recommended that speed be also reduced while navigating by the Palua Dock (Mile 181.8), Barrancas (Mile 143.2), and Curiapo (Mile 60.4). At the inception of the low water season each year (generally in early January), the Port Captain has in the past issued a "Notice to Mariners" instructing all vessels to reduce speed and proceed with caution while navigating the following river reaches: (1) Miles 184 to 178, (2) Miles 171 to 167, (3) Miles 150 to 141, (4) Miles 140 to 137, (5) Miles 133 to 131, (6) Miles 112 to 109, (7) Miles 106 to 98, (8) Miles 55 to 53, (9) Miles 39 to 36.

ANCHORAGES:

(1) No ships are permitted to anchor in the South Channel at the Boca Grande. Vessels are to anchor at least 1 mile outside of Buoy EO or Buoy 0.1.

(2) Within the Pilotage Zones, no vessel is allowed to anchor in narrow channels, nor close to a turn.

(3) Between Buoy 27 — Mile 27.7 and Mile 137, vessels which need anchoring may do so by coming as close as possible to shore on the ship's starboard side.

(4) Between Mile 137 and Mile 184, the Pilotage Regulations provide for 3 permanent anchorages and 1 seasonal anchorage, as follows: Area No. 5 (permanent); Miles 139.3 to 140.4. Area No. 6 (permanent): Miles 150.1 to 151.7. Area No. 7 (permanent): Miles 178.0 to 179.0. Area No. 8 (seasonal): at the junction of the Caroni and the Orinoco. It should be observed that Area No. 7, as determined in the Pilotage Regulations, partially encroaches on the narrow (dredged) channel and on shore. Vessels are to anchor in the naturally deep and wide part of the area.

(5) The low-water anchorage (for 1 ship only) previously established by the Port Captain between Miles 182 and 183 is no longer in use. This area is currently used as the turning basin for vessels exiting the Palua Channel, upon sailing from the new Palua dock at Mile 181.8.

(6) If due to emergency a ship is required to anchor in places other than the designated areas, it should do so in such a way as not to obstruct the channel and by taking the necessary precautions to avoid swinging around.

(7) Upon anchoring vessels should notify YVM.

MAX. SIZE:

(1) *Max. permissible draft.* The Port Captain of Ciudad Guayama can establish the permissible draft for the Orinoco waterway to a maximum of about 44 ft.

(2) *Controlling Depths and Authorised Draft*

The draft authorised by the Port Captain for the Orinoco Waterway is made public by means of a "Daily Bulletin of Depths and Draft" (Boletin Diario de Profundidades y Calado). Each daily bulletin issued by the Port Captain carries the following information, in Spanish and English:

(a) Controlling (minimum) depth between Miles 194 and 0, and corresponding location.

(b) Authorised draft, in feet and decimals of feet.

The controlling depths given for locations comprised between Miles 184 and 42 are actual depths, and reflect depth conditions as of the date of the bulletin. The controlling depth given for locations comprised between Miles 42 and 0 is referred to MLWS and does not include the height of tide at high water.

The authorised draft may be predicted either on the controlling depth existent between Miles 184 and 42 or between Miles 42 and 0, dependent upon whichever is the least.

When the controlling depth between Miles 184 and 42 is the significant factor, the permitted draft authorised is at least 2 ft. less than the controlling depth in this sector.

When the controlling depth between Miles 42 and 0 is the significant factor, the permitted draft authorised is generally less than the mean low water springs controlling depth but occasionally can be equal to the mean low springs controlling depth.

Whenever the MLWS controlling depth existing between Miles 42 and 0 does not provide sufficient clearance under the keel of the vessel at low water, the Master is expected to navigate by the site where the controlling depth is located only at times when the height of tide will assure a safe passage.

(3) *Variations in authorised draft:*

(a) The authorised draft is generally increased or decreased by multiples of 6 inches.

(b) Throughout the year the authorised draft is susceptible to variations, according to the conditions of the depth and width existing in the channel at any one time. On the basis of average river stages it is estimated that the authorised draft should be about 33 ft. in the dry season from December to May.

During the rainy season, from June to November, the max. permissible draft may be as high as 44 ft.

HEALTH: Radio Pratique may be obtained by sending a message, after picking up Pilot, to the Port Health Officer, advising that there is no sickness on board, name of last port, ETA, number of crew and nationality of vessel and name and nationality of Master (This does not apply at Palua).

RADIO:

(a) Communications: Communications are generally handled through the radio-telegraph station at Puerto Ordaz, call letter YVM. This station is operated on a 24 hour basis. The operating frequencies are: 440 kHz; 472 kHz; 4322 kHz; 6505.5 kHz. The GMT — CQ times and frequencies are: 0900 hrs., 4322 kHz; 1200 hrs. 6505.5 kHz; 1430 hrs. 8722 kHz; 2000 hrs. 8722 kHz; 0030 hrs. 8722 kHz; 0300 hrs. 4322 kHz.

There is no charge for messages from ship to shore or from shore to ship handled directly through YVM. A VHF frequency modulated radio system provides voice communications along the Orinoco Waterway. Master sets for the system are installed in the Puerto Ordaz Radio-telegraph Station (voice call: "Master Radio"); Marine Radio handles shipping matters exclusively, The system consists of a high-band VHF frequency modulated voice radio network. To ensure a more efficient and satisfactory coverage, this system operates on dual frequencies alternating according to location, so that ships can either transmit on 161.700 MHz receiving on 159.000 MHz, or transmit on 161.150 MHz receiving on 159.850 MHz. For best results, ships should select frequencies according to the following: From sea to Mile 50: transmit on 161.700 MHz, receiving on 159.000 MHz; From Mile 50 to Mile 112: transmit on 161.150 MHz, receiving on 159.850 MHz; From Mile 112 to Mile 159: transmit on 161.700 MHz, receiving on 159.000 MHz; From Mile 159 to Mile 184: transmit on 161.150 MHz, receiving on 159.850 MHz.

Pilot station at Barima Bar, Palua and Matanzas are equipped with this system. For the Puerto Ordaz area, ships will transmit to Marine Radio on a frequency of 43.02 MHz and to others on a frequency of 43.18 MHz, receiving in both cases on a frequency of 43.18 MHz.

Ship's Officer's Report: July, 1980.

The VHF Channels listed are not available on standard marine sets. All VHF work is done on Channel 16 (Pilot to Pilot), and reporting on W/T to Radio Marina.

(b) Control of Navigation:

(i) Navigation on the Barima Channel at Boca Grande is free. However, vessels are requested to notify the Port Captain, Ciudad Guayama, via "Barima Pilots" on Channel 16, upon arrival at Buoy EO, giving ETA at Buoy 27, Mile 27.7.

(ii) Simultaneous navigation in opposite directions by 2 or more vessels is not permitted on the South (dredged) channel at the Boca Grande. The restriction is placed on inbound traffic, to the extent that any vessel wishing to enter the South channel requires prior authorisation from the Port Captaincy of Ciudad Guayama. The request for permission to enter the South channel is to be addressed to the Port Captain, Ciudad Guayama, via "Barima Pilots" on Channel 16. and is to be transmitted before the vessel reaches Buoy 0.1. Upon receipt of the request, the Port Captain will notify the vessel via "Barima Pilots" on Channel 16, whether permission is or is not granted, indicating, in the latter case, the approximate waiting time. Until permitted to enter, vessels are to anchor at least 1 mile outside of Buoy 0.1. Once that authorisation has been granted, vessels are to enter the South channel at the earliest opportunity.

(iii) While navigating the Orinoco Waterway inbound or outbound vessels are to report their position to YVM hourly on the hour. Seaward of Punta Barima, to "Barima Pilots".

(c) Accident, Stranding, etc.

(i) Should a collision, stranding or other accident occur in the waterway, or should it be found necessary to take control of the vessel away from the Pilot for any reason, the Venezuelan law requires that a written report be made to the Captain of the Port by the Master of the vessel involved within 24 hours. The report is to be addressed to the Captain of the Port and may be handed to the Pilot or the ship's Agent for delivery. The Master need not appear in person before the Captain of the Port unless specifically ordered to do so.

(ii) Slight groundings or touching of banks and bottom may simply be noted on the reverse side of the receipt for pilotage signed by the Master.

(iii) In case of collision, stranding, slight grounding, touching of banks and bottom, or other accidents, vessels should immediately notify YVM.

SHIPMASTER'S REPORT: January 1989.

Vessel proceeding to Matanzas.

Apparently the entrance to the River Orinoco at Boca Grande h been upgraded.

All the buoys now have solar energy cells as well as photo-cells activate them at dusk.

The North entrance no longer exists, only the South Dredged Chan is used. A Racon had been installed on Mile 0.1 (Sea Buoy). Curr entrance information is given by Puerto Ordaz Radio Station (YVM), w which vessels should make contact as soon as possible. As usual, pi board the vessel between Miles 27-28. It is advisable to reduce spe beforehand, to be able to embark the pilot before Mile 28, as pilot b is not fast and there is a considerable bend at Mile 28. Also it is advisa to familiarise yourself with the buoys and ranges up to Mile 30 wh entering, as the down-bound pilot usually disembarks between Mile 31 and there are 3 short distance bends before Mile 28. On our passa as many as 4 buoys were out of position, one buoy was unlit at the range, and Sea Buoy (0.1) Racon was inoperative.

SHIPMASTER'S REPORT: June 1991.

Boca Grande Bar:

(a) Pilotage has become compulsory through Boca Grande Bar starting from Buoy No. 0.1) for the ships having LOA more than 200 since March 1991. Therefore, Orinoco River traffic is applicable throu the Boca Grande Bar as well.

(b) Pilots board at Fairway Buoy (Orinoco No. 0) by means of helicopter.

(c) The Bar has recently been dredged to sufficient depth. There w 10 ft. – 15 ft. keel clearance experienced up to Buoy No. 1 (disregarding moving mud), and became shallower up to Buoy No.

Section A

MATANZAS: 08.17 N. 62.52 W. (See Pla

N.B. See "Orinoco River" for all important entry requirements.

LOCATION: At Mile 195 from sea on Orinoco River.

ANCHORAGES: Between Miles No. 195 and 197, Orinoco River.

MAX. SIZE: Length 600 ft., breadth 74 ft., distance between rail a hatch coaming 23 ft., max. draft 41 ft. in rainy season May to Novemb and 28 ft. in dry season.

Note: A vessel with LOA 738 ft. has berthed at Matanzas.

RADIO: See "Orinoco River". Cables address of Matanzas termi operators is "Sidor Matanzas – Telex 86366" and cables may be rou through Caracas, Curacao or Trinidad Radio.

TUGS: Every vessel over 2,000 registered tons is required to use a when berthing. Tug is 1,600 h.p.

BERTHING: Reinforced concrete structure consisting of 3 diffe sections running in a straight line, bearing 065°.

From West to East, 3 sections should be pointed out:

The first section, some 320 m. long, is used mainly for unloading cargoes. Depth 10 m. below MSL.

The second section, 400 m. long, is for handling steel produ Depth 11 m. below MSL.

The third part, some 280 m. long, is for general cargo. Depth 1 below MSL.

The level of the river fluctuates from 0.6 m. over MSL at low water in the dry season (February – March) to 14 m. over MSL at river water in the rainy season (July – August).

The river bed drops sharply from the edge of the pier to the naviga channel where the depth reaches 30 m. below MSL.

Berth No. 1: Runs from bollard No. 1 to No. 7, length 155.30
Berth No. 2: Runs from bollard No. 7 to No. 14, length 176.38
Berth No. 3: Runs from bollard No. 14 to No. 24, length 204.2
Berth No. 4: Runs from bollard No. 24 to No. 33, length 182.7
Berth No. 5: Runs from bollard No. 33 to No. 39, length 160.4
Berth No. 6: Runs from bollard No. 39 to No. 44, length 158.8

In addition there is another berth, length 149 m., South of No. 6, 24 ft. of water under MSL, that runs from bollard No. 38 to No. 44

The reinforced concrete platform is 25 m. wide at the first section 20 m. at the second and third sections. The surface of the pier is 15 over MSL.

CRANES: Berths No. 1 and No. 2 are served by 2 "Ceretti Tan bulk unloaders of 22 tonnes capacity, able to handle clamshe 4.5 cu.m., for iron ore, lime stone and other heavy bulk, 10 c clamshells for coke and other light bulk and orange peeler and ma for unloading scrap iron.

The reach of these cranes is 10 m. from the pier edge. The wo field is from bollard No. 2 to bollard No. 13.

Berths No. 3 and No. 4 are served by 6 "CMI" gantry/trolley c fitted with 2 hoists of 15 tonnes each, with a total capacity of 30 t with the 2 hoists in tandem. The working field is from bollards N to No. 31.

Berths No. 5 and No. 6 are served by 3 "Ansaldo" gantry/trolley c of 16 tonnes capacity. The working area is from bollards No. 35 to N

At bollard No. 34 there is a stationary rotary derrick of 400 t capacity and a reach of 18 m.

In addition, there are 3 "Grove" auxiliary moving cranes, telescopic type, with a rated capacity of 80 tonnes able to work part of the pier.

WAREHOUSES: From bollard No. 14 to bollard No. 29, running the South edge of the pier, there are 10 adjoining wareho 30×100 m. each, 3 of them open at either end and the four in the roofed. All of them are provided with 1 gantry crane of 25 tonne

STEVEDORES: Operations are round the clock, 7 days a week.

MEDICAL: Private hospital and several doctors available.

FRESH WATER: Available at rate of 12 t.p.h.

FUEL: Available ex-barge.

REPAIRS: Local workshops undertake minor repairs.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits allowed per crew member for personal consumption.

AIRPORT: Matanzas is served by Puerto Ordaz Airport with several daily flights from Caracas.

POLICE/AMBULANCE/FIRE: The entire length of the pier is fitted with fire hydrants and at the steel mill, about 6 km. away, there is a well equipped fire brigade with firetrucks, ambulances and rescue vehicles.

A first aid centre is located close to the fire station.

TELEPHONES: No telephones or telex services are available at Matanzas for the use of vessel's personnel. Local telephones only available at the pier and dock supervisor's office. Recommend vessels use their VHF to communicate with their Agents while at anchorage and when alongside.

IDENTIFICATION CARDS: Provided by authorities, and necessary if crew going ashore.

REGULATIONS:

Pollution: Venezuelan law and Sidor's port regulations are very strict on air and river water pollution, the following restrictions being in force:

1. No smoke to be ejected from vessels' funnels while moored at Sidor's pier.
2. No waste, refuse or garbage to be dumped in the river while in the river channel, at Matanzas roads or laying alongside the pier.
3. All waste, refuse or garbage kept on deck, to be sprayed with anti-vermin and kept covered.
4. No salt water ballast, bilge water, oils, refuse water from galleys and lavatories, etc., to be pumped into the river.

In addition to whatever penalty the vessel shall incur under Venezuelan law, Sidor reserves its right to place the offending vessel "off hire" until she has complied with the regulations.

Safety: Under Sidor's security norms, every person which, for whatsoever the reason or business, has to transit or stand on the pier's platform is bound to use a hard hat. People doing any kind of work on the pier have also to use safety shoes.

GENERAL: Sidor's pier will discharge and/or load cargoes for other industries of the area provided a berth is available and no Sidor vessels are waiting. Permission for such operations must be requested prior to vessel's arrival.

Sidor require Agents to provide stowage plan and cargo documents prior to vessel's arrival otherwise Notice of Readiness will not be accepted.

SHIPMASTER'S REPORT: January 1990.

Approach: The approach is through Boca Grande South Channel from Buoy 0.1 without a pilot, to the Barima Pilot Station which is up-stream of Buoy No. 27.0.

Prior to arrival call "Amacuro Pilot" on VHF Channel 16 when within range, up to 100 nautical miles.

Vessels only enter the channel after having been granted permission by the Pilot Station.

The Racon on the Fairway Buoy is inoperative.

B.A. Chart No. 3322, addition 1971, last correction 1170 of 1988 is not up-to-date.

The numbers on the buoys indicate the distance in miles from the entrance of Matanzas (Mile 194.5).

The pilot who boards the vessel at Buoy No. 27.0, takes the vessel to Matanzas where he hands over to the harbour pilot.

Also see "Shipmaster's Report" below.

Loading: Gangs are available throughout 24 hours.

The working hours are 0730 – 1100, 1200 – 1500, 1500 – 1800, 1830 – 2230 and 2300 – 0630 hrs.

We worked with 2 gangs and the rate was 300 tons – 500 tons per shift/gang. We loaded bundles of re-bars which weighed about 1.8 tons each. The tally is carried out ashore and vessel has to ask for copies of the tally sheets.

Garbage: Garbage has to be stored on board in bags and can be removed by lorry via the Shipchandler.

Stores: Stores are available but it is advisable to get quotations. There are department stores and shopping centres in the vicinity.

Transport: Taxis are available to take personnel to the town, but only licensed taxis are permitted to enter the plant.

SHIPMASTER'S REPORT: July 1993.

Buoyage: The red buoys, when proceeding inwards, are and must be left on starboard side.

The red buoys are numbered 1.0, 2.0, etc. up to 27.0, where the pilots of Punta Barima board the vessel when going to the Orinoco ports, and the pilots leave ships at Buoy 32 when coming from Orinoco ports to sea.

OPERATOR: C.V.G. Siderurgica del Orinoco C.A., Codigo Postal 8016, Matanzas, Ciudad Guayana, Estado Bolivar, Venezuela. *Tel:* 991111 and 991118. *Telex:* 86366 and 86229 (Sidor). *Cables:* Sidor Matanzas.
Contact: Superintendent, Port Services.

Section B

PALUA: 08.21 N. 62.41 W.

N.B. See "Orinoco River" for all important entry requirements. Specific details, relevant to Palua only, are as follows:

SUPPLIER: The ore supplier is CVG Ferrominera Orinoco C.A., cable address "Ferrominera". Their Palua office is fitted with VHF radio-telephone on 161.150/159.850 MHz and 2182 kHz (call).

CLEARANCE: Agent will secure the Clearance dispatch.

Note: The Palua dock and facilities are the private property of CVG Ferrominera Orinoco C.A. All Company regulations must be obeyed by vessels and vessels' personnel.

The Bill of Lading will be prepared by CVG Ferrominera Orinoco C.A., also the Commercial Invoice on the Consular Invoice form 138. The Inward Foreign Manifest, U.S. Customs form 7527–B, should be prepared by Master after sailing from Palua.

MAX. SIZE: Max. d.w.t. 100,000 tons. Max. LOA 274.32 m. Max. beam 33.53 m.

HEALTH: The vessel will be boarded by the Public Health Doctor after docking at Palua; unless instructions to the contrary.

In the event that the Authorities have to board the vessel anchored out in the stream, an accommodation ladder should be rigged, preferably on the starboard side, to keep the port side clear for docking. Venezuelan authorities and workmen will not use Pilot ladders.

RADIO: Should a vessel receive radio advice at sea to proceed to Palua, and the clearance is to another port, it is requested to send following information to "Ferrominera" at earliest convenience. i.e. Master's full name and nationality, vessel's nationality, port and number of register, net and gross tonnage, type of vessel M/V or S/S, vessel's overall length and width, last port of call, original port of destination. This is necessary in order to comply with the Venezuelan Custom Law.

BALLAST: To provide the best manoeuvring trim on docking, it will be at the discretion of the Master to properly ballast the vessel. But in order to lose no time on loading operations, as well as to prevent short loading, the ballast should be pumped out as soon as possible, using utmost caution not to pump oil or sludge overboard in the port area.

APPROACH AND DOCKING: After passing the village of San Felix, and before reaching the turn off from the main channel, 2 tugs and a Docking Pilot will meet the vessel and will assist in the docking manoeuvre. Although the Master will always be responsible for the vessel's movements either in the case of docking or undocking, the Docking Pilot will actually pilot the vessel to, and dock the ship at Palua.

At Mile 180.5 the ship should leave the main channel, turning to the left to follow the new dredged entrance channel of approach which is marked by 2 flashing buoys: white on the port and red on the starboard side. Diamond-shape range marks of 6 ft. side, painted white with black diagonal cross, indicate the centre line of the approach channel. The front range, fastened on the ore loading pier, shows flashing green light, and the rear range, set on a tower shows flashing green light, and the rear range, set on a tower approximately 2,000 ft. away, has fixed green light.

The docking shall be port side to in all events; and please stow all hatch boards, or pontoons, or steel battens, etc., on the starboard side of the hatch as this will keep the gear cleaner and lessen the work of the ore handling gang.

Vessel's accommodation ladder is used. Nothing should overhang the port side of the vessel on docking.

If the loading berth is not available the arriving vessel would be instructed to anchor at an anchorage just below the entrance to Palua approach channel at Mile 178.

LOADING DOCK: The ore loading port is located at Mile 181.5 of the Orinoco waterway, along the left bank going up-river. The steel dock here is aligned up and down stream in the general direction of the current. It is 907 ft. long between its pointed heads, with 791 ft. of boarding side along, the deck fixed at about 6 ft. over the maximum rise of the river in the flood season. It has a strong fender system of steel structure covered with timber overhanging the side, down to near the lower river stage; and is fitted with 14 bollards plus 2 more, one on each head, for proper docking and securing the vessel.

Once the vessel is moored alongside the new ore loading dock, there shall be no further shifting necessary to load, as the loading tower moves along the dock on rails to facilitate the loading through the various hatches.

LOADING: The ore handling and loading equipment for Palua has a max. capacity to load 3,000 metric tons of ore per hour (average 2,500 metric tonnes per hour), for the time being. With this capacity, the vessel's mooring lines should be tended during the operation.

The boom of the loading tower is so designed as to allow free movement in any direction, fore and aft. The gantry and boom travel along the dock for a distance of 518 ft., and can place the ore at a distance horizontally out from the dock fenderline of 23 ft. minimum and 62 ft. maximum at the highest water stage, and from minimum 29 ft. to maximum 67 ft. horizontally out at the lowest stage (Ship's Master reports outreach is 55 ft.).

Care must be taken during the course of loading to avoid piling the ore too high in the holds, as this necessitates hand trimming before the hatch covers can be properly secured, and incurs unnecessary trouble.

UNDOCKING: The Master, assisted by a Docking Pilot, if required, will handle the vessel on leaving the dock, going upstream from the dock not less than 0.75 miles distance to the turning basin in the same heading as when the ship moored alongside. Two tugs will go alongside the ship prior to undocking and will assist the vessel until it is headed downstream in the main Orinoco Channel. The amber lights at the heads of the dock form a range to mark the shoreside boundary of the local dredged channel. A red light high up on the loading gantry will come in the same range as the 2 amber lights. In the turning basin a tug-boat will assist the vessel swinging downstream.

When the ship is in the main channel, properly headed downstream, the Docking Pilot will leave on the tug, and the River Pilots (2 of them) will assume the navigational direction. Report to Radio Marina by voice radio and give ETA at Mile 27.

Report again to Radio Marina giving position every hour, and try to contact Barima Pilot Station sometime before arrival at Mile 31, where the Pilots will disembark.

If voice radio communication is not possible, comply by radio-telegraph by way of the YVM station.

GAS-FREE CERTIFICATE: Vessels reporting to Palua to load ore should have the holds and cargo compartments swept clean and ready to receive cargo. Also, any combination ore/tanker vessel tendering to load iron ore at Palua shall present, along with the Notice of Readiness, a Gas-free Certificate if said vessel has in the past been employed in the carriage of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. But they are advised that around Palua in Venezuela there is no chemist available for granting such a Gas-Free Certificate. It may be secured before arriving at Venezuela by calling at Trinidad, reporting to cable address: Harriman, Port of Spain.

In case of necessity, or for convenience, it could be arranged for the chemist to travel to Venezuela to meet the ship in Palua, advising Harriman (Port of Spain) at least 3 days before arrival at Palua.

If the vessel is equipped with a gas-indicating meter (explosimeter), CVG Ferrominera Orinoco C.A. will accept the Master's certification in writing that the vessel is gas-free. However, they reserve the right to check the vessel with their own equipment prior to acceptance.

MEDICAL: There is a medical dispensary at Palua, and a hospital of the Company at El Pao, where seamen may be admitted when requiring hospitalisation in emergency cases.

CONSULS: See "Puerto Ordaz".

REPAIRS: Minor emergency repairs of mechanical, electrical and electronic types may be carried out in the shops by the personnel of the Iron Mines Company of Venezuela. The American Bureau of Shipping has a surveyor at Puerto Ordaz, near Palua.

FLOOD SEASON: The port experiences a yearly flood season from the middle of June to the middle of November, to a max. of about 38 ft. at the last days of August, above the lowest stage (during the first days of April) in the dry season that occurs from the middle of November to the middle of June.

TIDE: The wind in the locality blows generally upstream, and on exceptional occasions during the dry or low-river season, when the current is weak, does overcome the current and cause the anchored ships to tend with stern upstream.

FRESH WATER: Drinking water is available at the dockside in limited quantity of about 100 tons every 24 hours. Small amounts of fresh provisions may be obtained in the locality.

FUEL: All grades of bunker fuel are available at Palua, delivered by barge.

DENSITY: 995.

REGULATIONS: The Venezuelan law is very strict on the subject of contraband. It cannot be stressed strongly enough that all *new* articles, clothing, cigarettes, liquor, etc., must be declared and sealed up on arrival.

Concerning passes, the regulation states that "members of the crew who are not officers of the vessel, in order to go ashore and return aboard, have to be supplied with an identification card to be issued by the Purser of the vessel or his substitute, which card will contain the name of the vessel, the name of the crew member and the date of issue. This card will have to be signed by the person issuing same and has to be authorised by the respective officer of the Port Captain's office for the district".

Section C

PUERTO ORDAZ: 08.21 N. 62.43 W.

OPERATORS: CVG Ferrominera Orinoco.

LOCATION: The operations of the CVG Ferrominera Orinoco are centred in the State of Bolivar in Eastern Venezuela and iron ore is loaded into ocean-going vessels at Puerto Ordaz (08° 21' N., 62° 43' W.), at the junction of the Caroni and Orinoco Rivers, approximately 184 nautical miles from the open sea.

GAS-FREE CERTIFICATE: Any combination ore-tanker vessel tendering to load iron ore at Puerto Ordaz shall present, along with the Notice of Readiness, a Gas-Free Certificate if said vessel has in the past been employed in the transportation of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. Gas-Free Certificates can be obtained through an approved surveyor in Puerto Ordaz.

APPROACHES: See "Punta Cuchillo".

MAX. SIZE: Max. d.w.t. 115,000 tons. Max. LOA 289.56 m. Max. beam 39.01 m.

HEALTH: Vessels could be boarded by the Public Health Doctor in the stream off Puerto Ordaz. He will not come up a Pilot ladder and will insist on an accommodation ladder which should be rigged and ready when he approaches. In order not to delay docking, this accommodation ladder should be rigged on the port side during low river stage, and starboard side during high river stage. If vessel moves directly to berth, Health Doctor will board vessel at dock.

RADIO: Should a vessel receive radio advice at sea to proceed to Puerto Ordaz, and the clearance is to another port, the Master must radio station YVM Puerto Ordaz, and advise the name of the vessel, flag, port of embarkation, original port of destination, Master's name and number of members in the ship's crew. This is necessary in order to comply with article 17 of the Venezuelan Customs Law.

TUGS: All vessels touching at Puerto Ordaz will be assisted by a tug in docking and undocking manoeuvres. Line-handlers are available on the dock to secure mooring lines on vessel's arrival, and to release them on vessel's departure.

BERTHING:

1. **The Harbour:** The Puerto Ordaz Harbour extends from Mile 183.5 to Mile 184.1 of the waterway. The harbour consists of a natural basin formed by the mouth of the Caroni as it flows into the Orinoco. The width of the turning area within the basin varies from a min. of about 1,60 at low water to a max. of about 2,000 ft. at high water. The lighted bu marking the navigable limits on either side of the harbour are move different positions according to river stages in order to achieve utilisation of navigable waters. The bottom of the harbour is gener rock, with scattered layers of sand overburden deposited as sedim by the river. This sand is regularly removed by dredging in orde maintain depths which will accommodate the maximum draft authori by the Port Captain. The bottom configuration across the harb consists of a rocky shelf extending about 900 ft. from the face of t dock. Beyond this shelf the bottom slopes steeply into a deep gor then rises to form a sandy beach along the opposite shore. The veloc of river currents at this site varies according to stage levels. A slo current is generally experienced over the rocky shelf adjacent to t dock, with velocities averaging about 1.5 knots at flood stages and ab 0.5 knots or less at reduced river stages. The velocity of the current o and along the deep gorge averages about 3.5 knots at flood stages a 1.5 knots or less at reduced river stages. During extreme low water, t basin is subject to tidal influence and the velocity of currents is minim although there is no reversal of flow. The direction of the current is ain slightly toward the face of the dock at its S.E. end but deflects aw from the pier about 500 ft. downstreamward. Access to the harbou by way of a naturally deep and wide fairway which is the continuat of the gorge as it enters the Orinoco River.

2. **The Dock:** The Puerto Ordaz Dock is located along the ri ascending side of the harbour and extends outward from shore o S.E. by East alignment. The all-steel fixed-height dock is 1,885 ft. lo its elevation is 41 ft. above low water plane (0.0 ft. stage). This doc fitted with a strong fender system and with a sufficient number accessible bollards for proper docking and securing.

3. **Arrival:**

(a) Notice of Readiness: When completely ready to receive ca vessels will submit "Notice of Readiness" to CVG Ferrominera Orino Vessels will normally be loaded in the order in which Notices Readiness are accepted by CVG Ferrominera Orinoco. The Compa will advise when the vessel may proceed alongside the dock.

(b) Docking: Special Docking Pilots are provided for the docking a undocking of vessels at Puerto Ordaz. These Pilots are qualified R Pilots, thoroughly familiar with local conditions. All vessels will d starboard side to. During the low water stage, which is from the mid of November to the middle of June, no gangway should be rigged a nothing should overhang the starboard side of the vessel. When the r is sufficiently high which is from the middle of June to the midd November vessels are requested to have starboard gangway accommodation ladder rigged and ready to lower immediately a docking in order to expedite the commencement of loading. Venezue authorities and workmen will not use Pilot ladders. Vessels reportin Puerto Ordaz to load ore should have holds and cargo compartme broom clean and ready to receive cargo. Considerable time will be gai if this requirement is met prior to reporting.

(c) Hatches: On arrival at Puerto Ordaz all hatch boards or ponto beams, tarpaulins, steel battens, wedges, etc., should be stowed on port side of the hatch. This will keep the hatch gear cleaner and les the work of the ore handling clean-up gang.

(d) Ballast: In order to lose no time with the loading operations, as as preventing short-lifting, all ballast should be pumped out before ar at the dock. Use utmost caution not to pump oil or sludge overboar the port area. CVG Ferrominera Orinoco Ships' Agency Represent will contact vessel on arrival and will assist in every way possible.

4. **Departure:** All vessels which have completed loading at Pu Ordaz and have received the latest river information from the port offi and are ready for their river transit in every respect, will proceed outw via the Orinoco Waterway, disembarking the Pilot at Mile 27. Once Pilot has disembarked, vessels shall proceed over the South (dred Channel to Mile 0, and exit the waterway.

MEDICAL: There is a hospital at Puerto Ordaz which will admit sea requiring hospitalisation.

TANKERS: See "Punta Cuchillo".

FRESH WATER: Drinking water is available alongside the dock.

FUEL: Bunker "C" and diesel oil is available.

CONSULS: An Italian consulate Agent at Puerto Ordaz, nearest co for other countries at Cuidad Bolivar or Caracas.

REPAIRS: Minor emergency repairs may be carried out in the sho CVG Ferrominera Orinoco.

TIME: The legal time of Venezuela, which is 4 hours behind GMT, be used in Pilotage Zones No. 1 and No. 2 of the Orinoco River.

SHORE LEAVE: Permitted, but it is mandatory that all crew mem should report back to their respective ships before sailing time.

GENERAL: 1. *Ore Loading Equipment:* The ore handling and lo equipment installed on the pier has a speed ratio of 6,000 metric of ore loaded per hour. Due to this great loading capacity the ves mooring lines must be tended at all times.

2. *Handling Facilities:* A movable 110 ton, rail mounted stiff-leg d is installed on the dock for the handling of general cargo.

3. *Provisions:* Small amounts of fresh provisions are available.

4. *Surveyor:* The American Bureau of Shipping has a non-exc surveyor in Puerto Ordaz. Lloyd's has an Agency in Ciudad Boliva a branch office in Puerto Ordaz, and will appoint surveyors upon re

SHIPMASTER'S REPORT: October 1986.

Terminal: Interalumina Terminal.

Location: Lat. 08° 18.7' N., Long. 62° 49.0' W.

Local Time: GMT minus 4 hours.

Approaches: Vessel can anchor 3 miles North of Sea (Lat. 08° 56' N., Long. 60° 10.4' W.). Contact Punta Barima Pi Amacuro Pilots on VHF Channel 16. After obtaining permission, must proceed to inbound buoyed channel without Pilot for 27 mi to Buoy No. 27.1. Channel of sufficient depth, variable width be very narrow at times. One way transit only. Current sets are va

Pilotage: River Pilot boards at Buoy No. 27.1 and continues till 2 miles before berth. There are various buoyed channels enroute with dredging in progress. Several bends in the river, requiring close watch on steering at all times. For outbound pilotage, River Pilot and Berthing Pilot board at berth with River Pilot disembarking at Buoy No. 32.1.

Berthing: Berthing Pilot boards 2 miles before berth. Length of berth over 300 m. One tug available. Multi-purpose berth for alumina loading by chute and bauxite discharge by grabs. Sufficient depth alongside.

Loading: Cargo worked throughout 24 hours. Loading by conveyor-fed telescopic chute, capacity about 1,000 t.p.h. Chute reaches all holds.

Density: About 995 alongside berth.

Fresh Water: Available at berth, good for washing water but unsuitable for drinking.

Bunkers: HFO and DO can be supplied by barge.

Provisions: Fresh provisions and bonded stores can be supplied by Puerto Ordaz Ship Chandlers.

Shore Leave: No restrictions. Shore passes required. Puerto Ordaz City is 30 minutes by car.

Radio: For messages addressed to local Agents in Puerto Ordaz, it is better using some nearby foreign coast stations. YVG (Maracaibo Radio) provides unreliable service on HF. YVM (Puerto Ordaz Radio) does not accept public correspondence and controls all inward bound and outward bound transitting traffic only. Necessary that vessel gives time of passing Entrance Buoy and ETA at Buoy No. 27.1. Vessel is also required to give hourly position at the beginning of each hour until arriving at berth or anchorage and at the same time will obtain information concerning the changes of channel buoy positions and the transitting traffic for the vessels in the channel from the station.

For outward bound vessel, vessel to keep the same watch until passing Entrance Buoy.

The following are the paired frequencies for communicating with YVM (Puerto Ordaz Traffic Control): 468/472; 4192/4322; 6320/6372; 8386/8453 kHz.

SHIPMASTER'S REPORT: September 1988.

The following information is to be read in conjunction with the 1987/88 Edition of the "Guide".

1. The information that advises Masters to pump out all ballast before berthing should be amended.

At the end of September (1988) the river level was 2 ft. less than the highest predicted range. The actual depth at Puerto Ordaz Mineral Quay was measured at 53 ft. and the permitted air draft was 46 ft.

Ship's Masters may adjust their ballast condition through computing the relationship between their draft/air draft and actual depth at the jetty, which is subject to seasonal river level.

In addition to our regular ballast we took 1,100 cu.m. of ballast in the cargo holds in order to reduce our airdraft to the requested 46 ft., whereas we could have pumped out all ballast before going alongside.

2. The officially declared depth is 44 ft. and the permissible draft at Boca Grande Bar in late September was 42 ft.

3. The depth through the Boca Grande Bar Channel and its extension up to the 40 mile Buoy may not conform to the declared depth, and despite the pilot's statement, the part of the Channel on the Bar between Buoys No. 30-20 is the shallowest part of the passage and ships speed is reduced to half speed, instead of the section between Buoys 13.1 – 15.1.

4. The actual position of the Fairway Buoy is Lat. 08° 55.55' N., Long. 60° 11' W. and on our visit the buoy was unlit.

5. Many of the channel marking buoys (especially the red buoys) are unlit or have very weak flashing lights.

6. The rate of the river flow averages 3 knots – 4 knots.

7. It is suggested that deep draft vessels, outward bound, adjust their ETA at Buoy No. 44 in order that the vessel may be at Buoy No. 13.6 at daylight, taking into account that the vessel's speed will be reduced to half speed whilst navigating through the Boca Grande Channel from Mile 30 to Mile 13, due to the effect of the flood tide and mud under the keel.

The following figures may be of guidance to other vessels:

Declared depth: 44 ft.
Permitted draft: 42 ft.
Vessel's draft: 39 ft.
Vessel's sea speed: 12.5 knots
Passed Buoy 44: 1400 hrs.
Dropped Pilot at Buoy 32: 1530 hrs.
Arrived Buoy 13.6: 1820 hrs.
Vessel's average speed over the Bar between Buoy 30 – Buoy 13.6: 6 knots
High water time at Buoy 13.6: 1730 hrs.
Height of water at H.W. time: 2.0 m.
Date: 27th September 1988.

8. It is suggested that whilst navigating through the Boca Grande Channel, fuel oil is used in order to reach a high speed as quick as possible.

9. Nett ore loading rate experienced was 3,500 tonnes p.h.

10. The boarding officers were very co-operative and polite and were at all times courteous to the ship's officers and the Master.

The only documents requested were 8 copies Crew List, 3 copies Crew Personal Effects List and 3 copies of the Stores List (indicating fuel, narcotics, arms and ammunition, bonded stores and usual ship's stores).

AGENCY: Mailing Address for Puerto Ordaz: CVG Ferrominera Orinoco C.A., Agencia de Barques, Puerto Ordaz. Telex: 86472 Fmopu.

CVG Ferrominera Orinoco acts as ship's Agent for all vessels consigned to load iron ore at Puerto Ordaz. This function is performed by the Superintendent, Traffic & Ship's Agency and his staff, whose offices are located adjacent to the loading dock at Puerto Ordaz.

AUTHORITY: Capitania de Puerto de Ciudad Guayama. *Tel:* (86) 229268. *Contact:* Captain Lino Garcia Ibarra, Port Captain.

Section D

PUNTA CUCHILLO, (Puerto Ordaz Terminal): 08.20 N. 62.47 W. (See Plan)

N.B. See "Orinoco River" for all important entry requirements. Specific details relevant to Punta Cuchillo only are as follows:

OPERATORS: Lagoven S.A.

LOCATION: The terminal and dock is located near Mile Post 192 on the South side of the river.

PILOTAGE: Government Pilot will pilot vessel to Puerto Ordaz. In some cases this same Pilot will act as Mooring Pilot and dock vessel at the terminal. If River Pilot does not also act as Docking Pilot, the River Pilot will disembark at Mile 178 during LW, and Mile 183, in HW, and a Docking Pilot will embark and take the vessel to mooring.

Pilots are obtained at Buoy 27 of the old channel, which is the same as Buoy 27.7 of the new channel and is located 5 miles West of the old lighthouse at Punta Barima at Lat. 08° 36' 00" N., Long. 60° 30' 40" W. It is important that vessels pass this buoy and be in sight of the Pilot Station (1 mile E.S.E. of Punta Barima Lighthouse), as Pilots will not proceed to the vessel until it has been sighted.

APPROACHES: *Shipowners Report:* 1982.

Cautionary Advice: Due to several wrecks located in the approaches 6 miles North and 13 miles N.W. of the Fairway Buoy, extreme caution is necessary when approaching.

The coastline is difficult to pick up on radar and the Fairway Buoy is detected within a distance of only 3.5 miles. Contrary to the chart, it is currently not fitted with a racon. The buoy is not 25 ft. high as described in pilot books. It is, in fact, a small black buoy with a lattice construction with the radar reflector missing. In clear weather the channel buoys can be visually sighted and detected on radar at about 5 miles.

From the Sea Buoy 0.1 to position Mile 9, a strong N.W. set is experienced and an average of 5° set to channel course can be expected. After position Mile 9 set decreases and becomes variable in direction until arriving at Pilot Station Mile 27 position.

From August until the end of the year the river current can attain a rate of 5 knots, making it necessary for an outbound vessel to reduce speed when approaching river bends in order to ensure bends can be safely negotiated. Due to the strong currents of the Orinoco River, recent experience indicates that, if a vessel goes aground, the Master when attempting to lighter the vessel should drop an anchor prior to discharging ballast.

All stretches of the river have range markers which mark the centre of the channel. While manoeuvring in the river, the vessel tends to steady up when rudder is put midship without any counter rudder. This does not affect the manoeuvrability of the vessel but Master and Pilot should be aware of this so as not to take rudder off too fast when turning.

Buoys are NOT on the edge of the channel from the Sea Buoy to Mile 27.0. White buoys are 125 ft., Red buoys are 75 ft. outside the edge of the channel. Buoys are located at the point where the channel starts to slant downward to the deeper water. The main dredged channel is 400 ft. wide. The ranges are on the centre of the channel.

Masters must refer to the sailing directions for additional information.

MAX. SIZE:

Gauge Reading	*Maximum Draft*	*Tide Required at Bar*
12 ft. – 14 ft.	33 ft.	None
14 ft. – 17 ft.	34 ft.	None
17 ft. – 20 ft.	35 ft.	None
20 ft. – 23 ft.	36 ft.	None
23 ft. – 26 ft.	37 ft.	None
26 ft. – 29 ft.	38 ft.	None
29 ft. – 32 ft.	39 ft.	None
32 ft. – 35 ft.	40 ft.	None
35 ft. – 38 ft.	41 ft.	half of high tide
38 ft. – 41 ft.	43 ft.	half of high tide

HEALTH: Vessel will be boarded by the Public Health Doctor in the stream off San Felix or Puerto Ordaz or occasionally at the Terminal. If he boards before docking, an accommodation ladder should be rigged and ready when he approaches, as he will not come up a pilot ladder.

RADIO: Vessels diverted at sea to Punta Cuchillo which do not have a Venezuelan Clearance on board, must advise Lagoven by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessels flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessel will be subject to a fine.

TUGS: The use of tugs is necessary in docking and undocking manoeuvres of boats at this Marine Terminal. Alcoa has a 2,100 h.p. tug available for this service. A tie-up launch will be provided to assist in the mooring of the vessel, and will handle all the mooring lines before and after loading.

BERTHING: The dock at the terminal consists of a docking platform, 2 breasting dolphins and 2 mooring dolphins. The docking platform is connected to shore by a 10 ft. causeway capable of carrying a light truck.

At mean low river stage, water depth at the face of breasting structures is 40 ft. The bank rises sharply from face of dolphins toward shore. The 40 ft. depth contour extends parallel to shore for a considerable distance upstream and down stream from the dock, allowing a flat approach angle.

Current is negligible during low river stage and is approximately 6 knots at midstream at high river stage. Current runs generally parallel to the face of the dock at the dock site.

Top of dock elevation is 45 ft. above low water stage. Buffering system extends from a point below low water stage to a point immediately below top of dock. Nothing should overhang the shoreward side of the vessel when docking during the lower stages of the river. The buffering system is designed to accommodate forces exerted by a vessel of 47,000 tons displacement, approaching the dock with a velocity component perpendicular to the dockface, of 0.5 ft. per second.

Bollards for vessel's lines are provided at the mooring dolphins and at the breasting structures. Mooring dolphins will safely withstand 200,000 lb. of mooring line tension.

The facilities include a 24 in. diameter submarine pipeline which crosses the river a short distance down-stream of the dock. The crossing is marked by triangular-shaped signs on both banks of the river. Masters are cautioned against use of vessel anchors in this area.

The terminal pumps are capable of loading oil aboard ship at the rate of approximately 14,000 bbls.p.h.

INWARD CLEARANCE FOR DIVERTED VESSELS: Vessels diverted to Puerto Ordaz to load cargo should submit all documents, except consular mail, which they will not have. In lieu of this, they should submit 4 copies of the cable to divert, leaving enough space for the translation in Spanish. Vessels diverted at sea to Puerto Ordaz (Lagoven Terminal) which do not have a Venezuelan clearance on board must advise Lagoven at Puerto Ordaz, by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessel's flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessels will be subject to a fine.

MEDICAL: Medical assistance can usually be arranged, particularly in the case of an emergency.

SAFETY: The following is a condensation of the safety precautions that should be observed when the vessel is alongside the dock:

(i) All passageway doors leading to the cargo deck areas are to be kept closed during cargo-loading operations.

(ii) Ship's firefighting equipment must be kept ready at all times while berthed at Lagoven dock.

(iii) Smoking or carrying lighted or unlighted pipes, cigars or cigarettes on the weather decks of the vessel, or on the dock, is strictly prohibited under all circumstances. Masters are requested to instruct their crew not to throw lighted cigars or cigarettes over the side or out of the portholes.

(iv) An efficient watch must be maintained on deck and in the engine-room on the vessel, and a sufficient number of men must be on board at all times to move the vessel any time, in case such is required.

(v) If the galley is located near oil-handling operations of any nature, the skylight lids should be kept down and secured to prevent the galley being sprayed with oil in the event of a burst hose.

(vi) Ventilators in the vicinity should be turned away from the scene of operation.

LOADING: Monagas Crude is the only cargo available at the Puerto Ordaz Terminal. This crude has an API gravity of 11.9° to 12.5° F. (6.490 – 6.517 U.S. barrels per long ton). This cargo must be heated to approximately 140° F. in order to attain normal discharge rates.

Loading is accomplished through 3×10 in. hoses provided with 10 in., 150 lb. ASA flanges. Hoisting gear is provided for handling the hoses. A dock crew will connect the cargo hoses and disconnect them on completion of loading. Some adapters and other tools are available on dock. The oil will be loaded at an elevated temperature.

Precautions, as are common for any heavy oil, should be taken to ensure that no ballast water is left in any tank to be filled with this oil. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lb. per 1,000 barrels for every 0.10% contamination by sea water.

All cargo compartments must be stripped dry. Cargo pipelines should be drained and/or purged of water.

There is no provision at the Puerto Ordaz Terminal for disposal of dirty ballast or tank washings. Tankers bound for Puerto Ordaz for loading must dispose of all dirty ballast and tank washings before entering the Orinoco River.

Prior to proceeding to sea, all Butterworth plates, cargo tank hatch covers and ullage plugs should be inspected to ensure against entry of salt water.

FRESH WATER: Fresh water is available ex-barge; cable advice of 24 hours is required. Dry provisions may be obtained in very limited quantities.

FUEL: Bunker fuels are available at all hours from Astilleros Orinoco C.A., who operate a floating storage and blending facility in the Orinoco River. Bunker fuels may be received at Lagoven dry dock while loading crude. Full cargoes can be made available.

REPAIRS: No major repair facilities are available. However, small repairs can be taken care of through local machine and electrical shops, and shore labour can be obtained if required.

TIME: GMT minus 4 hours.

SHIPMASTER'S REPORT: June 1987.

Location: The Terminal at Punta Cuchillo (Puerto Ordaz Terminal) lies some 192 miles up the Orinoco River.

Approaches: The buoyed channel was picked up at a distance of 15 miles, and we made contact with Barima Pilot 2 hours prior to arrival. Pilot Station instructed us to anchor 1 mile East of Buoy "0.1". No vessel may enter Boca Grande Channel without permission from the Pilot or local Radio Station "YVM". We anchored for a few hours and then proceeded up the dredged channel to Buoy 27.1 to the Pilot Station. The Pilot boarded from a fast launch using the pilot ladder on the starboard side. We continued up the river at 90 r.p.m. making an average speed of 10 knots. The Pilot was competent, but spoke little English. The vessel finally anchored off San Felix, 179 miles up river at 2324 hrs.

BA. Chart No. 3322 is not really adequate, so we obtained the local river charts through the Agent. In the lower reaches the leading lights are poor in daylight, being hard to pick out. The Boca Grande dredged channel is said to be 400 ft. wide, with red buoys with red lights marking the starboard side of the channel inwards and black buoys with green lights marking the port side. At times of dredging, buoys are displa some 100 ft. outwards from the channel.

Communications: Throughout the river passage, the Radio Officer i contact with "YVM" on the hour, giving the ship's position; they in re give positions of other ship movements, and navigational informa with regards to shifting of buoys and where the dredger is working

Berthing: We remained at anchor for 10 days, after which we picked anchor in the afternoon and sailed the last 14 miles to the berth. It i modern construction, fendered with wooden sheaving, with dolphins the head and stern lines, which were long leads. Two tugs were u for mooring, tug ropes, close alongside "American style". The after was of conventional type, whilst the forward was a powerful flat bot pusher type boat. The tugs kept the vessel in position whilst moor were run.

The headlines were taken first, followed by the stern lines, run b mooring boat, 3 lines at a time, springs by heaving line. Ending up 3 lines and 2 springs each end. Ship's gangway used.

Cargo Operations: The independent surveyor spoke good Engl Vessel loaded Morichal Crude (described as Asphalt) but not wh know as asphalt, being much thinner. API 12.5, loading tempera 132°F. To be kept at loading temperature. Flashpoint 192°F.

A loading rate of 2,467 t.p.h. was achieved using 2 × 10 in. ho Shore stop at end of loading.

On completion of cargo operations 3 hours should be allowed paperwork. The cargo documentation is brought on board by the Ag who signed for the Notes of Protest on behalf of the suppliers (Lago SA).

Officials: The vessel was boarded at San Felix anchorage by the Ag and 5 officials, and everything proceeded smoothly.

The following documents were required:

5 copies Crew List
3 copies Crew Personal Effects List
3 copies Bond List
Clearance from Last Port

The Ship's Certificates were inspected.

Departure: The Docking Pilot took the ship off the berth, using the sa 2 tugs. Pilot departed once the ship was swung. We carried 3 river pi two were there for the journey only, although they all did a spell on bridge. The vessel anchored at Buoy 44.3A for 5 hours, awaiting The pilots left at Buoy 32.5. At 90 r.p.m. we made 8.5 knots until were clear of the channel.

The maximum sailing draft allowed on this occasion was given 38 ft. 6 in. (F.W.) which, to say the least, was optimistic.

AGENCY: Lagoven handles all papers and documentation connec with the ship's business. Lagoven will also help the ship's Maste providing required land transportation, limited provisions, or any o assistance that may be required for the operation of the ship's nor business. Alcoa will also assure that the ship's requirements are m regard to Sanitary Inspection, Customs Inspection and Guardia Nacio

Section E

VENALUM TERMINAL: 08.18 N. 62.50 W.

SHIPMASTER'S REPORT: February, 1981.

LOCATION: Mile 194 on Orinoco River. See "Matanzas – San F in "Plan Section".

ENTRY: See "General, etc." under Orinoco River.

TUGS: Are summoned by Pilot when required.

BERTHING: Modern quay built on piles parallel to the bank with ac by two piers, one at either end of the general cargo quay, allow one way system to be operated.

Length of general cargo quay – 215 m.
Length of bulk cargo quay – 85 m.
Depth alongside at lowest state of river – 12 m.

Fenders: The Pier's fenders keep the vessel 5.0 m. away from Fenders move up and down as water level changes.

CARGO FACILITIES:

Cranes: Venalum has 2 cranes of 35 tons capacity each, for loa discharging aluminium, general cargo, containers and bulk cargo

Two electro-hydraulic clamshells with 12 cu.m. capacity each discharging bulk cargo through 4 hoppers of 20 cu.m. capacity each used for loading bulk into trucks at a rate of 110 tonnes/hr. (2 clams

When the Orinoco River water level permits, ship's crane is us loading/discharging operations.

Elevator: Forklift with max. capacity 6 tonnes.

The Electro-Magnets: The equipment is connected to crane, a discharge rate is 20 t.p.h. each.

Pneumatic Cranes: This system used for alumina and petroleum only.

STEVEDORES: Working hours – 24 hours a day, 7 days a wee

END OF ORINOCO RIVER SECTION

PERTIGALETE: 10.15 N. 64.34 W. (See Plan)

LOCATION: Situated in a sheltered bay about 2 miles East of the port of Guanta, or about 4 miles from the pilotage zone situated in the North.

PILOTAGE: The pilotage zone in Pozuelos Bay is the same as for Guanta, i.e. an area situated between the islands of Borracha and Chimana, in the Bay of Pozuelos (formerly called Bergantin Bay).

From the pilotage zone for the port of Guanta/Puerto La Cruz, the private pier Pertigalete is to be approached by sailing between the Isla de Plata and the island of Cachicamo. Pilotage is compulsory in and out and is performed by well-trained government Pilots. The navigation is considered very safe.

MAX. SIZE: The depth of water for ocean-going vessels alongside the Pier is 20 ft. (shore side) to 40 ft. (sea side).

TUGS: Available from Inward Clearance port at Guanta/Puerto la Cruz.

BERTHING: The private pier in Pertigalete for berthing ocean-going vessels is up to 150 m. (492 ft.) long. The apron is ample and allows easy manoeuvre of trucks with cement. On the same pier the cement factory is regularly receiving raw material and machinery, but the berthing is along the West side of the pier for coastal trade, so does not interfere with operations for ocean-going vessels. There are chutes, conveyor belts from the nearby silos. No cranes available.

STEVEDORES: Loading operations are performed exclusively by the personnel of the cement factory. All costs, including overtime, are for account of the cement factory.

Under normal conditions on Saturday afternoon there is no work, but almost without exception the cement factory works overtime on Saturdays if by doing so the vessel can be despatched that day. On holidays, if circumstances call for urgent operation, the cement factory has the option to work overtime.

TANKERS: Berth at private wharf at Pamatacualito, operated by Baroid de Venezuela SA. Length of berth 113.60 m., depth alongside 10 m.

LOADING: The cement factory is able to deliver to the pier 600 tonnes per hour (cement in bulk).

GARBAGE DISPOSAL: No collection service available.

WASTE OIL DISPOSAL: No collection service available.

SEAMAN'S CLUBS: No seaman's club at this port.

CURRENCY: Venezuelan Bolivar.

OPERATOR: Private pier of C.A. Vencemos Pertigalete is under the jurisdiction of Customs and Harbour Master of Guanta/Puerto La Cruz, Eastern Venezuela. All charter business and general administration is covered by Caracas Headquarters of Venezolana de Cementos S.A.C.A.

Local address: C.A. Vencemos Pertigalete, Apartado 4141, Puerto La Cruz. *Tel:* 95421, Al 30. *FAX:* 95420. *Telex:* 81154.

AUTHORITY: Capitania de Puerto La Cruz, Paseo Colon, Sector Los Cocos, Puerto La Cruz, Venezuela. *Tel:* (5881) 677452, 677932. *Telex:* 81386. *Contact:* Captain Humberto Marcano, Harbour Master.

AGENT: Servicios Navieros Tisa (Sernatica), P.O.Box 4356, Puerto La Cruz, Venezuela. Tel: (5881) 683998, 683481, 683666, 684083. Telex: 81390. Fax: (5881) 683422.

PUERTO CABELLO (inc. Borburata): 10.29 N. 68.01 W. (See Plan)

DOCUMENTS:

Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
3 Narcotics Drugs Lists.
2 Lists of Personal Effects.
1 Vaccination List.
Derat Certificate.

PILOTAGE: Pilotage is compulsory, but vessels must first anchor in roads 1 mile North of Punta Brava to await entry formalities and berthing orders.

MAX. SIZE: Bulk Cargo Pier: Up to 32 ft. draft.
Inner Port: Up to 28 ft. draft.
Also see "Tankers".

TUGS: The use of tug-boats within the port is compulsory both for entering and leaving port, as well as for manoeuvres in the port basin, for foreign flag ships over 300 tons.

BERTHING: The port entrance is 100 m. wide in direction West to East. Berth No. 1 and half of Berth No. 2 are along the same entrance channel, where ships are berthed only as an exception or when the port is rather congested. The total length of the North (main) Pier for the berthing of ocean-going vessels is 1,025 m., room enough for 6 to 8 vessels. For administrative reasons the pier is divided into 8 berths of about 128 m. each. Between Berths No. 2 and 3, the pier turns Southwards. Along the pier there are warehouses which under normal circumstances provide sufficient indoor space.

Along the East Pier, of 350 m. length, there are no warehouses. This pier gives berthing facilities to 3 or 4 middle-sized vessels.

Along the South Pier, of 500 m. length, there are 2 warehouses. This pier is exclusively used for coastwise shipping, fishery and small craft in general.

The dredged channel along the East Pier is only 80 m. wide. This is the only channel which connects the main basin of the port with the South basin of the port, the latter served through the South Pier.

Ro-Ro facilities available.

BULK HANDLING FACILITIES: 400 m. long new pier, designed exclusively for the handling of bulk cargoes.

This bulk cargo pier has an apron of about 25 m. and allows ships with a draft of 10 m. at any time.

Ships moored along this new pier are not able to take water there, but have to be shifted to the general cargo piers in the port of Puerto Cabello.

There is no telephone installation on the new pier.

Tug-boat service and assistance of Pilots is compulsory to negotiate the distance to and from the bulk cargo pier.

General cargo is not allowed to be handled at this pier. There are no cargo handling facilities whatsoever and no kind of rolling equipment either. All the vessels, unless they have up-to-date discharging equipment of their own, have to provide derricks of minimum 5 tons capacity to support the SKT discharging equipment of receivers. The cargo is discharged in bulk cargo trucks, fully closed and with only rather narrow manholes for the SKT arm.

The new grain terminal has been opened. The wharf is 400 m. long and allows 2 vessels to berth. Max. depth 30 ft. Average discharge rate 1,500 tons per day.

TANKERS: *Borburata:* The Maraven Terminal lies about 2 miles East of the port entrance.

Berth No.	*Max. length*	*Max. beam*	*Max. draft*
1	400 ft.	—	20 ft.
2	575 ft.	72 ft.	31 ft.

No. 1 Berth is used for bunkering only.

No. 2 Berth is used for the discharge of refined products and bulk chemicals. It is fitted with 4×8 in. Chicksans and a range of hoses from 4 in. to 8 in.

A Pilot is compulsory, and boards at Puerto Cabello. If the vessel is cleared outwards at Borburata, the Pilot may return to the Pilot Station by road.

Berthing and unberthing in daylight only.

Also see "Shipmaster's Reports" and "Report".

Lagoven Terminal: The buoy mooring is used for the discharge of petroleum products. Max. length 198 m. Max. beam 28 m. Max. draft 34 ft., will be increased to 38 ft. Max. Tonnage 40,000 d.w.t. Vessels berth using 5 shackles on the port anchor, and 6 stern lines to 3 mooring buoys.

Terminal Marino Holanda: Consists of 3 buoys situated in a depth of 45 ft. near Guaguaza Lighthouse. Used for loading/discharge of Chemicals.

STEVEDORES: *Straight Time:* Monday to Friday: 0700 – 1100 hrs. and 1300 – 1700 hrs.

Overtime: Monday to Friday: 1800 – 2300 hrs. Normally overtime beyond 2300 hours is not permitted.

Relief Gangs: Obtainable, if there are not too many ships working in the port at a time, from 1100 – 1300 hrs. and 1700 – 1800 hrs.

Work on Sunday: Not permitted except for passenger vessels, and considered as such are those carrying more than 60 passengers, and with a medical doctor on board.

Saturday Afternoon Work: Not permitted. But if a vessel can terminate operation and sail with a maximum of 3 additional hours' work, a special permit can be obtained from Customs and Port Authorities. In such case, the additional working hours are considered straight time work.

FRESH WATER: Available by tanker trucks only.

The drinking water in Puerto Cabello is tropical treated, well-filtered and wholesome.

Every vessel of over 600 nett tons calling at Puerto Cabello, and other ports in Venezuela, should arrange to take water only at Puerto Cabello in order to avoid double water dues.

REPAIRS: The adjacent Naval Yard, the entrance to which is within the main port, opposite the North Pier, is equipped for minor repairs both on engine and hull. For emergency purposes, the dry dock could be used. Its capacity is for ships up to 30,000 to 35,000 tons. All repairs on the hull are effected by a special crew transferred from the Naval Yard.

At the dry dock there is 1 crane of 15 tons capacity. Within the Naval Yard there are 2 slipways for ships of 125 ft. length and 210 ft. length max. respectively.

Venezuelan Navy ships always have priority.

WATCHMEN: A very careful watch must be maintained in and around the accommodation as ships' safes and cabins have been broken into.

OPENING/CLOSING HATCHES: Is not performed by the National Port Services, but instead either the ship's crew or hired assistance labour must be used. Recommended that ship's crew open and close hatches.

REGULATIONS: Port regulations referring to contamination of the port waters will be strictly applied and fines for contravention will be imposed.

No maintenance to bridgehouse, hull or deck should be carried out whilst in port unless special permit issued by the Port Captain has been obtained.

SHIPMASTER'S REPORT: November 1984 (See "Plans").

Vessel: LOA 170 m., beam 26 m.

Berth: Maraven Berth at Borburata.

Pilot: Pilot boards off Puerto Cabello during daylight hours only.

Max. Draft: 32 ft.

Tugs: When berthing, 2 tugs are made fast on the Main Deck fore and aft.

When unberthing 2 tugs are used, 1 tug tows aft and the other stands by forward.

Charts: B.A. 1523 and 1966.

SHIPMASTER'S REPORT: October 1985.

Depth within the port received from Agent:

Entrance to the Harbour	31 ft. 6 in.
Pier No. 1	31 ft. 6 in.
Pier No. 2	31 ft. 6 in.
Pier No. 3	31 ft. 6 in.
Pier No. 4	27 ft. 0 in.
Pier No. 5	27 ft. 0 in.
Pier No. 6	31 ft. 0 in.
Pier No. 7	33 ft. 0 in.
Pier No. 8	32 ft. 0 in.
Pier No. 9	32 ft. 0 in.
Pier No. 10	27 ft. 0 in.

Pier No. 11	27 ft. 0 in.
Pier No. 12	27 ft. 0 in.
Pier No. 13 (for Ro-Ro vessels)	24 ft. 0 in.
Pier No. 14	24 ft. 0 in.
Docks At Area 6 (Grain Piers)

Pier No. 28	32 ft. 0 in.
Pier No. 29	30 ft. 0 in.
Pier No. 30	29 ft. 0 in.
Pier No. 31	31 ft. 6 in.
Pier No. 32	32 ft. 0 in.
Docks at Area 7 (Floating Docks)	
Pier No. 37	27 ft. 0 in.
Pier Nos. 38 and 39	30 ft. 0 in.
Pier Nos. 40, 41 and 42	32 ft. 0 in.

SHIPMASTER'S REPORT: February 1989.

Documents:

1 copy Health Declaration.
2 copies Drugs List.
3 copies Stores List.
2 copies Crew Declaration.
5 copies Crew List.

The port officials are generally relaxed and easy going, ship's standard papers are accepted.

A Ministry of Transport and Communications Inspector will board, probably after clearance has been given, and will fill in a long questionnaire about the vessel and equipment and also inspect all the certificates. An Inspection Certificate is issued and is required by the Port Captain before the Clearance Outward can be issued, however, the Agent had never heard of this before.

Pilotage: The Pilot boards at the anchorage from a large launch. Pilots leave just in the entrance channel.

Approaches: Charts: B.A. Charts No. 1966 and 1523, USDA Chart No. 24450.

Buoys were found to be as charted with lights working.

In February 1989 dredging was being carried out in the entrance with cranes on a barge moored to the North shore of the channel and blocking about half the width. Two buoys (Fl. Red) are moored approximately mid-channel, marking the work, with vessels passing to the South. The channel is still adequate.

Communications: Contact with pilots and Port Captain's office can be made on VHF Channel 16.

Shortly after anchoring, a launch came alongside with an Arrival Information Form to be completed.

When calling on VHF, a number of stations will answer, most of them are ship chandlers but do not identify themselves as such.

We were advised that the vessel should anchor in Anchorage 'C' and when we asked who was calling they said that it was the Pilot station calling, it was in fact a ship chandler.

Agents can be contacted on VHF Channel 16 and usually use Channel 11 for working, during office hours only.

Tugs: The Pilot advised that tugs are compulsory, one tug used for vessels under 125 m. in length and 2 tugs for vessels over 125 m. LOA.

The tugs join the vessel just inside the harbour entrance and if making fast use their own lines.

Berths: Berths No. 13 to 21 have not yet been completed and work does not appear to be continuing at the present.

Berths No. 31 and 32 are served by a fixed grain elevator supplying a grain silo on on the dockside.

Berths No. 25 to 30 are used for discharge of grain by portable elevators and also for containers.

The area of the dock from Berths No. 25 to 32 is known as El Granel.

Dockside cranes are not provided at any of the berths but a quantity of mobile cranes of various capacities are available.

There are good fenders on all the completed berths.

Cargo Working: On the bulk berths working hours are:

Weekdays: 0700 – 1200, 1230 – 1800, 1830 – 2300.
Saturdays: 0700 – 1200.
Sundays and holidays: No work.

Overtime is possible on Saturday afternoons to finish, also at other times if all parties agree.

Grain is discharged with a two stage chain conveyor elevator, each stage requiring a crane for support, i.e. 2 cranes at each hatch working.

Two elevators were used throughout, requiring 3 ship's cranes and one shore crane.

Shore crane hire rates are variable, depending on the shift, but were quoted as approximately 4,000 Bolivars per 3 shift day, exchange rate is 37 Bolivars to U.S.$1.00.

Discharge rate is quoted as 1,500 tonnes per elevator but this is entirely dependent on the availability of trucks to take the cargo away.

The distance the trucks have to go is also important, as some of our cargo was reported to have a destination 10 hours away, with a result that each truck could only make one round trip in a day. Each truck carries approximately 40 tonnes.

It was unfortunate that the vessel arrived just before Carnival, as heavy transport is not allowed on the roads during this time and other holidays, in an effort to reduce accidents, due to the many drivers on the roads.

Delays during discharge were due to shortage of transport with some short delays for rain and breakdowns.

Elevator hours available	161.3 hours.
Elevator hours used	74.17 hours.
Gross rate for 8,000 tonnes	49.6 t.p.h.
Net rate for 8,000 tonnes	107.9 t.p.h.

The nett rate gives 1,618.5 tonnes per day for each elevator.

Of the 74.17 elevator hours used, 2 elevators were working simultaneously for 14.7 hours. If discharging had been carried out with only one elevator it would have required at least another day alongside to complete.

Priority for trucks is given to completing vessels.

First four days of discharge 11 shifts (48.45 elevator hours) were u average of 4.4 hours per shift.

Last two days of discharge 5 shifts (25.72 hours) were used, aver of 5.14 hours per shift.

Medical: The Agent must be pre-advised of any medical atten required. The office car will pick-up crew for the doctors at 0800 and 1330 hrs. at the gangway. A note is required from the vessel by driver.

Fresh Water: Fresh water is delivered alongside by tank trucks, e carrying about 20 tonnes, order well in advance as delivery is slow. T trucks provide the necessary hoses.

Repairs: The Port Authority only allow chipping and scraping along on the bridge front, funnel and decks, provided that no chippings overside.

Hull painting is forbidden.

Permits are required for Plimsoll and draft mark painting, the pe are arranged through the Agent.

Engine repairs and check-ups require permits from the Port Autho prior to work starting, permits are often refused.

All repair work requires the advance permission of the Port Capt

Repatriation: Prepaid tickets are a condition as airline agents can guarantee Seamen's Rebate and will give preference to full paid tick

Shore Leave: Shore passes are issued and stamped by Immigration Port Captain, the blank passes are brought on board by the Agent the visit and have to be completed before the Officials stamp and s them.

Oil Spillage: The spillage of oil and garbage into the dock is prohibi and this also covers overflowing of ballast tanks, washing dust from docks and washing down.

Ship Chandlers: About ten ship chandlers will present themselves soon as the clearance visit is completed, with widely varying prices

We found Perdomo Shipchandlers to be professional, with reasona prices and also provided a good service.

Captain's Car Service: The Agent will send the office car at 0900 and 1500 hrs. for transport to the office for communications with Owners if required, or at any time if requested by VHF.

Flags: The Venezuelan flag must be hoisted every morning at 0600 and lowered at 1800 hrs. every evening whilst alongside.

Lifeboats: Vessels are not allowed to lower liferafts or boats for pain or maintenance work without a permit, whether alongside or at anc

Ratguards: Ratguards must be in position on all ropes in order to a fines.

REPORT: A tanker terminal has been established inside the port Berth No. 32. The terminal belongs to the "Instituto Nacional de Puert and is referred to as "Terminal Santana". The terminal handles vegeta oils through 3×6 in. connections and flexible hoses. There are 4 sh tanks about 80 m. away. Ships discharge into either shore tanks lorries. Max. draft 9.50 m.

SHIPMASTER'S REPORT: August 1996.

Authorities: Documents required by Venezuelan Authorities:
Upon arrival during the clearance:

5 copies Crew List.
5 copies List of Provisions.
5 copies Crew's Personnel Effects Declaration.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
2 copies Dangerous Cargo List.
3 copies Stowage Plan.
1 copy Ports of Call last 6 months.
Clearance from Last Port.
Mate's Receipts.
Ship's Certificate.

Information required by Authorities:

(a) Total capacity of sludge tank quantity onboard upon arrival.
(b) Total capacity of septic tank and cubic meters onboard treatment.
(c) Cargo in transit, metric tons and bales.
(d) Capacity of fresh water, how much onboard and last port w made water.
(e) Last provisions port.

Vessels are not allowed and/or permitted to undertake follo without authorisation from Harbour Master.

(a) Paint outside the vessel.
(b) Chip outside the vessel.
(c) Wash inside the holds.
(d) Wash deck without covering scuppers.
(e) Any kind of maintenance and/or repairs.
(f) Receive visits onboard which do not relate to ship's operation

Anchorages: See B.A. Chart No. 1628.

Pilotage: Pilot station calls vessel when 20 minutes – 30 minutes port, and advises time of Pilot coming onboard or if vessel has t or anchor. Call sign "Puerto Cabello Pilot". Pilot launch is painted with white superstructure and flies "H" flag. The boat may also other vessels waiting.

Stevedores: Work Monday to Friday, and Saturday until 1200 hrs may work up to 1800 hrs. Sunday is a holiday.

Opening/Closing Hatches: Ship's crew.

Garbage/Waste Oil Disposal: Available at a charge after vessel re a certificate.

Fresh Water: By truck. Cost U.S.$ 4.0 – 4.5 per tonne.

Shore Leave: Day before arrival, Master to send Crew List to Ag make out shore passes. These are stamped by Immigration inspection on arrival.

Passes are to be returned before departure.

Crew members should not go ashore alone at night.

Communications: Whilst at anchor, vessel may use VHF Chan When alongside, crew can make calls to any country by contact "man" with cellular telephone.

Currency: Venezuelan Bolivar. U.S.$1.00 = 440 – 470 VB.

Watchmen: A very careful watch must be maintained during darkness, and on completion of work, gangway should be raised. During working hours, watchman checks workmen boarding.

During hours of darkness, 2 policemen in patrol car check area every 30 minutes.

Regulations: Port Authorities and representatives of Harbour Master visit vessel every day to check documents. They also check for pollution and any infringements of the port regulations.

Fuel: Diesel oil delivery by truck with capacity 20 tonnes.

PUERTO DE HIERRO: 10.38 N. 62.05 W.

DOCUMENTS:

Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
6 Stores Lists.
6 Narcotic Drugs Lists.
2 Health Declarations (forms provided and filled by doctor on arrival).
Derat Certificate.

PILOTAGE: Pilot boards at Sea Buoy, Lat. 10° 37' N., Long. 62° 06' W. If no pilot boat meets vessel on arrival, ship must anchor to wait orders. Send 7 day, 48 and 24 hour ETAs to cable address "Transterm Guiria". Vessels should anchor in the vicinity of Sea Buoy. No radio-telephone available.

ANCHORAGE: Vicinity of Sea Buoy. Good holding ground.

RESTRICTIONS: Vessels may have to wait at anchorage until slack water for docking when tide/current is strong.

MAX. SIZE: Dock, East berth: 30 ft. at LW; 33 ft. at HW; 690 ft. length, 90 ft. beam.

Dock, West berth: 19 ft. at LW; 32 ft. at HW; 600 ft. length, 60 ft. beam. Also see "Berthing".

HEALTH: Doctor boards at berth and grants Pratique. Any suspected disease or fever to be reported at that time. Vessels arriving from a Venezuelan port do not require Pratique.

RADIO: La Guaira, Venezuela.

TUGS: None available.

BERTHING: Berthing at times limited to slack water period depending on strength of tides. Pilot will advise.

Bauxite Terminal: Max. draft 37 ft. Depth alongside 40 ft. Max. 40,000 d.w.t. Loading rate 3,000 t.p.h.

STEVEDORES: Bulk cargoes: Discharging rate 700 – 800 t.p.h., loading rate 800 – 1,000 t.p.h. No facilities available for handling general cargo.

MEDICAL: No notice required. Venezuelan Navy Hospital with limited medical assistance.

TANKERS: No facilities.

DENSITY: LW – 1020. HW – 1023.

FRESH WATER: Available in limited quantities at berth. Rate of delivery 30 t.p.h.

FUEL: In an emergency. Diesel fuel medium, specific gravity at 60°F 0.85, API gravity at 60°F 35, viscosity SSU at 100°F 37, viscosity engler at 20°C 1.40.

REPAIRS: None. Small company workshop.

CONSULS: None.

CUSTOMS ALLOWANCES: Two cartons of 200 cigarettes each or equivalent in tobacco. Two 0.75 litre bottles.

AIRPORT: Nearest airport (1 hour voyage on launch) is Guiria with 2 weekly flights to Caracas and the same number to Port of Spain, Trinidad. Next nearest (1 hour launch plus 2 hours car) is Carupano with 4 daily flights to Caracas.

TIME: GMT minus 4 hours all year round.

HOLIDAYS: Cargo worked 24 hours a day, 365 days a year.

IDENTIFICATION CARDS: Issued locally by Navy on arrival.

DEVELOPMENTS: Possibility of increasing draft to 42 ft. at loading berth, and to 30 ft. at discharging berth.

GENERAL: The whole of Puerto de Hierro is a Venezuelan Navy Supply Base. The dock and cargo installations are operated by Puerto de Hierro, S.A., a subsidiary of Caribbean Steamship Company, S.A. Only bulk cargoes transhipped by Caribbean Steamship are handled.

AUTHORITY: Puerto de Hierro, S.A.

PUERTO LA CRUZ, (Guaraguao Terminal): 10.13 N. 64.38 W.

(See Plan)

FLAG: The Venezuelan flag must be displayed from the foremast when entering Pozuelos Bay and when manoeuvring or docking, regardless of the hour. However, while at anchor or while moored at berth, it need be displayed only between sunrise and sunset.

LOCATION: Puerto La Cruz located on Pozuelos Bay on the N.E. coast of Venezuela. Its harbour is well protected by numerous islands against sea currents. The hurricane path is several hundred miles to the North and has never affected the flow of navigation in the Puerto La Cruz area.

The lighthouse marking the entrance to Pozuelos Bay is located: Lat. 10° 18' 18" N., Long. 64° 41' 7" W. Visibility is 20 miles.

DOCUMENTS: Arrival Clearance is effected on board vessel shortly after docking by Government Officials and a representative of the Company.

The following documents are required and should be prepared prior to arrival:

Ship's Register.
Dispatch issued by Venezuelan Consul at last port of call (1 copy).
Ballast Manifest (1 copy).
Crew List (6 copies).
Passenger and Baggage List, if any (5 copies).
List of Passengers in Transit, if any (5 copies).
List of Personal Effects (4 copies).
Stores List* (5 copies).
Medicine and Drugs List (4 copies).
Sailing Permit issued by Marine Authority at last port of call (Original).

*Stores List should indicate separately all deck, engine and cabin stores.

PILOTAGE: The use of Government Pilots is compulsory for all vessels docking and undocking. This service will be arranged at all times. The Pilot manages the docking manoeuvre, acting as Master's adviser. However, if the Master considers that Pilot instructions risk ship's safety, the Master has the right to disregard Pilot instructions. In this case, the Master must present immediately a report written in Spanish, to the Harbour Master and copy to Corpoven, indicating in detail all circumstances which induced him to disregard advice.

If an accident happens during the manoeuvre which affects the Terminal installations, the Master must present to the Terminal Dock Supervisor, a written report in Spanish, indicating all circumstances. Copy of this report will be delivered to the Harbour Master's Office in order to establish responsibility.

The Dock Supervisor, through the ship's Agent, makes all arrangements in order to have the Pilot onboard in time, in order to dock or undock the vessel.

ANCHORAGE: *Arrival at Pozuelos Bay:* Upon arrival at Pozuelos Bay, the ship should be conned to within the shaded area shown on Piloting Zone Plan (See "Plan"). This is the anchorage zone. As soon as the berth becomes available, a Pilot will be dispatched from shore by launch. No restrictions are made on arrival/sailing time.

RESTRICTIONS: No restrictions on arrival or sailing time.

MAX. SIZE: See "Berthing".

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.

Ships cleared between the hours of 1700 – 0800. Mondays through Fridays and all day Saturday, Sundays and holidays are charged by Immigration Service for the issuance of shore leave passes. There is no charge for this service from 0800 – 1700 hrs. Mondays through Fridays. Transportation and immigration clearance fees on movement of seamen are billed at cost.

RADIO: *Arrival Messages:* Masters are requested to advise Corpoven Puerto La Cruz by radio 72 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, ballast quantity and composition, last cargo, arrival height from water line to manifold, bunkers, name of Master, port of departure, draft (arrival), Registered Summer Deadweight and flag of ship; and 48 hours and 24 hours before arrival the estimated time of arrival (ETA).

Vessels may contact the Puerto La Cruz Terminal by radio-telephone on 2182 kHz SSB or by VHF Channel 16, calling "Corpoven, Puerto La Cruz", where there is stand-by attention 24 hours a day.

Ship-to-shore radios are installed on the oil dock and on both tugs. A 350-watt AM transmitter-receiver is monitored 24 hours a day.

TUGS: The use of 2 tugs is compulsory for all vessels over 145 m. LOA. The Company has available 3 tugs (2×3,000 h.p. and 1×1,600 h.p.).

BERTHING: This Terminal has 7 berths. Berths are numbered from 1 to 6, West to East and recently general cargo berth, located at the West of the Terminal installation, was converted as Jetty No. 7. To the East of this berth, the tugs and launches are moored. Service provided by jetty and other characteristics are indicated below.

Limitation/Restriction	*No.1*	*No 2*	*No.3*	*No.4*	*No.5*	*No.6*	*No.7*
LOA (ft.)	(1) 600 (2) 750	(1) 600 (2) 750	(1) 600 (2) 700	950	950	800	984
Beam (ft.)	100	100	120	161	161	120	148
Waterline to Manifold (ft.)	54	52	52	58	58	58	62
Max. Safe Draft (ft.)	38	38	38	55	55	40	51
Max. d.w.t. (1,000 tonnes) (3)	50	50	45	120	120	58	120
Max. Displacement (1,000 tonnes)	60	60	60	155	155	76	155

Notes:

1. LOA limitation if other ships are on neighbouring jetties No. 1, 2 and 3.
2. Max. LOA if neighbouring jetties are free.
3. Deadweight is referential. If ship's size is bigger than recommended d.w.t., ship must strictly comply with all of the other restrictions.
4. Jetty No. 7 is in its first stage operation. Restrictions are temporary.

Arrival at Dock: When the vessel arrives at the Piloting Zone and has the Pilot on board and berthing order, ship must steer towards the entrance channel indicated by Light Buoy No. 2, at the proximity of the entrance of the channel, the tugs go alongside the ship and pick-up the tow ropes to enter the channel, limit is signalled by shore bearing lights (direction 108°). Vessels normally dock with starboard side to dock, unless advised otherwise.

An anchor is made ready on the port side. Since the Terminal is located in a bay sheltered by various islands, the sea conditions do not require manoeuvring with the anchor. The departure manoeuvre to enter the exit channel for ships docked at Berths No. 1, 2, 3 and 7 will be made without difficulty once the vessel is undocked and moving ahead. Ships leaving Berth No. 7 must pass and round Isla El Burro Eastside.

Vessels docked at Berths No. 4, 5 and 6 must turn in order to enter the exit channel.

If a berth is occupied by a vessel which has finished loading and the berth is required, the Master may be requested to undock and await loading documents at the anchorage.

Mooring at Dock: While alongside berth, the following rules must be observed:

(*a*) Masters must ensure that mooring lines are properly tended during the discharge of ballast and loading of cargo, and that sufficient personnel are on board at all times to handle same. Discharging or loading will be temporarily suspended upon infringement of this regulation.

(b) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore hoses/cargo arms by company personnel. Vessels using Berths No. 4, 5 and 6 are also requested to have their derrick and gangway ready for use.
Note: Vessels normally dock with starboard side to dock, unless otherwise advised.

(c) While docked, discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(d) Rat-guards must be placed on all ropes connected with the shore.

(e) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(f) Meals must be provided in officers' mess-room for Venezuelan National Guard personnel who may be assigned to the vessel during stay in port.

LOADING: Ships must be operated by qualified crew, certified in tanker's operations.

After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions as to grade or grades of cargo, loading rates, information on size of hoses and lines, and other information pertinent to the loading of the vessel.

Before starting cargo operations, Master must prepare a loading plan, indicating operations sequence of cargo tanks, deballasting with stability's calculations, that includes strengths, moments and draft.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo of crude or fuel oil, hoses/arms are normally displaced with air at controlled rates prior to disconnecting. If the ship's officers request that the alternate procedure of draining hoses/arms be effected, shore personnel will be happy to comply, provided the following steps are observed by ship's officers:

1. Advice be received prior to termination of loading cargo.
2. Ship's receptacles be situated to receive oil drained on board. It should be noted that heavy fines are imposed for spills or overflows which contaminate the bay.

Shortly after completion of loading, company personnel together with ship's officer will take ship's ullages and, later, deliver cargo and sailing papers to the Master of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage if the berth is needed for another vessel. For information regarding cargo operations, the Loading Master can be contacted by VHF Channels 10 and 16.

Cargoes Handled:

	No. 1	*No. 2*	*No. 3*	*No. 4*	*No. 5*	*No. 6*	*No. 7*
Crude Oil	×	×	×	×	×	×	×
Refined Products	×	×	×	*	×	×	**
Bunker C Fuel	×	×	×	×	×	×	**
Bunker Diesel	×	×	×	×	×	×	**
Intermediate Fuel	×	×	×	×	×	×	**
Fresh Water	×	×	×	×	×	×	**

* Heavy Fuel Oil only.
** No extra service is provided in its first operational stage.

BALLAST: Vessels should arrive with enough ballast to permit safe handling, according to MARPOL Reg. 13:
For example:

1. Quantity of ballast to get a draft and trim, shear force and bending moment at safe parameter, propeller 100% immersed.
2. Only segregated ballast is permitted to be pumped direct to sea.
3. All ballast from cargo tanks must be received ashore.

Maximum allowable discharge pressure to shore installations is 90 p.s.i. for Berths No. 1, 2, 3, 4, 5 and 7, and 60 p.s.i. for Berth No. 6.

Maximum quantity of ballast permitted at Berths No. 1, 2, 3, 4, and 5 is 2,000 tonnes and 6,000 tonnes in Berth No. 6. Berth No. 7 cannot receive ballast at present.

All ships with ballast to pump ashore must advise in their 72 hour ETA, quantity of ballast (metric tons) and ballast composition.

Ballast reception ashore cannot be authorised if:

1. Compound of noxious substances or any other that could result in smell disagreeable to the community.
2. Residue oils, naphtha, or any other product that could form an explosive atmosphere in the lagoon.
3. Previous cargo needs to be heated and their point of flow is greater than 80°. This will be verified by the laboratory.
4. In case last cargo was crude oil with high sulphur (H_2S) content, and ballast composition mixture has part of this crude oil.

Venezuelan regulations strictly prohibit the pumping overboard of ballast in territorial waters. All ballast must be pumped ashore, except that from vessels equipped with Segregated Ballast Systems (SBT), after Terminal approval. Heavy fines are demanded for pollution of waters. The local fishermen are quick to report any transgression.

MEDICAL: All requests for medical or dental treatment must be accompanied by a written request from the Master to the vessel's Agent.

FRESH WATER: Fresh chlorinated water is available in limited quantities at an average rate of approximately 2 t.p.h.

FUEL: The terminal is not a general bunker station. Only ships loading petroleum or its products may take bunkers.

Bunker "C", heavy diesel fuel and complete range of intermediate fuels are available in reasonable quantities. Delivery rates to the ships are approximately as follows: Bunker "C", 200 t.p.h.; heavy diesel, 150 t.p.h.; intermediate fuels, 100 t.p.h.

Bunkers are delivered concurrent with loading/unloading operations and should be taken as soon as clearance is granted.

Meters are installed on all bunker systems and are calibrated in nett barrels; except diesel meters which indicate gross barrels.

The dock valves on the bunker lines will only be opened and clo upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

Ships which cannot take simultaneously bunkers with cargo supplied by bunkering vessel in Pozuelos Bay. This service is offered to vessels destined to Jose Terminal and other Puerto la C ports.

CONSULS: The following foreign countries have consular offices in vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
France
Great Britain
Italy
Netherlands
Norway
Spain
Sweden

Vessel's Agent should be appraised of vessel's consular requireme promptly upon docking.

REPAIRS: Request for repair work by local contractors must accompanied by a written request from the Master of the vessel.

SURVEYORS: 1. Saybolt, Inspecciones and AIVEPET cargo inspec available at the Terminal Office.

2. Lloyd's Register, American Bureau, Bureau Veritas, P & I availa locally or from Caracas via the ship's agent.

CUSTOMS: Crew members should be warned against taking knive other lethal weapons ashore, as this is strictly prohibited. All firea and ammunition must be noted on Stores List. They cannot exceed 1 officer and 18 cartridges per gun.

No weapons may be carried while ship is in Venezuelan waters tied up at dock. Contraband of any description will be confiscated. E man is allowed 1 package of cigarettes on his person and this pack must be opened. No liquor is to be taken ashore. It is prohibited to ca liquor from shore to ship without authorisation from Master of vesse is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras ash However, upon request to the National Guard contingent on the oil do special permission may be obtained. This is subject to 2 limitations that the camera is returned to the ship; (2) that no photographs are ta of the petroleum installations.

TELEPHONES: There is a telephone booth on each dock. supervisor on duty may be contacted by calling number 308 or 90

REPATRIATION: Seamen discharged from hospital for transfer another port, seamen arriving from another port or those be repatriated are handled by the vessel's Agent, who must comply wit Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters requested to furnish a letter accepting responsibility for all expen incurred, advances if any, and instructions for repatriation. Venezu regulations, at all times hold the vessel responsible for a seaman du his stay in the country. Close contact is maintained by radio with owners regarding disposition of their seamen.

Movements of Passengers: In as much as the Company's Termin not a public port, only bona fide crew members and Corpoven employees are permitted to join or leave the ship in Puerto La Cru

TIME: GMT minus 4 hours all year round.

EMERGENCY CO-ORDINATION CENTRE: Seccion de Segur Busqueda y Salvamento Maritimo. Telex: 31154. Tel: (02) 513 512156.

BANKS: Banco Royal Venezolano. Tel: (081) 691921.

Cash: The local currency is the Bolivar.

Foreign currency may be exchanged at local banks. Local banks open Monday to Friday from 0830 – 1130 hrs. and 1400 – 1630 hrs., except holidays.

STORING: See "Prelims".

1. Vessel can be stored by truck.
2. No need for barge storing while ship is alongside.
3. Trucks can proceed to the berth gate only. Distance from ga ships berth 200 ft.
4. Fork lift trucks cannot be permitted inside the berth while the is either deballasting or loading.
   No fork lift trucks whatsoever permitted alongside LPG ships.
5. No Customs regulations in force regarding storing.
6. Local riggers can be employed to assist with storing through local Agent.

IDENTITY CARDS: Passes for shore leave are issued by Ha Master's Office, who board with the Customs authorities upo vessel's arrival at dock. These passes are valid for the duration vessel's stay in port and must be returned before sailing.

In order to comply with Immigration Regulations, crew shou carefully checked before sailing, and any missing seamen repo the vessel's Agent.

Crew members left behind when the vessel sails will be held in cu until deported at the vessel's or Agent's expense.

GARBAGE DISPOSAL: Garbage collection service available. Co Marine Garbage Recolector C.A., Ave. Constitucion No. 92, Pue Cruz. Tel: (081) 664243. Garbage collection is by request only, $ 3 per service (including supply of waste bags and cleaning of ga storage area). Daytime service only.

WASTE OIL DISPOSAL: Waste oil disposal service available at No. 1, 2, 3, 4 and 5. Discharge and disposal is limited to 15,000 per vessel. Arrangement for this service is by prior agreement. agent 72 hours before arrival. There is no charge for this servic

SEAMAN'S CLUB: No seaman's club available. Taxis to be orde Agent. No telephone service on jetty.

CURRENCY: Bolivar. No currency restrictions. Also see "Banks

REGULATIONS:

Excessive Smoke: It is absolutely prohibited to exhaust heavy through a ship's funnel while tied up at the Company's docks. prohibited to blow boiler tubes. Failure to comply with this regula result in any or all of the following actions:

1. Vessel's discharge of ballast or loading of crude or products immediately shut down.
2. Vessel will be subject to fine.

3. Vessel may be removed from dock.
4. Ship's Agent will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution of Waters in the Bay Area: Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is in Venezuelan waters, sailing, anchored or docking.

Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a spill and can pinpoint the responsible vessel or source.

Fines for spills caused by any vessel will be the responsibility of the vessel through their Agent.

All expenses incurred in the clean-up of the affected areas will be invoiced to the vessel's P&I Club in this port. Master must get a warrantee from his local P&I Agent in the amount requested by Terminal in order to cover estimated clean-up expenses.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries are exempted from Arqueo compliance and payment of fees: Denmark, Great Britain, France, Germany, Netherlands, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL:

No charts or sailing directions are available in the terminal. Same should be forwarded by airmail to the vessel's Agent for delivery to the ship.

All ship requirements such as chandlery supplies, mail, cash advances, medical, dental, consular requirements, repair work, laundry service, bonded stores, transportation etc. should be obtained through the vessel's Agent.

Local authorities strictly forbid the throwing overboard of garbage, trash or any objects while anchored or docked, and they also forbid the exchange of articles between crew members and the occupants of adjacent small craft.

Corpoven S.A. as Owner and Operator of the Puerto La Cruz Terminal renders those services necessary to effect a prompt and efficient vessel turnaround. These services are reflected in the cargo papers and the expense statements, which are transmitted only to the vessel's Agent. It is with the Agent that the Company's business is transacted. This Terminal cannot deal with Shipowners, Charterers or Purchaser of cargoes. All shipping business must be agreed through Chartering and Supply Department at Corpoven Caracas.

Payment of all bills for services rendered by this Terminal must be made by means of a bank cheque issued in favour of Corpoven S.A. and delivered to the Banking Operation Section located at Corpoven Main Building, Modulo-C Nivel Plaza, Office No. 51, Puerto La Cruz, at least 24 hours before arrival of the tanker at the Bay. If that day corresponds to a holiday or a non-business day, the delivery of said cheque must be made within 24 hours of the next working day.

Charts: U.S. Hydrographic Charts No. 24434 and 24435, and B.A. Charts No. 4402 and 1498, indicate navigational water to Puerto La Cruz and approaches to Bergantin Bay, where the oil loading docks are located.

Dock Master's Office: The offices of Corpoven's dock personnel are located in a building near the docks. Any matter concerning loading/discharge and/or bunkering is handled through this office, which is open 24 hours a day. On each dock there is a telephone booth and the Supervisor on duty may be contacted by dialing number 73308 or 73960 (Company's internal telephone system).

Handling of Vessels Flying Foreign Flags engaged on Coastal Trade between Venezuelan Ports: Shipper must obtain a licence for coastal trip between Venezuelan port from Ministry of Transportation and Communications in Caracas. Failure to do so will result in local Port Captain's Office and Customs Office not being advised and vessels assessed this cost when exemption is applicable, such as Harbour Master's and Customs' Clearance Fees.

SHIPMASTER'S REPORT: February 1979.

Documents:

3 copies of List of Passengers or "nil" passengers.

3 copies of a letter by Master stating that vessel was diverted after sailing from previous port and explaining why clearance destination is wrong.

3 copies of cable ordering diversion.

Anchorages: Good holding ground in N.W. part of anchorage area, thick mud.

Restrictions: Maximum height of manifold about 18.95 m., so necessary for vessels of 140,000 d.w.t. to load some cargo before completion of ballast.

Max. Size: If draft less than 30 ft. on arrival vessel can approach berth direct from West, and use 2 tugs. If more than 30 ft. draft then vessel must use channel to the North of berth and use 3 or 4 tugs. This for vessels of 140,000 d.w.t.

VHF: Tankers call "Corpoven" on Channel 16, then change to Channel 12 or 13. Also call Agents on Channel 16.

Berthing: Back springs to bollards on jetty. Breasts and heads and stern lines to hooks on dolphins. These hooks are secured to bollards by wire of circumference 19 cm. or diameter 6 cm.

Consuls: No U.S. Consul available and Agents will give Master letter to this effect for U.S. Immigration.

General: Ballast, if clean, may be pumped overside. If dirty, advise Corpoven prior to arrival of quantities to be pumped ashore. They will also accept slops if not sour crude or smelling too badly.

Notice to Shipmasters:

We wish to advise the Masters of all vessels calling at this port that it is strictly prohibited to take photographs.

It is likewise contrary to regulations to carry ashore a camera. Same is liable to be confiscated by the Government Authorities.

Signed: S. A. Corpoven.

SHIPMASTER'S REPORT: January 1989.

Berth: Berth No. 4, starboard side alongside.

Vessel: 89,000 d.w.t.

Gangways: Shore gangways at Berths No. 1 – 5.

Tugs: 2 tugs used, port bow and starboard main deck aft. Tugs lines used.

Mooring: 2 head/stern lines, 2 breast lines and 2 springs at each end. Head lines sent first, then breast lines and finally springs. From aft, springs first, then breast lines and finally stern lines.

The pilot boat takes all the forward lines. After springs sent away by heaving line if possible, otherwise all after moorings by pilot boat on completion of forward moorings.

AGENCY:

All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

AUTHORITY: Capitania de Puerto, Guanta, Puerto La Cruz. *Tel:* 081-660534, 081-660367. *Telex:* Capipuerto 81386. *Contact:* Captain A. Hernandez, Port Captain.

Operator: Corpoven S.A., Apartado 4064, Puerto La Cruz, Venezuela. *Tel:* (081) 604709, 6022211. *Telex:* 81147. *FAX:* (081) 603099. *Contact:* Jorge Sparza, Terminal Supervisor.

PUERTO SUCRE (Cumana): 10.28 N. 64.12 W.

(See Plan)

SHIPMASTER'S REPORT: August 1980.

DOCUMENTS: As for Guanta. Entry formalities, normally after berthing but if at anchor will board about 0900 hrs.

APPROACHES: Approaching Puerto Sucre at night, the lights of the city are visible for many miles, but the light indicated at the end of the pier is non-existent, also the water tower marked on the chart with red lights is non-existent.

Two vessels were alongside when this vessel approached so the pier was clearly visible with the lights of the ships, otherwise there are no lights on the pier.

The pier indicated on the chart just North of the main pier is no longer there although at low water parts of the supports are still visible. Further North there are 3 piers, approximately half cable long, used by fishing boats. They start approximately 1 cable North and 1 cable between each, also there are car ferry terminals before the mouth of the river South of Pta. Carenero. This river mouth is undergoing extensive work which is apparently to be a fishing harbour.

A tall white building is situated in approximate position Lat. 10° 27.8' N., Long. 64° 11.1' W., it has a fixed red light and an occulting red light at night. A silo is situated in approximate position Lat. 10° 26.7' N., Long. 64° 11.25' W., this has 3 red lights in a horizontal line at night. There is an air light on the control tower at the airport, alternating white and green every 5 seconds, but this is only lit when an aircraft is due.

PILOTAGE: Pilotage is compulsory for berthing and unberthing. Pilot will anchor vessel if required.

ANCHORAGE: Anchorage is limited in pilotage area "A". This vessel anchored 3 cables off the shore line and 3 cables off the pier in 30 fathoms of water, vessels also anchor 2.5 to 3 miles S.W. of pier in 25 fathoms, however Pilots prefer vessels to use nearer anchorage.

VHF: Pilots occasionally on Channel 16, but very little English spoken. The ship's chandler has a VHF set and can be very helpful as he speaks very good English.

BERTHING: Vessels use both sides of the pier and Ro/Ro vessels tie up stern to the head of the pier. Soundings were taken around the pier (See "Plan").

CARGO HANDLING FACILITIES: There are numerous fork lift trucks of all sizes, 4 mobile cranes and some small towing vehicles. This vessel had a cargo of bagged fertiliser which was discharged onto lorries and there was no shortage of these, even when working 2 ships with 10 gangs no delays were caused due to lack of transport. Ship's gear is used at all times but the mobile cranes can be hired if required.

MEDICAL: Services available.

FRESH WATER: Available using ship's hoses.

FUEL: Diesel oil is available but difficult to obtain as it has to be brought from Puerto la Cruz by road tankers.

WATCHMEN: Not available, one member of National Guard on board, requires a cabin if one available. This vessel had no spare accommodation but the guard must still be fed.

SHORE LEAVE: Permitted, but shore passes must be carried and passes returned when vessel leaves.

GENERAL: *Provisions and Laundry:* Available.

Garbage Disposal: No facilities.

sufficient personnel are on board at all times to handle same. Discharging or loading will be temporarily suspended upon infringement of this regulation.

(b) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore hoses/cargo arms by company personnel. Vessels using Berths No. 4, 5 and 6 are also requested to have their derrick and gangway ready for use.

Note: Vessels normally dock with starboard side to dock, unless otherwise advised.

(c) While docked, discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(d) Rat-guards must be placed on all ropes connected with the shore.

(e) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(f) Meals must be provided in officers' mess-room for Venezuelan National Guard personnel who may be assigned to the vessel during stay in port.

LOADING: Ships must be operated by qualified crew, certified in tanker's operations.

After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions as to grade or grades of cargo, loading rates, information on size of hoses and lines, and other information pertinent to the loading of the vessel.

Before starting cargo operations, Master must prepare a loading plan, indicating operations sequence of cargo tanks, deballasting with stability's calculations, that includes strengths, moments and draft.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo of crude or fuel oil, hoses/arms are normally displaced with air at controlled rates prior to disconnecting. If the ship's officers request that the alternate procedure of draining hoses/arms be effected, shore personnel will be happy to comply, provided the following steps are observed by ship's officers:

1. Advice be received prior to termination of loading cargo.
2. Ship's receptacles be situated to receive oil drained on board. It should be noted that heavy fines are imposed for spills or overflows which contaminate the bay.

Shortly after completion of loading, company personnel together with ship's officer will take ship's ullages and, later, deliver cargo and sailing papers to the Master of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage if the berth is needed for another vessel. For information regarding cargo operations, the Loading Master can be contacted by VHF Channels 10 and 16.

Cargoes Handled:

	No. 1	*No. 2*	*No. 3*	*No. 4*	*No. 5*	*No. 6*	*No. 7*
Crude Oil	×	×	×	×	×	×	×

* Heavy Fuel Oil only.

** No extra service is provided in its first operational stage.

BALLAST: Vessels should arrive with enough ballast to permit safe handling, according to MARPOL Reg. 13:

For example:

1. Quantity of ballast to get a draft and trim, shear force and bending moment at safe parameter, propeller 100% immersed.
2. Only segregated ballast is permitted to be pumped direct to sea.
3. All ballast from cargo tanks must be received ashore.

Maximum allowable discharge pressure to shore installations is 90 p.s.i. for Berths No. 1, 2, 3, 4, 5 and 7, and 60 p.s.i. for Berth No. 6.

Maximum quantity of ballast permitted at Berths No. 1, 2, 3, 4, and 5 is 2,000 tonnes and 6,000 tonnes in Berth No. 6. Berth No. 7 cannot receive ballast at present.

All ships with ballast to pump ashore must advise in their 72 hour ETA, quantity of ballast (metric tons) and ballast composition.

Ballast reception ashore cannot be authorised if:

1. Compound of noxious substances or any other that could result in smell disagreeable to the community.
2. Residue oils, naphtha, or any other product that could form an explosive atmosphere in the lagoon.
3. Previous cargo needs to be heated and their point of flow is greater than 80°. This will be verified by the laboratory.
4. In case last cargo was crude oil with high sulphur (H_2S) content, and ballast composition mixture has part of this crude oil.

Venezuelan regulations strictly prohibit the pumping overboard of ballast in territorial waters. All ballast must be pumped ashore, except that from vessels equipped with Segregated Ballast Systems (SBT), after Terminal approval. Heavy fines are demanded for pollution of waters. The local fishermen are quick to report any transgression.

MEDICAL: All requests for medical or dental treatment must be accompanied by a written request from the Master to the vessel's Agent.

FRESH WATER: Fresh chlorinated water is available in limited quantities at an average rate of approximately 2 t.p.h.

FUEL: The terminal is not a general bunker station. Only ships loading petroleum or its products may take bunkers.

Bunker "C", heavy diesel fuel and complete range of intermediate fuels are available in reasonable quantities. Delivery rates to the ships are approximately as follows: Bunker "C", 200 t.p.h.; heavy diesel, 150 t.p.h.; intermediate fuels, 100 t.p.h.

Bunkers are delivered concurrent with loading/unloading operations and should be taken as soon as clearance is granted.

Meters are installed on all bunker systems and are calibrated in nett barrels; except diesel meters which indicate gross barrels.

The dock valves on the bunker lines will only be opened and clo upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

Ships which cannot take simultaneously bunkers with cargo supplied by bunkering vessel in Pozuelos Bay. This service is a offered to vessels destined to Jose Terminal and other Puerto la C ports.

CONSULS: The following foreign countries have consular offices in vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
France
Great Britain
Italy
Netherlands
Norway
Spain
Sweden

Vessel's Agent should be appraised of vessel's consular requireme promptly upon docking.

REPAIRS: Request for repair work by local contractors must accompanied by a written request from the Master of the vessel.

SURVEYORS: 1. Saybolt, Inspecciones and AIVEPET cargo inspect available at the Terminal Office.

2. Lloyd's Register, American Bureau, Bureau Veritas, P & I availa locally or from Caracas via the ship's agent.

CUSTOMS: Crew members should be warned against taking knives other lethal weapons ashore, as this is strictly prohibited. All firea and ammunition must be noted on Stores List. They cannot exceed 1 officer and 18 cartridges per gun.

No weapons may be carried while ship is in Venezuelan waters tied up at dock. Contraband of any description will be confiscated. Ea man is allowed 1 package of cigarettes on his person and this packa must be opened. No liquor is to be taken ashore. It is prohibited to ca liquor from shore to ship without authorisation from Master of vesse is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras asho However, upon request to the National Guard contingent on the oil do special permission may be obtained. This is subject to 2 limitations: that the camera is returned to the ship; (2) that no photographs are ta of the petroleum installations.

TELEPHONES: There is a telephone booth on each dock. T supervisor on duty may be contacted by calling number 308 or 906

REPATRIATION: Seamen discharged from hospital for transfer another port, seamen arriving from another port or those be repatriated are handled by the vessel's Agent, who must comply with Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters requested to furnish a letter accepting responsibility for all expen incurred, advances if any, and instructions for repatriation. Venezue regulations, at all times hold the vessel responsible for a seaman du his stay in the country. Close contact is maintained by radio with owners regarding disposition of their seamen.

Movements of Passengers: In as much as the Company's Termina not a public port, only bona fide crew members and Corpoven employees are permitted to join or leave the ship in Puerto La Cru

TIME: GMT minus 4 hours all year round.

If that day corresponds to a holiday or a non-business day, the delivery of said cheque must be made within 24 hours of the next working day.

Charts: U.S. Hydrographic Charts No. 24434 and 24435, and B.A. Charts No. 4402 and 1498, indicate navigational water to Puerto La Cruz and approaches to Bergantin Bay, where the oil loading docks are located.

Dock Master's Office: The offices of Corpoven's dock personnel are located in a building near the docks. Any matter concerning loading/discharge and/or bunkering is handled through this office, which is open 24 hours a day. On each dock there is a telephone booth and the Supervisor on duty may be contacted by dialing number 73308 or 73960 (Company's internal telephone system).

Handling of Vessels Flying Foreign Flags engaged on Coastal Trade between Venezuelan Ports: Shipper must obtain a licence for coastal trip between Venezuelan port from Ministry of Transportation and Communications in Caracas. Failure to do so will result in local Port Captain's Office and Customs Office not being advised and vessels assessed this cost when exemption is applicable, such as Harbour Master's and Customs' Clearance Fees.

SHIPMASTER'S REPORT: February 1979.

Documents:

3 copies of List of Passengers or "nil" passengers.

3 copies of a letter by Master stating that vessel was diverted after sailing from previous port and explaining why clearance destination is wrong.

3 copies of cable ordering diversion.

Anchorages: Good holding ground in N.W. part of anchorage area, thick mud.

Restrictions: Maximum height of manifold about 18.95 m., so necessary for vessels of 140,000 d.w.t. to load some cargo before completion of ballast.

Max. Size: If draft less than 30 ft. on arrival vessel can approach berth direct from West, and use 2 tugs. If more than 30 ft. draft then vessel must use channel to the North of berth and use 3 or 4 tugs. This for vessels of 140,000 d.w.t.

VHF: Tankers call "Corpoven" on Channel 16, then change to Channel 12 or 13. Also call Agents on Channel 16.

Berthing: Back springs to bollards on jetty. Breasts and heads and stern lines to hooks on dolphins. These hooks are secured to bollards by wire of circumference 19 cm. or diameter 6 cm.

Consuls: No U.S. Consul available and Agents will give Master letter to this effect for U.S. Immigration.

General: Ballast, if clean, may be pumped overside. If dirty, advise Corpoven prior to arrival of quantities to be pumped ashore. They will also accept slops if not sour crude or smelling too badly.

Notice to Shipmasters:

We wish to advise the Masters of all vessels calling at this port that it is strictly prohibited to take photographs.

It is likewise contrary to regulations to carry ashore a camera. Same is liable to be confiscated by the Government Authorities.

Signed: S. A. Corpoven.

SHIPMASTER'S REPORT: January 1989.

Berth: Berth No. 4, starboard side alongside.

Vessel: 89,000 d.w.t.

Gangways: Shore gangways at Berths No. 1 – 5.

Tugs: 2 tugs used, port bow and starboard main deck aft. Tugs lines used.

Mooring: 2 head/stern lines, 2 breast lines and 2 springs at each end. Head lines sent first, then breast lines and finally springs. From aft, springs first, then breast lines and finally stern lines.

The pilot boat takes all the forward lines. After springs sent away by heaving line if possible, otherwise all after moorings by pilot boat on completion of forward moorings.

AGENCY:

All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

AUTHORITY: Capitania de Puerto, Guanta, Puerto La Cruz. *Tel:* 081-660534, 081-660367. *Telex:* Capipuerto 81386. *Contact:* Captain A. Hernandez, Port Captain.

Operator: Corpoven S.A., Apartado 4064, Puerto La Cruz, Venezuela. *Tel:* (081) 604709, 6022211. *Telex:* 81147. *FAX:* (081) 603099. *Contact:* Jorge Sparza, Terminal Supervisor.

PUERTO SUCRE (Cumana): 10.28 N. 64.12 W.

(See Plan)

SHIPMASTER'S REPORT: August 1980.

DOCUMENTS: As for Guanta. Entry formalities, normally after berthing but if at anchor will board about 0900 hrs.

APPROACHES: Approaching Puerto Sucre at night, the lights of the city are visible for many miles, but the light indicated at the end of the pier is non-existent, also the water tower marked on the chart with red lights is non-existent.

Two vessels were alongside when this vessel approached so the pier was clearly visible with the lights of the ships, otherwise there are no lights on the pier.

The pier indicated on the chart just North of the main pier is no longer there although at low water parts of the supports are still visible. Further North there are 3 piers, approximately half cable long, used by fishing boats. They start approximately 1 cable North and 1 cable between each, also there are car ferry terminals before the mouth of the river South of Pta. Carenero. This river mouth is undergoing extensive work which is apparently to be a fishing harbour.

A tall white building is situated in approximate position Lat. 10° 27.8' N., Long. 64° 11.1' W., it has a fixed red light and an occulting red light at night. A silo is situated in approximate position Lat. 10° 26.7' N., Long. 64° 11.25' W., this has 3 red lights in a horizontal line at night. There is an air light on the control tower at the airport, alternating white and green every 5 seconds, but this is only lit when an aircraft is due.

PILOTAGE: Pilotage is compulsory for berthing and unberthing. Pilot will anchor vessel if required.

ANCHORAGE: Anchorage is limited in pilotage area "A". This vessel anchored 3 cables off the shore line and 3 cables off the pier in 30 fathoms of water, vessels also anchor 2.5 to 3 miles S.W. of pier in 25 fathoms, however Pilots prefer vessels to use nearer anchorage.

VHF: Pilots occasionally on Channel 16, but very little English spoken. The ship's chandler has a VHF set and can be very helpful as he speaks very good English.

BERTHING: Vessels use both sides of the pier and Ro/Ro vessels tie up stern to the head of the pier. Soundings were taken around the pier (See "Plan").

CARGO HANDLING FACILITIES: There are numerous fork lift trucks of all sizes, 4 mobile cranes and some small towing vehicles. This vessel had a cargo of bagged fertiliser which was discharged onto lorries and there was no shortage of these, even when working 2 ships with 10 gangs no delays were caused due to lack of transport. Ship's gear is used at all times but the mobile cranes can be hired if required.

MEDICAL: Services available.

FRESH WATER: Available using ship's hoses.

FUEL: Diesel oil is available but difficult to obtain as it has to be brought from Puerto la Cruz by road tankers.

WATCHMEN: Not available, one member of National Guard on board, requires a cabin if one available. This vessel had no spare accommodation but the guard must still be fed.

SHORE LEAVE: Permitted, but shore passes must be carried and passes returned when vessel leaves.

GENERAL: *Provisions and Laundry:* Available.

Garbage Disposal: No facilities.

SHIPMASTER'S REPORT: April 1996.

The following are my observations during a recent visit on a handy sized bulk carrier laden with wheat.

Charts: B.A. 230 and B.A. 1629.

Vessel arrived around 2230 hrs. LT.

We received no replies to our repeated calls on VHF to Port Authorities/ Pilots/Agents.

The approaches were infested with small fishing craft, most of which were unlit. As we received no information regarding berthing, we anchored around 2300 hrs. with main pier bearing 064° × 3.5 nautical miles, which was about 1.1 nautical miles off the nearest land, in depth of 40 m. The holding ground was good.

On the next day we received no replies to our repeated calls on VHF and telephone to Port/Pilots/Agent.

At 0630 hrs. the following day, an unmarked boat came alongside and a Pilot boarded the vessel. He spoke very little English, but we understood that the vessel has to berth immediately.

No tugs available in this port.

The Pilot was proficient and we went starboard side alongside the main pier.

Discharge of wheat was by portable SKT equipment directly into trucks, and the discharge rate was about 1,200 tonnes/day.

Fresh provisions, meat, fish and poultry available.

Shore pass required for ship's personnel to go ashore.

All anti-pilferage precautions need to be taken on board.

PUNTA CARDON: 11.38 N. 70.14 W. (See Plan)

PORT LIMITS: The area enclosed by the parallels of Lat. 11° 38' 00" N. and Lat. 11° 36' 38" N. and the meridian of Long. 70° 14' 25" W.

FLAG: It is compulsory to display the Venezuelan flag at the foremast starboard yardarm during daylight hours for ships anchored or berthed in Venezuelan waters. The ship's Services will provide a Venezuelan flag at any time for ship's account.

LOCATION: The port of Punta Cardon is located on the Gulf of Venezuela, on S.W. coast of Paraguana Peninsula, Venezuela. Punta Cardon is an open sea port with practically no swell, due to the Easterly winds prevailing almost all year from the shore side.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Punta Cardon.

2. If a ship, originally cleared for another port (including any other Venezuelan port) is diverted at sea to Punta Cardon, certain information must be radioed prior to arrival in order to avoid heavy fine(s) and/or delays.

3. No dirty ballast may be pumped overside in port in Venezuelan coastal waters. Ballast disposal facilities are available at Punta Cardon Terminal.

4. The use of Venezuelan Government Pilots is compulsory for berthing and unberthing.

5. In addition to other clearance documents, 5 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.

6. The emergency fire signal is 5 long blasts on the ship's whistle or siren. No other signal is to be given in cases of emergency.

7. Rat-guards must be placed on all mooring lines.

DOCUMENTS: Clearance (inward Pratique). Inward Clearance is effected on board by Government Port and Customs Officials and a representative of the Oil Movements Department immediately after berthing. The following documents must be ready on arrival:

(1) In ballast:

(a) Clearance from Last Port (1 copy).

(b) Ballast Manifest from Last Port (1 copy).

(c) Crew List (7 copies).

(d) Steward's Stores List (all foodstuff, liquors, tobacco, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).

(e) Deck and Engine Stores and Spare Parts List (paints, varnishes, chains, ropes, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).

(f) Medicine Chest Lists (including narcotics accurately itemised) (5 copies).

(g) Slop Chest Lists (5 copies).

(h) Personal Effects Lists (4 copies).

(i) Sailing Permit (issued by Maritime Authority at Last Port of call) (1 copy).

(j) Passenger and Baggage Lists (if any) (2 copies).

(k) List of Passengers in transit (if any) (4 copies).

(2) Both the Steward's Stores List, the Deck and Engine Stores and Spare Parts List may be prepared on board prior to the vessel's arrival. The Steward's Stores List must be comprehensive and accurate, especially with regard to cigarettes and liquor. All new clothing, gifts, souvenirs, etc. are to be clearly marked. All personal effects of the crew are to be collected and placed in the Bonded Stores Locker, ready for sealing by the Customs Authorities on arrival.

Although vessels proceed directly to Punta Cardon, clearance documents should be made out showing the port as "Las Piedras, Paraguana (Punta Cardon)". Failure to comply with this requirement may result in fines up to a max. of U.S. $600.00.

(3) Clearance documents out-bound: Outward Clearance and cargo documents are delivered on board by the Ship's Services Representative.

In the event that the berth is required by another vessel, a ves having completed loading may be required to vacate the berth prom and proceed to anchorage to await cargo documents and clearanc

APPROACHES: Restricted Fishing Area. Masters when approach coast should keep a particularly sharp lookout for fishing boats, nets a small craft.

Mechanically propelled vessels drawing more than 5 ft. are prohib from navigating in the restricted fishing area that extends off Paragua Peninsular from Punta Macolla, Lat. 12° 05' 32" N., Long. 70° 12' 55" to Punta Estanques (Los Taques), Lat. 11° 48' 45" N., Lo 70° 16' 45" W., and a line connecting the position indicated below:

(a) Lat. 11° 37' 12" N., Long. 70° 14' 25" W.

(b) Lat. 11° 37' 30" N., Long. 70° 19' 23" W.

(c) Lat. 11° 37' 36" N., Long. 70° 21' 50" W.

Leading Lines:

	Position			*Height*
Jetty	*Latitude* N.	*Longitude* W.	*Colour*	*in Metres (LWS)*
I	11° 37' 19.2"	70° 13' 54.6"	Green	4.70
	11° 37' 23.1"	70° 13' 47.6"	Green	14.20
II	11° 37' 32.0"	70° 14' 02.0"	Red	4.83
	11° 37' 35.9"	70° 13' 55.1"	Red	14.30
III	11° 37' 08.1"	70° 13' 53.5"	White	3.06
	11° 37' 09.1"	70° 13' 50.6"	White	14.94
IV	11° 37' 41.9"	70° 14' 12.0"	Blue	5.10
	11° 37' 42.4"	70° 14' 09.4"	Blue	21.54
V	11° 30' 49.64"	70° 14' 33.12"		

Navigation Aids: When approaching the Punta Cardon Terminal, t flares will be seen.

The North Flare is located at:

Lat. 11° 30' 49.64" N., Long. 70° 14' 33.12" W.

The South Flare is located at:

Lat. 11° 37' 26.00" N., Long. 70° 13' 20.00" W.

A light is located on the outer radio tower.

Position: Lat. 11° 38' 03" N., Long. 70° 13' 56.2" W.

Characteristics: Fl. White and Red, ev. 10 sec. Height 205 ft. (62.5 21 miles (U).

Sectors: Red 340° – 009°, White 009° – 202°, Eclipsed 189° - 34 (All bearings are true from seaward).

2 large chimneys are very conspicuous in the Refinery Area. The No chimney is situated Lat. 11° 37' 54.6" N., Long. 70° 13' 10.8" W. Hei above MLWS 399.6 ft. (121.8 m). The South chimney is situa Lat. 11° 37' 52.9" N., Long. 70° 13' 09.8" W. Height above MLWS 396. (120.8 m.). For daylight distinguishing marks, both are painted with bro red and white bands and at night both have a string of all round fi red lights at the top and the same at the middle height.

PILOTAGE: Pilots are employees of Venezuelan Government a pilotage is compulsory for vessels entering or leaving harbour. The Sh Services Office will arrange for this service at any time. If it becon necessary for Master of the vessel to disregard Pilot's orders in or to ensure safety to the ship, the Master must promptly submit a wri report to the Harbour Master on the matter, via the Ship's Servi Representative, stating reason for this action.

Pilots sustaining injuries: It is compulsory to submit a full repor cases where a Pilot is injured while performing duties on board vess

Agent's Notice to Masters: Dated July 1986.

Subject: Pilot Service from/to Punta Cardon

Harbour Master's Office has issued new regulations. Here below mentioned regulations:

1. Pilot service from Punta Cardon is only compulsory when Mas are crossing the channel of Lake Maracaibo for the first time. If th not the case, the Pilot should be then embarked at San Carlos.

2. Upon your request this Pilot service can be arranged by the Age

3. On departure, Pilot service to Punta Cardon is not required.

4. If Official Pilot is unable to disembark at San Carlos du difficulties on board or by *force majeure,* or if you decide to chang instructions given to the Agency with regard to Pilot disembarking Carlos, a letter addressed to the Harbour Master stating your reas should be handed to the Pilot before he disembarks in Cardon.

Master's Note: With regard to the above, on reflection the conte the letter from Agent may not be too clear to those not familiar wi area. At risk of stating the obvious, what this Notice is saying is pilotage inwards from the "EM" Buoy, to the San Carlos Pilot Stat only necessary on the Master's first visit to a Lake Maracaibo Thereafter he may navigate the Outer Channel without a Pilot. The C Channel Pilot is taken at Punta Cardon on the inward passage disembarked there on the outward passage, should a Pilot b required.

Shipmaster's Report: January 1989.

Punta Cardon is no longer a Pilot Station. The new station is Gua Pilot Station. The embarkation/disembarkation zone is located bet the following 4 points:

A.	Lat. 11° 40.0' N.	Long. 70° 15.5' W.
B.	Lat. 11° 41.5' N.	Long. 70° 15.5' W.
C.	Lat. 11° 41.5' N.	Long. 70° 16.5' W.
D.	Lat. 11° 41.0' N.	Long. 70° 16.5' W.

ANCHORAGE: The anchorage at Cardon roads within a radi 2 miles from end of jetties has depths varying from 54 ft. to 100 ft. and a bottom consisting of mud with some patches of small stones and shells. There are no known obstructions from West to N.W. Piers and there is ample water for a clear approach when comin West and N.W., but the anchorage is limited on the South by a sa projecting 1 mile S.W. off Punta Cardon Cape. A beacon is loca this Sandspit in position: Lat. 11° 36' 03.4" N., Long. 70° 14' 15 Fl.R. ev. 1 sec. 17 ft. 5 miles (U).

MAX. SIZE:

	Jetty/Berth		*Depth LWS* (ft. in.)	*Draft* (ft. in.)	*Length* (ft.)	*Displac.* (tons)
No. 1	North Outer	(3)	42 00	39 06	710	55,000
	South Outer	(4)	42 06	40 00	710	55,000

No. 5		(1)	45 00	41 08	787	60,000

RADIO/VHF: Arrival messages (ETA's) must be sent by all vessels bound for or diverted to Cardon, through telex to the Terminal or vessel's Agent, 72 hours, 48 hours and 24 hours prior to arrival.

(a) Name of vessel
(b) Flag
(c) ETA
(d) Last Port.
(e) Master's name
(f) Number of crew and passengers
(g) Port for which the vessel is cleared
(h) Quantity of clean ballast on board
(i) All requirements

This information is of the utmost importance to the Harbour Authorities in facilitating the entry of vessels in general, and in case of diversion.

VHF Radio Telephony: The radio and communication centre is located in the Oil Movements Office.

There is an R/T set operating 24 hours a day on the following frequencies, and manned by English speaking operators:

156.6 MHz FM VHF (Channel 12) Range limit 25 miles
156.8 MHz FM VHF (Channel 16) ,, ,, 25 ,,

Call sign: "Marine Cardon".

Shipmaster's Report: 1993.

VHF Channels 16 and 12 used. It is important to call and listen on Channel 12.

TUGS: 2 tugs of 2,700 h.p. are available, and their assistance is compulsory for berthing. Number, disposition and manoeuvres of tugboats are directed by the Pilot. The following tug signals in practice in this port are listed below for Master's guidance:

Short blasts are used to give orders to the tug situated ahead.
Long blasts are used to give orders to the tug situated aft.
1 blast means *push* tug engine, ahead (if it is stopped); *stop* tug engine, stop (if it is moving).
2 blasts, *pull* tug engine, astern.
1 long, 1 short, 1 long and 1 short whistle, "Calling tugs".
1 long and 2 short whistles, "Tugs Dismissed".

BERTHING: Without exception ships always moor head-in on all berths. It is considered prudent to have the outboard anchor hove out prior to approaching piers to facilitate speedy release while docking if necessary. Vessels are to be moored to satisfaction of the Port Services Superintendent or his deputy; mooring lines must be tended regularly and kept hove taut to prevent surging and possible damage to ships, docks or hoses. When adjusting mooring lines, the assistance of harbour tugs should be requested before slackening off any mooring line.

BALLAST: It is suggested that vessels nominated to load at this installation arrive with the minimum of ballast on board, necessary for the safe handling of the vessel under normal conditions. In this connection experience has shown that, under normal weather conditions, vessels can be safely berthed and unberthed with a quantity of ballast of approximately 25% of their respective Summer deadweights. Dirty ballast can be received ashore. Maximum discharge pressure to shore installation is 150 p.s.i. in the 20 in. ballast line of Jetty No. 2; Jetties No. 1 and 4 have a 24 in. ballast line, and Jetty No. 3 has a 16 in. line. Masters are requested to endeavour to arrive at this port with 20% SDW ballast.

Parafinic slops or ballast will not be accepted.

Extra-occupancy tariff will be charged for delays in ballast time. For more information contact our vessel's Agent.

MEDICAL: Facilities are available for medical and dental treatment, vaccination and hospitalisation in a private clinic.

Emergency cases will be attended to at all times.

Masters requiring medical or dental service or vaccination for their crew members should call vessel's Agent and they will make the necessary arrangements with the clinic and arrange for transportation to pick up the crew members on the pier and to take them to the clinic and back. Any crew member who is sent ashore for medical or dental treatment, and who does not speak English or Spanish, must be accompanied by a crew member who speaks one of these languages.

Doctors do not attend patients on board. In serious cases where the patient is unable to walk an ambulance will be provided to take him to the hospital.

FRESH WATER: Fresh water is available at all berths. Loading rate is 30 t.p.h.

FUEL: Available if advance notice given. Funds at to be remitted to Chase Manhattan Bank, One Chase Manhattan Plaza, New York, 24 hours in advance to Maraven S.A. (Account No. 001-1-992773).

REPAIRS: Shore facilities are available for emergency repairs of a minor nature. The nearest dry docks are located at Puerto Cabello and Curacao, N.A. Request for repairs should be mentioned in the ship's ETA message.

CUSTOMS: Venezuelan National Guards are stationed at the piers to ensure that vessels in port comply with regulations.

1. *Smuggling.* Strict compliance with the Customs laws of the country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle ashore cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) or other articles. A maximum of twenty cigarettes per person for personal use is allowed to be carried but a greater quantity will result in the imprisonment of the offender with possible heavy fines and delay to the vessel.

2. *Bar.* On Customs Authorities instructions vessels maintaining a "Bar Service" on board for the use of officers, crew, passengers and visitors, must keep the bar closed during the vessel's stay in port.

3. *Firearms.* Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be declared on Stores List. Officers must not carry firearms while ship is in Venezuelan waters. Said arms should be collected together with the ammunition and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore as these will be confiscated and the bearer fined.

CERTIFICATES: All ships arriving in Venezuelan ports for the first time must be measured by the Maritime Authorities for issuance of a Venezuelan Tonnage Certificate, known as "Certificado de Arqueo". This document gives the measurements and weight of the vessel in accordance with existing laws. The cost of measuring and issuing of the Certificate is contingent on size and tonnage of vessel.

It is usual practice to take ashore the ship's "General Arrangement" and "Capacity" plans, which are used as a basis for calculations. These plans and the Venezuelan Tonnage Certificate are later forwarded to ship's Owners.

Vessels registered in following countries are exempt from above regulations, due to existing reciprocal agreement with Venezuela: Denmark, France, Germany, Great Britain, Ireland, Netherlands, Norway, Portugal, Sweden, U.S.A.

The Venezuelan Tonnage Certificate is used in calculating Venezuelan Government Port charges, such as Port Captain Habilitation for entry and despatch of vessels and Pilotage Dues, for all vessels except those registered in the countries mentioned above, in which case the Lloyd's Registered Tonnage is used.

TIME: Local time is GMT minus 4 hours.

HOLIDAYS: By order of the local Port Authorities it is requested that all ships in port be fully dressed on the following national holidays: January 1st, April 19th, July 5th, July 24th, October 12th, December 25th.

TELEPHONES: Loading Supervisor (for cargo and bunkers) a 24 hour service on telephone 72206, 72133 or by VHF Channels 12/16, call sign "Marine Cardon".

SHORE LEAVE: Shore leave is permitted and Harbour Master's representative who boards vessel on arrival issues the required number of shore passes. These passes must be shown when proceeding ashore to the Government and Company Guards at the gangway and refinery gates. They are to be collected by Master prior to sailing and handed to Pilot unberthing the vessel. Masters are reminded that in accordance with the instructions of local police, crew members be properly dressed before leaving the vessel, i.e. long trousers and shirts.

Masters are requested to have shore leave expire at least 2 hours before expected departure. Men then found missing should be reported to the vessel's Agent, who will endeavour to locate them. An officer must accompany shore personnel in order to identify the missing crew member.

Vessels are not permitted to sail until all crew members are on board, unless said crew members are hospitalised or previously signed off by the Master through the Ship's Services representative. If any crew member is missing at sailing time and cannot be found, his passport and other personal documents must be handed to the vessel's Agent, as well as written instructions as to his repatriation, when found. All costs and expenses of a crew member so left behind will be for ship's account.

GENERAL:

Animals: The importation and transit of all birds belonging to the genus parrot or parakeet is prohibited. For other birds a valid health certificate is required. For so-called "small animals" e.g. dogs, cats, monkeys, rabbits, etc. a valid health certificate and a valid rabies vaccination certificate are required.

Bonded Stores: Stores in bond are not obtainable in Punta Cardon. The nearest port with bonded stores facilities is Curacao.

Board of Trade Gangway: A safe gangway must be provided by the vessel and should be rigged as soon as possible after mooring to allow the Port Authorities to board, and should not be taken in until Pilot has boarded to unmoor vessel. The use of rung ladders, pilot ladders, etc. is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

Damage during Manoeuvres: When a vessel or the pier sustains damage during manoeuvres with an official Pilot on board, it is the responsibility of the Master to submit to the Ship's Services representatives, immediately after the accident, a report in quintuplicate, for presentation to the Harbour Master. Such reports should give full details of the accident and of all engine movements as ordered by the Pilot, as well as a sketch in triplicate of the ship's manoeuvring position at the time. These will be translated by the Agents into Spanish and forwarded to the Harbour Master.

Cash Advance to Masters: Cash advances to Masters are made only in Venezuelan currency, which is the Bolivar. Cash requirements should be included in the vessel's ETA message. Foreign currencies are accepted in the United Seamen's Service Club.

Rat-guards: By order of the Port Authorities rat-guards must be fitted to all mooring lines. Non compliance entails a fine of 200 Bolivares for each unguarded line.

Kerosene, Motor Gasoline, Gas-Oil, Solvents: Supplies for ship's purposes are available in drums. The return of empty drums ashore is prohibited by Customs regulations. Therefore the cost of each drum will be billed to the vessel in the Port Disbursement Account.

Lubricants, Oils and Greases: Supplies of products are available. Vessels arriving at Punta Cardon on Saturday or Sunday or on a holiday should give ample notice of their requirements by cable in order that the necessary labour arrangements for delivery can be made. This procedure also applies to the delivery of white oils mentioned under 7 above, when required outside working days.

Laundry Service: Laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

Wireless Transmitters in Port: It is strictly prohibited to use vessel's wireless transmitters in the Port of Cardon. Non-compliance with this regulation may result in a fine being imposed on the vessel by the authorities.

Mail: On vessels' arrival, blank Mail List Forms will be handed to the Master to be completed in sextuplicate and duly signed by him, when sending ship's and crew mail ashore for posting. Ship's mail received after ship has sailed, or for vessels on which no advice has been received, will be held for 15 days and then returned by airmail to the owners or operators or senders, at ship's expense unless specific instructions have been received beforehand.

Marine Surveyors: Both the Lloyd's Agents at Maracaibo and Norske Veritas at Caracas have a representative in Punta Cardon who acts on their behalf when a surveyor is requested. However, in the case of continuous or classification surveys, advance notice of 4 days should be given in order to arrange for an appointed surveyor to come from Caracas. There is also a representative of the American Bureau of Shipping in this area (Caracas).

Navigation Charts: Navigation charts are not available at this port.

Passengers: Movement of passengers over Cardon Piers is subject to restriction under terms of agreement with the government. Passengers will not be permitted to disembark unless in possession of the required Venezuelan visa and travel documents. If passengers are carried, Master should so advise in his radio ETA so that arrangements can be made for Immigration Authorities to visit vessel on arrival and thus facilitate clearance.

Petroleum Inspection: Several petroleum inspectors are available in this area. Contact can be made through the vessel's Agents.

Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation, desertion or other reasons, all documents and personal effects are to be handed to the Oil Movement Department's representative before sailing. A letter is required from the Master advising the maximum advances, if any, to be made to the seamen, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, or Owner responsible for any seamen left behind in Venezuela.

Photographing: The taking of photographs within the boundary fence of the Cardon Refinery is prohibited. Taking cameras ashore is likewise prohibited.

Provision and Stores: Provisions and stores are available. Requisitions should be conducted through the ship's Agent, when he calls on board with the authorities on arrival. Ships' chandlers are not permitted to visit ships, unless specifically instructed to do so by the Agents.

Radar and Radio Repairs: Repair and maintenance services for radar, radio, gyro compass, radio direction finder, echo sounder, etc. are available. The repair man should be contacted through the ship's Agent.

Safety of Personnel: It will be appreciated that persons intoxicated by alcoholic drinks can create risks of accidents; therefore we ask the Master's co-operation to ensure that these persons do not enter the refinery gates and/or board their vessel unless accompanied by sober members of their crew. In this connection we will advise the Master or one of his officers, so that measures can be taken to ensure the safety of the forementioned person(s) e.g. by sending one or more of the crew to the gate to accompany him (or them) to the ship.

Visitors: Visits to ships are prohibited except from those company employees, petroleum inspectors, etc., whose duties require their presence on board.

Staff and Crew Changes: No staff and/or crew should be engaged or discharged without consulting ship's Agent. In case of discharge, identification documents must be handed to the Ship's Services representative or the Norwegian Consular Officer in the case of Norwegian vessels.

Tank Cleaning and Mopping: Several contractors in the area provide labour for tank cleaning and mopping. Masters in need of this service should submit their requirements to the Ship's Services Office, who will contact and request a contractor to go on board to discuss details and estimate costs of work to be effected. It must be pointed out that the Master of the vessel is solely responsible for the proper fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contamination of the cargo after loading, due to inadequate tank cleaning. Therefore it is up to him to decide the degree of tank cleaning necessary. He may, of course, seek advice from the installation representative in this respect, whenever there is any doubt.

Turnaround: To promote the economical operation of their vessel, Masters are requested to co-operate with installation representatives in minimising their in-port time. Any delays which are considered unnecessary or extensive should be reported to the loading Supervisor (tel. 2133) so that corrective measures can be taken.

Garbage: Garbage is collected twice daily (early morning and mid-afternoon).

REPORT: February 1991.

The following telex was sent to a Master by the Agent.

Quote:

Latest Instructions Received from Coast Guard and Port Captaincy with Reference to National Security Enforcement:

(AAA) Arrival and departure transit of vessel to the terminal of Punta Cardon.

(AA1) All vessels should arrive at following position:
Lat. 12° 10' N.
Long. 70° 40' W.

(AA2) Then, they have to proceed to the following posi (course 180°):
Lat. 11° 46' N.
Long. 70° 40' W.

(AA3) In order to arrive at terminal of Punta Cardon it compulsory to pass through Coast Guard control zone the following area:

(A)	11° 40' 15" N. 70° 22' 30" W.	(C)	11° 37' 00" N. 70° 26' 00" W.
(B)	11° 40' 15" N. 70° 26' 00" W.	(D)	11° 37' 00" N. 70° 22' 30" W.

(AA4) After passing through Coast Guard control you may ahead to the anchorage zone which is as follows:
Parallels 11° 40' 00" N. and 11° 38' 00" N.
Meridians 70° 17' 00" W. and 70° 15' 30" W.

(BBB) Arrival and departure information should be transmitted by ra on VHF Channel 16 to Coast Guard or Guaranao Pilot Stat (Port Captaincy of Las Piedras):

(BB1) Once you arrive at the position referred to in (AA1) abo you should start calling the Coast Guard (if you do receive any answer then call Guaranao Pilot Station).

(BB2) Following information should be passed to them:
Agency name.
Vessel's name.
ETA/Port.
Last Port.
Call Sign.
Kind of vessel.

Please note that all this information should be provided us (agent) to the port authorities 48 hours prior to vessel's arrival. Once you arrive at Point (AA1) abo same information must be reported to authorities, then you may be authorised to transit from Point (AA3) to (A above.

If there is something different in the information, yo vessel may be requested to anchor in the zone mention in Point (AA3) above and wait until Coast Guard boar your vessel and checks all the information again.

Please note that even when all information is com your vessel may be requested to anchor for routine che

(BB3) Upon departure you should contact Coast Guard/P Captaincy and inform them about your departure a transit through zone indicated in Point (AA3)/(AA2)/(A

If all the above procedure is not followed by you, your vessel will requested to anchor for about 48 hours in area referred to as Point (A

We highly appreciate your co-operation in order to avoid unnecessary delay for your vessel.

Unquote.

NOTES

Please also advise Shipping Guides Ltd.

Socialist Republic of Vietnam

GENERAL:
The following ports are open for international trade:

1. Ba Ngoi
2. Cam Pha
3. Can Tho
4. Da Nang
5. Hai Phong
6. Hon Gay
7. Nam Can
8. Nghe Tinh
9. Nha Trang
10. Quy Nhon
11. Saigon
12. Thanh Hao
13. Thuan An
14. Vungtau

The following small ports are also open to international trade:

1. Dong Nai
2. Dong Thap
3. Ky Ha
4. My Tho
5. My Thoi
6. Sa Ky
7. Van Phong (Honkhoi)
8. Vinh Thai

DOCUMENTS: (All ports).
Arrival Procedure:
(a) Arrival documents to be filled in or signed:
Clearance from Last Port.
2 copies Declaration of Arrival.
8 copies Crew Lists.
8 copies Passenger Lists.
2 copies Health Declaration.
Crew Personal Effects (individual declaration).
Passengers Personal Effects (individual declaration).
5 copies Dangerous Cargo Declaration.
5 copies Cargo Manifest.
5 copies Cargo Plan.
8 copies List of Articles Forbidden to be Used in Port.
Zoological Quarantine Declaration.
Ship's Stores Manifest.
Phyto Sanitary and Fumigation Certificates.
Veterinary Certificate.
Phyto Quarantine Certificate.
Application for Crew Members and Passengers Shore Passes (to be returned before Ship's Departure).
(b) Arrival documents to be submitted to Port Authority:
Ship Safety Construction Certificate.
Ship Nationality Certificate.
International Load Line Certificate.
International Tonnage Certificate.
Safety Radio Telephony Certificate.
Safety Equipment Certificate.
International Certificate of Vaccination for Passengers and Crew.
Ship's Derat (or Exemption) Certificate.
Seamans Passports or Seaman's Books of Crew and Passports of Passengers.
Transit Cargo Manifest.
Zoological and Botanical Transit Cargo Manifest.
Certificates of Competency of Officers and Engineers (for all Officers onboard).
Certificates of Proficiency in Manoeuvring Lifeboats.
Foreign Currency Declaration and Invoices.
International Oil Pollution Prevention Certificate.
Departure Procedure:
2 copies Declaration of Departure.
3 copies Health Declaration.
6 copies Outward Cargo Manifest.
6 copies Crew Lists and Passenger Lists (if changes).
6 copies Personal Effects Declaration.

PILOTAGE: Pilotage is compulsory for all vessels entering or leaving Vietnamese Ports, as well as when mooring, unmooring and shifting berths in harbour.

Request for Pilots at every port by international signal code for sea pilots and on VHF Channel 16.

RADIO: All communications for ship movements through radiotelephones of Harbour Offices on VHF Channel 16.

Agents, receivers, etc. can be called through Coastal Radio Stations.

Notice of Arrival: ETA message to be given 48 hours prior to ship's arrival, including particulars of vessel and cargo on board. 4 hours prior to arrival send correct time of arrival.

HEALTH: Usual international health regulations are to be observed. Any vessel, which is suspect, should inform Harbour Office and Medical Office.

Medical assistance, if required, is available, including vaccinations and inoculations, as well as dispensary and hospital treatment in all ports.

International code quarantine signals to be shown on arrival at port limits. No person, except Pilot and Port Authorities, may board or leave the ship until Free Pratique is given after port health inspection.

TIME: Local time in Vietnam is GMT plus 7 hours.

HOLIDAYS: New Year's Day (last day of December, 1st and 2nd January); Day of International Worker's Solidarity (1st May); National Day (2nd and 3rd September).

GENERAL: Commercial vessels may call at all ports officially declared open, if permission from Vietnam Maritime Department obtained at least 7 days in advance of arrival. The arrival should be re-confirmed at least 24 hours before entering territorial waters.

Emergency calls are allowed, but the Maritime Administration should be notified immediately.

Vessels only allowed to leave the Pilot Station when all formalities, such as Free Pratique, Customs, Clearance, etc., have been performed.

Crew members and officers are not allowed to have contact with other than Pilot and Port Authorities during arrival and sailing formalities.

SEARCH AND RESCUE: See "Authority".

There are Search and Rescue Centres at every port (Harbour Office).

AUTHORITY: Vietnam National Maritime Bureau, 7A Lang Ha Street, Hanoi, Vietnam. *Tel:* (84-4) 8561370, 8561372. *FAX:* (84-4) 8560040, 856729. *Contact:* Nguyen Viet Anh, Director – Legislation and Certification Department.

BA NGOI: 11.48 N. 109.12 E.

AGENT'S REPORT: April 1994.

PILOTAGE: Compulsory.
Pilot Station Co-ordinates: Lat. 11° 48' N., Long. 109° 12.5' E.
Distance from Pilot Station to Port: 9 miles.
RESTRICTIONS: Draft 6.50 m.
TUGS: 1×400 h.p.
BERTHING: Quay length 81 m.
Mooring Buoys: 3.
Average Handling Rate: 1,800 tonnes/day.
CRANES: 2×5 tons and 1×15 tons mobile cranes.

CAN THO: 10.03 N. 105.42 E.

DOCUMENTS: See "General" before first port.
PILOTAGE: Pilotage is compulsory for all vessels that enter or leave the Port of Can Tho.

Pilot boards at correct time of arrival at "Zero Buoy" in position Lat. 09° 28' 57" N., Long. 106° 30' 23" E. During bad weather, Harbour Master will advise, by VHF, the position where Pilot may board in safety.
RESTRICTIONS: Pilot boards during daytime only.
ANCHORAGE: In "Zero Buoy" area with max. depth 12.00 m.
MAX. SIZE: LOA – No restriction. Draft 7.0 m.
HEALTH: See "General" before first port.
RADIO/VHF: Communications available on VHF Channel 16 and ICOM IC-M700 on 8,743.7 kHz. with Vietnam Ocean Shipping Agency, Can Tho Branch (VOSA CANTHO) and Port of Can Tho Authority, stand-by daily, including Sundays and holidays, 0700 hrs. – 1100 hrs. and 1300 hrs. – 1700 hrs.
TUGS: 1×135 h.p. and 1×1,400 h.p.
BERTHING: Two quays with total length 140 m., depth 9.0 m.
STEVEDORES: 4 shifts: 0700 hrs. – 1100 hrs., 1300 hrs. – 1700 hrs., 1900 hrs. – 2300 hrs. and 0100 hrs. – 0600 hrs.
CRANES: 3 shore cranes of 10 tons, 15 tons and 20 tons capacity.
FRESH WATER: Available at berth.
FIRE PRECAUTIONS: Port fire service and City fire service available.
REPAIRS: Deck and engine repairs of medium size possible at Navy factories.
POLICE/AMBULANCE/FIRE: Via Port Authority or Vosa Can Tho.
SERVICES: Shipchandler services available via Vosa Can Tho.

AGENT'S REPORT: April 1994.

Location:	Lat. 10° 03' N., Long. 105° 42' E.
Pilot Station Co-ordinates:	Lat. 09° 28' 57" N., Long. 106° 30' 23" E.
Distance from Pilot Station (Dinh An):	70 miles.
Pilotage:	Compulsory, daytime only.
Restrictions:	Draft 7.00 m.
Tugs:	1×1,400 h.p.
Cranes:	1×5 tons, 1×10 tons and 1×15 tons.
Berth:	Length 141 m. Depth 9.00 m.
Buoys:	1 pair.
Storage:	Warehouse: 3,240 sq.m. Open: 4,500 sq.m.
Container Handling Facilities:	1 crane (45 tons) truck for shifting container.
Barges (for lighterage):	3
Average Handling Rate:	Bagged cargo 500 – 800 tons/day.

AUTHORITY: Port of Can Tho Authority, 14/11 Le Hong Phong Street, Binh Thuy, Can Tho City, Can Tho Province, Vietnam. *Tel:* (84) 01-71-41254. *FAX:* (84) 01-71-41049. *Contact:* Le Minh Khang, Harbour Master.

CUA LO: 18.50 N. 105.45 E.

AGENT'S REPORT: April 1994.

PILOTAGE: Compulsory and daytime only.
Pilot Station Position: Lat. 18° 47' N., Long. 105° 47' E.
Distance from Pilot Station to Port: 6 miles.
RESTRICTIONS: LOA 100 m., draft 4.5 m.
TUGS: 1×300 h.p. and 1×500 h.p.
BERTHING:

Quay No.	*Length* (m.)	*Depth* (m.)	*Type of Cargo*
1	160	6.00	All types.
2	160	4.00	

Sheds/Warehouses: 2×5,970 sq.m.
Open Storage: 40,000 sq.m.
Barges (for lighterage): 5×70-700 tonnes.
CRANES: 5×5 ton mobile cranes.

DAI HUNG: 08.28 N. 108.41 E.

LOCATION: The CALM Buoy location is Lat. 08° 28' 32.77" N., Long. 108° 41' 22.92" E.

This location, and that of the FPU, is situated within a Marine Exclusion Zone. This Marine Exclusion Zone, which encompasses the Dai Hung Oil Field and Facilities, was declared to protect the Facilities from collision risk from passing traffic in the offshore sealane. Vessels should remain alert to avoid passing sealane traffic outside the Marine Exclusion Zone. Drilling rigs, installation vessels and associated support craft may be working in the Marine Exclusion Zone.

One possible STS site is a circle of 20 nautical mile radius, centred on Lat. 08° 52' N., Long. 103° 18' E.

This location is in Vietnamese waters of over 30 m. depth S.S.W. of Hon Tho Chau Island. Other sites may be identified and details will be provided by BHPP as necessary.

RADIO: *Communications with Terminal:*

(a) FSO:
Radio watch maintained 24 hours.
HF call sign: 3EXW5.
Inmarsat M number for telephone: 872 or 873; 650 390 110.
Inmarsat M number for fax: 872 or 873: 650 390 111.
Inmarsat C number for telex: Mobile Earth Station ID: 1332455.
VHF Channels available.

(b) FPU:
Radio watch maintained 24 hours.
HF call sign: C6BP.
Inmarsat M number for telephone: 872 or 873: 650 391 210
and 650 391 110.
Inmarsat M number for fax: 872 or 873: 650 391 211
and 650 391 111.
Inmarsat C number for telex: Mobile Earth Station ID: 450300318.
VHF Channels available.

Vessels' communication with the Terminal shall be made to the FSO, in the first instance, unless difficulties are encountered or when the FSO is not present at the Dai Hung Field, in which case the FPU shall be contacted.

LOADING: *FPU:* The FPU is a converted Aker H3 semi-submersible drilling rig, fitted with well fluid processing and water injection facilities. It is connected to the subsea wellheads by subsea flowlines and umbilical hoses. Stabilised crude oil is not stored on the FPU, but pumped via subsea flowline to the CALM Buoy. *The FPU is permanently anchored in approximately 110 m. of water, using an 8 point mooring system,* and it cannot readily be moved from the site. The process equipment includes a fiscal metering system, and up to approximately 6,360 cu.m./day (40,000 barrels per day) may be pumped to the CALM Buoy.

CALM Buoy: The CALM Buoy is situated 2 km. S.E. of the FPU and is moored on an 8 point anchor system. It is equipped with a soft mooring system and 150 mm. floating hose extended from the CALM Buoy turntable for berthing of an FSO, or a directly moored vessel acting as a tanker of convenience. No crude oil is stored on the CALM Buoy.

FSO: When utilised, the FSO (Ex-"Hikari Orient" – 232,678 d.w.t.) is soft moored to the CALM Buoy and loads stabilised crude oil via the 150 mm. floating hose. It has approximately 238,000 cu.m. (1.5 million barrels) total crude oil storage capacity. *Liftings performed with the FSO on the CALM Buoy mooring utilise a tandem mooring configuration rated at 200 tons SWL.* The FSO may also perform STS (lightering) at a location in waters remote from the site. Tandem offtakes utilise a 16 in. floating hose, and discharge rate is approximately 5,500 cu.m./hr. (35,000 bbls./hr.). Allowing for start-up and slow-down periods, 95,400 cu.m. (approximately 600,000 barrels) will require over 20 hours pumping.

Dai Hung Crude Oil: The characteristics of this crude oil varies between wells and between zones in wells. Specific details of the crude oil to be lifted will be provided at the time of contracting the vessel.

The crude oil shall require to be heated during transportation.

Floating Hose Contents: It is normal procedure for the floating hose to be flushed with sea water to the vessel prior to disconnection at the end of the lifting operation. Consequently, upon commencement of lifting operations, a hose volume of water may be transferred to the vessel also. This volume should be approximately 35 cu.m. for tandem moored liftings.

Terminal Management: The Field Superintendent on the FPU has overall field responsibility for the safe and efficient operation of the Facilities and vessels working or visiting infield.

The Mooring Master (Based on the FSO or on the FPU if the FSO is not present) is responsible to the Field Superintendent for the safe and efficient operation of the Terminal and for all crude lifting activities involving a vessel.

Dirty Ballast, Slops and Refuse: Dirty ballast, slops or refuse cannot be accepted at the Terminal, and under no circumstances can they be discharged to the sea, except within compliance with Vietnamese Laws and MARPOL.

MEDICAL: Medical and dental services are not available at the Facilities. In emergencies, medical evacuation to Vung Tau can be arranged, which may take 4 hours or more. The FPU crew includes a qualified medic.

FRESH WATER: Not available.

FUEL: Not available.

SURVEYORS: The following independent inspector has offices in Vietnam:

SGS Supervise Vietnam Limited, Redwood Services Division, 115 Tran Quoc Thao Street, District 3, Ho Chi Minh City. Tel: 84-8-294284 and 231253. Fax: 84-8-230616. Telex: 812798 SGSHCM VT.

REPAIRS: Repairs to critical shipboard systems and hot work are not permitted whilst a vessel is moored at the Terminal. Under no circumstances are the main engines to be disabled for any period of time while the vessel is so moored.

TIME: GMT plus 7 hours.

SHORE LEAVE: Shore leave is not possible from vessels visiting the Terminal.

GENERAL:

Charts: International Chart Series Pacific Ocean – South China S Int. 508 and B.A. Chart No. 2660 (China Sea, Southern part, Weste Sheet), both cover the general area, the site of the Facilities and t Hon Tho Chau STS area.

Environmental Conditions:

(a) Wind: Dominant wind directions are defined by the North Easte Winter (November to March) and South Westerly Summer (Apri October) Asiatic Monsoons.

Typhoons generally are of only moderate intensity with avera occurrence of 8 per year. The 100 year wind speed is estimated 97 knots.

The Winter months are subject to prevalent strong wind commencing sharply in October. This period is also subject monsoonal surges which may be associated with winds up 50 knots. This is likely to affect mooring and offtake operations.

Relatively calm periods occur during the inter-monsoo transitions, approximately April and September.

(b) Waves: Wave response follows the wind pattern, with Winter wa height generally remaining above 1.5 m. – 2.0 m. significant, a reaching to greater than 5.0 m. significant during monsoonal surge when heavy swell patterns dominate.

(c) Current/Tide: The main current trends with the monsoonal wi direction, at up to 5 knots on the surface. The tidal range is +1.0 to −1.4 m., and may act as a current modifier, particularly dur the inter-monsoonal transitions.

(d) Precipitation: The norm is 1,200 mm. – 1,400 mm. annually, mai falling during Summer. Cloud and storm activity may affect helicop operations during this period, severely reducing visibility.

(e) Water Temperature: The minimum surface water temperature 24°C and maximum 34°C.

(f) Air Temperature: The minimum air temperature is 21°C a maximum 38°C.

(g) Seabed Conditions: The bottom is gently undulating from 110 m. 120 m. and generally sandy.

Firefighting: The Facilities only have firefighting equipment required their own purposes. Only limited aid may be given to vessels in the eve of fire, utilising the field vessel if available.

Pollution Control: The Facilities hold a small quantity of dispersant pollution control, which can be dispensed from the field vessel or, subje to call-out delay, from an aircraft, should this be necessary. A sm quantity of equipment to contain and recover oil from the water shall held on the Facilities.

Visitors: Access to the Facilities is by a helicopter flight from Vung Ta to the Facilities. Because of the limited capacity of scheduled flights, difficulties in arranging extra flights and the severe accommodat constraints onboard the Facilities, the attendance of visitors is n normally possible. 24 hours notice, together with passport details required to obtain an offshore travel pass from Vung Tau.

Persons required to visit for offtake purposes will be contacted by a have arrangements made for their travel by the Lifting Supervisor Ho Chi Minh City.

Other persons intending to visit should seek permission from the BH Production Manager at least 4 days before scheduled arrival of vessel. Earlier advice would be appreciated.

Supplies and Services: The remote, deep-sea location of the Termi severely limits the provision of services. Vessels should carry suppl adequate for a return journey.

Stores: Stores are not available to vessels visiting the Terminal.

Fishing: Due to the presence of subsea facilities that are serviced divers and Remotely Operated Vehicles, no fishing is permitted wi the Marine Exclusion Zone.

Shipping Agents: The following shipping agents have offices in Vietna

Petroleum Technical Services Co., 95B Le Loi Street, Vung Ta Tel: 84-64-52048. Fax: 84-64-59858.

Vietnam Ocean Shipping Agency, 4 Quang Trung, Vung Tau. Tel: 64-52800/1. Fax: 84-64-52276.

DANANG: (Tourane): 16.04 N. 108.13 E. **(See Pl**

DOCUMENTS: To be inspected:

Derat Certificate (or Exemption).
Certificate of Registry or Nationality.
Load Line Certificate.
Tonnage Certificate.
Certificate of Pollution Prevention, and other Safety Certificates
Permit for Ship's Radio Operation.
International Vaccination Certificates (for crew/passengers).
Transit Cargo Manifest.
Crew's Passports and Passengers' Passports.
Certificates of Competency for Master, Chief Engineer, Chief R Officer, Officers and Engineers.
Civil Responsibility Insurance Certificate (for ships carrying petro or dangerous cargo).
Foreign Currency Declaration or Crew Luggage Books.
Certificates of Proficiency in Manoeuvring Lifeboats.

Required for Entry:

1 copy Fumigation or Disinfection Certificate for Cargo.
1 copy Port Clearance from Last Port.
2 copies Declaration of Arrival (Form supplied).
2 copies Declaration of Health (Form supplied).
1 copy Individual Luggage Declaration (Form supplied).
5 copies Cargo Plan and Cargo Manifest (Form supplied).
5 copies Dangerous Cargo Manifest (Form supplied).

5 copies Declaration for all Equipment and Instruments/Tools used during Ship's stay in port (Form supplied).
5 copies Stores List – Deck, Engine and Provisions (Form supplied).
5 copies Crew List (Form supplied).
5 copies Passenger List (Form supplied).
1 copy Declaration of Provisions (Form supplied).
1 copy Zoological/Phyto Quarantine Certificate (Form supplied).
1 copy Application for Crew and Passengers Shore Passes (Form supplied).
Required for Departure:
1 copy Individual Luggage Declaration (Form supplied).
2 copies Declaration of Departure (Form supplied).
3 copies Cargo Manifest (Form supplied).
1 copy Declaration of Health (Form supplied).
5 copies Crew List and Passenger List (Form supplied).
Also see "General" before first port.

PILOTAGE: Compulsory for all vessels that enter or leave port. Pilot Station at "Zero Buoy" (Lat. 16° 10' N., Long. 108° 11' E.), depths at Pilot Station 14.0 m. Pilot requires 8 hours notice.

Pilot boards from a tug during daytime only. Ships arriving at night should anchor in a position close to the Pilot Station.

ANCHORAGE: Pilot station and 45 anchorages in Danang Bay with depths from 10.0 m. – 16.0 m.

RESTRICTIONS: No restrictions in the Danang Bay and anchorage.

MAX. SIZE: Permissible LOA 190 m. Beam 26 m. and max. draft 11 m.

HEALTH: See "General" before first port.

RADIO: Danang Radio, call sign XVT, works 24 hours everyday.

Contact by VHF Channel 16. It is possible to contact anywhere through Danang Radio.

Name: Danang Radio Coast Station.
1. SW: 8 MHz. Call Sign: "XVT".
Transmit Frequency: 8,570 kHz.
Receiving Frequency: 8,368/8,369 kHz.
Working Time: From 0700 hrs. – 2200 hrs. (local time).
Call Time: The first half of every hour (Call "TRAFICLIST").
2. MW: Transmit and Receiving Frequency: 500 kHz.
Call Time: From the 35th minute of every hour.
3. R/T – H/F: Listens and answers on frequency 12,290 kHz.
Working Time: From 0700 hrs. – 2100 hrs. (local time).
4. VHF: Channel 16. 24 hours/day.
5. R/T – M/F: Frequency 2,182 kHz for emergency (24 hours/day).

VHF: Contact with Port Authority and VOSA Danang on VHF Channel 16. Port Authority listen 24 hours. VOSA Danang and Pilot listen during daytime only.

RADAR: Not available.

TUGS: 3 tugs available. 1×1,140 h.p., 1×800 h.p. and 1×480 h.p.

BERTHING: There are 3 areas:
Tien Sa area: 2 quays with 4 berths (one with length 182 m.), depth 10.5 m.
X50 Berth (Navy): 250 m. long with depth 6.0 m.
Song Han area:
1 main berth 530 m. long with depths 4.0 m. – 6.0 m.
1 berth (Song Han 7) 138 m. long with depth 6.0 m.
1 berth (Song Han 8) 82 m. long with depth 6.0 m.
1 berth (Song Han 9) 60 m. long with depth 6.0 m.
3 berths (called 234) (A) 220 m. long with depth 6.0 m.
(B) 230 m. long with depth 6.0 m.
(C) 190 m. long with depth 6.0 m.
1 berth (Nai Hien) 10 m. long with depth 5.0 m. – 5.5 m.
Ky Ha area: 1 berth 349 m. long with depth 6.0 m.

CRANES: One truck crane of max. 80 tons capacity and 8 cranes of 5-16 tons capacity.

BULK CARGO FACILITIES: No specialised facilities available. Cargoes handled include coal, maize and fertiliser in bulk.

SPECIALISED CARGO HANDLING FACILITIES: There are specialised facilities for handling 20-40 ft. containers. Storage space available for palletised cargoes. Ro-Ro ramp available.

STEVEDORES: Ordered by Agent, work continuous throughout 24 hours, except for meal breaks.

BRIDGES: None.

MEDICAL: 6 hours notice required for medical assistance. There are hospitals in town.

TANKERS: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kg. Average discharging rate 200 tons per hour per line.

FRESH WATER: Available by barges, arrange with Agent.

FUEL: Fuel oil, diesel oil and lubricating oil available, arrange with Agent.

CONSULS: Laos.

REPAIRS: Can be undertaken on request to Agent.

DRY DOCKS: Two dry docks for vessels up to 7,000 d.w.t.

SURVEYORS: Cargo Surveyors: Vina Control, 105 Le Duan Street, Danang.

Ship Surveyors: Vires Danang, Branch No. 4, 4 Nguyen Thi Minh Khai Street, Danang.

HATCHES: Opening/closing is normally carried out by crew or stevedores.

REPATRIATION: Possible.

AIRPORT: There is an airport about 5 km. from the city with local flights only:

Danang to Ho Chi Minh City and Danang to Ha Noi:	Many flights every day.
Danang to Vinh:	Mon., Wed., Sat. (Departs at 1520 hrs.)
Danang to Pleiku:	Mon., Tue., Wed., Fri., Sat. (Departs at 1505 hrs.)
Danang to Buon Me Thuot:	Mon., Wed., Sun. (Departs at 1415 hrs.)
Danang to Nha Trang:	Tue., Thu., Sun. (Departs at 1215 hrs.)
Danang to Qui Nhon:	Mon., Thu., Sat. (Departs at 1300 hrs.)
Danang to Hai Phong:	Mon., Wed., Sat. (Departs at 1100 hrs.)

TIME: GMT plus 7 hours.

HOLIDAYS: 1st January; Lunar New Year (4 days); Liberation Day (30th April); International Labour Day (1st May); National Day (2nd September).

POLICE/AMBULANCE/FIRE: Contact Danang Radio (VHF Channel 16) to request telephone No. 113 (Police), 115 (Ambulance) or 114 (Fire); or contact VOSA Danang or Port Authority (VHF Channel 16).

EMERGENCY CO-ORDINATION: S.A.R. Centre of Danang Port based at Harbour Office. Contact with S.A.R. Centre on VHF Channel 16.

SERVICES: Available. Contact VOSA Danang or Ship's Agent.

BANKS: Vietcom Bank, Danang Branch, 104 Le Loi Street, Danang City. Tel: 84.51.823503.

Vietnam Export-Import Bank, Danang Branch, 92D Hoang Dieu Street, Danang. Tel: 84.51.826673, 84.51.826675, 84.51.826676. Telex: 84.51.5730 DN-EIB VT. Fax: 84.51.826674.

Vietnam Maritime Commercial Stock Bank, Danang Branch, 14 Tran Phu Street, Danang City. Tel: 84.51.825804, 825822, 824049. Telex: 311260 MSB VT. Fax: 84.31.845125.

SHORE LEAVE: Permitted via ship's Agent.

IDENTIFICATION CARDS: Shore passes issued.

GARBAGE DISPOSAL: Service is compulsory at least everyday for passenger ships and every 2 days for other ships. Ships must provide drums or bags.

Charges U.S.$ 30 per time (on berth), U.S.$ 60 per time (at buoys or anchorage) for other ships. U.S.$1.00/person per time for passenger ships (including passengers, crews, officers). At least U.S.$100 per time (if passengers, crew, officers on board are less than 100 persons).

If ships having destructors on board, will be reduced 30% of above charges.

WASTE OIL DISPOSAL: Available. Contact ship's Agent or VOSA Danang.

SEAMAN'S CLUBS: One Seamen's Club in the port. Facilities include shops, restaurants, international telephone, church services, football, dances, mini-bus collection and postage service. Arrange through ship's agent VOSA.

CURRENCY: Vietnamese Dong (d). U.S.$ 1.00 = 11,009 d (April 1996).

REGULATIONS: It is strictly forbidden to throw any garbage, waste oil, etc., into the bay or the river. Garbage collected by barge.

DELAYS: In the months from February to August: Good weather with S.E./S.W. winds.

In the months from September to January: Bad weather usually with N.E. wind (Monsoon), and it is often impossible to berth for discharging or loading at Tien Sa Berths, or the tanker berth at My Khe.

GENERAL: Officials boarding on arrival with Pilots: Two armed policemen who remain aboard during ship's stay at anchorage and berth. Officials boarding for clearing:
2 Port Authority Officers (Immigration Officers).
2 Security Officers.
2 Customs Officers.
2 Quarantine Officers.
Ship's Agent.

SHIPMASTER'S REPORT: 1976 (Updated 1996).

Documents: On arrival usually dealt with immediately by the Immigration Service, Police Service, Customs Service, Agency and Health Service. Ship's Documents: Classification Certificate, Tonnage Certificate, Minimum Safe Manning Certificate, I.O.P.P. Certificate, Construction Certificate, Certificate of Registry, Radio Certificate, Load Line Certificate, Safety Equipment Certificate, Port Clearance from last port. Cargo Documents: Bill of Lading (8 copies), Cargo Manifest (8 copies), Stowage Plan (5 copies), In Transit Cargo Manifest (if any). Immigration: Crew List (7 copies), Stores List (2 copies), Crew's Effect Declaration (2 copies), Passports of the crew.

Health: Vaccination List (2 copies), Provisions List (2 copies), International Vaccination Certificates.

All documents to be ready on arrival. Cameras and binoculars to be collected and placed in a locker, to be sealed. Bonded stores sealed.

Pilotage: Pilot station at a position Lat. 16° 10' N., Long. 108° 11' E. Pilot boards from a tugboat and moves the ship to a position about 1 mile West of Phare de l'observatoire. Pilot boarding during daytime only. Ships arriving at night should anchor in a position close to the Pilot Station. Pilot will board the ship at 0600 hrs. ETA should be given 48 hours and 24 hours prior to arrival at the Pilot Station.

Restrictions: There are no restrictions for entering the bay.

Health: A 24 hours cable should be sent to the Agent, stating that all crew are fit and healthy. If any sickness on board cable 48 hours in advance.

Radio:

Call sign	Frequency	Working hours GMT
XVT	500 kHz	0001 – 1200 hrs.
XVT 2	417.5 kHz	0001 – 1200 hrs.
XVT 2	8,570 kHz	0130 – 0145 hrs. 0830 – 0845 hrs. 1200 – 1315 hrs.

Radar: There is no radar post.

Tugs: There are 3 tugboats available, 1×1,200 h.p., 2×800 h.p. each. Tug's lines are used if necessary.

Berthing: There is one finger pier of 250 m. and another under construction. The latter to be ready towards the end of 1976. A tanker berth is situated in position Lat. 16° 04' N., Long. 108° 15' E., called My Khe. Tankers proceed to this position, after clearance, with Pilot rounding by the peninsula. (See "Plan"). At the cargo pier all discharging is done by ship's gear.

Cranes: There is 1 heavy lift floating crane of 100 tons capacity. 3 mobile truck cranes upto 25 tons capacity, one mobile truck crane of 80 tons capacity and 8 cranes of 5-16 tons capacity.

Bulk Handling Facilities: Bulk cargoes are sometimes handled at the port (i.e. maize) but there are no special facilities.
Bridges: No bridges.
Stevedores: Ordered by the Agent. No ETA necessary. Working hours 0001 – 0400 hrs., 0800 – 2400 hrs. Approx. discharging rate general cargo 400 tons/gang.
Medical: Six hours' notice required for medical assistance. There is a hospital in town. Inoculations required for cholera and yellow fever.
Tankers: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kg. at ship's manifold. Average discharging rate 200 t.p.h. per line.
Density: Cargo pier brackish depending on the season. At the tanker berth salt.
Fresh Water: Available by barge, rate of delivery 50 t.p.h.
Repairs: Repairs taking longer than 2 hours are not permitted unless permission is granted by the Port Master. Small repair facilities can be carried out ashore. There are no drydocks at this port.
Deck Watchmen: Cargo ships alongside the pier are provided with a gangway watch. Tankers discharging at My Khe will have two security guards on board during the stay in port.
Hatches: Old type hatches opened and closed by shore labour. Special patent hatches by crew.
Customs Allowances: The bonded stores are not sealed. There are no restrictions for quantity of spirits, cigarettes, beer, etc. It is strictly prohibited to supply any bonded stores to shore personnel.
Cargo Gear: There is 1 floating heavy lift crane of 100 tons.
Repatriation: Crew changes are arranged through ship's Agents and permitted by the Border Security at Danang Port.
Airport: There is an airport about 5 km. from the town. Air services to Ho Chi Minh City and Haiphong, local flights only, twice a week.
Time: GMT plus 7 hours (no Summertime) is kept along the whole coast.
Police/Ambulance/Fire: Via ship's Agent.
Services: There are laundry facilities (2 days ashore) with a 24 hour service. Shipchandler available at all times. Good fresh vegetables and fruits, depending on the season. Also good sea food.
Shore Leave: Permitted via local Agent with 6 hours' notice. Persons with invalid Passport are not allowed to go ashore.
Regulations: It is strictly prohibited to throw any garbage into the bay, heavy fines. Garbage collected by boat.
Delays: Remittance has to be granted by Owners or Charterers before sailing. Without a sufficient remittance the vessel does not receive a clearance.

Alongside the pier berthing and unberthing only between sunrise and 1400 hrs. due to strong winds in the afternoon. At any other time when strong winds are experienced berthing and unberthing not allowed. The fore mentioned also for the tanker berth at My Khe, here berthing is normally carried out during the morning hours, when there are weak winds. During a strong monsoon it is sometimes necessary to stop discharging operations and unberth the ship.
General: Ships calling for the first time at Danang port should give their ETA and call sign, nationality, all other necessary particulars so that the ship can be identified by the Navy. Ships, chartered by the Vietnamese Government should state this also and whether time or voyage charter. Ships carrying general cargo should also give all particulars about the stowage of the cargo, whether any deck cargo, heavy lifts etc.
Agents: VOSA Danang, Vietranstimex, Vitranschart, PTSC, Transimex Saigon, Danang Shipchanco, Vietrans, HaLong Fishcom, Polaris Co.Ltd., Vietranscimex, Vietfracht, Vosco, Container, Falcon.

SHIPMASTERS' REPORT: September 1980 (Updated 1996).
Documents: See "General".
Pilotage: Compulsory. Pilot boards in position Lat. 16° 10' N., Long. 108° 11' E. Notice required 24 hours. Daylight only for berthing except in cases of emergency.
Anchorage: In the Bay of Tourane; depth up to 19.0 m.
Restrictions: No restrictions in the bay and anchorage, depth of water up to 19.0 m.
Radio: Danang Radio.
VHF: Pilot on Channel 16.
Tugs: Two tugs available; 1 of 1,200 h.p., the other being used for barge work only.
Berthing: Location Lat. 16° 07.1' N., Long. 108° 12.6' E. Two piers available. Distance from sea to berth 4 miles. Max. size permissible: LOA 230 m., beam 26 m. and deepest draft 11 m. Least depth of water in channel from sea to berth 13.0 m. Mean tidal range at berth 0.9 m. Nature of bottom at berth – mud and sand. Average density 1016.

Cargo Handling Facilities: No bulk handling facilities or quay cranes available. There is a quarter ramp for Ro/Ro vessels and a 50 ton floating crane. Security is good as armed police are on duty throughout the vessel's stay. There is adequate storage space for break bulk and palletised cargoes. Stevedore gangs are available as required and work throughout 24 hours except for meal breaks.
Services: The following are available: Fresh water; fresh provisions; minor repairs facilities; airport with internal flights only; laundry services; bunker fuel oil; diesel oil; lubricating oil; doctor and hospital; groceries and meats.
General:
Officials Boarding on Arrival with Pilots:

Two armed police who remain aboard during vessel's stay at anchor and berth.
Officials Boarding when Vessel Anchored:

- Agent and assistant.
- 2 Customs Officers.
- 2 Port Authority Officers (Immigration).
- 2 Quarantine Officers.
- 2 Security Officers.

Documentation:

- 8 Crew Lists.
- 2 Stores Lists – Deck, Engine and Provisions.
- 2 Crew Customs Declaration Lists.
- 2 Currency Lists for foreign money in Crew's possession.
- 2 Bonded Stores Lists.
- Health Declaration.
- 2 Crew Vaccination Lists.
- All Vaccination Certificates.
- 4 copies of Bills of Lading.
- 7 copies of Cargo Manifest.
- 2 copies of Cargo Manifest – Cargo in Transit.
- 1 Form (Supplied) for Ship's Sextants, Binoculars, Cameras, etc.
- 1 Form (Supplied) for Arrival Details and Times.
- All Discharge Books (Passports of Officers' wives collected for sa keeping ashore).

Restrictions:

- Main and Emergency Transmitters sealed.
- Stornos (Walkie Talkies) sealed.
- Cameras sealed.
- Bond sealed.
- Inspection of all cabins on arrival.

General:

Vessel on 4 hours' notice at all times for sailing or shifting bert Although bond sealed release of spirits available at any time fro Customs.

Very strict on cigarettes with issue of only 200 per week per perso Shore passes issued to all personnel. Shore leave very restricted b bus service available to Seaman's Club nightly from 1800 – 2130 hr accompanied by a guard.

Maximum of 60 cigarettes per person for shore leave.

Seaman's Club takes Pound Sterling, Hong Kong Dollars, U.S.Dollar Australian Dollars, French Francs, Japanese Yen, Thai Bhat, etc.

One sight seeing tour was to have been arranged this call but cancelle due to adverse weather conditions. (Limited number of cameras wou have been available on this occasion).

Remittances from Owners take at least 1 month before any cash made available.

One typoon warning received this call when vessel had to vacate ber and proceed to anchorage.

One emergency vacation of berth at 0300 hrs. this call when hea swell built up alongside pier.

On departure full inspection of cabins and personnel, discharge boo (passports of Officers' wives returned). Shore passes collected. No ma received this call due 1 month delivery time. No restriction on bond coastal passage Danang to Haiphong.

AGENT'S REPORT: April 1996.

Location:	Lat. 16° 07' N., Long. 108° 13' E.
Pilot Station Co-ordinates:	Lat. 16° 10' N., Long. 108° 11' E.

Container Handling Facilities:	One berth and one terminal at Tien Sa.

AUTHORITY: Danang Port Authority, 1 Bach Dang Street, Dana Vietnam. *Tel:* 84.51.826203. *FAX:* 84.51.820372. *Contact:* Nguyen Thai, Port Director.

HAIPHONG: 20.52 N. 106.41 E. (See Pl

PORT LIMITS: *Haiphong Sea Port Waters Limits:*
Seawards: It is limited by a straight line connecting the Points fro to A2, A3, A4, A5 (See "Plan").
Landwards: It is limited by the highest tide level from the Points A1 A5 along the Bachdang River to Pharung Shipyard and from Bachdang River estuary along Dinhvu Canal and the Cam Riv 200 m. upstream from Vatcach port (crossing Anson Hamlet, An Village, Anhai District). In addition, there are 4 positions in Hongay and 5 positions in Trabau area (former name is Halong). In Hongay HG1, HG2, HG3 and HG4 (Area D), Latitude and Longitude sa given (See "Plan"). In Trabau Area: TB1, TB2, TB3, TB4 and TB5 are bound by the following co-ordinates (Area D) (See "Plan"):

	Latitude N.	Longitude E.
TB1	20° 51' 36"	107° 07' 06"
TB2	20° 51' 42"	107° 06' 36"
TB3	20° 51' 48"	107° 06' 12"
TB4	20° 49' 12"	107° 05' 18"
TB5	20° 49' 18"	107° 06' 12"

Seaward boundaries: Limited within 2 areas as below:

The pilot boarding/disembarking area is limited by semi-circle Southward, having a radius of 1 nautical mile and the central point at co-ordinates Lat. 20° 40' 00" N., Long. 106° 51' 00" E.

The near-by "zero" is quarantine area, and is limited by a semi-circle Southward, having a radius of 2 nautical miles and the central point at co-ordinates Lat. 20° 40' 00" N., Long. 106° 51' 00" E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Pilotage is compulsory for all vessels that enter and leave ports. Pilot boat arrives at the areas which are bounded by the above (See "Port Limits") at the correct arrival time, or as instructed by the Port Authority of Haiphong. Pilot boats are painted buff with a red stripe and a yellow star. Contact Pilot Station on VHF Channels 9 and 16.

ANCHORAGE: To Pilot's advice and permission of Port Authority of Haiphong.

There are 4 anchorage areas:

Ninhtiep Anchorage Area with max. draft 7.00 m. There are 2 positions (NT1 and NT2).

Bachdang Anchorage Area with max. draft 6.0 m. and length 130 m. There are 7 positions (BD3, BD4, BD5, BD6, BD7, BD8, BD9).

Trabau Anchorage Area with max. draft 12.0 m. There are 5 positions (TB1, TB2, TB3, TB4 and TB5).

Hongay Anchorage Area with max. draft less than 9.4 m. There are 4 positions (HG1, HG2, HG3 and HG4).

RESTRICTIONS: Max. draft to enter the berths of Haiphong Port and Ninhtiep and Bachdang Anchorage areas is 25 ft. Ships with draft over 25 ft. have to operate lighterage at anchorage areas.

MAX. SIZE: At berths, LOA 200 m. Breadth 26 m. Draft 7.0 m.

Berth for Oil Tankers: LOA 70 m., breadth 10 m. and draft 5.0 m.

HEALTH: See "General" before first port.

RADIO: Haiphong Radio handles vessel traffic. Call sign XVG, frequency 500 kHz and 8364 kHz.

VHF: Port Authority on Channel 16, working Channels 6 and 10.

TUGS: Tugs available of 500 h.p., 600 h.p. and 3,200 h.p. Tugs are used for escort, rescue, salvage and towage.

BERTHING: Port central area has 12 berths available.

Berth No. 1: Containers.

Berth No. 2: Grain, ore, coal.

Berths No. 3, 4, 5, 6, 8, 9, 10: General cargo.

Berths No. 7: Containers.

Berth No. 11: General cargo and refrigerated cargo.

Berths No. 4, 5: Passenger ships.

Doanxa Area: 2 berths for Ro/Ro or container ships.

Chua Ve Area: 2 berths for general cargo ships.

Thuongly Area: 1 berth for tankers.

Cuacam Area: 3 berths for general cargo ships.

Thuysan Area: 2 berths for fishing vessels and general cargo ships.

Vatcach Area: 3 berths for general cargo ships of less than 1,200 d.w.t.

CRANES: Port Central Area, Doanxa Area and Vatcach Area have shore cranes with capacities of 5 tons, 6 tons, 7 tons, 10 tons and 25 tons.

The Port Central Area, Doanxa Area and Chuave Area have floating cranes of 60 tons up to 200 tons available.

BRIDGES: None.

STEVEDORES: Ordered by Agent (Vosa Haiphong) or other ships' Agents in Haiphong.

Stevedores work 24 hours continuously in 4 shifts.

Loading or discharging rates are those stipulated by charter party or by the agreement between cargo owners and the stevedoring companies.

Particular advice: See "General" – "Radio" – "Notice of Arrival".

MEDICAL: Doctors and hospital facilities available in Haiphong through Agents.

TANKERS: One tanker berth, max. draft 19 ft., depending on the tide. Two tanker anchorage positions in Haiphong Anchorage Area with max. draft over 30 ft. (TB4 and TB5) (See "Plan").

DENSITY: Low tide 1000, at berths.

FRESH WATER: Available at berths and at anchorage.

FUEL: Diesel oil and fuel oil can be supplied through Vosa Haiphong or other Agents.

FIRE PRECAUTIONS: Safety Regulations for tankers and other ships with dangerous cargo.

REPAIRS: Any deck and engines repairs can be performed on request.

DRY DOCKS: Pha Rung Ship Repair Yard nearby. Dry dock available for ships with max. length 150 m. and 10,000 d.w.t.

Asia Star Shipyards. Tel: (84-31) 875-210/228. Fax: (84-31) 205 (Canada-Vietnam Cooperation). 20,000 tonne dry dock (156 m. × 24 m.) draft 4.35 m. (LW), 7.0 m. (HW). Repair berths, 1×15 tonne and 1×10 tonne crane.

SURVEYORS: Cargo surveyors: Vinacontrol, branch in Haiphong City. Ship surveyors: Vietnam Register of Shipping (VIRES), Branch No. 10 at Haiphong City.

GANGWAY/DECK WATCHMAN: Compulsory for the ship's security and safety.

OPENING/CLOSING HATCHES: By the ship's crew, or by stevedores if requested.

CUSTOMS ALLOWANCES: No restrictions for spirits, cigarettes and beer for crews use, but strictly prohibited for commercial purposes.

CARGO GEAR: Cargo handled by ship's cranes or by shore cranes. If shore cranes are used, there must be a request in advance.

REPATRIATION: To Agent's advice.

AIRPORT: Catbi Airport for local services only. Noi Bai International Airport situated about 130 km. from Haiphong Port.

TIME: GMT plus 7 hours.

HOLIDAYS: National Day (2nd and 3rd September); International Labour Day (1st May); New Year (1st January); Tet Holidays (last day of December and 1st and 2nd January of Lunar Calendar).

POLICE/AMBULANCE/FIRE: Contact Port Authority or Vosa on VHF Channel 16.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Haiphong based at Harbour Office, contact can be made on VHF Channel 16 or Tel: 42637, 42682.

TELEPHONES: No connections on board vessels. All operational ports are linked by telephone network.

SERVICES: Tank cleaning equipment, facilities for discharge of tank washings and all kinds of oil residues, oily rags, food wastes, garbage and hazardous substances are available at the port. Compass adjusting, radio and radar repairs, extensions of Ship's Certificates are available at port.

BANKS: State Bank of Vietnam in Haiphong Maritime Bank, 25 Dien Bien Phu Street, Haiphong.

SHORE LEAVE: Crew members are allowed ashore.

DEVELOPMENTS: *1st Phase:* Construction of graving dock (150 m.×25 m.×6.3 m.) and 200 m. length berth with depth 6.5 m.

2nd Phase: Construction of dry dock (180 m.×30 m.×7 m.) and small piers length 100 m. and 150 m.

SHIPMASTER'S REPORT: October 1980.

Documents: See "Shipmaster's Report" for Danang dated September, 1980.

Pilotage: Compulsory. Pilot boards in position Lat. 20° 41' N., Long. 106° 58' E. 24 hours' notice required.

Anchorage: The inner anchorage is between the outer bar and the channel cut, depth at LW 8 m.

Restrictions: It is not advisable to enter or leave during hours of darkness as there are only a limited number of lights and buoys.

Max. Size: Max. LOA 200 m., beam 26 m., draft 7.5 m. Lightening facilities are available at Baie d'Halong for vessels with draft of up to 10 m.

Health: Quarantine Authority require 24 hours' notice of arrival.

Radio: Haiphong Radio handles vessel's traffic.

Tugs: Available. 1×600 h.p., 1×500 h.p.

VHF: The Agency (Vietnam Ocean Shipping Agency – VOSA) on Channels 6 and 16. They will forward messages to the Pilot.

Berthing: Berth situated in position Lat. 20° 52' N., Long. 106° 43' E. The berth was built in 1976 and is down river from the town berths. In all there are 12 berths available. Our berth was 18 miles from the entrance. Max. size acceptable at the berth, LOA 200 m., beam 26 m. and deepest draft 7.4 m.

Cargo Facilities: No bulk handling facilities; no cranes at this berth but some were sighted at the town berths; no Ro-Ro facilities visible. There is a floating crane with a capacity of 60 tons (approx.). Security is good as armed guards stay aboard the vessel throughout. No container facilities of any kind sighted. Labour works around the clock in 3 shifts.

Barges: Wood and steel barges available, some have engines.

Consuls: None, nearest are in Hanoi.

Services: The following are available: Fresh water; fresh provisions (depending on time of year); minor repair facilities; airport; laundry service; diesel oil; lubricating oil; doctor and hospital; small amounts of groceries and meats.

General: Any vessel intending to remain at the port for a long period of time should have onboard sufficient stores and fresh water prior to arrival, as if vessel at anchor, stores and fresh water can take up to one week to arrive.

SHIPMASTER'S REPORT: November 1981.

Pilot Station: The Pilot boards the vessel at the anchorage which is about 2 to 3 miles S.S.E. from Zero Buoy. Pilot boat is a metal boat about 20 m. length. The funnel is painted buff with a red stripe and a yellow star.

Restrictions: There are 2 mud banks up river. One after the buoyed channel and one after the ship-canal about 1.5 miles before the berths. River draft depends on the tide which varies from 6.4 m. to 7.2 m. at HW. Haiphong port draft about 6.9 m.

Pilotage: The channel from Zero Buoy to Haiphong has buoys but no lights visible and the buoys are often out of position. The channel is very narrow having only a few centimetres' bottom clearance. Pilots are good.

Anchorage: For deeper draft than 6.9 m., ships are lightened at Halong Anchorage. Pilots, Security Officers and Customs Officer board at Zero Buoy and the vessel proceeds to the anchorage via Passe Henriette. Depths are 18 m. to 21 m. and good holding ground. The place is sheltered from all winds except North.

Documents: 1 more copy of Crew List and Money Declaration necessary than stated in "Shipmaster's Report", September 1980 for Danang.

Also see "General".

Security Police: At Halong Anchorage 2 security policemen remain on board, requesting accommodation and food.

Agency: During the vessel's lightening, Agent's clerk remains continuously on board requesting accommodation and food. Any communication with the Agency at Haiphong is done by telegram. Ship's transmitter is unsealed by Security Officer, message sent, and then resealed. Whilst alongside, Agent visits every day and they are quite efficient.

Stevedores: At Halong Anchorage, a barge with quarters for the stevedores comes alongside the vessel. Chief Stevedore is always available speaking efficient English. Discharging performed by vessel's derricks with shore grabs. Rate about 1,500 metric tons per day. At Haiphong berth discharging performed by shore cranes with a rate of about 1,800 – 2,000 metric tons per day. Haiphong Port has a berth accommodating ten large ships. There are about 25 shore cranes from 10 to 15 tons capacity and we have seen 1 floating crane of about 200 tons.

Ship Chandler: Fresh provisions are poor quality and only small quantities available. Low prices. Also ship chandler takes care of sick crew members for hospital and doctors.

Shore Leave: From Halong Anchorage crew are not allowed to go ashore. At Haiphong berth shore leave allowed from 0700 – 2300 hrs. All foreign currency, rings, watches, must be declared at the gate.

Repatriation: Agent assures Master that repatriation is very easy, however the need of formalities and permissions will take a long time.

Health: Quarantine doctor will revaccinate any crew member with expired certificate.

Communications: VOSA Agency has VHF Channel 16 and it is possible to contact them from Zero Buoy. Communication with Owners is very slow and the cable needs 2 to 3 days to reach the destination. Crew mail requires more than 40 days to reach the vessel.
Density: Halong anchorage 1020. Haiphong port 1000.
General: A lot of people visit the vessel claiming that they are Harbour Officers, Chief Stevedores, Receivers, Surveyors, Stevedores, Customs Officers, Security Officers.
IMPORTANT: Stevedore's barge which is alongside the vessel at Halong Anchorage is full of rats, which come on board via ladders and other ropes, with result that the vessel becomes infested with rats.

Ships must have on board, from their previous port of call, sufficient quantity of rat poison to kill them after sailing from Vietnam.

AGENT'S REPORT: April 1994.

Location:	Lat. 20° 52' N., Long. 106° 41' E.
Pilot Station Co-ordinates:	Lat. 20° 42' 01" N., Long. 106° 57' 08" E.
Distance from Pilot Station:	20 miles.
Pilotage:	Compulsory, day and night.
Restrictions:	Draft: 7.5 m. (channel) LOA: 170 m.
Tugs:	From 600 h.p. – 3,200 h.p.
Cranes:	5-15 tons shore cranes. 10-50 tons (max. 80 tons) floating crane.

Berths:

Quay	Length (m.)	Depth (m.)	Type of Cargo
1,2,3	390	8.0	Bulk cargo
4,5,6	490	8.0	General cargo
7	165	8.0	Containers, general cargo
8,9,10	489	8.0	General cargo, grain
11	156	8.0	Frozen cargo
Chua Ve	200	6.0	General cargo
Doan Xa	300	8.0	Containers, timber
Vat Cach	250	4.0	General cargo, lighter
Lighterage	6 vessels	12.0	Bulk, bagged cargo, passengers

Shed/Warehouses:	74,300 sq.m.
Open Storage:	53,000 sq.m.
Container Handling Facilities:	Available.
Barges (for lighterage):	Available.

Cargo Handling Rates: (10,000 g.r.t. vessel)

At Berth:	Bulk cargo:	1,500 ton/day min.	3,500 ton/day max.
	Bagged cargo:	800 ton/day min.	2,000 ton/day max.
	General cargo:	450 ton/day min.	600 ton/day max.
	Equipment:	500 ton/day min.	700 ton/day max.
	Container 20:	100 TEU	200 TEU
	Frozen cargo:	250 ton/day min.	350 ton/day max.
	Timber:	600 ton/day min.	800 ton/day max.
At Anchorage:	Bagged cargo:	1,000 ton/day min.	1,500 ton/day max.
	Bulk cargo:	1,500 ton/day min.	3,000 ton/day max.

AUTHORITY: Port Authority of Haiphong, No. 1 Minhkhai Street. *Tel:* 842637, 842682.

HO CHI MINH CITY (Saigon Port): 10.50 N. 106.45 E. (See Plan)

LOCATION: 46 nautical miles from Vung Tau
DOCUMENTS:
7 copies Crew Declaration.
7 copies Passenger Declaration.
1 copy Stores Declaration.
2 copies Arms & Ammunition Declaration.
1 copy Tobacco/spirits/personal effects.
8 copies Inward Cargo Declaration.
3 copies Health Documents.

Vessel status and safety equipment will be checked.

These documents are to be completed and presented with copies of manifest and ship's documents at the time of report.
PILOTAGE: Compulsory.

Request pilot by telephone: Saigon Pilot Tel: 290152; Vung Tau Pilot Tel: 2235. Notice of ETA required at least 24 hours in advance. Pilot on VHF Channel 16.

Exact Pilot Boat location: Lat. 10° 20' N., Long. 107° 03' E.

The anchorage position for vessels awaiting pilot: Lat. 10° 18' N., Long. 107° 03' E. to Lat. 10° 21' N., Long. 107° 02' E.

Pilotage service is available from sunrise to sunset. Ladders required for pilot boarding.
ANCHORAGE: From Lat. 10° 20.4' N. Long. 107° 03.2' E. to Lat. 10° 21.9' N., Long. 107° 02.25' E. off Vung Tau, Can Gio estuary. Depth 12.0 m. Good holding ground. Nature of bottom mud and sand. Good shelter in N.E. monsoon.
RESTRICTIONS: Daytime entry only (0600 hrs. – 1500 hrs.). Overhead power lines cross river with 36 m. clearance. East Bend limits vessel length to 230 m.
MAX. SIZE: Length 230 m.; Beam 36 m.; Draft 9.5 m. at high water (semi-diurnal tidal regime: MHHWL +3.6 m., MWL +2.30 m.). Some vessels of 30,000 d.w.t. and 11.0 m. draft have been accepted.
HEALTH: Usual International Health Regulations have to be observed.
RADIO: Saigon Radio (XVS) 500 kHz and VHF Channel 16.
TUGS: Towage undertaken by Saigon Port Marine Enterprise. 13 tugs from 600 h.p. – 2,400 h.p.

BERTHING:

Quay	*Length* (m.)	*Depth* (m.)	*Type of Cargo*
MM1	138	8.3	Passenger, General cargo
MM2	125	6.0	General and bagged cargo
MM3	163	6.0	General and bagged cargo

K12 A	132	9.0	Ro-Ro and containers
K12 B	55	10.5	Dry bulk cargo

There are also 11 pairs of mooring buoys along the opposite side the river which can handle deeper draft vessels by barge or ligh
Lighters/barges: 30, from 150 tons – 1,200 tons available.
Sheds/Warehouses: 34 (78,620 sq.m.).
Open Storage: 56,300 sq.m.
CRANES: Floating: 35 tons and 100 tons. Mobile: 5-10 tons and 150-2 tons.
BULK HANDLING FACILITIES: Dry bulk (cement, fertilizer and whea handled by cranes, grabs, bulldozers and trimmers.
CONTAINER HANDLING FACILITIES: Feeder vessels only handled Berth K12.

2 shore cranes available.

Forklift trucks in container yard from 2 tons to 30 tons capacity.

Tractors and trailers available.

Container Yard: About 5 Ha. Max. stacking height: 3, using fork trucks.
BRIDGES: Inland road transport to/from the port: Tan Thuan Brid 12 tons and Khanh Hoi Bridge 25 tons nominal allowable truck load.
STEVEDORES: Provided by the port, 24 hour service (3 × 8 hour shift Ship's gear operators, watchmen, opening/closing hatches operat available.
MEDICAL: Hospital, dentist, doctor and chemist available.
TANKERS: *Nha Be Petroleum Terminal:* 3 berths with 7.0 m., 12.0 and 18.0 m. depth alongside respectively.

Load/discharge rate: 300 t.p.h. – 1,000 t.p.h.; Lines of 6 in., 8 in. a 10 in. diameter for handling Fuel oil, Mogas, Diesel oil, Kerosene a Lub oil.

Vegetable Oil Terminal also available.

Also see "Shipmaster's Report" dated September 1993.
DENSITY: 1005.
FRESH WATER: Supply from hydrants on quays or by barges.
FUEL: Diesel oil and fuel oil by barge or truck.
REPAIRS: Facilities only available for barges (slipway) and vehic (workshops) at locations within the port area.
SURVEYORS: Cargo surveyors: Vinacontrol.

Ship's surveyors: Vires, Branch No. 6, 22 Nguyen Hue Sreet, Ho Minh City.
CUSTOMS: Port of Entry: Vung Tau-Saigon; branch office situated Saigon Port.
HOLIDAYS: New Year's Days (Lunar: 3 days, Solar: 1 day), May (1.5 days), National Day (2 days: September 2nd and 3rd).
POLICE/AMBULANCE/FIRE: Telephone 13, 15 and 14 respectively service required from Ho Chi Minh City or call 294971, 725526 225762 respectively for Saigon Port service.
AIRPORT: Tan Son Nhut International Airport 10 km. from the port
TIME: GMT plus 7 hours.
EMERGENCY CO-ORDINATION: S.A.R. Centre of Saigon Port is ba at Harbour Office. Contact with S.A.R. Centre can be made on Channels 16 or 6.
GARBAGE DISPOSAL: Service available. Drums provided along and collected every three days. Charges U.S.$ 20/collection at wh U.S.$ 40/collection at buoy. Contact Saigon Port General Ser Enterprise. Tel: 721744, 224161. Telex: 812772 SGPORT VT. Fax 8-224168.
WASTE OIL DISPOSAL: Service available by barge or tanker Truck capacity 10 cu.m., barge capacity 100 cu.m. Charges: Tru U.S.$ 50/truck, barges up to 50 cu.m. U.S.$ 300, over 50 c U.S.$ 6/cu.m. Contact Saigon Port General Service Enterp Tel: 721744, 224161. Telex: 812772 SGPORT VT. Fax: 84-8-224
SEAMAN'S CLUBS: Seamans Club 1 & 2, mini-shop and Duty Shop. 24 hour service.
CURRENCY: Vietnamese Dong (d).
SERVICES: Telex, telephone, transport and souvenir shop.

Hotels and tourist services to International standards available short distance of about 1 km.
CLIMATE: Dry season November to April, rainy season May to Oc (average rainfall: 160 mm. – highest in July: 330 mm.), tempe 28° C, humidity: 81%, Wind: N.E. monsoon from October to Ap S.W. monsoon from May to September.
STATISTICS:

	1987	1988	1989	1990
Vessel Calls:	907	961	1,049	982
Throughput (kTons):	2,497	3,075	4,048	4,347

(Throughput of Saigon Port in 1989 amounts to about 85% throughput of all ports in Ho Chi Minh City area).

Average handling rates (tons/10,000 d.w.t. vessel per day).

Commodities:	
General cargo	551
Steel, machinery and equipment	951
Rice and agricultural products	1,640
Bulk cement and fertilizer	1,260
Cement and fertilizer in bags	1,475
Containers (TEU/8 hour shift)	70

DEVELOPMENTS: Channel dredging to 9.5 m. and alongside dredging; New container berths and new container handling facilities; Navigational aids and lighting for night navigation; Rehabilitation of existing facilities, and other improvements.

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Approaching from South, Mui Vung Tau (ex-Cap St. Jacques) observed on radar from about 15 miles with all details.

Anchorage extends from Lat. 10° 19' N., Northward to Buoy No. 2. If anchoring South of Lat. 10° 19' N., vessel will be requested to come closer in order to be boarded and cleared by Authorities.

Anchorage well protected during N.E. monsoon, no swell.

Pilot boarding ground at position Lat. 10° 20.4' N., Long. 107° 03.2' E. However, vessels are requested to enter and anchor at Vung Tau without the pilot. Pilot Station can be contacted on VHF Channels 16 and 6.

Watch on VHF Channel 16 should be maintained from 1000 hrs. – 1200 hrs. and 1400 hrs. – 1600 hrs. (local time), usually notice is given when vessel is to leave Vung Tau for proceeding up the river.

Buoy No. 1 is in position Lat. 10° 18.7' N., Long. 107° 03.8' E.

Buoy No. 2 is in position Lat. 10° 22.4' N., Long. 107° 02.7' E.

Buoy No. 3 is in position Lat. 10° 19.5' N., Long. 107° 04.1' E., but is liable to drift.

Buoy No. 7 is in position Lat. 10° 20.25' N., Long. 107° 03.8' E.

Buoy No. 8, formerly in position Lat. 10° 21.55' N., Long. 107° 02.05' E., no longer exists.

No other buoys observed in this area.

All existing buoys are unlit.

Buoy No. 2 is the Northern limit of the area where pilot not required.

Lighthouses on shore reliable and working.

Distances and bearings, taken by radar, reliable.

There are numerous fishing traps, extending from, or in the vicinity of the shore, but not obstructing navigation.

Previous information concerning the maximum size and draft is still valid.

From Vung Tau Anchorage to Saigon Port, most of the river is without any marks. Inbound or outbound ships transit the river during the day time only.

Authorities from Vung Tau board the vessel on anchoring, but only North of Lat. 10° 19' N.

There are about 5 – 6 officials, representing Immigration, Customs, Port Authorities and Port Health. In addition ship's agent and 2 port police officers board (and stay onboard for security reasons). Vessels bound for Saigon (Ho Chi Minh City), if waiting at anchorage, are also cleared by Authorities and one set of documents remains on board to be handed to Authorities in Saigon by ship's agent.

Whilst at anchor and alongside in port, crew must keep sharp lookout and keep watch duties as Port Rules require.

In addition to the numerous forms given on arrival by Authorities to be filled in, following documents are required:

Clearance from Last Port.
7 copies Crew List.
1 copy Crew Personal Effects Declaration.
1 copy Ship's Stores Declaration.
1 copy Arms and Ammunition Declaration.
1 copy Medical Narcotics Declaration.
1 copy Crew Vaccination List (if expired, crew will be revaccinated).
1 copy Foreign Currency Declaration (crew and vessel's).
6 copies Cargo Manifest.
6 copies Cargo Plan.

All ship's certificates checked by Port Authorities.

Crew Passports/Seaman's Books usually taken ashore to obtain shore passes in Saigon.

Radio room sealed, if necessary to operate, permission must be obtained from Police Officer on board.

Fresh water available by barge (250 tons) at Vung Tau on advance notice of 24 hours, and by barge (250 tons), or by pier hose connection at Saigon Port.

Fresh fruit, vegetables and any kind of food can be obtained, prices low and negotiable, medium quality.

The cargo fumigation can be performed at Saigon Port.

The ship's derating can be performed at Saigon Port.

SHIPMASTER'S REPORT: June 1993.

Vessel: 17,500 g.r.t. LOA 176 m. Arrival draft 5.40 m. Departure draft 9.60 m. Cargo: 23,750 tonnes of bagged rice.

Charts: B.A. Charts No. 1261 and 1016.

Vessel approached in ballast from South and picked-up Mui Vang Tau at 18 miles.

Anchorage extends from Lat. 10° 19' N. Northwards to Buoy No. 2. For the Port Authority to come on board, vessel is requested to come closer and North of 10° 19' N.

S.W. Monsoon had just begun, but there was no swell, although there was a fresh S.W. wind.

Pilot boarding ground at position Lat. 10° 20' N., Long. 107° 03' E. (approx.). However, vessels usually anchor well North for Port Authorities and Pilot to board. Police station keeps watch on Channels 16 and 6.

Watch is to be maintained on VHF Channel 16 all the time for the Port or the Agent to contact vessel.

Information to proceed up the river is usually given by Port and/or Agent in advance.

Buoy No. 1 is in position Lat. 10° 18.7' N., Long. 107° 03.8' E.

Buoy No. 2 is in position Lat. 10° 22.4' N., Long. 107° 02.7' E.

Buoy No. 3 is in position Lat. 10° 19.5' N., Long. 107° 04.1' E.

Buoy No. 7 is in position Lat. 10° 20.25' N., Long. 107° 03.8' E.

Buoy No. 8 was not in position.

No other buoys observed in this area.

All existing buoys were lit.

Lighthouses on the shore are reliable and working.

Distances and bearings by radar are reliable.

Visual bearings reliable.

There are numerous fishing traps extending from and in the vicinity of the shore, but do not obstruct navigation.

From Vung Tau Anchorage to Ho Chi Minh Port, most of the river is without any marks. Inbound and outbound ships transit the river during the daytime only.

Maximum outward draft permitted is 9.6 m. fresh water.

Authorities from Vung Tau board the vessel on anchorage only, North of 10° 19' N.

There are about 6 – 8 Officials representing Immigration, Customs, Port Authorities and Port Health. In addition, ship's Agent and 2 Port Police Officers board (Police stay onboard for security reasons). Vessels bound for Ho Chi Minh City are cleared by Authorities and one set of documents remains onboard to be handed over to Authorities in Saigon by ship's Agent.

While at anchor and alongside in port, crew must keep a sharp vigil and watch as Port Rules require. Anything loose (sounding rods, sounding pipe caps, heaving lines, etc.) is stolen.

In addition to numerous forms given by Authorities to be filled in, the following documents are required:

Last Port Clearance.
7 copies Crew List.
1 copy Crew Personal Effects Declaration.
1 copy Ship's Stores Declaration.
1 copy Arms and Ammunition Declaration.
1 copy Medical Narcotics Declaration.
6 copies Cargo Manifest.
6 copies Cargo Plans.

All ship's Certificates are checked by Port Authorities.

Crew Passports/Seaman's Books are taken ashore to obtain shore passes.

Shore leave is permitted from 0700 hrs. – 2300 hrs. If a crew member is late back, a heavy fine is imposed.

Radio room is sealed. If it is necessary to operate radio, permission must be obtained from the Police Officers onboard.

Fresh water is available by barge (250 tons) at Vung Tau on advance notice of 24 hours or by pier hose connection at berth.

Fresh fruit, vegetables and any kind of food is available. Prices negotiable, but of medium quality.

Diesel oil and lub oils available.

Repairs of any kind available.

Due to cheap labour, chipping and painting can be done in a very short time at a very cheap cost.

Stevedores are very efficient, fast and very cooperative. Usually load to entire satisfaction.

Cargo fumigation is performed at the port.

Derating can be performed.

SHIPMASTER'S REPORT: September 1993.

Nha Be: *Chart:* B.A. Chart No. 1016 and 1261.

General: The name "Saigon" is still widely used. Indeed, the pilot boat at Vung Tau has "Saigon Pilot" prominently displayed. It seems the individual areas are known by their present names – Nha Be / Ho Chi Minh City, whilst the general maritime district is known as Saigon.

Authorities give little trouble, and restrictions on cameras or bridge electronic equipment were not found.

Reasonable English is widely spoken, but not by pilots.

Approaches: Vung Tau (old Cape St.Jacques) is prominent and can be seen from Nha Be, some 27 miles over the flat land.

The statue of "Christ" at the Southern end of the Cape and the new racon of the lighthouse are both conspicuous.

Numerous fishing boats are encountered, and as the vessel neared Mui Vung Tau, the craft became a major hazard. We arrived near dusk with the mass of boats putting to sea. Fortunately, they tended to alter around the ship. The deep water was followed to 1 mile South of Mui Vung Tau, and then course was altered to pass South of Buoy No. 1.

Communications: VHF Channel 16 used by pilots at Vung Tau, Channel 9 used by VOSA Agent at Vung Tau, and Channel 14 used by pilots during river transit.

As we neared Vung Tau, the Agent called vessel on Channel 9 for arrival information, English was passable.

The telex numbers of VOSA (State Agent) in Ho Chi Minh City are 811257/811258.

Anchorage: The numbers on B.A. Chart No. 1016 at Vung Tau are no longer used or relevant.

The Authorities like vessels to anchor as near as possible to the new Buoy No. 3. We anchored in position Lat. 10° 20' N., Long. 107° 03.48' E., which seemed suitable to all concerned (in the middle of fishing pots). We anchored with 5 shackles and holding seemed good. A heavy swell from the West was found, vessel mainly lying North/South.

Authorities: Boarding Agent together with 8 Customs/Immigration/Police Officers boarded vessel by white launch soon after arrival at Vung Tau Anchorage, and cleared vessel.

No particular problems (See "Documents"). We had all forms already prepared in line with "Guide to Port Entry". Two Police Officers remain onboard until departure of outward pilot, so accommodation is required.

Shore passes are made out for shore leave, and are to be handed in on departure to Police Guard. There is a curfew ashore between 2300 hrs. and 0500 hrs. Boats moored and came from Harbour in Baie Des Cocotiers (10° 20.4' N., 107° 04.5' E.), all have white hull and superstructures. Authorities at Vung Tau require pilot ladder, not gangway.

Pilots: Operate in river Song Saigon between 0500 hrs. and 1900 hrs. (daylight). Passage inwards or outwards must be completed within this period, which means last transit North/South must commence no later than 1530 hrs., depending on vessel's speed. Ships of deep draft leave Vung Tau about 2 hours after low water at Vung Tau.

Transit to and from Nha Be takes 3 hours. We managed a speed of 13 knots on 7.5 m. draft, the engine being unable to take more load.

Pilots report 13 knots is about the average speed of transit. Pilots board off Baie Des Cocotiers from launch with white hulled superstructure with "Saigon Pilot" displayed.

Generally 2 pilots (Senior/Junior), but little English spoken apart from basic commands. The pilots seem very competent.

Pilot boat at Nha Be is a small fast launch.

River/Transit: Song Saigon is the only channel used to Saigon.

Normally maximum draft is 7.0 m. plus tide, which means about 10.0 m. maximum draft.

Maximum length of vessels is about 200 m., with 50 m. breadth. Normally about 30,000 d.w.t. is the largest vessel to Nha Be and Ho Chi Minh City.

The river has a 200 m. navigable width at its minimum. There is a right angled bend at Pointe de L'Est.

Few navigational marks are displayed, although what there are seem to be in good condition.

Ships pass throughout the river length. Shoreline is mainly mangrove swamp with "paddy fields" at the Northern end. Vessels awaiting berthing or daylight South transit are anchored off Pointe Phami (10° 40.8' N., 106° 46.4' E.), holding ground found to be good, we used 5 shackles.

Maximum air draft of 45.0 m. is enforced for Ho Chi Minh City due to power cables. This restriction does not apply at Nha Be.

The Cua Soirap Channel is no longer used for commercial traffic.

The depths as charted on B.A. Chart No. 1016 for Song Saigon were found to be mainly accurate with perhaps 0.5 m. to 1.0 m. greater depth. No uncharted shoals were seen on the echo sounder.

Berthing: The main petroleum berth at Nha Be is the old Shell Terminal, now called Jetty No. 4 in position Lat. 10° 41.55' N. Long. 106° 45.34' E. (corrected WGS 84). It is a typical tanker "T" jetty of concrete construction, and is in reasonable condition with good fendering. Depth alongside at C.D. was found to be 10.0 m.

Tankers up to 30,000 d.w.t. use the terminal.

Vessels are swung off the berth to head South on berthing (starboard side alongside).

Tugs: We observed 3 tugs of low power. Two tugs were used for berthing, mainly pushing. On departure, the largest tug took ship's bow line and pulled vessel off berth.

Mooring: 2 line boats used. Basically 1,2,2, each end (See "Plan"). Mooring very competently undertaken by river pilot with tugs pushing.

Berth/Discharge: An effective mooring length of 80 m. is provided by 2 mooring dolphins connected to the central jetty section by catwalks.

Pipelines come from the nearby tank farms, down the two pipe jetties to a central hose area.

All hose lifting by ship's gear with assistance of a large gang of terminal labour, 8 in. hoses used.

Two grades of product handled at same time. We discharged 3 grades of lubricating oil at an average rate of 350 t.p.h.

Grades of products handled are petrol, diesel, lubs, furnace oil and pressure LPG.

About 4 hours should be allowed for survey and sampling.

International companies are used with local partners, in particular S.G.S. and B.P. have local partnerships.

Ship's brow gangway used.

Agent: State organisation VOSA. A few telex queries before arrival were answered by satellite through Perth.

Fresh Water: Fresh water is not piped to berth, but can be obtained by barge from Ho Chi Minh City, if plenty of advance notice is given.

Chandler: State Chandler boards on arrival at berth. Fresh produce is very inexpensive, and there is a plentiful supply of good quality. We received a range of vegetables, fruit and fish, and all were good. Delivery is by launch. U.S. dollars are accepted.

Shore Leave: Granted between 0500 hrs. to 2300 hrs. with shore pass. Chandler will arrange transport to and from Ho Chi Minh City.

Gratuities: We handed out 28 cartons of cigarettes and 12 bottles of wine (no spirits on board) to Agent, Pilots, Police, Customs and Immigration at Vung Tau and Nha Be.

Documents: On arrival at Vung Tau:

Ship's papers and Crew's Seamen's Books sighted.
8 copies Crew List.
2 copies Maritime Declaration.
3 copies Vaccination List.
1 copy List of Ports of Call.
2 copies Personal Currency List.
2 copies Ship's Currency in Master's Safe.
2 copies Personal Declaration.
3 copies Stores/Bond/Canteen List.
1 copy Dangerous Cargo List.
1 copy Arms and Ammunition List (or "Negative").
1 copy Passenger List (or "Negative").
2 copies Medical Drugs (in Master's Safe).
8 copies Cargo Manifest.
1 copy Cargo Plan.

At Nha Be:

Shore passes are issued to each crew member and must be returned to Police Guard on departure.

Ship's Papers and Crew's Seamen's Books sighted.

2 copies Crew List.

Visitors/Boarders: No females or persons unconnected with the ship's business allowed on board and none seen.

Boarding Agent at Vung Tau warned me against boarders and thieves at the anchorage. We took all usual precautions (double watches, locks on all outside doors) and were not bothered.

At Nha Be a few bum boats with local tourist gifts and fruit tried sell goods, but no attempt was made to board the vessel.

AGENT'S REPORT: April 1994.

Saigon:

Location:	Lat. 10° 50' N., Long. 106° 45' E.
Pilot Station Co-ordinates:	Lat. 10° 20' N., Long. 107° 02' 30" E.
Distance from Pilot Station:	48 miles.
Pilotage:	Compulsory, daytime only.
Restrictions:	Draft: 9.5 m. LOA: 230 m. Beam: 36 m.
Tugs:	12 (600 h.p. – 2,400 h.p.).
Cranes:	3×10 ton and 15-20 ton shore crane 8×5 ton mobile cranes. 1×35 ton and 1×100 ton floating cranes.

Berths:

NGHE TINH (Ben Thuy): 18.39 N. 105.42 E.

PORT LIMITS: The seaward boundaries of Nghe Tinh Port are the Lat. 18° 50' N. in the North, the Lat. 18° 45' N. in the South and the Long. 105° 49' E. in the East.

The seaward boundaries of Nghe Tinh Port (including Ben Thuy) Gua Lo, Xuan Hai areas, in the North, East and South limited by sections from the positions 18° 50' 01" N., 105° 42' 09" E.; 18° 50' 01" N., 105° 47' 00" E.; 18° 48' 00" N., 105° 48' 00" E.; 18° 45' 04" N., 105° 46' 08" E.

DOCUMENTS: See "General" before first port.
PILOTAGE: Compulsory for entering and leaving. Pilot Station at "Zero Buoy" (Lat. 18° 48' N., Long. 105° 48' E.) for Nghe Tinh and Xuan Hai areas, depth 14.0 m., and for Gua Lo area (Lat. 18° 48' 30" N., Long. 105° 45' 12" E.), depth 10.0 m. Pilot available day and night.
ANCHORAGE: Anchorage Area: "Zero Buoy", and discharge area at position Lat. 18° 49' N., Long. 108° 45' E. (N.W. of Hon Ngu Island), depth 11.0 m.
RESTRICTIONS: Maximum draft to enter 5.0 m. Vessels exceeding 5.0 m. draft discharge cargo into self-propelled barges at discharge area (See "Anchorage"). Pilot boat may only arrive at "Zero Buoy" in conditions of weather with wind not exceeding Force 5. Pilot boards during daylight only.
MAX. SIZE: At berth, LOA 125 m., max. draft 5.0 m.
HEALTH: See "General" before first port.
RADIO: There is no radio contact with Nghe Tinh Port. Notice of Arrival messages sent via Haiphong Radio XVG or Danang Radio XVT.
VHF: Nghe Tinh Harbour Master on Channel 16 from 0800 – 1400 hrs. and 1600 – 2000 hrs. local time.
TUGS: 2 tugs, 305 h.p. each available.
BERTHING: 3 small berths in Ben Thuy area for ships with draft 4.0 m. Two berths in Cua Lo area for ships with draft 5.0 m. One berth in Xuan Hai area for ships with draft 5.0 m.
CRANES: There are 5 mobile truck cranes, capacity 3 – 60 tons.
BRIDGES: None.
STEVEDORES: Stevedores work 2 shifts. 0800 hrs. – 1800 hrs. and 1800 hrs. – 0600 hrs. with one meal interval between 1130 hrs. – 1230 hrs.
One gang average for day (24 hours).
Grain and Bulk Cargo: 300 tons.
General Cargo: 150 – 200 tons.
DENSITY: 1,000 at low tide.
MEDICAL: Doctors and hospital facilities available through Agent – Vosa at Nghe Tinh Port.
FRESH WATER/FUEL: Fresh water and fuel oils are available at Nghe Tinh.
AIRPORT: International Airport at Noi Bai, about 340 km. from the port. Vinh National Airport, 7 km. from Cua Lo port.
REPAIRS: Can be performed on request.
SURVEYORS: Cargo Surveyors: Vina Control have branch office in Nghe Tinh.
Ship Surveyors: Vires have branch office in Nghe Tinh.
EMERGENCY CO-ORDINATION: S.A.R. Centre of Nghe Tinh Port based at Harbour Office, call on VHF Channel 16.

SHIPMASTER'S REPORT: July 1982.
Location: 10 miles upstream from the entrance of the Song Ca River. Vessels exceeding 4.5 m. draft discharge cargo at anchor off the entrance to the river into self-propelled barges which transport the cargo to Nghe Tinh.
Pilot/Anchorage: Vessels anchor in position: Lat. 18° 47' N., Long. 105° 47' E. 1.5 miles S.E. of Hon Niem Island in 14 m., soft grey mud and sand. Pilot and officials board at this position. After Clearance granted, vessel shifts to discharge anchorage in position Lat. 18° 49' N., Long. 105° 45' E., 1 mile N.W. of Hon Niem Island in 10 m. This anchorage was approached by rounding Hon Niem Island to the Eastward, not less than 0.5 miles off, there is a dangerous rock awash at LW in position Lat. 18° 50.7' N., Long. 105° 46' E. It is prudent to approach the port in daylight due to the large amount of unlit fishing craft in the vicinity.
Documents/Officials:
Officials boarding with Pilot on arrival:
3 Security Officers.
2 Customs Officers.
2 Immigration Officers.
2 Quarantine Inspectors.
1 Agricultural Inspector.
1 Agent.
1 Harbour Master.
To be accommodated and victualled during stay of vessel in port:
3 Security Officers.
2 Customs Officers.
1 Agent.
Agent is the only person who speaks/understands a limited amount of English.
Documents required:
6 Crew Lists.
2 Stores Lists (deck, engine and cabin).
2 Stores Lists (provisions).
1 Health Declaration.
2 Crew Customs Declaration Lists.
2 Currency Lists (foreign monies in crew's possession).
2 Bonded Stores Lists.
4 copies Cargo Manifests.
4 copies of Bills of Lading.
2 Cargo Stowage Plans.
3 Forms (supplied) for Sextants, Binoculars, Cameras, etc.
3 Forms (supplied) for Arrival details and times.
1 Form (supplied) Report concerning where water taken during the voyage, drinking and ballast in tons and tank being used at present for drinking water.
Certificates of Registry, Radio, Load Line, Safety Equipment and Derat sighted, also Clearance from last port.

All Passports/Seamen's Identity Cards collected and taken ashore, require to see each crew member and compare with Passport photo. Discharge Books were not required. All Vaccination Certificates sighted and returned. Inspection of all crew cabins and each crew member's foreign money counted at the same time.
Restrictions: Main switch for Radio Transmitter/Receiver sealed.

All Cameras sealed. Bond and beer lockers sealed. (Release of bonded stores available at any time from Customs Officers on board).
General: There is no Radio or VHF contact with Nghe Tinh. ETA/Health messages, etc, via Haiphong Radio XVG to VOSA Haiphong.

No fresh water or oil fuels are available at the anchorages off Nghe Tinh.

Limited quantities of fruit and vegetables are available when in season. There are no facilities for sending or receiving mail.

Draft survey is carried out at commencement and completion of cargo, 3 surveyors attend from Hanoi, a journey of approximately 10 hours by road.

Bulk cargoes are discharged by ship's gear using shore grabs (which are in poor condition) each grab capacity approximately 1.5 tons (bulk wheat) also burlap savealls, sewn on to cargo nets are used.

Cargo loaded into self propelled barges, each carrying 40/50 tons bulk grain, approximately 20 barges are available when none are under repair, which is quite frequent, journey to discharge wharf takes 3 hours, 6 hours to discharge and 3 hours to return to the ship.

Stevedores work two shifts 0600 – 1800 hrs. and 1800 – 0600 hrs. with one meal interval between 1130 – 1230 hrs.

1 gang's average discharge per day (24 hours) 250/350 tons.

MEDICAL: Hospital and dental facilities are available. Inoculations vaccinations can be carried out. Vaccination/Fever Certificates available.
DENSITY: Between 1009 and 1017, according to tidal stream.
FRESH WATER: Available. Supplied from barge by Quan Shipchandler.
FUEL: Fuel oil and diesel oil can be supplied by barges.
FIRE PRECAUTIONS: Ship-to-ship cargo oil transhipment not al
CONSULS: None.
REPAIRS: Can be performed on request.
DRY DOCKS: Available at Pharung Shipyard for 10,000 d.w Halong Shipyard for 5,000 d.w.t.

SURVEYORS: Arranged by Agent.
Cargo Surveyor: Vinacontrol, Quangninh Branch.
Ship's Surveyor: Vires, Branch No. 15.
GANGWAY/DECK WATCHMEN: Compulsory. Carried out by Campha Port Border Guard Station.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: Cigarettes: 400 cigarettes per person.
Alcoholic drink: Over 22°: 1.5 litres. Under 22°: 2.0 litres per person.
REPATRIATION: Available through Agent.
AIRPORT: Scheduled services by Vietnam Airline and Pacific Airline are daily from 2 airports:
Noibai Airport, about 230 km. from port.
Catbi Airport, about 100 km. from port.
TIME: GMT plus 7 hours.
HOLIDAYS: New Year's Day (1st January); Lunar New Year Festival "Tet", 4 days (The last day and the first 3 days of the lunar year); Victory Day (30th April); International Labour Day (1st May); National Day (2nd September).
POLICE/AMBULANCE/FIRE: Police Tel: 113; Ambulance Tel: 115; Fire Department Tel: 114.
SERVICES: Supply of charts, safety equipment, compass adjusting, radio and radar repairs, extention of certificates available through ship's Agent or Shipchandler.
BANKS:
Trade Bank. Tel: 84.33.865021. Fax: 84.33.863101.
Development-Investment Bank. Tel: 84.33.862267.
STORING: The port is for exporting coal only. Open storage of 22,600 sq.m. Warehousing storage in port not available.
SHORE LEAVE: Crew allowed to go ashore.
EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Office on VHF Channel 16.
GARBAGE DISPOSAL: Available. Tel: 84.33.846478.
Charges: At anchor: U.S.$60.0/one time. At berth: U.S.$30.0/one time.
Times: For cargo ship: One visit every 2 days. For passenger ship: One visit a day.
SEAMAN'S CLUBS: Available.
CURRENCY: Vietnam Dong. U.S.$1.00 = 11,000 VND (July 1996).
AUTHORITY: Port Authority of Quangninh, Campha Branch, Cuaong Precinct, Campha Town, Quangninh Province, Socialist Republic of Vietnam. *Tel:* 84.33.865041. *FAX:* 84.33.865142.

(B) HON GAY PORT

PORT LIMITS: Pilot station at channel entrance (Honcam Island).
DOCUMENT: See Part (A).
PILOTAGE: Compulsory. Pilot provided by Pilotage Company of Zone No. 3, No. 33 Le Thanh Tong Street, Halong City, Quangninh Province. Tel: 84.33.825386. Fax: 84.33.826655.
Pilot station at Lat. 20° 43.4' N., Long. 107° 10.3' E. No draft restriction from pilot station.
Pilot Station for bad weather at Lat. 20° 49' N., Long. 107° 08.1' E.
Request for Pilot must be made to the Pilots at least 8 hours in advance.
ANCHORAGES:
For LASH:
Anchorage No. 1: Lat. 20° 49' N., Long. 107° 07.1' E.
For cargo ships of over 2,000 d.w.t. at transhipment:
Anchorage No. 2: Lat. 20° 56.2' N., Long. 107° 04' E.
Anchorage No. 3: Lat. 20° 56.3' N., Long. 107° 03.9' E.
Anchorage No. 4: Lat. 20° 56.5' N., Long. 107° 03.9' E.
Anchorage No. 5: Lat. 20° 56.6' N., Long. 107° 03.8' E.
Anchorage No. 6: Lat. 20° 56.8' N., Long. 107° 03.8' E.
Anchorage No. 7: Lat. 20° 57' N., Long. 107° 03.7' E.
For ships or tankers with dangerous cargoes:
Anchorage No. 8: Lat. 20° 52' 15" N., Long. 107° 05' 00" E.
Anchorage No. 9: Lat. 20° 52' 15" N., Long. 107° 04' 30" E.
For tankers waiting for berth:
Anchorage No. 10: Lat. 20° 51.6' N., Long. 107° 07.1' E.
Anchorage No. 11: Lat. 20° 51.4' N., Long. 107° 07.3' E.
For passenger vessels anchoring:
Anchorage No. 12: Lat. 21° 56' 02" N., Long. 107° 03' 42" E.
Further positions subject to consideration of Port Control Department. Sheltered places from bad weather advised by Port Control.
RESTRICTIONS: The main channel to reach Hongai is marked by 7 pairs of buoys and is dredged to 8.1 m. at low tide, width 80 m. at the bottom and width 110 m. on the surface of channel. Distance from pilot station to Inner Harbour is about 18 miles.
High voltage lines at the entrance to Tanker Buoys and to Cailan Port, clearance is 43.0 m. CD.
MAX. SIZE: *Coal Berth:* One pier of length 120 m. for ship with draft up to 8.5 m. and less than 12,500 d.w.t.
Oil Tanker Buoys (B12 Port): For tanker of 20,000 d.w.t., depth 11.2 m.
General Cargo Berth (Cailan Port): Length 166 m., draft 8.6 m. for ship of 10,000 d.w.t.
HEALTH: Quarantine station is the same as pilot station. Pratique is automatic for vessel after calling at another Vietnamese port.
RADIO: See Part (A).
VHF: Channel 16.
RADAR: Port radar service and Vessel Traffic Management Service (VTS) not available.
TUGS: 1×1,800 h.p., 1×1,200 h.p. and 1×305 h.p.
BERTHING: See "Max. Size".
CARGO HANDLING FACILITIES: *Hongay Coal Berth:* 2×7.2 ton shore cranes, working rate 250 t.p.h.
Cailan Port (For General Cargo): 1×40 tons, 4×14 tons mobile cranes. 1×3 ton forklift and others of 6.5 tons.
Storage: Warehousing at Cailan Port: 29,000 sq.m.
Open storage (coal): 6,600 sq.m.

STEVEDORES:
Quangninh Port: Tel: 84.33.826516. Fax: 84.33.826118.
Quangninh Transport and Stevedoring Co.: Tel: 84.33.825750.
Campha Transport and Material and Stevedoring Co.: Tel: 84.33.862381. Fax: 84.33.862908.
MEDICAL: Hospital and dental facilities are available. Inoculations and vaccinations can be carried out. Vaccination/Fever Certificates are available.
TANKERS: 6 hoses of 219 cm. Pressure 12 kg./sq.cm. Pumping rate 12,000 cu.m./day. Storage 70,000 cu.m.
Also see "Max. Size".
DENSITY: 1009 – 1017, according to tidal stream.
FRESH WATER: Available.
FUEL: Fuel oil and diesel oil can be supplied by barge.
FIRE PRECAUTIONS: Ship-to-ship oil transhipment not allowed.
CONSULS: None.
REPAIRS: Can be performed on request.
DRY DOCKS: Available at Pharung Shipyard for 10,000 d.w.t. and Halong Shipyard for 5,000 d.w.t.
SURVEYORS: See Part (A).
GANGWAY/DECK WATCHMEN: Compulsory. Carried out by Campha Port Border Guard Station.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: See Part (A).
REPATRIATION: Available through Agent.
AIRPORT: Scheduled services by Vietnam Airline and Pacific Airline daily from 2 airports:
Noibai Airport, about 190 km. from port.
Catbi Airport, about 70 km. from port.
TIME: GMT plus 7 hours.
HOLIDAYS: Same as other ports in Vietnam.
POLICE/AMBULANCE/FIRE: Police Tel: 113; Ambulance Tel: 115; Fire Department Tel: 114.
SERVICES: Many services available through ship's Agent or Shipchandler.
BANKS:
Baichay Trade Bank. Tel: 84.33.846560.
Quangninh Trade Bank. Tel: 84.33.825713.
Investment Bank. Tel: 84.33.825502. Fax: 84.33.828426.
Quangninh Maritime Bank. Tel: 84.33.826174. Fax: 84.33.826176.
Foreign Trade Bank. Tel: 84.33.825737. Fax: 84.33.827206.
State Bank. Tel: 84.33.825597. Fax: 84.33.827609.
SHORE LEAVE: Crew allowed ashore.
EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Office on VHF Channel 16.
GARBAGE DISPOSAL: Available (See Part (A)).
SEAMAN'S CLUBS: Available.
CURRENCY: Vietnam Dong. U.S.$1.00 = 11,000 VND (July 1996).

SHIP'S OFFICER'S REPORT: July 1986.
Pilotage: Compulsory. Pilot will board at Pilot Station between 0600 hrs. and 1800 hrs. (daylight hours). Pilot will bring vessel to either Quarantine Anchorage or Inner Harbour, via Vung Ha Long Buoyed Channel, for Customs and Immigration clearance.
Pilot Station: Lat. 20° 44.2' N., Long. 107° 10.5' E.
Anchorages:
Quarantine Anchorage: Lat. 20° 52.2' N., Long. 107° 06.2' E.
Inner Harbour Anchorage: 0.8 miles S.S.W. off Hon Gay.
Restrictions: 1. Transit from Pilot Station to Quarantine Anchorage in daylight hours only.
2. Vung Ha Long Buoyed Channel dredged to 7.0 m. Draft restriction according to tides. Approximate max. draft 10.0 m.
3. Height restriction through Cua Lu to tanker berth 39.0 m. (air draft) at Chart Datum.
Radio/VHF: Hon Gay Pilot and Vosa Hon Gay (Agent) on VHF Channel 16.
Tankers: Tanker berth in position Lat. 20° 58.0' N., Long. 107° 03.7' E. Vessel tied up to buoys and discharged via flexible hose of 6 in. Vessel can expect delays. Average discharge rate 180 t.p.h.
Density: Between 1009 and 1017, according to tidal stream.
Agent: Vosa is sole government Agent. Agent acts as interpreter.

SHIPMASTER'S REPORT: September 1988.
Hon Gay: Radio contact direct through Haiphong (XVG) is possible for sending cables, but working hours are unreliable.

Not a single cable was acknowledged by Vosa Agent at Hon Gay. However queries were received from Vosa Haiphong via Haiphong Radio.

VHF contact after arrival was also difficult, due to frequent electricity shutdown in Hon Gay.

No draft restriction from Pilot Station (Lat. 20° 44.12' N., Long. 107° 10.3' E.) to Lightering Anchorage (Lat. 20°50.3' N., Long. 107° 07.7' E.).

The main channel to reach Hon Gay is marked by 10 unlit buoys and dredged up to 6.3 m. at low water. When crossing the channel with 9.0 m. draft and 3.3 m. of high tide, the echo sounder indicated a clearance of 2.0 m.

All movements in the channel during daytime.

The Sea Berth is just after passing the electricity high tension overhead cables. Air draft required to pass under the high tension cables with high tide of 3.3 m. was 33 m.

Mooring and unmooring during daylight hours and during slack water. One tug available for mooring and unmooring.

Sea Berth consists of 5 buoys (3 forward and 2 aft). The hoses are rigged on the port side, we were given 2×6 in. hoses for discharging Gas Oil. The rate of discharging was 200 tonnes per line per hour. Shore capacity is around 15,000 tonnes.

Shore start/stop of cargo operations is by flag signals during daytime and by light signals during night time. During rain and blackout at night time, the signal arrangement is inadequate and unreliable.

During the stay at Sea Berth, lightering is allowed.

At all times, 3 policemen reside onboard. Accommodation and meals are to be supplied.

Fresh water is available.

Shipchandler service is minimal. Most essentials out of stock or out of season.

SHIPMASTER'S REPORT: February 1993.

Hon Gay: Vessel: 26,200 d.w.t. Draft 9.5 m. fore and aft. LOA 170 m. Airdraft 33 m. Vessel discharged a cargo of gas oil.

Vessel made contact by VHF Channel 16 one hour prior to arrival.

Two pilots boarded in position Lat. 20° 44.2' N., Long. 107° 10.2' E. The pilots spoke good English and very experienced.

The main channel to Hon Gay is marked by 5 pairs of numbered light buoys (System "A"). The channel depth was 6.6 m. at low water and 9.9 m. at high water. There is a strong current running across the channel. The channel bottom is mud (no rocks). The vessel's speed in the channel was 5-6 knots.

As the high tension cables were situated before the discharge berth, we anchored in the inner roads to await low water. Clearance at low water is 36 m. and at high water 32 m.

On berthing, we dropped port anchor to 1.5 shackles in water. Six ropes were sent to three mooring buoys forward and four ropes were sent to two mooring buoys aft, by mooring boat.

The cargo of gas oil was discharged to the account of "Petrolimex".

Maximum rate of discharge was 350 cu.m./hr. During discharge, two representatives of the consignees stayed on board and they were in VHF contact with the terminal.

Fresh water is available by barge.

Two small tugs assist with unmooring by swinging the ship to starboard towards the entrance.

AGENT'S REPORT: April 1994.

Location:	Lat. 20° 57' N., Long. 107° 10' E.
Pilot Station Co-ordinates:	Lat. 20° 43' 04" N., Long. 107° 10' 03" E. (L'Orange Island)
Distance from Pilot Station:	18 miles.
Pilotage:	Compulsory, day and night.
Restrictions:	Draft: 6.6 m. (channel) 8.2 m. (berth) LOA: 170 m. Air draft: 33 m.
Tugs:	1×350 h.p., 1×600 h.p. and 1×1,000 h.p.
Berth:	Quay No. 1: Length 120 m. Depth 8.2 m. Cargo: Bulk, coal.
Mooring Buoys:	5 (for tankers) with depth 9.5 m.
Open Storage:	42,000 sq.m.
Barges (for lighterage):	50×200 tons.
Cranes:	2×5 ton shore cranes.

AUTHORITY: Port Authority of Quangninh, 10 Le Thanh Tong Street, Halong City, Quangninh Province, Socialist Republic of Vietnam. *Tel:* 84.33.823070, 84.33.823071. *FAX:* 84.33.826137. *Contact:* Nguyen Viet Dung, Vice Director.

QUY NHON: 13.46 N. 109.14 E.

DOCUMENTS: See "General" before first port. Additional copies of documents may be required.

PILOTAGE: Compulsory. Pilot boards on correct arrival time at "Zero Buoy" (Lat. 13° 44' 19" N., Long. 109° 15' 16" E.). During bad weather Harbour Master will advise by VHF the anchorage position where Pilot may board in safety.

RESTRICTIONS: Pilot boards during daylight only.

ANCHORAGE: In "Zero Buoy" area with max. depth 10.00 m. If draft exceeds 9.00 m. vessels anchor in the Southern port limits.

MAX. SIZE: LOA 180 m. Draft 7.5 m.

HEALTH: See "General" before first port.

RADIO: Contact Quy Nhon Radio, call sign XVH.

VHF: Harbour Master on watch: 0630 – 1100 hrs. and 1330 – 1700 hrs. on Channel 16.

TUGS: 1×800 h.p. and 1×980 h.p.

BERTHING: Two quays with length 350 m., depth 7.5 m. (low tide) available.

CRANES: 5 shore cranes with capacities 15 tons, 12 tons, 10 tons and 2 shore cranes of 8 tons and 40 tons available.

BRIDGES: None.

STEVEDORES: Stevedores work 3 shifts: 0600 hrs. – 1400 hrs., 1400 hrs. – 2200 hrs. and 2200 hrs. – 0600 hrs.

TANKERS: One floating pier for tankers with max. draft 9.0 m. Pipes and hoses of diameter 200 mm. and 159 mm. (6 in.).

DENSITY: 1020.

FRESH WATER: Available at berth.

FUEL: Lube oil and diesel oil available. Fuel oil presently available.

FIRE PRECAUTIONS: Tanker regulations apply and fire service available on wharf.

REPAIRS: Machine shop in port. Minor repairs possible.

DRY DOCKS: 500 tons capacity for small ship construction.

SURVEYORS: Cargo surveyors: Vinacontrol, branch office at 228 Tran Hung Dao Street, Quy Nhon City.

Ship surveyors: Vires, branch at Quy Nhon Port.

AIRPORT: Pha Chat Airport 35 km. from port. Local flights or International flights from Tan Son Nhat Airport of Ho Chi Minh City Noi Bai Airport of Hanoi City.

POLICE/AMBULANCE/FIRE: Contact via Harbour Office or Vo Quy Nhon on VHF Channel 16.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Quy Nhon P based at Harbour Office. Contact S.A.R. Centre on VHF Channel 16

AGENT'S REPORT: April 1994.

Location:	Lat. 13° 44' N., Long. 109° 03' E.
Pilot Station Co-ordinates:	Lat. 13° 44' 03" N., Long. 109° 16' 03" E.
Distance from Pilot Station:	5 miles.
Pilotage:	Compulsory and daytime only.
Restrictions:	
Channel (Width 300 m.)	Depth: 9.5 m. Length 5 miles.
Pier	Depth: 7.0 m. Length 340 m.
Tugs:	1×980 h.p. and 1×600 h.p.
Berth:	Quay No. 1: Length 340 m. Depth: 7.0 m. General cargo.
Sheds/Warehouses:	7,000 sq.m.
Open Storage:	150,000 sq.m.
Container Yard:	100,000 sq.m.
Barges (for lighterage):	2×600 tons.
Cranes:	6 (5 – 40 tons). No floating cranes available.

AUTHORITY: Quy Nhon Harbour Office. *Tel:* 2221.

VAN PHONG BAY: 12.31 N. 109.23 E. (See Pla

LOCATION: Van Phong Bay is ideally located to serve the entire reg with the following advantages being immediately obvious:

Centrally located to main trading ports in the region, and requir minimal diversion from main trading routes between Singapore and ports to the North East, relevant distances from the Bay as follows:

Singapore	770 miles
Hong Kong	675 miles
Manila	675 miles
Bangkok	820 miles
Kaoshiung	875 miles

Although the service is initially to serve vessels and cargoes destin or originating from ports outside Vietnam, below are the distances fr domestic Vietnamese ports:

Hanoi	560 miles
Ho Chi Minh (Vungtau)	210 miles

DOCUMENTS: On arrival, the vessel will be boarded by the nomina Agents, Mooring Master, Port Authorities (Health, Immigration, Custo Pilots, Environmental Department and Police) and Inspection Compa personnel, if applicable (Total 12 person).

Following documentation will be required:

1 copy Last Port Clearance.
2 copies Crew Manifest (Personal).
2 copies Cargo Manifest (Arrival).
2 copies Cargo Manifest (Departure).
7 copies Crew List (Arrival).
4 copies Crew List (Departure).
4 copies Arrival Declaration (Format provided by Agent on arriva
4 copies Departure Declaration (Format provided by Agent on arri
2 copies Vessel Provisions Declaration (Format provided by Agen arrival).
1 copy Health Declaration (Arrival) (Format provided by Agen arrival).
1 copy Health Declaration (Departure) (Format provided by Agen arrival).
Vessel Stores Declaration (Format provided by Agent on Arriv covers all items in Stores – Deck/Engine (Bunkers, etc.)/Bon Provisions).
Declaration Radio Equipment/Arms/Cameras, etc.

Following vessel documents will require to be sighted by Authoriti

Nationality Certificate.
Classification Certificates.
International Load Line Certificate.
International Tonnage Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
International Oil Pollution Prevention Certificate.
Oil Pollution Insurance Certificates.
Oil Record Books (Engine/Deck).
Derat Certificate.
Minimum Safe Manning Certificate.
Professional Certificates, all Officers and Crew.
Passports/Seaman's Cards and Health Certificates of all st board.

Any of the above Certificates which are removed by Agent w subject to issuance of receipt. Documentation is returned prior to ve departure.

PILOTAGE: The pilot station is at a position just outside the en to the Bay, the following position being nominated:

Lat. 12° 30.45' N., Long. 109° 23.15' E.

Use of the Vietnamese Pilotage Services is compulsory for all v using the Bay. However, for the vessels using the STS faciliti following regime will be followed:

Mother Vessels (and Daughter Vessels where no ready berth is available alongside the Mother Vessel) will be piloted into the nominated anchorage by the Vietnamese Pilots.

In the event that a berth alongside the Mother Vessel is available immediately, then Daughter Vessels will be met at the pilot station by the Van Phong Bay Petrotech Mooring Master, who will also be accompanied by the attending tug with fenders and hoses.

The Daughter Vessel, once all entry formalities have been completed and the equipment has been deployed, will be piloted alongside by the Mooring Master, who will also be advised by the Vietnamese Pilot Service where appropriate on navigational matters within the Bay itself.

The Vietnamese Pilotage Service is operated out of Nha Trang port, some 25 miles South of the Bay. However for each operation, Pilots will be based at Hon Khoi port.

Vessels approaching the Bay should call "Hon Khoi Pilots" on VHF Channel 16 when within range, to obtain latest information.

Normally vessels will only be berthed alongside during daylight hours, unberthing operations at any time.

All berthing and unberthing operations will be in strict compliance with the latest edition of the Oil Companies International Marine Forum publication, Ship-to-Ship Transfer Guide (Petroleum).

Mooring Master will remain on board the Daughter Vessel throughout any operation.

ANCHORAGES: Three anchorages have been nominated within the Bay for the Ship-to-Ship operations, with one further anchorage being nominated just at the entrance to the Bay for larger vessels.

These anchorages are as follows:

Position A:	2.5 miles diameter circle centred upon Lat. 12° 34.00' N., Long. 109° 19.20' E. Minimum depth in this area is 21.5 m.
Position B:	2.5 miles diameter circle centred upon Lat. 12° 31.20' N., Long. 109° 18.00' E. Minimum depth in this area is 21.8 m.
Position C:	2.5 miles diameter circle centred upon Lat. 12° 32.50' N., Long. 109° 21.80' E. Minimum depth in this area is 22.5 m.
Position D:	2.5 miles diameter circle centred upon Lat. 12° 30.80' N., Long. 109° 25.60' E. Minimum depth in this area is 34.5 m.

RESTRICTIONS: Berthing in daylight only, unberthing at any time.

RADIO/VHF: Initial communications will be through Petrotech Office in Singapore (See "Operator"). When vessel is within 48 hours of arrival, then all communications will be to the following:

Van Phong Bay Petrotech.
Copy to MACS (Agents), Ho Chi Minh City.
Copy to VIFRASAL, Ho Chi Minh City.
} See "VHF"

ETA advice is to be passed to above parties at 48 hours, 24 hours, 12 hours and 6 hours prior to arrival. Vessels to contact Hon Khoi Pilots on VHF Channel 16 when within 2 hours of arrival.

All vessels to provide following information via telex/fax 48 hours prior to arrival to Van Phong Bay Petrotech:

1. Name / Port of Registry / Flag.
2. Deadweight / NRT / GRT.
3. Total number on Crew List.
4. Confirmation of Anti-Polluton Insurance Cover (TOVALOP or equivalent).
5. Arrival / Departure drafts.
6. Parallel Body Length (Arrival and Departure).
7. Freeboard (Arrival and Departure).
8. Vessel can accept our transfer hoses, which are either 10 in. or 8 in.
9. Cargo Description (Crude, etc.).
10. Total Cargo on board.
11. Total Cargo amount due to Transfer.
12. Nationality of Senior Officers.
13. Confirmation that all Trading Certificates are valid.

We confirm that the Vietnamese Authorities have no restriction upon flag and nationality of vessels using service, subject to being fully "classed" at time of call.

Pre-Fixture Information – Check List 1:

Mooring Master . . . . .
Vessel Name . . . . .
Operator . . . . .
Charterer . . . . .

Operator's Comments
Confirmation

1. Is centre of cargo manifold arrangement 3.0 m. or less either forward or aft of mid length position?
2. Is centre of cargo manifold at least 0.9 m. above deck, or working platform if fitted?
3. Is the height of the centre of cargo manifold no greater than 2.1 m. above the deck?
4. What is the horizontal spacing between manifold connections, measured centre to centre?
5. Is the ship fitted with a hose support rail at the ship's side, constructed of curved plate or piping, having a diameter of not less than 200 mm.?
6. If a hose support rail is fitted, is this at least 700 mm. below centre of cargo manifold?
7. Is the ship able to present 2×400 mm. manifold connections?
8. Is ship equipped with sufficient enclosed type fairleads on both sides to receive head lines, stern lines and backsprings from the other ship?
9. If the answer to Q8 is 'Yes', are the fairleads, which will receive the other ship's backsprings positioned not more than 35 m. aft of the midships position?
10. Are there bitts of sufficient strength and suitably located inboard of enclosed fairleads to receive eyes of mooring ropes?
11. Are both sides clear of any overhanging projections?

For Operator:
Position:
Signature

VHF: Communication Systems: Vietnamese Regulations normally require that your vessel's radio station be shut-down during the vessel's stay. However, Petrotech shall arrange for your communication system to be available for essential communications whenever you so advise Petrotech staff.

For safety reasons, it should be noted that the OCIMF only permit outside communications via satellite communication systems, traditional type radio stations should therefore by shut-down and isolated during any cargo transfer operations.

Use of portable UHF/VHF radio sets is permitted for cargo operations and for inter-ship communications.

Contacts: The mobile telephone system is not yet operational in the Bay, and therefore communications with shore facilities are limited to VHF to the Agent's office in Hon Khoi, radio calls via the local radio station and satellite communication systems.

The local Harbour Master's office in Hon Khoi may receive via VHF, however some difficulties have been experienced in the past with the message strength when they reply to vessels in the Bay.

Both the Agent's and the Harbour Master's offices in Hon Khoi are connected into the Vietnamese telephone systems from where calls can be made to any destination.

Agent: Agent for the Bay is exclusively MACS who maintain offices in Hon Khoi, Nha Trang and Ho Chi Minh City.

Hon Khoi:	Contact via VHF.
Nha Trang:	Tel/Fax: (84) 58 81133.
Ho Chi Minh City:	Tel: (84) 8 243215. Fax: (84) 8 244107. Telex: 811220 MACS VT.

Anti Pollution: This is provided by VIFRASAL, who own the tug which is attending the operation, local coverage therefore via the tug, direct contact to VIFRASAL head office in Ho Chi Minh City.

Initial Contact:	Contact tug by VHF.
Ho Chi Minh City:	Tel: (84) 8 231421/425. Fax: (84) 8 231430. Telex: 811281 VSAL VT.
24 Hours: (Mr. Bruno Forestier)	Mobile (84) 9 081934. Residence (84) 8 291079.

Petrotech: The attending Mooring Master will be on board one of the vessels involved at all times, other contact numbers as follows:

Ho Chi Minh City:	Via VIFRASAL.
24 Hours:	Mobile (84) 9 091331.
Singapore:	Tel: (65) 568 2390. Fax: (65) 568 2531. Telex: 51297 PTECH RS.
24 Hours:	Residence (65) 872 5651. Residence (65) 466 1826.

TUGS: 1×2,360 h.p. tug.

BERTHING: *STS Service:* The service has been arranged in such a manner as to minimise any problems for the clients, with the basic outline being as follows:

All commercial, financial and logistical dealings will be via the Van Phong Bay Petrotech offices in Singapore. No direct negotiations or arrangements are required to be instigated by any client with any Vietnamese party.

The following matters are covered by Van Phong Bay Petrotech within the terms of business:

(a) Arrangement of Mooring Master, fenders, hoses and associated equipment required for the actual STS operation;

(b) Arrangement of attending tug complete with firefighting and anti-pollution equipment throughout the operation;

(c) Appointment, attendance and payment of Agency Services (only one agency company is licensed to operate in Van Phong Bay for the STS operations);

Agency Services include the following:
- Attendance and payment for Pilotage Services;
- Inwards and Outwards Port Clearance;
- Attendance Port Authority, Customs, Port Health, Immigration, Police, etc.;
- Payment of all Port Dues;

(d) Appointment, attendance of and payment to Independent Inspection company, this company can, within certain parameters (mainly availability of companies within Vietnam) be selected by the client. Inspection service is limited to quantity aspects only and is compulsory. In the event that client does not select, then SGS of Vietnam will be appointed.

Ship-to-Ship Transfer Operation Criteria: The operation will be carried out in strict compliance with the guidelines laid down in the current edition of the OCIMF publication "Ship-to-Ship Transfer Guide", current edition published January 1988.

An essential part of this criteria is the completion of the check lists contained within the publication (See Check List 1 above in "Radio" – the others are not reproduced).

Petrotech attending staff will require your cooperation in completing their copies of these check lists and you or your nominated staff signatures at each stage of the operation.

Petrotech Equipment/Ship's Personnel: Petrotech shall be supplying sufficient equipment which will consist of all or some of the following:

(a) Sufficient number of 6.5 m. × 3.3 m. Yokohama type floating fenders which will be moored alongside either your vessel or the other participating vessel prior to the berthing operation.

These fenders are equipped with sufficient length 32 mm. wire rope moorings to reach your deck – if appropriate, your staff assistance will be required for positioning and securing these fenders alongside prior to the operation, and demobilisation of the equipment on completion.

A member of Petrotech staff will be in attendance to advise on these operations.

(b) Sufficient number of either 8 in. or 10 in. diameter flexible hoses, complete with blank flanges, nuts, bolts and gaskets.

These will be supplied in either 20 ft., 30 ft. or 40 ft. lengths, dependent upon the situation, and your staff assistance will be required in lifting these from the deck of the attending tug, securing of these individual lengths into sufficient length 'strings' for your operation and connection to your vessel manifold.

Your staff assistance will also be required on completion with the derigging and return of this equipment to the attending tug.

Petrotech Personnel: During the stay of your vessel at the facility, Petrotech will necessarily require some limited accommodation and service facilities from your vessel.

Our Mooring/Safety Master will remain on board the Daughter Vessel throughout the operation.

One assistant may also be attending on board throughout the operation, whilst he will require accommodation he is not limited as to which vessel this would be on.

Port Authority and Inspection Personnel: So far as we are advised, accommodation may be required throughout the operation for 6 staff, namely 2 police representatives, 2 Customs representatives and 2 Independent Inspection personnel.

These personnel would almost certainly require to be based upon the Mother Vessel, with one of each transferring to the Daughter Vessel when an operation is being carried out.

BALLAST: Owners of vessels calling Van Phong Bay are advised that any sea water ballast which is due for discharge into the Bay during the operation will be checked for cleanliness, and samples will be taken. In cases where vessels have ballasted at river berths, then this ballast MUST HAVE been replaced by ballast taken a minimum of 12 miles from any coastline prior to arrival of the vessel in Van Phong Bay.

MEDICAL: Some medical facilities are available in Nha Trang which is accessed via road from Hon Khoi Port in the Bay (approximately 1 hour), with more comprehensive facilities available in Ho Chi Minh City, which is approximately 12 hours by road or one hour's travel time by air.

Should you require medical facilities during your vessel's stay, please contact Petrotech for assistance.

FRESH WATER/FUEL: Not available in the Bay, but some limited supplies *may* be available if vessel calls off Nha Trang.

AIRPORT: There is a domestic airport at Nha Trang with daily connections to Hanoi and Ho Chi Minh City, from where most international destinations can be accessed.

REPATRIATION: Repatriation of crew members, whilst being possible, is difficult due to the visa requirements and, unless absolutely essential, is not recommended at the present time.

SHORE LEAVE: Not permitted at present.

POLLUTION: *Anti-Pollution Measures:* Petrotech attending safety vessel has the following anti-pollution equipment on board which is immediately available for any pollution incident:

Dispersant which is approved by the Vietnamese Authorities in the Bay;
Spray booms for distribution of dispersant;
Floating barrier ofsufficient length to reach from the sterns of both vessels;
Oil skimmer for removing oil from surface of water.

In addition to the above, further supplies of dispersant are stored at Hon Khoi, which can be made available in the Bay within a very short time frame.

Sufficient dispersant is available in the Bay to enable Petrotech resources to immediately operate anti-pollution activities for 12 hours.

If required, Petrotech have also arranged ready access to further resources from Vung Tau, within 12 hours by road, alternatively these resources can be airfreighted into Nha Trang.

If necessary, further resources based out of Singapore can be called upon.

Notwithstanding the above, obviously a key part of any anti-pollution measures would be that played by your vessel, and to this end Petrotech request that you ensure that the full range of any anti-pollution equipment which you may have onboard be available at immediate notice.

Please note however that your staff should be advised not to commence spraying with any dispersant which you may have on board until Petrotech attending staff so request.

Please also refer to the contingency plans which are attached to this document for further guidance (not reproduced).

In the event of your staff observing any pollution incident, then regardless of the source, all cargo operations must cease immediately and preparations be made for disconnection.

GENERAL: *Organisations involved in STS Service:*

1. Van Phong Bay Petrotech Pte.Ltd.: A sister company of 'Petrotech Marine Consultants Pte.Ltd.', which has been incorporated in Singapore to handle all operational matters regarding Van Phong Bay.

2. Petrotech Marine Consultants Pte. Ltd. (See "Operator"): Incorporated in Singapore in 1990 specialising in tankers and their operational problems and requirements.

The Managing Director has considerable practical and busin experience in Ship-to-Ship transfers of petroleum cargoes, hav carried out operations worldwide on numerous occasions.

Since incorporation in Singapore, numerous Ship-to-Ship operati have been carried out both in the Singapore straits, off Hong Kong a off Taiwan for various clients by the company.

Petrotech also have in house another extremely experienced S Mooring Master.

Either one of these personnel will attend as Mooring Master for operations in Van Phong Bay.

3. MACS Ho Chi Minh City: A department of the Vietnam Natio Maritime Bureau, who are responsible to the Vietnamese Governm for all Marine matters in Vietnam.

MACS are also licensed ship Agents and have offices in Ho Chi M City and Nha Trang carrying out this service.

4. VIFRASAL: A joint venture organisation providing tugs, salvage a anti-pollution services in Vietnam.

Head office in Ho Chi Minh City with one tug being dedicated to V Phong Bay operations.

Costs: The costs for utilising the service are 'split' into two headin namely:

STS Service Costs: This cost element is that usually attributable to cargo interests and covers the following aspects of the operation:

Provision of all STS equipment and associated personnel, specifica
Fendering and running gear;
Transfer hoses, gaskets and associated equipment;
Mooring/Safety Master;
Attending tug for berthing, unberthing and stand-by duties, compl with firefighting capability and anti-pollution equipment;
Back up anti-pollution equipment stored in Hon Khoi;
Independent Inspection company attendance.

This element of the cost is dependent upon the number of Daugh Vessels which are associated with any one Mother Vessel, and as 1st January 1996, the following prices are applicable:

No. of Daughter Vessels	1	2	3	4
Free Time allowed (hrs.) *	36	60	108	132
Cost (U.S.$)	29,000	38,500	57,500	67,00

* Free Time is allowed to clients under above pricing structure for equipment and personnel to be physically available on site from the that the Mother Vessel advises her arrival (based ETA sent 12 ho prior to arrival).

Demurrage costs for above equipment and personnel would charged after expiry of Free Time at rate of U.S.$ 9,500 for every 24 h period or part thereof in excess of the Free Time allowed.

Payment as per the above pricing structure would be required in *prior vessel being permitted into the Bay.* Demurrage payments excess time would be due within 3 days of completion of operation in the case where demurrage payments due exceed 72 hours, t payment will be due immediately on expiry of each 72 hour perio excess of the allowed Free Time – in this event vessel will not be clea outwards until payment of last due demurrage amounts confirmed.

Port Disbursements: This cost element is that usually attributable to vessel Owners and covers the following aspects:

Provision of Agency services, including Inwards/Outwa Clearance;
All Port Dues;
All Pilotage Dues;
Provision of launch service for transporting personnel from sh to ship on arrival and from ship to shore on departure (two launc provided per vessel).

Special rates have been negotiated with the Vietnamese Author for any vessel utilising the STS service in the Bay and, as 1st January 1996, stand at U.S.$ 6,500 per vessel lumpsum.

Payment for port disbursements must be made *in full prior* to the ve receiving inwards clearance into the Bay.

Van Phong Bay Petrotech will be appointed by Owners as Protec Agents, and they in turn will appoint MACS Ho Chi Minh City as s agents.

Thus all payments must be made to Van Phong Bay in Singap who will then be responsible for ensuring that all disbursements received by the Vietnamese parties.

Due to the present limited banking facilities in Vietnam, which result in considerable delays being incurred in receipt of funds b Vietnamese parties concerned, Petrotech have arranged and ag with those Vietnamese parties that confirmation from Petrotech funds have been received in Singapore is sufficient for them to pro the vessel inwards/outwards.

Security: During your vessel's stay in the Bay, a representative o local Border Police will remain on the vessel.

Notwithstanding the above, you and your staff are advised at all t to ensure that any valuables are secured, and that any spaces which are unoccupied are also secured.

Your staff should also be advised that any unauthorised vessels approach the operation should be reported immediately to both Petr staff and the Police representative.

Any means of access to the vessel (i.e. gangways/ladders) shou rigged in such a fashion that, when not in use, they are well abo waterline.

Charts: The following charts are applicable for this area:

B.A. Chart No. 3883 – 1:200,000.
Vietnamese Chart No. IA-200-09 – 1:200,000.
Vietnamese Chart No. IA-100-17 – 1:100,000.

All Vietnamese charts are produced based upon Projection Ellipsoid Everest 1960, and as such there exists a variation be positions referred to by any Vietnamese Authority and those refe on British Admiralty or USA chart systems.

The variation noted is only with respect to Longitude, Latitude re being unaffected.

Positions reported by Vietnamese Authorities, when transferre or U.S. charts should be 'moved' *0.55 miles East* (West if trans from B.A./U.S. to Vietnamese charts systems).

All positions reported by ourselves refer to the B.A./U.S. syst

Notice to Mariners: The Vietnam Maritime Safety Agency, who carried out an hydrographic survey of one of the nominated anchorages in the Bay, have advised that a wreck with a depth of water of over 24 m. at lowest low water level was found in position (B.A./U.S. systems):

Lat. 12° 31' 56" N., Long. 109° 24' 05" E.

The depth of water in the anchorage is reported as being a minimum of 22.2 m. at the level of lowest low water, with a minimum depth of 26.0 m. in a channel connecting the pilot station and the anchorage area.

Stores: Some limited provisions *may* be available from Nha Trang – please contact Petrotech for assistance.

OPERATOR: Van Phong Bay Petrotech (Private) Ltd., 2 Jurong East Street 21, No. 04-12 IMM Building, Singapore 609601. *Tel:* (65) 568 2389/90/91. *Telex:* 51297 PTECH. *FAX:* (65) 568 2531. *Contact:* Captain Nigel Snowden, Managing Director.

VUNG TAU (Cat Lo): 10.21 N. 107.04 E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Pilotage is compulsory for all vessels that enter or leave the Port of Vung Tau.

General Pilot Station for Saigon/Vung Tau Ports and Mekong River is at "Zero Buoy" in position Lat. 10° 20' 40" N., Long. 107° 03' 00" E.

ANCHORAGE: In Vung Tau Bay, with anchorage well protected during N.E. monsoon, no swell at waiting area.

(1) All vessels waiting to enter Saigon Port must fly signal flag No. 1 at top of foremast.
(2) All vessels waiting to transit Mekong River must fly signal flag No. 2 at top of foremast.
(3) All vessels waiting to enter Saigon Port may be inspected by Vung Tau Harbour Master (if requested by Master).

HEALTH: See "General" before first port.

RADIO: Contact Saigon Radio, call sign XUS.

VHF: Contact with Pilot Station, Harbour Master and Vosa Vung Tau on Channel 16.

TUGS: Available from 1,000 h.p. – 7,000 h.p.

BERTHING: Vung Tau Port consists of three ports:

1. No wharf. Port for export of the crude oil. Pilot Station at position Lat. 9° 11' N., Long. 107° 35' E., for tankers with LOA 250 m., breadth 40 m., draft 15.0 m. and 80,000 d.w.t.
2. Petroleum and gas service port in position Lat. 10° 23' 36" N., Long. 107° 05' 58" E. There are 9 quays. Quay No. 6 for ships with LOA 160 m., breadth 28 m., max. draft 9.0 m. and 12,000 d.w.t. Other berths for ships less than LOA 120 m., draft 6.0 m. and 6,000 d.w.t.
3. Cat Lo Port in position Lat. 10° 24' 48" N., Long. 107° 08' 00" E. Length of quay 250 m. For ships with LOA 135 m., breadth 20 m. and 6,000 d.w.t.

CRANES: There are 3 shore cranes of 10 tons, 3 floating cranes of 300 tons and 400 tons and mobile truck cranes.

MEDICAL: Doctors and hospital facilities available through Vosa Vung Tau or Vosa Saigon.

TANKERS: See "Berthing" and "Shipmaster's Report".

FRESH WATER: Can be supplied by pier hose connection for berthed ships (Cat Lo Port) and by barge, generally subject to advance notice of 24 hours.

FUEL: Diesel oil and fuel oil can be supplied at Vung Tau Port.

REPAIRS: Any small deck and engine repairs can be performed on request.

SURVEYORS: Cargo Surveyors: Vinacontrol, branch at Vung Tau City.

Ship's Surveyors: Vires, branch at Vung Tau Port.

AIRPORT: International service via Tan Son Nhat Airport at Ho Chi Minh City.

SERVICES: Shipchandler available at all times.

POLICE/AMBULANCE/FIRE: Contact through Harbour Office and Vosa Vung Tau on VHF Channel 16.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Vung Tau Port based at Harbour Office. Contact S.A.R. Centre on VHF Channels 16/6.

SHIPMASTER'S REPORT: June 1992.

Berth: Offshore storage tanker "Chi Linh".

Position: 09° 49.9' N., 107° 59.9' E.

Documents: See "General" before first port.

A boarding party of Pilot, Customs, Immigration, cargo supplier and cargo surveyor, 9 persons in total, come on board before berthing. Five of them stay onboard during the loading operation and require accommodation.

Pilotage: Pilotage is compulsory. Communications before arrival with the Pilot, who is also the Master of the "Chi Linh", is via VHF Channel 16 and working Channel 6. The Pilot boards the vessel from a supply boat/tug.

Approaches: B.A. Charts No. 3986 and 3987.

Coming from the North East on course 246°, the Iles of Catwick were passed to the South. 10 miles South of Poulo Sepata, course was altered to 270°, keeping the patch of 7 fathoms and the "Submarine Vulcanoes" area well clear.

Poulo Sepata was radar conspicuous at approximately 22 miles distance.

In a position bearing Poulo Sepata 059° and distance 20 miles, course was altered to 315°.

Petit Catwick and Grande Catwick are also both radar conspicuous.

In a position bearing Grande Catwick 082° and distance 23 miles, course was altered to 270°. Grande Catwick was still visible on the radar.

The first flares of Vung Tau Oil Field were visible at a distance of approximately 20 miles during daylight. Soon thereafter the first rigs could be seen on the radar.

At a distance of approximately 15 miles, the storage tanker "Chi Linh" could be distinguished clearly.

In position 10° 00' N., 108° 17' E., course was altered to 242° to an anchor position 3 miles West of the storage tanker.

Anchorage: 3 miles West of the storage tanker. There are numerous oil rigs in the vicinity and construction is still underway.

Restrictions: No night berthing. Vessels unmoor day and night, weather permitting.

Max. Size: 110,000 d.w.t.

Health: See "General" before first port.

Agency: Vosa Vung Tau. Telex: 641054 VOSAVU VT.

VHF: See "Pilotage".

Tugs: A supply boat/tug makes fast to the stern of the tanker during the approach to the berth. For this, 2 soft ropes are required, led through the same centre lead. The eyes of the ropes should be tied together with a messenger line onto which a heaving line should be fastened. The tug's towing rope is then shackled to the eyes of the ship's ropes, which are fastened on the bollards when sufficient slack (about 75 m.) has been paid out.

During the stay on the berth, the tug maintains a light pull on the vessel to keep her off the stern of the "Chi Linh".

Berth: The storage tanker "Chi Linh" is permanently moored to an SPM, by means of a special construction between ship's bow and SPM turntable.

Berthing: Berthing is done in a manner similar to mooring to an SPM. The mooring arrangement is as per OCIMF Standards.

The Pilot remains on the bridge until the tanker is at a distance of approximately 0.5 miles from the berth. During the final approach, he is on the foc'sle, directing the vessel by ship's walkie-talkie.

On the foc'sle, one messenger line has to be prepared for picking up the mooring arrangement. The rope is put on a winch drum, led through a bow stopper and a centre lead.

When the distance between the approaching vessel and the stern of the "Chi Linh" is approximately 60 m., the latter shoots a heaving line over the foc'sle of the tanker, by means of a pneumatic gun. Attached to this is a messenger line which, once on board, can then be fastened to the messenger line on the tanker.

The mooring arrangement can now be pulled in and the chafe chain secured on the bow stopper (vessels not equipped with a bow stopper can be moored by means of a wire/shackle arrangement, secured on the bitts, as per OCIMF).

Only 1 nylon grommet rope is used for this tandem berthing.

Loading: A 16 in. floating hose string, with a total length of 262 m., runs from the port side of the stern of the "Chi Linh" to the tanker's port manifold. The tanker rail hose has a 12 in. reducer fitted.

Cargo particulars (approximate):

Name: Bach Ho Crude.
API: 39.9 (density 15°C: 0.8252).
Pour point: 32°C.
Loading temperature: 39°C.
Heating requirements: Between 38°C and 43°C.
Max. loading rate: 2,600 cu.m./hr.

Due to the high pour point of the crude, the "Chi Linh" has to carry out a line flush on completion of each loading. As a consequence of this, a water plug of approximately 75 cu.m. is received at the start of loading. This should preferably be loaded into one cargo tank.

At the end of loading, the line contents will be displaced by means of a water plug. Preferably the same tank as above should be used for this, as well as for dropping the lines. Loading lines should be thoroughly dropped/drained in view of the high pour point.

During stay in the berth, the starboard side accommodation ladder should be ready.

AGENT'S REPORT: April 1994.

Cat Lo:

Location:	Lat. 10° 20' N., Long. 107° 03' E.
Pilot Station Co-ordinates:	Lat. 10° 20' 40" N., Long. 107° 03' E.
Distance from Pilot Station:	11 miles.
Pilotage:	Compulsory.
Restrictions:	Draft: 6.2 m. LOA: 150 m.
Tugs:	2×1,000 h.p.
Berth:	Quay No. 1: Length 250 m. Depth 6.0 m. – 9.0 m. General cargo, machinery, timber, agricultural products
Mooring Buoys:	At Vung Tau Bay.
Sheds/Warehouses:	25,000 sq.m.
Open Storage:	100,000 sq.m.
Cranes:	1×10 tons and 1×45 tons.

Vung Tau Petroleum Terminal:

Location:	Lat. 10° 20' N., Long. 107° 03' E.
Pilot Station Co-ordinates:	Lat. 10° 20' 40" N., Long. 107° 02' E.
Distance from Pilot Station:	8 miles.
Pilotage:	Compulsory.
Restrictions:	Draft: 8.0 m. LOA: 150 m.

Berths:

Quay: No.	Length (m.)	Depth (m.)	Type of Cargo
1 (upstream)	120	7.0	General, machinery
2 (downstream)	150	8.0	Drilling equipment and chemicals.

Mooring Buoys:	At Vung Tau Bay.
Sheds/Warehouses:	1,300 sq.m.
Open Storage:	26,000 sq.m.
Cranes:	1×10 tons and 1×75 tons. Floating crane with 600 tons lifting capacity available.

AUTHORITY: Vung Tau Harbour Office, No.2 Quang Trung Street, Vung Tau. *Tel:* 2270 – 2272.

Virgin Islands

FREDERIKSTED, St. Croix: 17.43 N. 64.53 W.

DOCUMENTS: All forms are standard U.S. Government Forms:
Passenger List (I-418) – 3 copies.
Crew List (I-418) – 3 copies.
Clearance from Last Port.
Inward Customs Manifest (1302) – 4 copies.
Ship's Stores Declaration – Customs Form 1303 – 2 copies.
Crew Effects Declaration – Customs Form 1304 – 1 copy.
(Also see separate headings – "Health" – "Customs" – "Immigration").

PILOTAGE: Services available day or night. Payment for Pilot services is mandatory whether Master uses Pilot or not. (Vessels commissioned by the U.S. or foreign government, yachts and vessels under 100 gross tons are exempt from pilotage fees, except when the services of a Pilot are requested).

ANCHORAGE: Open roadstead on the lee (West) side of St. Croix, providing a good anchorage with no significant tide.

HEALTH: See "Health Regulations" before first U.S.A. Port (Albany).

Garbage should be disposed of beyond the 3-mile limit. On passing the 3-mile limit all garbage disposal units which open to the sea should be closed. All garbage should then be placed in covered cans and retained on board until the ship is again beyond the 3-mile limit.

RADIO: (a) Vessels may communicate with Island via:

Mackay Radio, Amagansett, New York	Call Letters WSL
Chatham Radio, Massachusetts	Call Letters WCC
Lantana Radio, Florida	Call Letters WOE
Barbados Radio, Barbados	Call Letters VPO
Destrellan Radio, Guadeloupe	Call Letters FFO
Fort de France Radio, Martinique	Call Letters FFP

All stations maintaining 24-hour service. These radio stations then relay the messages by cablegram to Frederiksted via either ITT World Communications Inc., Cable and Wireless or Western Union International.

(b) Master of every vessel arriving Frederiksted is required to give at least 24 hours advance notice of arrival to Captain of the Port, U.S. Coast Guard – San Juan, Puerto Rico, by wireless on 500 kHz or by radio telephone 2182 kHz. Call Letters for U.S. Coast Guard, San Juan, Puerto Rico – NMR.

(c) Masters are requested to advise Agent their expected time of arrival as far in advance as is possible, vessels arriving from ports other than U.S. or Caribbean Islands should give at least 7 days' notice, and vessels arriving from U.S. ports should give at least 4 days' notice. In addition, a message should be sent verifying arrival at least 48 hours in advance, with delays reported as necessary. Arrival messages should include information regarding repairs, stores, number of crew and passengers on board. If cash is required, a minimum of 7 days' (prior to date of arrival) notice is mandatory.

(d) While vessels are in Frederiksted the Authorities do not permit the use of the ship's radio transmitters.

(e) Vessels equipped with VHF equipment should commence radio watch on Channel 16 when vessel is 100 miles from St. Croix. Contact with Agents and shore facilities can be made direct or via Virgin Islands Marine Operator – Station WAH – Call Letters WAH.

(f) Masters of vessels arriving at Frederiksted Pier are required to contact V.I. Port Authority through their Agent or by Fax No. (809) 778 1033, 24 hours in advance of arrival.

VHF: Port Authority on Channel 16.

TUGS: None readily available – tugs can be arranged with 48 hours advance notice.

BERTHING: A government-owned pier with a 1,400 ft. long approachway, bridging Maritime Zone to a pier-head 240 ft. long by 60 ft. wide. Vessels 600 ft. and over with a max. forward draft of 25 ft. have been accommodated.

FRESH WATER: Available at dock, arranged by Agent.

SHORE GANGWAYS: Available.

LAUNCHES/TENDERS: Not available.

CUSTOMS: Customs Officers will board at anchorage or wharf berths, and will require an accommodation ladder.

Vessels required to enter and clear through Customs House:
Vessels loading or unloading cargo;
Vessels embarking or disembarking passengers;
Vessels remaining in port over 24 hours;
Vessels requesting permission for their passengers to go ashore during the stay of the vessel in port.

Vessels in above categories must present following documents:
Clearance from Last Port;
3 copies of Crew List (Form I-418) or substantially similar form – see note*
3 copies Passenger List (Form I-418) or substantially similar form – see note*
4 copies Inward Foreign Manifest covering all cargo for discharge at St. Croix, V.I., showing weights or measurements (of basis of how cargo is freighted) on all items (Customs Form 1302).
2 copies Stores List (Engine-Deck-Commissary-Narcotics).
1 copy Crew Effects Declaration (Custom's Form 1304).

* List of passengers and crew shall be on Customs and Immigration Form I-418 or on a substantially similar form, except that where no steerage passengers are aboard upon arrival, the listing of the passengers may be in the form of a vessel "Souvenir List" or similar list, in which the names of the passengers are listed alphabetically by class.

Sealing of Stores: Upon arrival of a vessel from a foreign port, or a vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use of consumption on board while vessel is in port and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless Customs Officer is of the opinion that circumstances do not require such action. Customs Inspectors in cha of vessel, from time to time, may issue stores from under seal consumption on board by passengers and crew.

Passengers disembarking must present personal baggage declara if from foreign.

IMMIGRATION: Recommended that Masters who are unfamiliar w U.S. Immigration Procedure should seek clarification from Agents as in advance as is possible.

If a vessel arrives direct from a United States mainland port or fr Puerto Rico no Immigration inspection will be performed. If a ves arrives direct from a foreign port the vessel shall undergo Immigra inspection.

Vessels arriving without a visaed Crew List, may be able to obtai waiver from Officer in Charge of U.S. Immigration & Naturalisa Service, by making application on Form I-193. A fee of $10.00 is requi to obtain a waiver.

In order to expedite the clearing of the vessel, it is suggested t prior to arrival all passengers subject to inspection should be assemb where the inspection is to be performed.

Stowaways must be reported in ETA Message and listed or Passenger Manifest (Form I-418) and on Form I-94, and must reported to the U.S. Immigration Officer as soon as he boards.

All non-resident alien crew members, whether shore leave is requi or not, are required to have in their possession valid Passpo Seamen's Book or Identification Card (with photo) and Form I- (Crewman's Landing Permit) or Form I-184 (Alien Crewman's Per and Identification Card) on arrival. All resident alien crew members a required to have in their possession Alien Registration Receipt C (Form I-151) on arrival.

AIRPORT: Distant 8.5 miles.

TIME: GMT minus 4 hours. Atlantic Standard Time.

HOLIDAYS: The following are legal holidays: Sundays; January (New Year's Day); The third Monday in February (President's Da March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Mond Whit Monday; Last Monday in May (Memorial Day); June 22nd (Orga Act Day); July 4th (Independence Day); July 3rd (Emancipation Da Last Monday in July (Supplication Day); The first Monday in Septem (Labour Day); The second Monday in October (Columbus Day); T fourth Monday in October (Veterans' Day); The fourth Thursday November (Thanksgiving Day); December 25th (Christmas Da December 26th (Christmas Second Day), and such other days as President or the Government may by proclamation declare as holida The port remains open on holidays.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harb Pollution Act of 1924, prohibiting discharge of refuse and oil in naviga waters of the U.S. Virgin Islands. Local Port Regulations are simila those applying in U.S. Mainland Ports.

AUTHORITY: Virgin Islands Port Authority, Marine Division, P.O. 1134, Christiansted, St. Croix, Virgin Islands, U.S.A. 00820. *Tel:* (8 778-3131 (St. Croix). *FAX:* (809) 778-1033. *Contact:* Larry Finch, Ma Manager.

LIMETREE BAY, St. Croix: 17.41 N. 64.44 W.

(See Pl

LOCATION: The facilities of Hess Oil Virgin Islands Corp. (HOVIC located in Limetree Bay on the South coast of the island of St. C U.S. Virgin Islands. St. Croix is 32 miles South of St. Thomas St. John Islands and 50 miles S.E. of the island of Puerto Rico. It is largest of the U.S. Virgin Islands being 19 miles long and avera 3.5 miles in width.

The Limetree Bay sea buoy is located approximately 9.3 miles of Sandy Point and Southwest Cape, St. Croix, on the South coa the island. The harbour is located between Krause Lagoon Canegarden Bay.

On approaching the Pilot Station, Mariners are advised to stay t South of the 100 fathom curve to avoid fish traps and shoal areas w have not been completely surveyed.

A vessel is considered to be "Arrived" when it is on the Pilot Sta that is South of the Channel Entrance (See "Pilotage").

Charts: Virgin Islands (including Saint Croix) – U.S.C. & G.S. C No. 905, U.S. Naval Oceanographic Office Chart No. 25246. St. – British Admiralty Chart No. 485. Frederiksted Roads – U.S.C. & Chart No. 937 and U.S. Naval Oceanographic Chart No. 25251.

DOCUMENTS: All ships arriving from a foreign port will be boarde Customs, Immigration and U.S. Public Health Service Officers. *personnel are not allowed ashore until permission is granted from officers.*

The following documents are required for entry and clearance a to be presented to the respective officers on boarding:

Customs:
2 copies Crew List (Form I-418).
2 copies Passenger List (Form I-418).
1 copy Ship's Stores Declaration (Form 1303).
1 copy Crew Effects Declaration (Form 1304).
Inward Foreign Manifest (if discharging).
Original and 3 copies Form 7527-B.
Ship's Register.
Clearance from last port.
Derat Certificate.

For vessels not using the HOVIC Marine Agency, the fol additional documents are required:
1 copy for entry and 1 copy for clearance Master's Oath on Vessel in Foreign Trade (Form 1300).
1 copy for entry and 2 copies for clearance General Declaratio 1301).

All other forms should be provided by the vessel's Agent.

Immigration:
Original Crew List (Form I-418) (Certified if available).
1 copy Passenger List (Form I-418).
Each crewman must have either valid D-1 (Form I-95) or new Form I-95 for presentation with Passport/Seaman's Book to Inspection Officer.

United States Immigration laws apply in the U.S. Virgin Islands. Passports and Visas are required for non-U.S. citizens.

Normally Customs entry must be complete before cargo operations can begin.

Customs clearance is accomplished by the vessel's Agent.

Cargo documents are placed onboard by the Refinery Terminal Department.

Note: The Customs Service of the U.S. Virgin Islands is under the jurisdiction of the United States Treasury Department. However, Virgin Islands Customs laws differ considerably from those of the Continental United States.

Limetree Bay is in the Christiansted Customs District.

APPROACHES: Channel Entrance Buoys No. 1 and No. 2 are located in 80 ft. of water on the Easterly and Westerly sides of the Limetree Bay channel entrance.

Entrance Buoy No. 1 is positioned at:
Lat. 17° 40' 37.4" N., Long. 64° 44' 18.2" W.

Buoy No. 1 is painted green and equipped with a quick flashing green light and a visibility of 5 miles.

Buoy No. 2 is painted red and equipped with a quick flashing red light and a visibility of 3 miles.

All aids to navigation in the approach channel and harbour are privately maintained by HOVIC.

Channel/Berths: The channel is 500 ft. in width and 60 ft. in depth at Mean Low Water (MLW). This depth extends into the VLCC Berths No.3 and No. 4. Docks No. 5 and No. 6 have 50 ft. at their face. Docks No. 1, No. 2, No. 7, No. 8 and No. 9 have 45 ft. at the face of MLW. Dry Cargo Berth has a draft restriction of 34 ft. without fenders and 38 ft. 06 in. with fenders. The turning basin opens up Eastward from the channel line and is approximately 1,200 ft. long and 1,000 ft. wide. The West Turning Basin is 1,500 ft. × 1,200 ft. A breakwater extends out from the head of the East Basin to the coral reef which forms the Southern harbour limit.

Anchors: Vessels shall have their anchor windlasses manned and their anchors ready to let go upon entering the channel into Limetree Bay.

PILOTAGE: Service is available 24 hours a day. All vessels entering Limetree Bay must comply with the Navigation Safety Regulations per 33 CFR, Part 164 and an entry denoting this should be made in the vessel's logbook. A HOVIC Pilot is mandatory for all vessels entering, shifting, or leaving the facilities at Limetree Bay. Pilots will assist the Master in the docking and undocking of the vessel; however, the Master of each vessel retains *full* responsibility for the vessel at all times.

Vessels must remain at the Pilot Station 2.5 miles South of the Channel Entrance until boarded by a HOVIC Pilot. The Pilot will be placed aboard by a company tug.

The HOVIC marine and terminal office is equipped with a VHF radiotelephone having the following channels:

Initial Contact – Channel 11
Working – Channels 9, 10 and 11

Ships must call the HOVIC marine office on VHF at least 3 hours before arrival at the Pilot Station and advise of any change in their ETA.

Pilot Ladders: The following regulations apply to Pilot Ladders:

If these regulations are not complied with, HOVIC Pilots may refuse to embark or disembark thus delaying the vessel.

The Officer responsible for the embarkation and disembarkation of the Pilot is to be a Deck Officer.

The pilot ladder is to be properly secured and adequately lit at night.

The Pilot should be able to pass safely and conveniently from the head of the ladder onto the ship's deck. Where portable stanchions and bulwark ladders are used for this purpose, the portable stanchions must be rigidly secured to the ship's structure to prevent being unshipped and supported at not less than two points to prevent lateral movement. The bulwark ladder should also be independently attached and firmly secured. The stanchions should be of reasonable height and adequately capped to allow a firm grip.

The ladder is to be in good condition and its treads are to remain horizontal. The treads are to have a rough upper surface.

The length of the ladder should not exceed 30 ft. Whenever the distance from sea level to a point of access on the ship is more than 30 ft., access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.

The ladder is to be rigged so that each step rests firmly against the ship's side. Spreaders are to be provided not more than 10 ft. apart to prevent the ladder twisting.

A manrope or a safety line is to be secured at the vessel's rail and lowered over the side adjacent to and for the full length of the pilot ladder. A lifebuoy with self-igniting light is to be readily available.

The ladder is to be rigged well clear of any overboard discharges and at a place where the best lee can be provided to the boat carrying the Pilot.

Whenever a mechanical pilot hoist is used, a standard pilot ladder shall be at hand, ready for immediate lowering in the event of a hoist malfunction.

ANCHORAGE: There is no safe anchorage off the entrance to Limetree Bay. Vessels having to wait due to berth availability or weather should proceed to sea towards the South and West of the Island and heave to 15 or 20 miles offshore, maintaining VHF contact with HOVIC Marine by guarding Channel 11 for berthing instructions.

In bad weather it is possible to proceed to Fredericksted on the West end of the island and anchor in 30 ft. to 60 ft. of water. Vessels shall have their anchors ready to let go upon entering the channel into Limetree Bay.

RESTRICTIONS: Navigation is permitted 24 hours a day, except for vessels over 100,000 d.w.t. Vessels over 100,000 d.w.t. are handled on a daylight basis inbound only. The Port Captain will check and report on each vessel's draft before a Pilot is dispatched.

Ballast Drafts: Ballast draft restrictions are as follows:

Vessel d.w.t.	*Forward* (ft.)	*Aft* (ft.)
Under 30,000	10	16
30,000 – 50,000	12	18
50,000 – 70,000	15	21
70,000 – 100,000	18	24
San Clemente Class	21	27
100,000 – 150,000	28	32
150,000 – 200,000	32	36
Over 200,000	40	40

These guidelines will be adjusted as weather and vessel handling characteristics dictate. Advice concerning any variance will be provided to the vessel by the Pilot in ample time to prevent any unnecessary delays to the vessel's ballasting.

MAX. SIZE: The docking facilities listed are subject to change, depending on weather conditions, depth of water and length of vessels at the adjoining berths. All vessels are normally turned prior to docking.

Roll-On/Roll-Off Dock – East Basin:
Length: 318 ft.
Draft: 17 ft.

Dry Cargo Dock – East Basin – Tankers:
Length: 650 ft. – Depending on size of vessel at Dock No.1 and distance from bow to centre manifold.
Draft: 38 ft. 06 in. with fenders.
34 ft. 00 in. without fenders.
D.w.t.: 45,000 tons.

Dry Cargo Dock – East Basin – Sulphur Ships:
Length: 585 ft. LOA
Beam: 65 ft. with Yokohama Fenders.
Draft: 38 ft. 06 in. with Yokohama Fenders.
Beam: 75 ft. without Yokohama Fenders.
Draft: 34 ft. 00 in. without Yokohama Fenders.
D.w.t.: 45,000 tons Max. – Must be adhered to.
Freeboard: 40 ft. Max. – Must be adhered to.

NOTE: If the restriction on the beam is not adhered to, hand trimming will be required. This is an extra cost.

Vessels over 585 ft. LOA, up to 685 ft. LOA may use this berth. The above restriction on beam and draft to be adhered to.

It will be necessary to undock, and turn a vessel of over 585 ft. up to 685 ft. at least once during the loading. This will involve extra port charges (one pilot and 2 tugs will be required).

All other restrictions pertaining to beam, draft, deadweight and freeboard must be strictly adhered to.

Dock No. 1 – East Basin:
D.w.t.: 80,000 tons maximum.
LOA: 900 ft. maximum.
Beam: Unlimited.
Draft: 42.5 ft. maximum.
Bow-Centre Manifold: 450 ft.

Dock No. 2 – East Basin:
D.w.t.: 80,000 tons maximum.
LOA: 900 ft. maximum.
Beam: Unlimited.
Draft: 42.5 ft. maximum.
Bow-Centre Manifold: 450 ft.

Dock No. 3 – East Basin:
D.w.t.: 300,000 tons maximum.
LOA: 1,200 ft. maximum.
Beam: 200 ft. maximum.
Draft: 55 ft. maximum.
Bow-Centre Manifold: 600 ft. maximum.

Dock No. 4 – West Basin:
D.w.t.: 300,000 tons maximum.
LOA: 1,200 ft. maximum.
Beam: Unlimited.
Draft: 55 ft. maximum.
Bow-Centre Manifold: 600 ft.

Dock No. 5 – West Basin:
D.w.t.: 100,000 tons maximum.
LOA: 900 ft. maximum.
Beam: Unlimited.
Draft: 47.5 ft. maximum.
Bow-Centre Manifold: 450 ft.

Dock No. 6 – West Basin:
D.w.t.: 100,000 tons maximum.
LOA: 900 ft. maximum.
Beam: Unlimited.
Draft: 47.5 ft. maximum.
Bow-Centre Manifold: 450 ft.

Dock No. 7 – West Basin:
D.w.t.: 25,000 tons maximum.
LOA: 500 ft.
Beam: Unlimited.
Draft: 35 ft. maximum.
Bow-Centre Manifold: Length of vessels using this berth shall be guided by the length of the vessel at Berth No.6, also on the distance from bow to centre of the manifold.

Dock No. 8 – West Basin:

D.w.t.:	100,000 tons maximum.
LOA:	900 ft. maximum.
Beam:	Unlimited.
Draft:	42.5 ft. maximum.
Bow-Centre Manifold:	450 ft.

Dock No. 9 – West Basin:

D.w.t.:	100,000 tons maximum.
LOA:	900 ft. maximum.
Beam:	Unlimited.
Draft:	42.5 ft. maximum.
Bow-Centre Manifold:	450 ft.

HEALTH: United States quarantine laws are enforced by the U.S. Public Health Service.

Pratique is required only if vessel is coming from a plague infected area or if there is illness of a suspicious nature or there is a death (from any cause) onboard. The Master is obligated to report to the HOVIC marine office any of the above circumstances well in advance of the vessel's arrival at the Pilot Station in order that the Public Health Officials may be notified – failing this the vessel may be delayed.

All trash and refuse kept in drums on deck must be in closed plastic trash bags and the drums must have securely attached lids. No plastic bags laid upon the deck nor open containers on and/or below decks will be acceptable. No garbage collection or disposal service is allowed or available. No trash or refuse will be allowed to be deposited in the harbour. Failure to comply with any of the aforementioned items results in immediate and large fines.

RADIO/VHF: Masters must advise HOVMAR St. Croix and their agents by radio or telex 72 hours, 48 hours and 24 hours in advance of their ETA, giving the vessel's name, date and hour of arrival (Local time) and the name of their last port of call, otherwise delays may result in berthing the vessel. A vessel will be considered as "Arrived" when it reaches the Pilot Station 2.5 miles South of the Sea Buoy.

A vessel's "Notice of Readiness" will not be accepted until the vessel has initially reached this point and notified HOVIC by VHF.

VHF Radio Frequencies:

1. Calling only	– 11
2. Harbour Operations	– 9-10-11
3. Pilotage	– 11
4. Agency	– 10 or 11
5. Standby-call	– 2182 kHz.

Harbour tugs and the HOVIC Marine Dispatchers monitor the VHF frequencies 24 hours a day.

S.S.B. Channel Frequencies:

SSB communication available with prior scheduling.

RADAR: No Port Radar Service or Vessel Traffic Management System exists in the port.

TUGS: Tug assistance in the channel, docking and undocking is mandatory and is provided by 3×3,000 S.H.P. twin screw diesel tugs and 2×7,200 S.H.P. twin screw diesel tugs which are stationed in the port to provide this service. Additional tugs are available when required for handling VLCC's. All HOVIC tugs are equipped with firepumps, monitors and foam towers to assist in firefighting.

Line Handling: A line handling vessel and personnel are provided for mooring.

MOORING: A HOVIC Pilot will direct the mooring of the vessel to ensure that it is properly secured before cargo handling operations start. This does not relieve the Master of his responsibility to ensure that the vessel is safely moored and that the lines are kept properly tended at all times.

Ship's Moorings and Mooring Winches: Ships shall at all times remain adequately secured alongside the berth by the use of ropes or wires which are in good condition and properly sized for the service they are in.

Mooring lines of the same size and type should always be used for all leads in the same service.

The use of constant tension mooring winches in the automatic mode is not permitted. Vessels with constant tension mooring winches must have their brakes set manually.

BERTHING:

Port Alucroix: Situated to the West of the HOVIC Terminal. The port is entered via the Krause Lagoon Channel with a controlling depth of 35 ft. at Mean Low Water and a width of 300 ft. At the head of the Lagoon is the Martin Marietta Alumina Terminal which is currently idle. Pilot boards approximately 2.5 miles South of the Krause Lagoon Channel Entrance Buoys.

Container Port: Situated close to the West of the HOVIC Terminal. The port is entered via the Krause Lagoon Channel (300 ft. wide and 35 ft. depth) and the Container Port Cross Channel (400 ft. wide and 35 ft. depth). Length of the pier is 1,200 ft. with 35 ft. depth. 1 × 30 ton Paceco container crane is available with a telescopic spreader to handle 20 ft., 35 ft. and 40 ft. containers.

A berth at the head of the pier can handle Ro/Ro cargoes.

TANKERS: *HOVIC Terminal (Hess):* A shore gangway is provided. For berth limitations due to size see "Maximum Size". All berths are for the handling of petroleum products with the exception of Dry Cargo Berth which has in addition the capability of loading sulphur pellets in bulk. There are no other facilities for handling any other cargoes beside petroleum at the HOVIC Terminal. No shore steam/power is available. Lightering: *VLCC Lightering is no longer conducted off Frederiksted, St. Croix. Lightering is done at the island of St. Lucia. If arrangement is made to lighter at St. Croix, the procedures listed are to be adhered to.*

BALLAST: United States laws prohibit the pumping overboard of dirty ballast while a vessel is within U.S. coastal waters. All ballast must be pumped to facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump the segregated ballast overboard at the dock after the ballast tanks have been inspected and approved by a Marine Department representative.

In pumping dirty ballast ashore, the ballast is received through a 36 shore line at a maximum discharge pressure to the shore installatio 100 p.s.i. Ballast is pumped into a ballast facility about 1 mile North the dock.

Due to the limited facilities and the possibility of more than one ves deballasting at a time, it is requested that vessel arrive with a minim amount of ballast, consistent with Pilot's ballast draft restrictions, a include the amount to be discharged on their ETA advices to their Agen

The U.S. Oil Pollution Act of 1924 applies to the Pollution of Coas Waters. Violators are subject to fines and possible imprisonment.

INERT GAS SYSTEM: Ships equipped with a properly working In Gas System are to keep all cargo tanks inerted when alongside w exception of those tanks that are gas-free.

Vessels equipped with an Inert Gas System may be required de-pressurise the cargo tanks to allow for ullage measurements to made. HOVIC Terminal and U.S. Coast Guard Rules and Regulatio concerning Inert Gas Systems must be complied with at all times.

NOTICE OF READINESS: Notice of Readiness to load or discharge a warranty that the vessel is in all respects ready to load or dischar and that all of the ship's equipment, including, but not limited to, tan pumps, valves and pipelines, are ready and fit to load or dischar petroleum or petrochemical products.

HOVIC reserves the right to refuse acceptance of such Notice Readiness unless the vessel is in all respects ready to load or dischar

A vessel will not be deemed ready to load or discharge and pump will not commence until the Senior Deck Officer shall have executed a delivered to HOVIC a "Declaration of Inspection Prior to Bulk Car Transfer" as required by U.S. Coast Guard Regulations.

HOSES: *Connecting and Disconnecting Hoses:* A crew will be provid by the terminal to connect and disconnect cargo hoses, bunker hos and Chicksan arms on the ship.

Vessels should have blank flanges removed from the cargo line reducers installed and drip pans or other fixed containment in place arrival at the dock. The HOVIC Dispatcher will advise the vessel arrival the size and number of hoses to be connected. Manifolds not use must be blanked off.

1. Oil transfer hoses and loading arms must be long enough to al the vessel to move to the limits of its moorings without placing strain on the hose/loading arm or oil transfer piping system.
2. Each hose must be supported to prevent kinking or other dama to the hose and strain on its coupling.
3. The oil transfer system must be properly aligned.
4. Each part of the oil transfer system not necessary for the trans operation must be securely blanked off.
5. The end of each hose and loading arm that is not connected the transfer of oil must be blanked off using closure devices.

LOADING: The Petroleum docks are serviced by the following sh lines: 1×42 in. crude line, 1×36 in. crude line, 1×36 in. No. 6 oil l 1×36 in. ballast line, 1×30 in. VGO (Catfeed) line, 1×24 in. No. 6 line, 1×24 in. VGO (Catfeed) line, 2×20 in. gasoline lines, 1×20 in. Kerosene line, 1×16 in. gasoline line, 1×12 in. line for each of following: Paraxylene, Xylenes, Benzene and Toluene, 1×8 in. Caus Soda line and bunker lines of 1×18 in., 1×12 in. and 1×8 in. All h connections are 10 in. diameter, there are 4×16 in. loading/discha arms at Berths No. 3 and No. 4 for crude oil, 2×16 in. arms for N oil/crude at Berth No. 6, and 2×16 in. arms for VGO (Catfeed)/Crud Berths No. 8 and No. 9. Chemical grades are handled via 1×10 in. h with Caustic Soda handled by 1×6 in. and balance grades via 2×10 hoses. Facilities are available to handle dirty slops/tank washings.

BRIDGES: There are no bridges that affect harbour movements.

MEDICAL: Emergency medical attention is available from the Pu Hospital at any hour of the day or night. The ship's agency representa should be contacted by the Master with any requests for crew med attention. For each man needing medical or dental attention, a f should be completed in duplicate and signed by the Master, or in absence, by the Chief Officer. The form should provide the date, pati name, rating and the name of the vessel.

For routine medical treatment, a doctor will board vessel on a d basis. Dental treatment is available ashore on weekdays.

All crew members requiring medical attention should be availab treatment upon ship's arrival.

Inoculations and vaccinations are available.

DENSITY: 1025.

FIRE PRECAUTIONS: Standard fire precautions for tanker safety ap including but not limited to: Smoking is prohibited on the weather d of tank vessels, on docks, and in the general dock vicinity. All doors portholes from the quarters facing outside must be kept closed w transferring cargo at the dock. No portable cables connected t electrical source shall be used while transferring cargo or ballast. W illumination is needed, approved explosion-proof lights are to be u Boiler cleaning, tank cleaning, gas freeing, welding, burning or hot is not allowed at the dock. Tank mopping is permitted on an indi basis. Vessel's main engines should not be out of service whi vessel is in port. It is not permitted to shut down both main boile a steam vessel or pull the cylinder heads from the main engine motor vessel. In the event a stack or engine exhaust emits live s the transfer of cargo must be stopped. The main radio transmitter to be used while transferring cargo or ballast. The transfer of carg ballast must be stopped during electrical storms, or when ligh appears in close vicinity. A fire towing wire should be led out fo and aft on the offshore side of the vessel and lowered to the w edge, made fast to the deck and tended to maintain them at the w edge. In the event of fire on the vessel, dock or waterfront are transfer of cargo will be suspended and the vessel made rea immediate departure if the danger is imminent. Furthermore, sho emergency or accident occur, vessel and terminal personnel mu immediate action in order to protect life and property. Contact the H Port Captain on VHF Channel 11 and the terminal dockwatch to them of the nature of the emergency.

FRESH WATER: The Island of St. Croix is dependent almost entirely on rainfall for its supply of fresh water. There are wells but most of them are rather saline in nature. As a result, fresh water is scarce and expensive. In conjunction with its refinery operation, HOVIC operates desalination plants and limited quantities of fresh water are available providing at least 72 hours' notice of these requirements is given prior to the ship's arrival. All fresh water is metered aboard ship.

FUEL: Bunkers are available by prior arrangement. Advice concerning the quantities and type required should be given in the vessel's arrival message (ETA) sent in 72 hours prior to arrival.

CONSULS: Denmark and Netherlands.

REPAIRS: In general no repair work is authorised, except for emergencies while the vessel is at the dock. Nearest major repair facilities are at San Juan, Puerto Rico.

DRY DOCKS: No dry docks are available in the port.

SURVEYORS: Cargo Inspectors are available at Limetree Bay as follows: SGS Inspectorate, Chas. Martin and Caleb Brett. E. W. Saybolt available on premises.

Representatives of the American Bureau of Shipping, Lloyd's Register and other maritime classification societies are available from San Juan, Puerto Rico on 24 hours' notice. The ship's Agent will assist Masters in soliciting their services.

GANGWAY/DECK WATCHMEN: Vessel to provide personnel at manifold and gangway.

Gangway: Vessels must be prepared to provide their own gangways. Some of the docks have gangways that may be used at the discretion of the dock foreman. Where HOVIC provides the gangway, a safety net will be rigged. When the vessel's gangway is used, we strongly urge the use of a vessel supplied safety net under the gangway.

CUSTOMS ALLOWANCES: Crew members are permitted to hold out of bond 1,500 cigarettes and 1 litre of alcohol per crew member.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation by air.

AIRPORT: HOVIC Terminal at Limetree Bay is located 15 minutes via highway from the airport. Daily flights direct to Miami, Fla., New York, N.Y., Newark, N.J. and numerous flights to San Juan, Puerto Rico with worldwide connections are available.

TIME: The U.S. Virgin Islands use Atlantic Standard Time (A.S.T.) which is Greenwich Mean Time minus 4 hours all year round.

HOLIDAYS: The refinery and terminal operates 24 hours per day all year round.

POLICE/AMBULANCE/FIRE: The refinery and terminal have their own ambulance and fire department. Contact the HOVIC Port Captain on VHF Channel 11. Local police may be contacted via the Agent.

TELEPHONES: No arrangements are available for placing telephones aboard ship.

SERVICES: Following services are available: Radio/Radar repair, Ship Chandler, Liferaft Service/repacking, ship classification societies surveyors (from San Juan, P.R.), and charts, publications or Notice to Mariners in very limited supply.

BANKS:

The Bank of Nova Scotia, Christiansted (809-773-1013).
Banco Popular, Christiansted (809-773-0077).
Chase Manhattan Bank, Christiansted (809-773-1200).
First Pennsylvania Bank NA, Christiansted (809-773-0440).

STORING: Vessels can only be stored by truck delivery to the pier. Trucks may approach the vessel no closer than 150 ft., where goods are pushed/pulled alongside using vendor's wheeled carts. A shore crane is capable of lifting light weights to the vessel from the apron. Forklifts are not allowed on the dock. Local riggers are available for assistance provided a minimum of 24 hours' notice is given to the Agent.

SHORE LEAVE: Under normal circumstances, no restrictions are imposed by the Immigration authorities on shore liberty. Masters are requested to have all crew members on board at least one (1) hour prior to departure time to avoid delay "awaiting crew members".

If crew members of foreign vessels are to be given shore leave, Form I-95 must be prepared for each member of the crew. These forms are available from the ship's agent.

Transportation: Crew members desiring shore leave are not permitted to walk through the refinery. Taxi cabs are available when required for transportation through the refinery and to Christiansted and Frederiksted at the crew member's expense.

IDENTIFICATION CARDS: Agency representative will supply Master with Refinery Gate Passes.

GARBAGE DISPOSAL: Service available. Contact any of the following for details:

Dept. of Planning and Natural Resources. Tel: 772-0565.
Brown and Ferris Industries. Tel: 809-788-7171.
Safety Clean Enviro Systems. Tel: 854-1090.

Hess Oil Virgin Islands Corp. Facility: Facilities available for handling of plastics and garbage/refuse provided material is non-hazardous. Medical waste and hazardous waste are not acceptable. U.S.A. Regulations 33 CFR 158.115, 40 CFR 261.3 & 261 Sub-part D apply. All ship waste is subject to inspection and control of the U.S. Dept. of Agriculture & U.S. Coast Guard. Vessels should apply for service through their agent 36 hours prior to arrival, indicating type and amount of material for disposal ashore. Charge is U.S.$ 21.00 per 4 cu.ft. bag. Special bags are supplied through the agent.

WASTE OIL DISPOSAL: Service available. Contact any of the following for details:

Dept. of Planning and Natural Resources. Tel: 772-0565.
Brown and Ferris Industries. Tel: 809-788-7171.
Safety Clean Enviro Systems. Tel: 854-1090.

Hess Oil Virgin Islands Corp. Facility: Dirty ballast/slops are discharged to shore through a 36 in. shore line at a maximum discharge pressure to the shore installation of 120 p.s.i.

SEAMAN'S CLUBS: None. Usual local facilities.

Hess Oil Virgin Islands Corp. Facility: Hess Oil Virgin Islands Corp. jetty is within 10 minutes of large shopping centre which can be reached by taxi or walking from the refinery main gate.

CURRENCY: U.S.Dollar.

TIDES AND CURRENTS: The tides are small and diurnal, the mean range being about 0.5 ft. and the diurnal range less than 1 ft. Normally there is a drift of 0.5 knot to 1 knot moving along the South shore of the island in a Westerly direction.

H.O. Sailing Directions and U.S. Coast Pilots No. 5 can provide additional details.

REGULATIONS: Vessel will be held responsible for the cost of labour and material required to clean up any oil spill caused by the vessel in Limetree Bay. Slick booms are available to isolate spills and contingency plans are in force for oil spills. The U.S. Coast Guard will be notified of any oil spills, no matter how minor, also vessel's cargo transfer operations will be suspended pending U.S. Coast Guard investigation.

AIR POLLUTION: Blowing or cleaning of boiler tubes while a vessel is alongside the dock or within the harbour limits is strictly prohibited.

It is unlawful to permit the emission of smoke darker than No.2 on the Ringelmann scale. Violation of this law in Limetree Bay may result in fines to the vessel. Terminal personnel record violations and report the same to Air Pollution Authorities. Masters are advised that continued violation can result in the vessel being placed offhire. The vessel will be sailed and not re-docked until the problem is fully resolved.

In the event a stack or engine exhaust emits live sparks, the transfer of cargo must be stopped. If the condition is not corrected immediately, the vessel will be removed from the harbour.

SWIMMING: Swimming in the Harbour is not permitted.

COMMUNICATIONS:

Communication with U.S. Navy at Fredericksted: Arriving at or departing from Limetree Bay, all vessels passing the Western end of St. Croix are to monitor VHF Channel 16 for radio traffic from the U.S. Navy Weapons Tracking Station at Fredericksted. Vessels may be requested to alter course to avoid interrupting naval activities that are being conducted with aircraft, ships and submarines.

GENERAL:

Photography: Cameras are not allowed within the confines of the Refinery. Picture taking is strictly prohibited.

Emergency Towing Wires: Immediately on docking, emergency towing wires of sufficient length to reach the water's edge, with 8 ft. eyes on the outboard ends, must be paid out from the offshore bow and quarter. The inboard end of the wire must be made fast to the vessel's bitts. Wire shall be in good condition, of adequate strength and adjusted as necessary throughout loading/discharge operations to keep the eyes at or above the waterline at all times.

Liquors: The transportation of alcoholic beverages inside HOVIC's property is strictly prohibited; consequently, no liquor or beer may be removed from vessels. The only exception to the foregoing is the delivery of bonded stores ordered by the Master for the vessel.

Visitors: No visitors are permitted in the dock area. Only persons on official ship's business are permitted on the piers.

Laundry: Facilities are available to handle ship's laundry.

Mail: Official and personal mail will be delivered on board by the ship's Agent upon vessel's entry.

Mail received for vessels while in port will be delivered on board prior to sailing. Outgoing mail is accepted from Master, provided it is accompanied by a mail transmittal slip to support disbursements.

Supplies and Repairs: Limited supplies of provisions and marine hardware are available on the island. There are no facilities for major repairs closer than San Juan, Puerto Rico. Machine shops in Christiansted and Fredericksted can assist in making minor repairs.

Overloading: Masters are advised that International Laws pertaining to overloading are strictly enforced and they should be guided accordingly.

Vessels shall not arrive or sail overloaded. All expenses incurred in discharging or lightering overloaded cargo will be for the vessel's account. Vessels departing to zones requiring lighter draft may sail with the draft permitted in that zone plus an allowance for fuel and water consumption to the zone limit.

Weather Conditions: The loading and discharging of all crude and petroleum products will be stopped during severe electrical storms.

Loading of gasoline or other similar low flash products will be stopped during periods of calm when the heavy vapours cannot be dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's Officers are cautioned to be on their guard during such conditions.

In the event of abnormal weather conditions in the area, such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters may be told to suspend all operations and proceed to sea until normal weather conditions again return.

Demurrage: Vessels are required to vacate the berth promptly upon completion of cargo handling operations (loading or discharging operations, as the case may be). Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the HOVIC Marine Manager.

If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be held responsible for penalties and demurrage as follows:

(1) To pay dock demurrage at the rate of U.S.$1,000 per hour or a pro-rata share thereof for a fraction of an hour.

(2) To hold HOVIC harmless for any demurrage and consequential damages incurred as a result of any other vessels suffering berthing delays or for any other events resulting from its failure to properly vacate the berth.

The following rules shall govern the determination of demurrage:

(1) 1 hour of free laytime will be allowed after completion of cargo loading operations. This free time will start at the time cargo hoses are disconnected from the ship's manifold on completion of loading or discharging of cargo.

Vessels awaiting cargo papers and/or Customs Clearance must vacate the berth within 1 hour of such completion and move outside to await their papers.

(2) 4 hours free Laytime will be allowed for ballasting after discharge operations are completed.
(3) Ballasting times for VLCC's will be handled on an individual basis for each ship.
(4) Delays caused by the terminal are excepted.

DEVELOPMENTS: Currently there are no planned revisions to the harbour.

AGENCY: Vessels calling at HOVIC's terminal should address all business messages to their Agent. Ship owners and operators may wish to have their vessels represented by HOVIC Marine Agency. The Agency offers a complete and efficient service.

Arrival: The ship's agent is to be advised as to the vessels ETA 72 hours, 48 hours and 24 hours prior to the vessel's arrival. They are to keep the terminal advised at all times.

SHIPMASTER'S REPORT: April 1996.

Vessel arrived in ballast and loaded sulphur in bulk.

Pilotage: On approaching the port, call "Pilot boat" on VHF Channel 11. The Pilot usually boards on bearing 154° × 2.2-2.5 miles from entrance to Limetree Bay Canal from a port tug.

Ships waiting for a Pilot drift and watch VHF Channels 16 and 11.

Documents:
3 copies Crew List (only U.S. blank forms).
3 copies Ship's Stores Declaration.
1 copy Ports of Call during last 6 months.
1 copy Drugs List (if any, medicine).
1 copy Fire Plan.

If vessel visits one time, U.S. crew and ship are checked by U.S. Coast Guard. They watch crew fire and boat drills and check all ship's documents.

Shifting: All shifting near berth is with Pilot and 2 tugs.

Communications: When in berth, vessel must watch VHF Channel 11.

Terminal supplies vessel with Motorola walkie-talkie whilst in berth for contacting Terminal Operator. Call sign "Sulphur Loader".

Agency: Call "HOVIC" on VHF Channel 11, working Channel 10.

Surveyor: Surveyor was on board and watched the loading at all times.

AUTHORITY: Hess Oil Virgin Islands Corporation (HOVIC), P.O.Box 127, Kingshill, St. Croix, U.S. Virgin Islands 00850. *Tel:* 809-778-4000, 778-4494. *Telex:* 3473013. *Contact:* Steven Williams, Port Captain. John H. Frederick, Marine Manager.

Virgin Islands Port Authority, P.O.Box 1707, St. Thomas, Virgin Islands, U.S.A. 00801. *Tel:* (809) 774-2250 (St. Thomas), (809) 778-1180 (St. Croix).

ROAD HARBOUR & PORT PURCELL, Tortola, British Virgin Islands: 18.25 N. 64.37 W. (See Plan)

PORT LIMITS: All the area of water North of an imaginary line drawn from Burt Point to Hog Point (see B.A. Chart 2020).

DOCUMENTS:
Clearance from last port.
Declaration of Health Certificate.
4 Crew Lists.
2 Crew Store Lists.
2 Ship's Stores Lists.
2 Passenger Lists.

PILOTAGE: Only compulsory for vessels of 200 g.r.t. and over, unless a vessel is in possession of a valid Exemption Certificate issued by the Ports Manager. Pilot boards at Port limits after receiving advice from Agents preferably 12 hours prior to arrival. Link calls made through Tortola Radio, Channel 27 in daytime and Channel 16 at night.

Vessels arriving ahead of ETA sound "G" on whistle if unable to advise Agent.

No inward pilotage at night, unless emergency, night Pilotage outwards by special arrangement.

ANCHORAGES: Between Buck Island and Beef Island or immediately South of Port limits, approximately 12 fathoms.

RESTRICTIONS: Anchorage within Port limits prohibited unless authorised by Ports Manager. Max. draft alongside Port Purcell 21 ft.

HEALTH: Customs issue Pratique for vessels with clear bill of health, otherwise request doctor to board on arrival alongside or at anchor.

RADIO: Call sign "Port Purcell" – can be reached by VHF Channel 16. Cable and Wireless maintain a Public Coast Station on Tortola, call sign "Tortola Radio", with an approximate range of 50 miles and provides linked telephone calls between ships and any shore based telephone subscriber. From 0700 hrs. – 1900 hrs. watch is kept on Channel 16, at night for emergencies only.

For distances in excess of 50 miles any other convenient shore station, (eg. Barbados, St. Thomas) that will accept messages for onward cabling or telephoning to Tortola.

TUGS: None available.

BERTHING: Port Purcell quay is 800 ft. long, max. draft 21 ft. at any state of tide, salt water. Ships discharge with own gear.

CRANES: Port Purcell has 1 mobile shore crane, max. lift 8 tons. Prior advice required for use.

MEDICAL: Hospital facilities available, no routine inoculations, etc., required unless specially notified.

DENSITY: Entirely salt water within port limits.

FRESH WATER: Available in limited quantities at Port Purcell, approx. delivery 20 t.p.h. and costs U.S.$14.00 per 1,000 gallons.

FUEL: Diesel only for small vessels delivered by road tanker to Port Purcell, 2 hours' notice.

REPAIRS: Minor repairs only.

SURVEYORS: Available.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: No sealing of tobacco, wine or spirits.

AIRPORT: Beef Island, 7 miles, regular local flights to St. Thoma Puerto Rico, Antigua which connect with several main lines to Europ and the Americas.

TIME: GMT minus 4 hours.

HOLIDAYS: Port Purcell closed Christmas Day, Good Friday an 1st Monday in August.

POLICE/AMBULANCE/FIRE: Dial 999 (emergency). Police statio 43422.

TELEPHONES: Telephones available for use on board ship.

SHORE LEAVE: No restrictions for crews.

IDENTIFICATION CARDS: None required.

DELAYS: None should be expected. Cargo working is geared to ship arrival, irrespective of time and 24 hours continuous working if require

AUTHORITY: Ports Manager and Harbour Master, Road Town, Tortol Virgin Islands.

ST. THOMAS: 18.20 N. 64.56 W. (See Plan

St. Thomas is situated on South side of Island of St. Thomas. It i 1,434 miles from port of New York. Northern side of Island borders o Atlantic Ocean, and Southern side on Caribbean Sea. The Harbour i one of the best in the West Indies, being almost landlocked.

DOCUMENTS:

Quarantine, Customs and Immigration – See "Frederiksted".

Agent:
1 copy Crew List (Form I-418).
1 copy Passenger List (Form I-418).

PILOTAGE: Compulsory and available day and night. Pilot Boat ha letter "P" on deck house and flies International Code flag "P". Pilots w meet vessels 1 to 3 miles outside harbour, boarding via Jacob's ladde

ANCHORAGE: Outer Harbour Anchorage located beginning at Scorpi Rock Lighted Buoy No. 1 (Lat. 18° 19' 25.6" N., Long. 64° 55' 08" W thence 180° 1,580 yards; thence 263°, 2,490 yards; thence due Nor 1,255 yards; thence due East to the Southerly tip of Sprat Point, Wat Island; thence to Cowell Point, Hassel Island, and thence to point beginning. This anchorage is considered good and is about 8 fathom with sand bottom.

RADIO: (a) The St. Thomas Marine Operator will guard the followi throughout 24 hours: Channel 26, 16 VHF, 2009 – 2506 and 2182 k AM, and the upper side band (2010.4 – 2507.4 kHz) of the sa frequency. The Harbour Master's Office maintain a 24 hour watch VHF Channel 16 (working on Channel 12).

(b) Master of every vessel arriving at St. Thomas is required to g at least 24 hours advance notice of arrival to Captain of the Port U Coast Guard – San Juan, Puerto Rico by wireless on 500 kHz or radio telephone 2182 kHz.

(c) Masters are requested to advise Agents their ETA, at least 36 hou in advance. Arrival messages should include cash requirements (lo currency U.S. Dollar) and advice regarding repairs, stores, etc. T information is particularly necessary in the cases of vessel arriving weekends or holidays. For cruise vessels the arrival messages sho also include the number of passengers and crew on board.

(d) While vessels are in St. Thomas Harbour, the Authorities do n permit the use of the ship's radio transmitters.

(e) U.S. Coast Guards: This organisation maintains a small Mar Safety Detachment in St. Thomas to observe, service and effect repa to navigation aids in vicinity of St. Thomas. An 82 ft. Coast Guard Pa Boat "Point Whitehorn" (82364) is attached to the station for prim purpose of search and rescue work. Maintains watch on V Channel 16.

Radio telephone marine information broadcasts, including Notices Mariners, will be made on 2670 kHz, after first making a prelimin announcement on 2182 kHz. Radio telephone urgent and safety broa casts or Marine Information will continue to be made on 2182 kHz

TUGS: Normally not considered necessary for docking, however t are available for docking and undocking ships.

BERTHING: Wharf of the West Indian Company Limited, locate Eastern shore of harbour basin. Wharf is bulkhead type, 2,234 ft. with 600 ft. extension, running N.E./S.W., and is well protecte seaward. Mooring bitts are spaced at intervals of 50 ft. There is a out" in the wharf 950 ft. from N.E. corner, which is 22 ft. wide approximately 3.5 ft. above low water. This ramp is slanting from 8 to 3.5 ft. over a distance of 20 ft. Safe depth alongside from 27 ft. N.E. end to 30 ft. on S.W. end. Bulwark is 8.3 ft. above mean Average difference between high and low tide is 11 in.

Dockage dues are payable to the West Indian Company Limite per tariff.

In the Crown Bay area (access via East or West Gregerie Chan the V.I. Port Authority maintains facilities which include a pier exte 800 ft. from shore with 500 ft. of berthing space on South side and 2 on North side, where ships up to 25,000 g.r.t. can moor. Cont depth presently 38 ft. This pier is used for berthing tourist and vessels only. A curved bulkhead at top of Crown Bay, approxi 900 ft. long, is used for Ro/Ro, container and break bulk c Controlling depth 15 ft. 24-hour arrival notice is required.

Phase II-A of the development at Crown Bay will include a 650 ft. for cargo vessels.

CARGO HANDLING: Containers are handled at the West Indian Company and the Crown Bay area (V.I. Port Authority), but no special gantry cranes are available. Ro/Ro cargo handled at these facilities as well. No liquid chemicals facilities exist here but there is a small privately-owned LPG plant limited to 20 ft. draft and 250 ft. length. Shell uses this facility for gasoline and light diesel. The "T"-pier in Crown Bay is used for the V.I. Water and Power Authority for movement of fuel and water, and Texaco has its own pipeline on the same pier for their products.

STEVEDORES: Discharging and/or loading arranged by the West Indian Company Limited for account and risk of vessels.

Rates of discharging and/or loading dependent on vessel's equipment and stowage. However, following may be considered average:

General Cargo 6 weight tons per gang hour.
Bagged Goods 8/10 weight tons per gang hour.
Lumber 10/12 weight tons per gang hour.

Each stevedore gang normally consists of 12 stevedores (10 on board and 2 ashore), 2 winchmen, 1 signalman, 1 foreman.

MEDICAL: Local hospital is the Knud-Hansen Memorial Hospital, which is equipped with facilities for operations, etc.

FUEL: Bunkers are not available except for small craft.

FRESH WATER: Mostly rain water which when available is supplied by the West Indian Company Limited. This supply is limited and is on an emergency basis only. Water may also be requested from the Government of the Virgin Islands in cases of emergency only. Delivery effected by pipe alongside wharf. Water can be delivered by barge.

HEALTH, CUSTOMS, IMMIGRATION: Refer to Frederiksted.

CONSULS: Following countries have consular representatives in St. Thomas:

Belgium
Denmark
Dominican Republic
El Salvador
France
Haiti
Netherlands
Norway
Panama
Sweden
United Kingdom

AIRPORT: Distance 2 miles. Connections with International flights from Puerto Rico and direct flights from New York, Dallas/Fort Worth and Miami.

TIME: Official St. Thomas time is Atlantic Standard Time, which is 4 hours behind GMT.

HOLIDAYS: The following are legal holidays in St. Thomas: Sundays; January 1st (New Year's Day); January 15th (Martin Luther King); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; The last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 25th (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans' Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President of the Government may by proclamation declare as holidays.

Whenever any holiday falls upon Sunday, the Monday following is a legal holiday.

POLICE/AMBULANCE/FIRE: Police 915; Ambulance 774-1212; Fire 921. Port Authority 774-2250, 774-2333.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands.

Local Port Regulations are similar to those applying in U.S. Mainland Ports.

WEATHER: The weather is usually mild with little wind. Squalls when they occur, usually come from the N.E.

GENERAL: *Gangway:* One aluminium gangway available which is 34 ft. long and 2 ft. 6 in. wide – made with skidding prevention strips only and therefore not recommended for use as a passenger gangway. There is a similar gangway that is owned and used on V.I. Port Authority facilities. Since these are the only gangways; they are made available to vessels on first-come-first-served basis.

Stores: St. Thomas should not be depended upon for large quantities of provisions or deck and engine stores, as practically all commodities are imported making prices higher than United States mainland ports and Puerto Rico. No regular Ship's Chandlers established in St. Thomas, V.I.

Storage Facilities: The West Indian Company Limited undertakes ordinary storage for a limited period of time in 8 transit warehouses, all 14 ft. high with a total floor area of 80,000 sq. ft., plus an additional 9,600 sq. ft. roof covered area. There is also a large uncovered area available for outside storage. Only limited cold storage facilities are available on The West Indian Company's Dock.

Ice: Small quantities may be obtained.

Laundry: Modern laundry service is available.

AUTHORITY: Virgin Islands Port Authority, Office of the Marine Manager, P.O.Box 2216, St. Thomas, Virgin Islands, U.S.A. 00803. *Tel:* (809) 774-2250, 774-2333. *FAX:* (809) 774-0025. *Contact:* Marine Manager.

Western Samoa

APIA: 13.50 S. 171.45 W. (See Plan)

PORT LIMITS: The Customs Act defines the port of Apia as follows: The limits of the said port of Apia shall be a circle of 2 miles radius from the Custom House now existing in Apia and the said port shall include all land, river, and sea included within that circle. The Shipping Act defines the limits of the port in similar terms using the Export Wharf as the centre of the 2 mile radius circle. Both of these features are shown on Chart 2211.

DOCUMENTS:
1 Clearance from previous port of call.
3 Crew Lists.
3 Passenger Lists.
2 Health Documents.
1 Manifest.
Bills of Lading.
Ship's Papers (stores and poisons).
List of Dangerous Goods.

PILOTAGE: 72 hours ETA is required, confirm 24 hours before arrival. Pilotage is compulsory for merchant vessels. Pilot boards 1.5 miles outside harbour on line of leading beacons. Pilot boards from harbour tug.

By night, in addition to usual navigation lights, Pilot boat carries standard identification, i.e. a red light on foremast with all-round visibility. Exemption from pilotage may be granted to Masters of vessels trading regularly to Apia, but pilotage dues are still payable.

ANCHORAGES: In 20 fathoms outside a line drawn between the 2 reefs and preferably on line of leading beacons. Bottom is coral.

RESTRICTIONS: No night-time or tide restrictions. Turning basin dredged to 36 ft. in 1972, extending to 1,200 ft. from each end of the wharf. Arrivals preferred during daylight hours.

MAX. SIZE: Shore bollards to take stern and bow lines for vessels up to 800 ft. in length. Max. draft 35 ft.

Buoy mooring for tankers up to 32,000 d.w.t. consists of 3 buoys with black and red vertical stripes, 1 ahead and 2 astern. Vessel also uses starboard anchor.

HEALTH: Doctor boards vessel on arrival alongside.

RADIO: ETAs should be sent 72 hours before arrival, and confirmed 24 hours before. Signals to incoming ships by radio or radio-telephone from Apia Radio Station 5WA. For radio, ships should call on 500 kHz and operate on 483 kHz. For radio-telephone, ships should call on 2182 and operate on 2162 or other available frequency as may be arranged once contact has been established. Call sign "Apia Radio" repeated.

Apia Radio maintains continuous service, and the Harbour Master can be called on Channel 16 during normal working hours. The tug and pilot launch also operate on Channel 16 .

TUGS: 2 tugs available, *Pualele,* 425 b.h.p. (7 ton pull) and *Tafola,* 2×800 s.h.p. (20.95 tons pull).

BERTHING: Export Wharf – reinforced concrete wharf 604 ft. in length on the East side of inner harbour. Max. depth alongside 36 ft. All loading and discharging is carried out with ship's gear. No wharf cranes available. This wharf and all surrounding areas enclosed by fence is Customs area and all vessels trading to or from places outside Western Samoa must depart from or arrive at this wharf.

New wharf 604 ft. long, vessels up to 800 ft. may be berthed.

There is 250 ft. of berthing alongside the inner face of the Southern arm of the wharf for small ships in deep water.

There are no special Ro/Ro facilities.

Shore equipment: 1×30 ton forklift, 4×25 ton forklifts, 1×20 ton mobile crane and 16×2.5 ton – 7 ton forklifts.

STEVEDORES: Arranged by ship's Agents.

MEDICAL: Advance notice to Agents preferable. Doctors and good general hospital where seamen may be admitted.

There are private medical and private dental clinics of high standard.

TANKERS: Shell, Mobil, and B.P. operating in Samoa, and have own discharging facilities. Tanker terminal situated on West Reef. Discharge line is 6 in. diameter. Launch service may be provided between ship and shore at a small charge.

DENSITY: 1025 – but may alter considerably during rainy season.

TIDES: Mean high water intervals 6 hours 27 minutes, Spring range 3.8 ft., mean range 2.6 ft. Tidal stream normally slight, but after heavy rain outflow from rivers and streams can cause it to become quite strong.

The current across the harbour entrance about 600 m. off the reef can be variable, but is predominantly Westerly and velocities up to 4 knots have been reported but this is not normal.

FRESH WATER: Available at wharf from shore installation.

FUEL: Only light diesel fuel available.

FIRE PRECAUTIONS: Fire services available on wharf, station is 0.5 miles distant.

CONSULS: The New Zealand High Commissioner represents all British subjects; French Consul, Australian High Commissioner, Embassy of the Chinese People's Republic, South Korean Consul, German Consul, United States of America Consul.

REPAIRS: Minor repairs only.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Opened and closed by stevedores.

CUSTOMS ALLOWANCES: No enforcements.

AIRPORT: Faleolo International Airport is situated West from the port, about 34 km., and Fagalii International Airport for light aircraft, situated East of the Port of Apia, is about 5 minutes away.

TIME: GMT minus 11 hours. No alteration to clocks.

HOLIDAYS: No cargo on Sundays from midnight Saturday until 2100 hrs. Sunday. The recognised holidays are Christmas, New Year, Boxing Day, Good Friday, Easter Monday, Monday after Whit Sunday, Anzac Day and Independence holidays from 1st June to 3rd June.

TELEPHONES: Police and public telephones near wharf and provisio are available for telephone connection to tourist vessels berthed at th wharf.

POLICE/AMBULANCE/FIRE: Hospital 21.212; Police 22.222; Fire 99 emergency or 20.404.

EMERGENCY CO-ORDINATION CENTRE: U.S Coast Guar Pago Pago, American Samoa, 80 miles East of Western Samoa.

BANKS: Bank of Western Samoa, P.O.Box 189, Apia, Western Samo Tel: 22 422. Telex: 258.

Pacific Commercial Bank (Affiliate Bank of New South Wales an Hawaii), P.O.Box 192, Apia, Western Samoa. Tel: 22 781. Telex: PC 231.

STORING: See "Prelims".

Republic of Yemen

GENERAL:

CIRCULAR: Extract from the Circular dated 21st June, 1975 from the Hodeidah Port General Corporation.

Information and General Condition:

1. *Payment of Tolls and Dues:*

All charges imposed herein are payable in cash, in advance except in the circumstances in which the General Manager of the Hodeidah Port General Corporation exceptionally agrees otherwise.

2. *Definition to Certain Terms:*

(a) "Vessels" shall deem to refer in the Regulations to every floating craft made to sail on water by its or without its own means, whether or not fit for navigation.

(b) "Working Day": Commences at 0600 hrs. and ends at 1800 hrs. Night: Commences 1800 hrs. ends 0600 hrs. following day. Weekend: Commences Thursday 1200 hrs. and ends Saturday 0600 hrs.

3. *Public Holidays:*

The following occasions are observed as Public Holidays, which commence from 1200 hrs. on the preceding day and end at 0600 hrs. following the holiday:–

1. Weekly Holiday: Friday.
2. Al-Hijra (Moslem New Year): *1st Muharram.
3. Maulid-El-Nabi (Prophet's Birthday): *12th Rabia Awal.
4. Al-Meiraj (Prophet's Ascension Night): *27th Rajab.
5. Al-Shaabania: *15th Shaaban.
6. Idd-El-Fitr (4 days): *1st to 4th Shawal.
7. Idd-El-Adha (5 days): *9th to 13th Dulhijja.
8. Revolution Anniversary: 26th September.
9. 13th June (National Holiday).
10. Labour Day (1st May).
11. Revolution Day (14th October).

*N.B.: For Hijra Calendar dates, the corresponding Georgian Calendar dates will be those proclaimed by the Government of the Yemen.

CIRCULAR: To Owners/Masters.

We quote below text of a Circular dated 21st January, 1979, issued by the General Corporation for Ports and Marine Affairs, Hodeidah, for your information and necessary compliance:

"No vessel, having no workable derricks or winches of her own, shall be received or accepted.

Agents shall be responsible for said obligations and without any liability to the Port General Corporation, in all Yemen Ports.

Due to non-availability of discharging means of floating cranes at anchorage and non-guarantee of available shore cranes, advisable you ensure that all ships calling under your Agency should be fully equipped as required."

PILOTAGE: Pilotage is compulsory on all vessels irrespective of their size, on entry and departure.

NOTICE: The following notice was handed to a Master on arrival at Hodeidah.

Re: *Formalities, Restriction, Breaches & Penalties at Yemeni Ports:*

We are very pleased to welcome you and the vessel under your command at Hodeidah/Raskateeb/Saleef/Mokha, and request you to note and comply with the following formalities/restrictions to avoid payment of penalty.

1. Call Pilot only when you are fully ready in all respects. If Pilot is called to take the vessel out, and the vessel fails to depart after boarding of the Pilot, the vessel will bear all the consequential expenses of (a) Pilot waiting time, (b) Launches assistance charges, (c) unmooring charges, including any other expenses.
2. Fine of Y.Rials 500 to 2,000 is imposed, if Yemen flag is not hoisted on the highest mast.
3. Fine of Y.Rials 500 is imposed, for arrival at Port without prior notice, notifying actual time of arrival of the vessel.
4. Fine of Y.Rials 10,000 to 20,000 is imposed for attempting entry to berthing quay, without prior permission from the Management and without Pilot on board. Same penalty imposed for attempting departure without permission and Pilot, from the quays or inner basins.
5. Fine of Y.Rials 500 to 1,000 is imposed for draining water onto the quays. Vessel also to bear responsibility for losses caused therefrom.
6. Fine of Y.Rials 1,000 is imposed for throwing garbage, cargo remains, food remains, oil, etc. into inner harbour or onto quay.
7. Fine equivalent to 100% of the loss in income to the Corporation is imposed, in the event the vessel submits inaccurate statements on ships particulars and drafts.
8. Fine of Y.Rials 5,000 is imposed, if the vessel leaves anchorage after registration without clearance from the Corporation.
9. Fine of Y.Rials 500 is imposed, if Rat Guards are not provided to avoid rats escaping to the quays.
10. Fine of Y.Rials 2,000 is imposed, if vessel uses her own boats within Port limits without prior permission.
11. Fine of Y.Rials 2 is imposed per hour per metre of LOA of the vessel, for delay in completion of discharging during the duration set out by the Corporation.
12. Fine of Y.Rials 1,000 is imposed on whoever obstructs Corporation's staff/employees in carrying out their duties or insults them.
13. A shore crane will be compulsorily deployed at 100% surcharge to a vessel over 100 m. LOA.
14. Corporation reserves the right of removing any vessel from the quays for any reason in the general public interest.
15. Photography of the Port area is prohibited.

(Notes from Tariff – 1/82 published by Ports & Marine Affairs General Corporation).

Please note that the Port Limits (for Hodeidah) are 14° 55' 34" N., 53° 37' E.

"Pilotage Point" for entrance and departure is Buoy No. 2.

We trust that you will find the above information very helpful to promote cordial relations with all officials and relevant authorities, and at the same time contribute towards reducing expenses of our mutual Principals.

PLEASE NOTE: All the foregoing information was in effect prior to the unification of the country and may have been superceded in recent times.

ADEN, (including Little Aden): 12.48 N. 44.54 E.

DOCUMENTS:

5 Crew Lists for Ship's Agent, Police and Immigration.
5 Passenger Lists for Ship's Agent, Police and Immigration.
2 Lists of Bonded Stores.
1 Health Form to be shown to Pilot on boarding and handed to Ship's Agent.
Manifests, Bills of Lading if landing cargo only.
Ship's Register to be sighted by Pilot.
Arrival Declaration to be filled in by Ship's Agent after arrival.
Dangerous Material Declaration to be handed to Pilot on boarding.

PILOTAGE: Compulsory for all vessels proceeding to and from Inner Harbour and Oil Harbour at Little Aden which exceed 200 g.r.t. To call Pilot fly International Code Flag "G" or red/white/red lights at night. Call "Harbour Control" on VHF Channel 16, or R/T 2182 kHz. 48 hours' notice of ETA with draft to Harbour Office.

Pilot boat will meet ship at the Fairway Buoy in all weathers. Pilot boat is 50 ft. launch painted red, flying Pilot flag by day or white/red lights at night. Pilot will board on lee side of ship by pilot ladder only. Vessels waiting Pilot can anchor anywhere in Outer Harbour except in a Prohibited Area of 2,000 ft. around the Fairway Buoy. All Pilots are Yemenies with foreign-going Master's certificates.

ANCHORAGES: Ample anchorage area available with in Outer Harbour depths from 18 ft. to 54 ft.

(a) Anywhere North of Fairway Buoy clear of Main and Little Aden Channels and clear of Prohibited Area mentioned above.

(b) Deep water anchorage anywhere to S.W. of Fairway Buoy clear of Little Aden Channel and Prohibited Area mentioned above.

MAX. SIZE:

Aden:

(a) Max. length 900 ft., breadth no restriction, depth 38 ft. at datum for vessels taking bunkers from A.B.C. (Aden Bunkering Co.).

(b) Vessels taking bunkers from Y.K.T.C. (Yemen-Kuwait Terminal Co.), max. length restricted to tankers of 750 ft., breadth no restriction, depth 39 ft. at datum.

(c) Larger vessels can be considered on application to the Port Officer. Longest vessel to enter 940 ft.

Little Aden Refinery:

Max. length 760 ft., breadth no restriction, depth 40 ft. at datum and max. deadweight 65,000 tons.

A new jetty 45 m. in length has been constructed on the North side of the oil harbour by Agip Oil Company for use by oil rig supply tugs. Vessels up to 90 m. LOA and 6.1 m. draft can berth on the jetty.

Note: In both harbours vessels manoeuvring require 2 ft. water under keel, and vessels of draft 37 ft. and above require 4 ft. water under keel.

Ballast Draft for Tankers: All tankers when manoeuvring within the port shall be ballasted properly to a mean ballast draft which shall not be less than half the Summer draft and the trim by the stern not exceeding 6 ft. These figures are the minimum for normal conditions and may be increased when conditions necessitate at the discretion of the Pilot.

HEALTH: Vessels requiring Pratique fly International Code Signals or 3 red lights at night. This signal to be exhibited until Pratique has been granted by the Pilot or Port Health Officer.

Control of quarantinable and infectious diseases is direct responsibility of Port Health Officer. All passengers from infected local areas except children under age of one year are required to have valid international certificate of vaccination or revaccination against yellow fever and cholera.

RADIO: All ships landing passengers are boarded by Assistant Port Health Officer unless Radio Pratique has been given. Pratique may be obtained by radio to Port Health Authorities no earlier than 12 hours and no later than 4 hours before arrival, in accordance with international procedure. All landing passengers medically inspected and vaccination certificates checked on board before Free Pratique granted. Ships having infectious diseases on board are also boarded; after examining the case and taking any necessary precautions the Assistant Port Health Officer grants Restricted Pratique. Ships also inspected for issuing Derat Exemption Certificates. Deratting carried out when necessary and Derat Certificate issued.

Radio telephone circuits set up on request at times shown	0400 – 0500 1000 – 1100 1600 – 1700	8805.6 & 4409.4

VHF: 24-hour watch on VHF Channel 16 (working Channel 13) and duplex working on Channel 26.

TUGS: Tugs for both harbours normally join just outside Breakwater. Ships' ropes always used in Aden Harbour, tugs' wires in Little Aden.

6 tugs available in Aden Harbour, maximum 2,000 h.p. In Oil Harbour at Little Aden 2 Voith Schneider tugs of 3,200 h.p. each are available.

BERTHING: (Also see "Tankers" and "Developments"). 24-hour service at all berths.

7 In	T	Dolphin & breast buoys (oil)	750	39

The capital letters in column two denote alternative designation of mooring buoys/dolphins.

New Quay: New quay with length 750 m. and depth 11.0 m. for vessels up to 36,000 d.w.t. Two berths for container vessels and 2 berths for general cargo vessels. The quay will be equipped with 1×40 ton container crane and 6×6 ton semi-portal cranes.

Ro-Ro Terminal: Length 150 m., depth 7.6 m.

Home Trade Quay (H.T.Q.): 800 ft. long with depth of 6.7 m. Max. size of ships that can berth there are restricted to 122 m. LOA and max. draft 5.5 m.

Free zone. Initial Stage 525,420 sq.ft. open space and 162,000 sq.ft. covered space. Import and export industrial facilities. No restrictions, no taxes. Transhipment storage free for unlimited period.

STEVEDORES: ETA advice to Agent at least 48 hours before arrival.

MEDICAL: Advance notice for medical attention not normally required except for serious cases requiring doctor's attendance on board, or ambulance cases. Vaccination certificate required for landing. Hospital facilities available.

TANKERS: Tankers carrying dangerous petroleum (flash point below 73° F) and those not gas free or carrying more than 3 tons of category one cargo (explosives) cannot enter Aden Harbour during hours of darkness. They can enter Little Aden day or night. Slop (residue) discharge facilities available at Little Aden. 4 tanker berths for discharge/loading at Little Aden with max. datum depth of 40 ft.

Berthing at Oil Harbour: Functions of Oil Harbour Little Aden to receive crude oil in bulk for oil refinery and to export refined petroleum products. Vessels carrying cargo for refinery, other than oil, discharge at Inner Harbour.

Oil harbour has finger jetty and 2 T-head jetties which provide berths for 4 tankers. Tankers of up to 65,000 tons Summer deadweight with 55,000 tons of cargo can be accommodated.

Berth	*Type*	*Normal maximum length of ship* (ft.)	*Datum depth* (ft.)
1	Dolphin & mooring dolphins	750	40
2	Dolphin & mooring dolphins	750	40
3	Dolphin & mooring dolphins	750	40
4	Dolphin & mooring dolphins	See "below"	

Berth No. 4: Max. size 110,000 d.w.t. Max. LOA 264 m. Width of channel 220 m., depth 14.75 m. Depth alongside 15.85 m. Daylight berthing on flood tide. Daylight unberthing on suitable tides.

BALLAST: Notice: Port Authority require vessels arriving or sailiing in ballast to have mean draft 50% of Summer draft and maximum trim of 6 ft. by stern. However, should the vessel have segregated ballast tanks then ballast condition must comply with regulation 13 of International Convention for Prevention of Pollution 1973, Protocol 1978. Total deballasting time allowed being 6 hours only. Vessels should have maximum possible ballast clean and capable of being pumped overboard. Dirty ballast and slops can be received ashore at maximum rate of 500 t.p.h.

Signed: Marine Superintendent.
Aden Refinery Company.

DENSITY: Salt water at all times.

FUEL:

(a) A.B.C. (4 berths).
Marine fuel 2500 sec., 1000 sec., 600 sec., 200 sec.
Diesel oil and gas oil.

(b) Yemen-Kuwait Terminal Co.
Marine fuel – all grades below 3,500 sec.
Diesel oil and gas oil.
All supplies done on a Nomination basis through the Company Head Offices, with the vessel giving at least 48 hours' notice Aden.

FRESH WATER: Ample available, delivered by barge in Aden at abo 50 t.p.h. Ordinary water in Little Aden supplied by pipeline at abo 40 t.p.h. and condensate at about 2 t.p.h.

FIRE PRECAUTIONS: As per the Refinery regulations (Internatio Standard). Tug wires to be rigged and check list to be furnished.

REPAIRS: Workshops are equipped to carry out: Boiler repairs; Plat and sheet metal work; Galvanising work/moulding work; Welding a blacksmith's work; Main and auxiliary machinery repairs; Carpentry a joinery work; Electrical and plumbing work; Refrigeration repai painting, cleaning and chipping. Repairs afloat to vessels up 80,000 tons are undertaken; repairs to the largest vessels carried mostly in Outer Harbour.

Radio engineering section with fully qualified personnel giving roun the-clock service of repairs and maintenance to radar and rad equipment.

During repairs, maintenance and painting – no rubbish to be thro overboard, precautions to prevent pollution to be taken. No paint overside to be carried out without written permission from Port Author Chipping and/or scrapping overside strictly not permitted.

DRY DOCK: 1 sideways slipway taking 1,500 tons and floating do lifting capacity 4,500 tons. Length 137 m., breadth 31 m. Max. d 6.0 m.

GANGWAY/DECK WATCHMEN: It is recommended watchmen a employed; they can be supplied by Ship's Agent. Safety net to be rigg

OPENING/CLOSING HATCHES: Normally carried out by stevedor derrick-topping by ship's crew. Vessels not to move in harbour w beams off.

CUSTOMS ALLOWANCES: Tobacco/Wine, Spirit allowance. restriction at the moment. Bonded stores not allowed to be suppl more than 1 hour before ship sails.

REPATRIATION: Arranged through Ship's Agent and Immigration.

AIRPORT: About 5 miles from port. Flights to U.K. via Beirut (Mid East Airlines), Air France, Kuwait Airways, Air India, Ethiopian Airlin Saudi Air and Alyemda also call.

TIME: GMT plus 3 hours. No alteration of clocks.

HOLIDAYS: Most holidays are religious which have movable dat National holidays are 14th October and 30th November. Cargo w usually carried out during all holidays. Friday is a public weekend holi

POLICE/AMBULANCE/FIRE: Ambulance at Crater 53232; Harb Police 22851; Port Health 22626/7; Fire 22222.

TELEPHONES: No connection to ships but link calls can be made VHF through Yemen Communications using Channel 16 to call working on Channel 26. Some Agents have private VHF Channels.

SHIP SUPPLY SERVICE: There are no firms specialised in this fiel Yemen. However, the Yemen Ports Authority has a large fleet of and launches at Aden, and will, in 1985, have 2 Voith Schneider propel tugs, 1 fast pilot launch and 2 mooring launches at the newly constru port of Mukalla-Khalf. These craft are available at all times for render assistance to sick persons on board ships in the vicinity of the ports are also available for crew changes, mail and spare parts delivery.

As to helicopter services, the Yemen Army and Air Force make helicopters available for rescue at sea whenever possible.

SHORE LEAVE: *Regulations:* In accordance with Art. 8 of Immigration Rule No. 28 of the year 1969, all crew members co ashore will be excused from obtaining visa provided they surrender Passports to the Immigration Officer-in-Charge. These Passports w given back to the holders before they return to their particular ves Any crew member unable to comply with these instructions will n permitted to visit the town.

Ships' crew are not allowed to stay ashore after 0000 hrs.

IDENTIFICATION CARDS: Shore pass to be carried at all times ashore.

REGULATIONS: Vessels must fly the National flag of Yeme foremast. No movement of "dangerous petroleum" at night. Ve must vacate oil berths on completion of bunkering. Main engines not be immobilised in an oil berth. Sufficient crew must remain ab vessel at all times to move her.

Ships carrying dangerous cargoes calling at Yemen Ports must the Port Authority concerned not less than 48 hours prior arriva Class 1 dangerous cargo to discharge at Outer Harbour Ancho IMO Class 1 in transit vessel will manoeuvre during day time on

Immobilisation of main engines should not be executed at any before obtaining written permission from Port Authority, through Agent. Same procedure applies for overside hull painting. Applica be through ship's Agent in duplicate. Main engine immobilisatio berths and Home Trade Quay not allowed.

GENERAL: Outer harbour contains ample anchorage area for vessels requiring datum depths up to 54 ft. Inner harbour approached by 2.7 mile dog-leg channel, dredged to 38 ft., from Fairway Buoy in Outer Harbour where Pilots board. Inner harbour protected by breakwater at Steamer Point and by rubble mound. It provides 24 buoy or anchor-and-buoy berths, including 13 with oil bunkering facilities. Majority of these berths have a datum depth of 30 ft. or 38 ft., with max. length of ship ranging from 275 ft. to 750 ft. In addition 3 dolphin berths, with bunkering facilities, of 39 ft. datum depth and normally accommodating ships of 750 ft. – 900 ft. max. length; vessels of greater length can be accommodated with the approval of the Port Officer. Quays and wharves cater for shallower-draft vessels and lighters.

Oil harbour, serving refinery at Little Aden, reached by 38 ft. channel from Fairway Buoy, provides facilities for tankers of up to 750 ft. All berths and anchorages are under the jurisdiction of the Port Officer.

In order to facilitate berthing arrangements for ships calling at Aden, Masters are requested to furnish the Port Authority with the necessary information, such as, LOA, max. draft, g.r.t., type of ship, object of call, dangerous cargoes on board and IMO Classes, ETA and any other information Master thinks may be useful.

DEVELOPMENTS: Newly constructed alongside berths of 900 m. (excluding HTQ) are ready for berthing modern vessels:

2 Container berths (11 m. depth).
2 General cargo berths (11 m. depth).
1 Ro/Ro berth (7.6 m. depth).
1 Home trade quay (800 ft. long with 6.7 m. depth).

Procurement of new cargo – handling equipment:

1 Container gantry crane of 40 tons under spreader and 50 tons with hook.
2 Container handling forklifts of 45 tons each.
4 Forklifts of 2.5 tons (diesel and electric).
6 Tractor units and 20 roll trailers and communications equipment.
3 Container forklift trucks of 35 tons under spreader.
12 Container forklift trucks of 12.5 tons.
5 Forklift trucks of 2.5 tons.
6 Terminal tractors.
12 Terminal chassis (semi-trailers).

Other terminal equipment plus workshop equipment and tools.

SHIPMASTER'S REPORT: 1976

Documents:

Pilot: Sights Ship's Register to check tonnages.
Customs: 2 Crew Lists; 1 Bond List.
Immigration: 2 Crew Lists.
Doctor: 1 Health Form; 1 Vaccination List.

Note: Crew List should have consecutive numbers as well as Agreement numbers.

Agents: 2 Crew Lists; Arrival information sheet; Statement of Owners full address also Cable address; 2 Arrival Declaration for Yemen Ports Authority; 2 Aden Port Log; 1 Charges sheet for Mail; 1 Sailing information sheet; 1 Currency refund sheet.

Agent brings these Forms on board and will assist with filling in the information.

Communications: It was found impossible to make Radio Contact with Aden prior to 5 days before arrival. Best time seems to be after Aden sends its Traffic List. VHF contact was made at 12 miles as the hills around Aden appear to blanket signals when further away. Channels 16, 13, 8 or 6.

Approach: This is straightforward. The B.A. Charts appear to be well up-to-date. The Fairway Buoy is easily seen at 8 miles. Pilot boards here. Pilot ladder required. Authorities will not allow the accommodation ladder to be used.

Mooring: There was a trainee Pilot with both the inward and outward Pilot.

Ship was swung using starboard anchor and 1 tug aft. Berthed at No. 4 Berth. Forward: 3 ropes to buoy on inside plus starboard anchor 5 shackles. Aft: 1 rope from port quarter and 1 from starboard quarter taken to outside buoy, then 2 ropes, 1 from each quarter taken to inside buoy. Ship then hove to be centred between the 2 after mooring buoys. When ship in position oil pipeline, on floats is towed alongside.

Visit: Agent boarded with Doctor. At first Doctor was insisting all had to have Cholera vaccinations but is not really necessary. Immigration and Customs boarded. All pleasant and helpful. Bond was sealed.

Port Facilities: 2 fairly powerful tugs. Numerous mooring boats, 1 floating crane seen but as to lift capacity this was not ascertained. Port is run by The Yemen Ports Corporation. Like the Agency it is State owned.

Watchmen: Agents automatically provide 2 watchmen. Seemed to be alert.

Regulations: Masters are requested to assist the Port Authority by not allowing Bumboatmen or fishermen to board without written permission. The Port Authority advises Masters to be most careful if they do issue written permission. There were no bumboats about and no one seeked permission to come aboard to do business.

One half hour prior to sailing the Pilot signal red-white-red in a vertical line or "G" to be hoisted also call Port Control on VHF 16.

Use of ship's whistles or sirens is very controlled.

Bunkering: Ship's crane used to hoist pipeline aboard. The bunkering operation went smoothly and the Oil people seemed co-operative.

Walport Film Exchange: Agents were cabled but it is necessary for an Officer to go with the Agent to make the exchange.

Mail: Mail posted in London on 22nd March or 23rd March was stamped as having arrived Aden 28th or 29th March.

General: It would seem that the Port Authority, State, etc., are very keen to build up a thriving Port. It would also seem that they endeavour to give a good efficient service. I gather there is a special duty free shop ashore for the purchase of souvenirs, goods, etc.

SHIPMASTER'S REPORT: March 1985.

Documents: See "Fuel".

Pilotage: Harbour Control was called on VHF Channel 16 two hours before arrival and again 4 miles off the Fairway Buoy. Information given from the Harbour Control regarding Pilot and berthing gave the impression of a well organised port. Night signal for a ship requiring Pilot is following: vertical lights, red-white-red.

Radio: From one week before arrival, radio messages were sent via Aden Radio (7OA) to Aden and Ethiopia. Radio Officer told me that Aden Radio proved to be easy and efficient to work with.

Fuel: Bunkering commenced immediately on arrival even before ship cleared by the Authorities. Authorities came on board just before departure to collect Crew Lists and Stores Lists. Crew's cabins were not searched and stores not sealed.

2 men from the Agents were on board to handle ship's matters.

Repatriation: 7 crew members were repatriated to Denmark, and 7 new crew members joined. Tickets for those to be repatriated were brought from Denmark with the joining crew. Crew change went smoothly.

Notices: Yemen Ports Authority – Port of Aden:

Masters are requested to assist the Port Authorities in controlling bumboat traffic as follows:

Bumboatmen and fishermen selling fish *may not* board ships without the written permission of the Master. Disregard of this rule renders the men liable to police action *after* the ship has left when evidence cannot be obtained from the ship. Masters can greatly assist the Authorities if they will ensure that they give written approval to bumboatmen and fishermen whom they have allowed to board the ship.

Port Officer, Aden.

To: All Masters of Vessels in Aden Port – From National Shipping Agency.

The undermentioned information is for your kind attention and guidance:

Immobilisation of Ship's Engines:

Please note that it is an offence to immobilise ship's engines WITHOUT written permission being obtained from the Yemen Ports Authority. To avoid heavy penalty, Masters are advised to forward their requests to us in duplicate, as ship's Agents, and should NOT immobilise ship's engines unless they are in possession of the written permission of the Yemen Ports Authority for the period approved.

Garbage Collections:

Appended below are extracts from Circular No. G/3/128 dated 25th January, 1984, of the Port Officer and Director of Marine Affairs, Yemen Ports Authority, Aden:

(a) Collection and removal of garbage from vessels is entrusted to persons authorised and licensed by the Yemen Ports Authority, Aden, and who work on a rota system.
(b) It is compulsory for a vessel staying in the harbour for a period exceeding 24 hours to avail itself of this service and fees will be collected per day **whether garbage has been collected or NOT.**
(c) Similarly it is compulsory for garbage collectors to call on vessels allocated to them daily unless other arrangements have been agreed with the Master of a ship. Any garbage collector who does not call on vessel allocated to him daily without prior agreement of the Master will not receive his fee that day if reported.

Note: Masters requiring special service for collection of extra garbage, i.e., refuse/wastes, etc., emanating from the cargo holds/engine room, etc., must put their written request in duplicate to us, as Agents, to arrange for the garbage collector to call on their vessel. The Master should also notify us in writing the charges agreed upon for the extra garbage with the Collector. This does not apply to Russian vessels who are required to comply with the procedures below.

For Masters of Russian Ships: Before applying for the collection of extra garbage, please first submit your written request in *4 copies* through the Agent for *approval* of the Resident Representative for Russian ships. Please *do NOT* employ collection of the extra garbage before receiving this approval.

Scraping, Chipping and Painting in the Port:

Please note that as per instructions from Yemen Ports Authority, scraping, chipping and/or painting are *NOT ALLOWED* during vessel's stay in the port, unless prior permission is obtained from the Port Officer through us, as Agents. Any requests for the above must be forwarded to us in duplicate.

Shore Leave – Immigration Regulations:

All shore leave expires at 2300 hrs. and, therefore, all Masters, Ship's Officers, crew and passengers should be on board by this time. Overnight stay ashore is *not permitted.* Infringement of the above will be subjected to penalty and also delay to the ship.

Cash Advance to Master in Yemeni Dinars:

Cash advances required by Masters for payment to their crew in order to enable the crew to avail themselves of purchases from *Tax Free Shop,* require the following procedures to be complied with:

(a) Masters are required to render their requisitions in duplicate to the Agents during working hours together with 2 copies of Crew List.
(b) Either the Master or Chief Officer or Purser in person should have the requisition attested, stamped and signed by the Customs Officer before handing them to National Shipping Co. (the Agents).
(c) Together with the cash to Master the Agents will issue Purchase Certificates on Tax Free Shop.
(d) After completion of the purchases and 24 hours before vessel is due to sail, the Master should obtain *Purchase Clearance Certificate* from Tax Free Shop and hand it over to the Agents. This is most essential as against these Certificates only and after reconciling with the actual cash advanced, the Agents can accept the balance cash refund from Master.

Under the Exchange Control Regulations, it is an offence *not* to return the *UNUSED* Yemeni Dinars prior to sailing. Masters of vessels who received Cash Advance in Yemeni Dinars are advised to return *ALL* Yemeni Dinars remaining in their possession, to our representative who boards to clear the vessel, and ensure to obtain from him *on the spot* an official receipt of the National Shipping Company for the amount refunded, prior to departure of the vessel.

Victualling Allowance:

Free meals to Stevedores' Personnel/Watchmen.

Free meals are normally given by vessels by mutual arrangements between Masters and the Stevedores, to save time of the following persons who otherwise would have to go ashore for their meals:

One Tally Clerk per hatch working.
One Foreman.
One Cargo Supervisor.

It is left entirely to your discretion to supply free meals to the above mentioned personnel and the watchman or not. Kindly, therefore, note that we do *NOT* countersign or vouch expenditures.

Contacts on VHF: Masters of vessels can contact Agents on VHF (Channel 16) at any time during the *DAY* or *NIGHT* for any inquiries or services required. The Harbour Control also can be contacted on the same Channel.

Authorities: All in all the Port Organisation, Pilots, tugs and the Authorities gave us a good impression of the port.

SHIPMASTER'S REPORT: October 1994.

Vessel called at Aden for bunkers and fresh water.

Documents:

Agent:
3 copies Crew List.
Customs:
1 copy Crew List.
2 copies Customs Declaration.
1 copy Crew Declaration.
Immigration:
2 copies Crew List.
Police:
2 copies Crew List.

Arrival Declaration filled in by Agent after arrival. Departure Declaration was also signed for Agent to fill in later for Departure Clearance. No Ship's Certificates were requested by the Agent or the Port Authorities. Immigration officers check passports. Shore leave allowed with Passports/Seaman's Book. Agent and Port Authorities very co-operative and arrival formalities were quick and smoothly carried out.

Agent returned on board prior to vessel's departure to give Port Clearance papers and instructions to call Aden Port Control by VHF Channel 16 for Pilot when vessel is ready to sail.

Pilotage/VHF: When 25 miles from Aden and approaching from the West, Aden Port Control was contacted on VHF Channel 16.

Following information was requested:

Ship's name.
Flag.
G.r.t.
Type of vessel.
Draft.
Last Port.
Next Port.
Agent in Aden.

We were then instructed to call again when vessel was 4 miles off the Fairway Buoy. We reported again when vessel was 4 miles off the Fairway Buoy, and were then informed by Port Control that no arrangements made by our Agent for Pilot to bring the vessel into port. We were then instructed to anchor vessel 2.5 miles S.W. of the Fairway Buoy and to report again when vessel was anchored.

After reporting anchoring time and position back to Port Control, we were then instructed to call our Agent on VHF Channel 16. Agent was then contacted on Channel 16 with working Channel 11. We were then informed by our Agent that as no confirmation from the bank of funds from the Owners received by them yet, vessel will not be allowed into the port and we were to keep VHF watch on Channel 16 for their call again when confirmation was received. Two other vessels were also outside the anchorage who had arrived 2 days before us and were similarly waiting for confirmation of funds from their Owners to the Agents.

Next morning, our Agent called again on VHF to advise that funds had been received by them and vessel could now proceed into port for bunkers and fresh water. Thereafter Aden Port Control called up for vessel to heave-up anchor and proceed to the Fairway Buoy, where the Pilot will board. Pilot boards near the Fairway Buoy with lee side pilot ladder.

For departure, call Aden Port Control for Pilot. Vessel has to inform them that Port Clearance papers are on board and no barges alongside the vessel. Pilot checks the Port Clearance papers after boarding. We were instructed to exhibit the pilot lights (red – white – red) vertically on the masts. As our vessel did not have the lights required, we informed Port Control about it and they were kind enough to disregard the lights. Pilot and mooring gang arrived together 45 minutes later by boat. Pilot disembarks after clearing harbour entrance breakwater and at No. 4 Buoys. We were informed by the Pilot that some of the buoys are unlit, but can be picked-up clearly on the radar. No. 2 and No. 3 starboard green lights were not lit. Similarly No. 1 port red light was not lit. The Fairway Buoy could not be seen to be lit also.

Mooring: Vessel berthed starboard side alongside dolphin berth with bunkering facilities, but which were not used during bunkering. One tug and 2 mooring boats meet the vessel near the berth, but the tug was not used. Port anchor was let-go while coming alongside with 1.5 shackles out. 3 mooring ropes were used forward and aft, 2 ropes as springs, 2 ropes as stern lines to the dolphin berth, and remaining 2 ropes also as stern lines to buoys forward and aft of the dolphin berth. Pilot disembarks to the mooring boat after vessel is all fast alongside.

During departure, one tug is made fast at the stern with ship's line. All lines were cast-off and the port anchor heaved-up with the tug aft pulling the stern of the vessel, away from the berth. When the port anchor was aweigh, engines were used with astern movements to swing the vessel round to starboard to face the entrance harbour breakwater. T was then cast-off from the stern.

Fuel: The gas oil bunker barge came alongside the vessel on the p side soon after vessel was made fast. Bunkering was commen immediately on arrival, even before ship was cleared by the P Authorities. Minimum amount of gas oil to be supplied was 35 to Bunkering went smoothly.

Fresh Water: The fresh water barge also came alongside and made t forward of the bunker barge. After completion of bunkering and t bunker barge had cast-off, the fresh water barge moved aft to take place and commenced to supply fresh water to the vessel. Capacit the fresh water barge was approximately 200 tons. Supply was ma using normal canvas hose, and there were 3 supply outlets to supply different tanks on board our vessel simultaneously. We were inform by the Agent that there are 3 fresh water barges in Aden port, but o one is available to suppply fresh water to the vessels in port, as t other 2 barges were undergoing repairs at the time. Cost of fresh wa is U.S.$ 4.00/ton.

Notices and Circulars: Also see "Shipmaster's Report" dated Ma 1985 – "Notices". These notices are still in effect.

AUTHORITY: Yemen Ports Authority, P.O. Box 1316, Tawahi, Ad Yemen. *Tel:* 22666. *Telex:* 2278 Mawany Ad. *Cables:* Mawa
Contact: Mohamed Ahmed Ali, Director General.

ASH SHIHR TERMINAL: 14.41 N. 49.31 E. (See Pla

LOCATION: The Ash Shihr Petroleum Export Terminal, operated Canadian Occidental Petroleum Yemen, is located on the South coastline of the Republic of Yemen, approximately 230 nautical mi East of Aden.

The Terminal area is delineated by a circle 3 miles in radius from t SPM.

ACCEPTANCE: *Terminal Terms of Acceptance:* The Mooring Mas will give the Master of the vessel a Terminal Rules and Regulati booklet and duplicate copies of documents entitled "Ash Shihr Petrole Export Terminal Conditions of Use", "Ship/Shore Safety Check List" a "Safety Requirements". These documents specify the conditions of and safety requirements which must be satisfied.

The Master must personally sign the "Conditions of Use" docum before the Terminal Operator will accept the vessel.

NAVIGATION: The location of certain navigational and mooring facil is given by the following coordinates:

(i) SPM Position: Lat. 14° 40' 35" N., Long. 49° 31' 16" E.
Navigation Light – white "U", visible 3 miles.

(ii) Navigation Buoys: Permanent navigation lights are exhibited on 2 navigation buoys marking the 27.4 m. (90 ft.) water depth sea contour – Fl. Y. 5 sec. with radar reflectors.
Positions of the buoys are given hereunder:

East Buoy:	Lat. 14° 41' 15" N.,	Long. 49° 31' 10" E.
West Buoy:	Lat. 14° 40' 55" N.,	Long. 49° 30' 31" E.

(iii) Service Tug Mooring Buoys:
Mooring Buoy "A" – Lat. 14° 41' 08" N., Long. 49° 29' 30" E.
Mooring Buoy "B" – Lat. 14° 40' 50" N., Long. 49° 29' 30" E.

Masters of vessels are advised that no Anchorage Are warranted as being suitable by the Terminal Operator.

Seabed soil characteristics within the Terminal area are Dolo Limestone, and is not suitable for anchoring vessels.

Masters of vessels must not attempt to anchor within the Term area.

All attempts to anchor their vessel is at their own risk, and m be well clear of the Terminal and its facilities.

The Terminal Operator will have no liability whatsoever for claims, charges, damages or losses of any nature or kind inc by or in any way relating to anchoring of vessels.

Navigational Chart: The location of the Terminal is indicated on following navigational chart:

British Admiralty Chart No. 3784, titled – Ra's Al Kalb to Ra's Ma

Approach to Terminal: Approach to the Terminal is direct from the sea.

DOCUMENTS: Upon arrival at the Terminal, the following docum will be required by the Republic of Yemen Government Authorities vessel will be boarded by the ship's agent who will collec documents):

3 copies Crew List.
2 copies Personal Effects Declaration.
2 copies Bonded Stores List.
1 copy Last Port Clearance (original).
1 copy Maritime Declaration of Health.
2 copies Cargo Manifest.
2 copies Vaccination List.

Documentation required by the Terminal Operator is as follows:

Signed "Conditions of Use" letter (by Master).
Signed Ship/Shore Safety Check List.
Signed Safety Requirements.
Signed Non-Intrinsically Safe Equipment.
Signed Notice of Readiness Notification.
Signed Agreement for Agent to sign documents (EDP).
Signed Foc'sle Watchkeeper.
Copy of a current TOVALOP Certificate.
Copy of a current CLC Certificate.

TOVALOP: Each vessel which is to load at the Terminal m currently enrolled as a member of the Tanker Owners Vo Agreement Concerning The Liability For Oil Pollution (TOVALOP must provide a valid TOVALOP Certificate to the Terminal Oper the Terminal before being accepted to load.

Pollution Insurance: Each vessel which is to load at the Terminal must have Protection and Indemnity Insurance in force and effect that provides the standard $500,000,000 pollution coverage and the available $200,000,000 excess pollution coverage, and must provide documentary evidence to the Terminal Operator at the Terminal before being accepted to load.

Shipping Documents: The Terminal Operator prepares all cargo related documentation, including: Bills of Lading, Quality & Quantity Report, Cargo Manifest, Certificate of Origin, Tanker Time and Loading Report, Ship's Ullage Report, and Receipt for Documents and Samples. The Terminal utilises an "Early Departure Procedure" (EDP).

Bills of Lading are based on shore metered quantities and will be dated according to the time of completion of loading. No amendment to any Bill of Lading is permitted.

Letters of Protest: Any Letters of Protest must be signed by the Master and dated and endorsed with the ship's stamp. The Mooring Master has the authority to receive all letters, without prejudice.

PILOTAGE: *Compulsory Pilotage:* A Mooring Master and his assistant provided by the Terminal Operator will board an arriving vessel approximately 2 miles seawards of the SPM.

Use of the Mooring Master is compulsory.

A combination of accommodation ladder/pilot ladder should be rigged on the leeward side, 1.0 m. above sea level.

Mooring Master: A Mooring Master will remain on board the vessel to coordinate the loading operation throughout the vessel's stay. The Master of the vessel must provide the Mooring Master, his assistant, the Cargo Inspector and possibly an Oil Ministry representative with full messing and accommodation, equivalent to that enjoyed by the vessel's officers.

ANCHORAGE: No suitable anchorage (See "Navigation").

RESTRICTIONS: See "Berthing" – "Terminal Operations".

MAX. SIZE: The Terminal is capable of accepting vessels of the following deadweight tonnages:

Maximum – 400,000 tonnes d.w.t. (with loading restricted to 260,000 tonnes d.w.t.).
Minimum – 80,000 tonnes d.w.t.

RADIO: *Pre-Arrival Information:* Masters are advised that there is no provision for vessels to discharge ballast to the shore facility. No oil contaminated ballast from cargo or permanent ballast tanks is permitted to be discharged into the sea. Vessels arriving with clean ballast in cargo tanks will be required to retain on board at least the last meter in each ballasted tank.

Masters are advised that the Terminal utilises a compulsory "Early Departure Procedure" which will be fully explained on arrival.

The Terminal Operator must be provided with answers to the following questionnaire, 3 days prior to the vessel's arrival at the Terminal:

AAA ETA.
BBB Cargo requirements in barrels at 60° F.
CCC Maximum and minimum loading rates.
DDD Quantity and type of ballast on board to be discharged at this Terminal.
EEE Can vessel load and deballast simultaneously while maintaining a minimum two valve separation?
FFF Deballasting time prior to commencement of loading.
GGG Number and size of cargo manifolds. Do they comply with OCIMF "Recommendations for Oil Tanker Manifolds and Associated Equipment" 4th Edition 1991.
HHH Availability of two reducers to adapt port side manifold to suit 16 in. 150 ANSI loading hoses.
JJJ Whether Inert Gas System is operative and percentage oxygen level in cargo tanks, prior to arrival at Terminal.
KKK Is vessel equipped with one or two bow chain stoppers capable of accepting a 76 mm. chain.
LLL Does foc'sle mooring arrangement comply with OCIMF "Recommendations for Equipment Employed in the Mooring of Ships at Single Point Moorings" 3rd Edition 1993.
MMM SWL of cranes or derricks.
NNN Last port and destination.
OOO Name of Pollution Insurers.
PPP Summer Deadweight Tonnage.
QQQ Arrival Displacement. Sailing Displacement.
RRR Arrival draft. Sailing draft.
SSS Nationality of officers and crew.
TTT Master's name.
UUU Other.

Your attention is drawn to the serious view of pollution taken by the Terminal Operator. Fines may be imposed by Government Authorities to which will be added the cost of any clean-up operations. You are responsible to ensure that crew members cause no pollution during the vessel's stay at the Terminal. Principal pollution causes include leaking sea and overboard discharge valves and cargo or bunker overflows. Prior to arrival, sea discharge valves must be flushed and deck scuppers must be plugged.

VHF: *Information to Masters – Communications Procedure:*

1. The primary means of communications between the tanker and the Terminal control room during loading is VHF Channel 9.
2. The call sign of the Terminal control room is "Operations Control".
3. The secondary means of communications is by private UHF radio (Channel 1), which is in use by Terminal personnel. A handheld radio which operates on this private channel will be made available to the tanker duty officer during loading.
4. An emergency stop of loading by the tanker will be activated by the words "Operations Control, Emergency Stop" and repeated until acknowledged by the Terminal control room.
5. Regular communications checks between tanker and Terminal control room must be made during loading. It is procedure that tanker and Terminal duty personnel will exchange cargo figures frequently, usually at hourly intervals, and this practice will also serve as a communications check.
6. The Mooring Master has a marine VHF radio with him at all times. He can be contacted by the tanker duty officer on Channel 9, if required.

TUGS: A tug is available at the Terminal. The Operator will require that the tug be in attendance throughout operations. A ship's rope must be provided at the stern of the vessel for the tug to connect to, after berthing is completed.

BERTHING: Terminal's Facilities:

SPM Buoy: The 12 m. diameter Single Point Mooring buoy is moored in approximately 45 m. water depth. A small boat harbour is provided for the use of Terminal support craft only.

Loading Hoses: Each 20 in. loading hose string tapers to a 16 in. diameter tanker over-rail hose, to which is secured a shut-off valve, Camlock coupling, hand-off chain and pick-up rope.

Lifting Equipment: Vessel's hose lifting equipment shall be Safe Working Load certified and rigged to handle at least 12 tonnes.

Mooring Systems: The mooring system is comprised of two endless grommet 17 in. circumference mooring ropes each with a single U3 grade 76 mm. chafing chain.

Mooring: *Provision of Mooring Equipment:* Vessels must be equipped with mooring equipment in accordance with the OCIMF "Recommendations for Equipment Employed in the Mooring of Ships at Single Point Moorings", 3rd Edition 1993.

Panama Lead Size: Panama leads and chain stoppers must accept 76 mm. diameter chains.

Messenger Lines: The vessel must supply at the bow, 2 floating messenger lines of 25 mm. minimum diameter and minimum 50 m. long.

Terminal Operations: *Hours of Operation:* The Terminal operates 24 hours a day, prevailing weather conditions permitting. During the S.W. Monsoon season, berthing may be restricted to daylight only.

Berthing at night will be at the discretion of the Terminal, and dependant upon the location of the vessel's ballast.

Berthing on Arrival: Government officials may board the vessel with the Mooring Master and his assistant. The vessel's Agent will usually board with the Mooring Master.

Communications: Pre-arrival information is required by fax directly to the Terminal (See "Radio").

Arriving vessels can contact "Ash Shihr Terminal" on VHF Channel 16. Working channel is Channel 9 (See "VHF").

Notice of Readiness: Shipmasters may tender Notice of Readiness on arrival by contacting Ash Shihr Terminal, if the vessel is ready in all respects to load.

Acceptance of the Notice of Readiness: Notice of Readiness will be accepted by the Terminal Operator, subject to the following conditions:

(a) The Terminal is open.
(b) That the Estimated Time of Arrival (ETA) has been advised to the Terminal, 72 hours, 48 hours, 24 hours and 12 hours prior to arrival, and Masters have advised the Terminal of any change of ETA in excess of 3 hours.
(c) That the vessel complies with the Terminal Rules and Regulations. *The level of oxygen in the inerted tanks will be checked by the Mooring Master prior to proceeding to the berth.*

LOADING: *Safe Loading:* Safe operations, and continuing compliance with the Terminal Rules and Regulations on board the vessel throughout the vessel's stay at the Terminal, is the Master's responsibility.

Suspension and Stopping of Loading – See "Combination Carriers (OBO)": The Master may suspend loading at any time. A minimum of 15 minutes notice is required prior to change of loading rate or suspension or completion. Emergency stops excepted.

The Mooring Master and the vessel's Master must liaise as to the amount of cargo that will be received on board the vessel after the shore pumps have stopped. The Terminal Operator will not be responsible for any overloading that may occur. There is no capability to pump excess cargo back to the Terminal storage tanks.

Ship and shore quantities will be verified at regular intervals throughout the loading, usually hourly.

Closure of Vessel's Valves: The vessel's loading system valves must never be closed against the Terminal's loading pumps. After completion of loading, the Terminal Operator will notify the vessel through the Mooring Master, when it is safe to close the manifold valves.

Loading Rates:

The minimum loading rate is 15,000 bbls./hr.
The maximum loading rate is 60,000 bbls./hr.

Loading at the SPM: *Manifold Connections:* 2×16 in. 150 ANSI rated loading manifolds must be prepared on the port side. The manifold must comply fully with the OCIMF "Recommendations for Oil Tanker Manifolds and Associated Equipment" 4th Edition 1991.

Special Requirements for Vessels at the Terminal: The vessel's firemain must be pressurised at all times with 2 hoses with foam delivery nozzles connected to foam hydrants available for emergency use. Records must be at hand to show that the foam system is in good working order and functions correctly.

Two hand-held dry chemical extinguishers must be available close alongside the loading manifolds.

Combination Carriers (OBO): Particular care should be taken when loading or discharging liquid cargo from combination carriers and when handling ballast on such ships to ensure that the total free surface effect of cargo and ballast is kept within safe limits, otherwise a sudden, and possibly violent, change of list could occur.

In compliance with Government requirements, all combination carriers are supplied with stability data and loading and unloading instructions. These instructions should be carefully studied and followed. Generally, these instructions will specify a maximum number of cargo holds or tanks which may be slack at any one time. Sometimes it may be necessary to adjust the quantity of cargo to be loaded in order to avoid slack tanks. Where double bottom tanks extend across the whole width of the vessel, the free surface effect of water in these tanks will be as great as that of full width cargo holds and account must be taken of this fact.

Before arriving at the Terminal, a plan must be prepared for the anticipated loading sequence, bearing in mind the free surface effect and distribution of cargo, fuel and ballast at all stages of the operation. This plan must be discussed with the Mooring Master prior to the commencement of loading or deballasting.

If a loss of stability becomes evident during loading, all cargo and deballasting operations must cease and a plan prepared for restoring positive stability. This plan must be discussed with the Mooring Master prior to implementation.

Double Hull Operations: Single hull tankers usually have such a high metacentric height in all conditions of loading and ballasting that they can be considered as being inherently stable. Whilst tanker personnel have always had to take account of longitudinal bending moments and vertical shear forces, the actual stability of the ship has seldom been a prime concern. However, the introduction of double hulls into tanker design is likely to change that situation.

The main problem likely to be encountered is the effect on the transverse metacentric height of liquid free surface in the cargo and double bottom tanks.

Depending upon the design, type and number of these tanks, the free surface effect could result in the transverse metacentric height being significantly reduced. The situation will be most severe in the case of wide cargo tanks with no centreline bulkhead, and the so called "U" ballast tanks which have no centreline bulkhead.

The most critical stages of any operation will be whilst emptying the double bottom ballast tanks during loading of cargo. If sufficient cargo tanks and double bottom tanks are slack simultaneously, the overall free surface effect could well be sufficient to reduce the transverse metacentric height to a point at which the transverse stability of the ship may be threatened. This could result in the ship suddenly developing a severe list. Large free surface area is especially likely to threaten stability at greater soundings (innages) with associated high vertical centre of gravity.

It is imperative that the tanker and Terminal personnel involved in cargo and ballast operations are aware of this potential problem, and that all cargo and ballast operations are conducted strictly in accordance with the ship's loading manual.

Where they are fitted, interlock devices to prevent too many cargo and ballast tanks from being operated simultaneously, thereby causing an excessive free surface effect, should always be maintained in full operational order, and should never be over-ridden.

Ships which operate with limited metacentric height should be equipped with a loading computer which calculates metacentric height.

EARLY DEPARTURE PROCEDURE: *Information to Masters:* The Early Departure Procedure as adopted at Ash Shihr Petroleum Export Terminal is explained below:

1. Masters should be aware that the Early Departure Procedure is compulsory at the Terminal as all Companies lifting cargo have been informed. In any case, on arrival Masters are requested to sign a letter which is an agreement in principle to the procedure.
2. On completion of loading, cargo hoses will be disconnected and the vessel unmoored from the SPM.
3. Concurrent with (2) above, vessel's tank ullages, water dips, etc., will be taken. Usually this practice is completed prior to unmooring operations.
4. The vessel will be manoeuvred to a safe position which is to seaward of the SPM and then stopped to await shore cargo figures.
5. Shore cargo figures will be passed to the vessel from the Terminal by VHF radio. *These figures represent the Bill of Lading figures.* The ship's cargo figures will be passed to the Terminal by radio by the Mooring Master. If there is no dispute over the difference between ship and shore cargo figures, then the vessel is free to sail. In case of a dispute, the respective cargo figures will be recalculated and compared once before the vessel is released. If the Master chooses to issue a Letter of Protest, this will be received by the Mooring Master.
6. *No cargo documents will be placed on board the vessel, either in completed or blank form.*
7. All cargo documents which require Master's signature will be signed by the vessel's Agent after the documents have been prepared by the Terminal, which will be after the vessel's departure. Authorisation to sign cargo documents is a matter between the Master and the vessel's Agent.
8. Copies of the signed Bill of Lading and Q & Q Certificate will be sent by fax to the vessel. If the vessel does not have a fax, the Master can nominate a fax number to which they can be sent.
9. Master's copies of cargo documents are forwarded to the discharge port by courier.
10. An outward clearance certificate for the vessel is issued by the vessel's Agent when he attends the vessel.

BALLAST: *Discharge of Ballast:* The discharge of dirty or contaminated ballast is strictly forbidden. *The Operator will have no liability whatsoever for any deadfreight incurred due to retention of ballast or any other residues. No ballast reception facilities exist at the Terminal.*

Clean Ballast: Clean Segregated Ballast (SBT) may be discharged to the sea at any time. The Mooring Master will check that vessels with Cargo Tanks dedicated to Ballast (CBT) comply fully with MARPOL Regulations and that complete segregation exists between the ballast and cargo systems before approving deballasting.

Ballast in Cargo Tanks: Vessels which arrive with Ballast in the Cargo Tanks will only be permitted to discharge ballast during daylight hours. In addition, the last one (1) meter of ballast in each tank must be retained onboard. Discharge of the ballast must be monitored to comply with MARPOL regulatory limits of 15 ppm.

Simultaneous Deballasting and Loading: Discharge of CBT or Cargo Tank Ballast concurrently with loading will only be permitted if the ballast is segregated by a minimum of two valve segregation. In addition, the draft and trim must be maintained in a condition whereby emergency evacuation of the berth can be achieved. The Terminal Operator accepts no responsibility for the mixing of crude oil and water onboard the vessel.

MEDICAL: Medical and dental services are not available at the Terminal, except in an emergency.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: The nearest consuls are in Sana'a.

REPAIRS: No facilities available.

AIRPORT: The nearest airport is at Riyan, approximately 10 km. W of the Terminal.

REPATRIATION: Crew changes cannot be carried out at the Term No member of the ship's crew or passengers is permitted to land, exc in an emergency.

GENERAL: *Lifeboats:* Except for an emergency abandonment of vessel, no vessel shall lower its lifeboats to the sea.

Waste and Garbage: Disposal of waste, sewage waters or garbag the sea is forbidden. No facilities exist to receive waste material, garb or sewage waters at the Terminal.

Vessels alongside the Loading Vessel: Only vessels authorised by Terminal Operator are allowed alongside, while deballasting and loa operations are in progress.

Standards of Operations: Loading operations are conducted accordance with the following standards and recommendations:

- (a) Oil Companies International Marine Forum (OCIMF), Internatio Chamber of Shipping (ICS), International Safety Guide for Tankers and Terminals (ISGOTT) 4th Edition 1996.
- (b) Special emphasis on the OCIMF "Recommendations for Tan Manifolds and Associated Equipment" 4th Edition 1991, and OCIMF "Recommendations for Equipment Employed in Mooring of Ships at Single Point Moorings" 3rd Edition 1993.
- (c) International Agreement for the Prevention of Pollution of 1973 its Protocol of 1978 (MARPOL 73/78) as amended 1992.
- (d) Ash Shihr Petroleum Export Terminal Rules and Regulat (Latest Revision).

Draft upon Arrival: Vessels must arrive at the Terminal with suffic ballast/cargo on board, to ensure safe manoeuvring of the vessel be trimmed no more than 4.0 m. by the stern and with propel submerged. Vessels will not be berthed with excessive trim or insuffic ballast.

Handling of the Equipment Supplied by the Terminal: Equipment supp by the Terminal will be taken on board from a line handling boat, us the vessel's lifting equipment. The vessel's crew must be availab receive equipment and connect the loading hoses. A "tag line" mus provided on the cargo hook.

State of Readiness: The vessel's main engines and essential machin must be ready at all times in order to allow immediate vacation of berth.

Mooring Master Authority: The Mooring Master can instruct any ve to leave a berth.

Vessel's Officers and Crew: A ship's officer with an adequate comm of English and sufficient qualified crew must always be available a times for operational requirements and emergencies.

Deployment of Emergency Towing Wires: All vessels must de emergency towing wires forward and aft on the starboard side.

Ship's Agents: Ship's Agents must be registered with the approp Government Authority.

Disembarkment: The embarkation and/or disembarkation of c members and passengers as well as foodstuffs, provisions, fuels different types of commodities using the Terminal facilities is st forbidden.

Any of the aforementioned services will be supplied by the Sh Agent with his own resources and through his own means, either be or after loading operations.

Only in cases of approved emergency, or for humanitarian reas or for special circumstances as approved by the Terminal Operator on whatever terms and conditions the Terminal Operator may imp can the vessel personnel embark or disembark at the Terminal. In th cases, the Terminal Operator can provide transportation for the embarkation or disembarkation.

Provisions: The vessel cannot take on stores or provisions at Terminal.

Mail and Correspondence: Official communications and crew mai be handled by the Ship's Agent.

Foc'sle Watchkeeper: While the vessel is moored at the facility, i requirement that the position of the vessel in relation to the SPM i is continuously monitored by vessel personnel.

Please ensure that a competent watchkeeper is continuously po on the foc'sle throughout the entire period that your vessel is moo

The watchkeeper must receive clear instructions that he shall in the Officer-on-watch *by radio* when the vessel moves into a po closer than usual to the SPM buoy.

SHIPMASTER'S REPORT: December 1993.

Location of SBM: Lat. 14° 40.6' N., Long. 49° 31.3' E.

Pilot: Pilot boarded 2 miles South of SBM.

Anchorage: None. Vessels must drift when awaiting berth.

VHF: Terminal works on Channel 9.

ETA: Sent by FAX/Inmarsat to 871-1473113 or 871-1473150, 10 72 hours, 48 hours, 24 hours and 12 hours prior to arrival.

Arrival Information: The Terminal requires the following inform 3 days prior to arrival:

- (A) ETA, arrival and sailing drafts.
- (B) Cargo requirement in bbls./tonnes.
- (C) Slops, location, grade, API, previous cargo.
- (D) Quantity and location of ballast in cargo tanks.
- (E) Last port and destination.
- (F) Whether IGS is operative and percentage of oxygen level in
- (G) Name of pollution insurers.
- (H) Gross, Net and Summer d.w.t.
- (J) Max. loading rate.
- (K) Deballasting time.
- (L) Number and size of cargo manifold.
- (M) Availability of reducers to adapt manifold to 16 in. 150 ANSI (two are required).
- (N) Can vessel load and deballast simultaneously while main minimum two valve separation.

(O) Is vessel equipped with a patent AKD stopper or similar, capable of accepting a 76 mm. end link.

(P) SWL of derricks.

(Q) Nationality of Officers and crew.

Documents:

5 copies Crew List.
1 copy Vaccination List.
1 copy Customs Declaration.
2 copies Bond Stores List.
1 copy Last Port Clearance.
3 copies Arrival Information (Form).
3 copies Sailing Information (Form).
1 copy Master's Authorisation Letter for EDP.

Agent: Natship Aden (Telex 2216/2217).

Cargo: Masila Crude Oil. API 31.0 – 31.9. Temperature 98°F.

Loading: Max. rate 60,000 bbls./hr.

Hoses: 2×16 in. on port side.

Officials: Customs and Immigration do not visit.

Local Agent boards with Clearance and EDP forms.

Duty Pilot and an assistant, together with a surveyor, stay onboard all the time.

Moorings: 2×18 in. nylon ropes, bow stoppers required.

SHIPMASTER'S REPORT: April 1994.

B.A. Chart No. 3784 is barely sufficient to approach the port, but insufficient to approach the SPM.

B.A. Chart No. 10 shows only a plan of the port of Ash Shihr, a small port 6 nautical miles N.E. of the SPM.

VHF communication was established at a distance of 35 nautical miles to the S.E. of the Terminal, at greater distances, atmospheric disturbances made contacts impossible. Channel 9 is the working channel for loading operations and is manned 24 hours a day.

National Shipping Agency, Aden, was reached via their telex numbers (806) 2216 YD and (806) 2217 YD, but at no time were answers obtained in spite of repeated requests to give details about the Terminal and berthing prospects, and confirmation of telex receptions. The only time communications with the agency were established was when the Radio Officer listened to Aden Radio traffic list, where a message asked for calling the agency's telex machine, only a standard message was received giving the same questionnaire and information contained in the "Guide".

The Mukalla branch of Natship, in charge of Ash Shihr Terminal, was as ill-informed by the head office as the vessel itself, and was of no help to the vessel. The Agent boarded together with the Pilots, filled out some papers for the authorities who are said to never board a vessel, and left with an authorisation to sign cargo papers on Master's behalf. He actually requires all the papers mentioned in the "Guide".

There are 3 European Pilots, contracted to Ash Shihr Terminal, of whom two bring the vessel to the SPM. After commencement of loading, one of the Pilots leaves while the other stays onboard as Loadmaster.

While Pilots were very competent, though cautious, on approaching and mooring, the local crews seemed to need a lot more training and experience.

Current on this occasion was setting N.E. at 1 knot, while drifting over night at a distance of more than 7 nautical miles from the coast, whereas when approaching the SPM and while alongside, the current was 2 knots, keeping the vessel's heading at a constant 245°.

Wind was varying and never more than Force 3.

Although berthing/unberthing will take place day and night, in view of the handling crews' lack of experience, Terminal seems to prefer daylight berthing during strong currents and when there is no time pressure. An average of 6 ships a month are handled at the Terminal, which opened in July 1993.

Masila Crude of API = 31.00 and temperature = 102°F (39°C) is loaded on port side through 2×16 in. floating hoses, at maximum rate of 60,000 bbls./hr., the maximum rate normally reached being only 57,000 bbls./hr.

Hose connecting/disconnecting very fast with the assistance of an experienced local Mooring Master.

Saybolt's cargo inspector was very professional.

Cargo figures were calculated by Terminal very quickly.

EDP described in the Terminal Information Book was not followed by the Terminal, viz. documents were not placed on board. Instead they were to be faxed to vessel, which never happened.

AUTHORITY: *Operator:* Canadian Occidental Petroleum Yemen, P.O.Box 52137, Mukalla, Hadhramout, Republic of Yemen. *Tel:* 1-403-234-6099 + 0 (Terminal switchboard), (873) 1473112 (Inmarsat), 967-79-59008/59009 (Cellular). *FAX:* 1-403-234-6456, (873) 1473113 (Inmarsat). *Contact:* Mike Keiller, Terminal Manager.

Ash Shihr Petroleum Export Terminal: *Tel:* (967-79) 21509 or 21525 or (967-2) 241175. *Telex:* (871) 1473113 (Inmarsat – East Atlantic). *FAX:* (871) 1473150 or 1473113.

HODEIDAH: 14.48 N. 42.55 E. **(See Plan)**

Also see "General" before first port.

FLAG: It is essential that from the time they enter Yemen territorial waters all vessels fly the Yemen flag and this should be flown continuously until they leave these waters on sailing. Failure to observe this courtesy may result in a heavy penalty. The design of the flag is red, white and black horizontal stripes of equal size with green star in centre of white stripe.

DOCUMENTS: On arrival 16 copies of Manifests of cargo for discharge are required and each must be endorsed with the word *Correct* by the *Customs Authorities* at the Port of Loading. It is imperative that at least 2 of the 16 copies of Manifests on board the ship should be freighted copies, otherwise 2 additional copies, showing freight details should be airmailed to Hodeidah separately to arrive in advance of the vessel. The Master should also be in possession of 1 copy of each Bill of Lading and certificate to show vessel is not blacklisted.

PILOTAGE: Pilotage is compulsory and as the entrance of the Channel giving access to the Port cannot be observed from the port area itself it is essential that accurate ETAs be given to the Agent in order to avoid delays waiting for a Pilot.

Vessels will be piloted down a dredged channel of about 8 miles in length. The channel, which is buoyed with black starboard and red port buoys, is 7.5 m. deep and 100 m. wide.

Pilot boarding position: Lat. 14° 56' N., Long. 42° 54' E.

ANCHORAGE: Masters are also recommended to ensure that on arrival they anchor off the entrance to the new port to await the Pilot and do not anchor off the old port opposite the town some 5 miles to the South and which is still shown as being the Port of Hodeidah on some charts. Vessels anchoring in the wrong area may suffer some delay before they can be contacted and asked to proceed to the correct area. Masters should be advised to anchor at the outer anchorage in the following position: Lat. 14° 55' N., Long. 42° 54' E. Also see "Shipmaster's Report – May 1982".

RESTRICTIONS: The approach channel is dredged to 9.5 m.

MAX. SIZE: Max. draft 31 ft. (September 1990). Also see "Shipmaster's Report", dated May 1982.

Shipmaster's Report: January 1985.

Entrance channel is buoyed differently to that shown on B.A. Chart (See "Plan"). Pilot suggests that max. draft at LW is approximately 8.0 m., especially if there is a swell at the entrance.

Report: We quote below text of a circular telex received from Ports and Marine Affairs Corporation, Hodeidah:

"The General Corporation of Yemen Ports hereby advise all Masters, Owners, Charterers and Agents that as of September 14th, 1990 all vessels with a draft of more than 31 ft. (9.45 m.) should not attempt to enter the dredged channel to the port of Hodeidah.

Vessels arriving during darkness should anchor to the West of the Fairway Buoy and await instructions.

Vessels arriving during daylight may have to anchor for a short period of time, but it is the intention of G.C.Y.P. to put a pilot onboard each ship at the first daylight high water and bring such vessels to the inner anchorage.

Under no circumstances should vessels attempt to enter the port without a pilot, except with the express permission of the Harbour Master".

HEALTH: All members of the crew must be vaccinated against yellow fever and cholera, otherwise permission will not be given to disembark.

RADIO: Masters should also ensure that a radio watch is kept to receive calls from the Port Authorities. The Hodeidah Radio Station is operative between 0600 and 1800 hrs. daily, the call sign is: 4WD or 4WD3 (short).

TUGS: 6 tugs, 375 h.p. – 1,800 h.p. Pilot launch 250 h.p. also available to assist.

BERTHING: The quay is 540 m. in length with 4 berths, the first 70 m. long, depth 6 m., the second, third and fourth are of 150 m. length and 8.5 m. depth. *Officially, ships berthing are restricted in length to 180 m.*

The quay is of concrete construction and is well founded, vessels being secured to bollards in the normal manner. Use of rat-guards is recommended. The quay is equipped with 7 electric cranes having a max. capacity of 5 tons and one crane having a max. capacity of 10 tons. Floating crane of 75 tons capacity available.

There is also a dolphin berth for discharging of petroleum products, which is connected by submarine pipes to storage tanks near the port area. The depth alongside is 6 m.

Also see "Report" and "Developments".

STEVEDORES: All labour is provided by Agent's representative including winchmen and tally clerks, but winchmen are provided entirely at ship's risk.

Rates of discharge vary but are quite satisfactory and with bagged cargo the average obtained is 30 tons per hatch per hour. Night work is possible.

Vessels are expected to supply food on board to cargo supervisors, foreman, and tally clerks. It may be left to Master's discretion whether this is supplied, but if not the Agency will have to supply same and the cost will be debited to the vessels.

Working Hours: Normally from 0600 hrs. to 1100 hrs. and again from 1300 hrs. to midnight. Additional work outside these hours, including after midnight can usually be arranged if necessary, although this cannot be guaranteed. Any work after midnight is overtime.

MEDICAL: Hospitals at Hodeidah and Sanaa-Taiz.

FRESH WATER: Available; pumping rate 10 t.p.h.– 15 t.p.h.

FUEL: Small quantities of diesel oil available from Yemen Petroleum.

CONSULS: (and Embassies):

Algeria
China
Egypt
Germany
Ethiopia

France
Italy
Iraq
Korea
Kuwait

Lebanon
Libya
Russia
Saudi Arabia

Syria
United Kingdom
U.S.A.
Yugoslavia

REPAIRS: Light repairs can be carried out.

SURVEYORS: Lloyd's Agency available.

HOLIDAYS: Friday is the weekly day of rest, Sunday being a normal working day. There are also a number of Moslem holidays. Work is usually possible on such days but cannot be guaranteed. Holidays for special occasions are also liable to be declared at short notice. Friday if worked 50% and public holidays 100% surcharge. During the Moslem fast period of Ramadhan lasting about twenty nine days, which again varies from year to year, work is slower.

Also see "General" before first port.

AIRPORT: Flights to Sanaa. Also flights from the new Hodeidah International Airport.

TIME: GMT plus 3 hours.

SHORE LEAVE: Allowed. The Master should prepare a list of persons wishing to go ashore as Agent has to issue I.D. cards.

REGULATIONS: It is strictly forbidden for crew and passengers on board to take photographs while a vessel is in the harbour approaches or secured to the jetty in harbour.

Any vessel which permits oil and/or water to be discharged into the harbour will be liable to a minimum penalty of U.S. $500.

DEVELOPMENTS: A second container berth with length 300 m. and depth 11.0 m. and 1×40 ton container gantry crane has been completed.

Vacuators to be installed for grain handling, giving average daily discharge rate of 5,000 tonnes – 6,000 tonnes.

Also see "Report" below.

REPORT: August 1979 (Updated 1986).

Hodeidah Port is situated 5 km. away from the old town, built in 1961, the population of which is about 200,000. It was built on the Red Sea Coast, S.E. of Khour Ras Alkatheeb, 4 km. away from the town of Hodeidah.

Hodeidah port is built at a location safe from storms and strong winds. The port is under the administration of the Ministry of Public Works, managed by the Hodeidah Port General Corporation. It has a direct connection with the capital city of Yemen, Sana'a, by a modern highway and another connecting Taiz.

The official characteristics of the port are given as an external pool, 10 m. in depth, where ships can anchor. A channel, minimum 45 m. wide, about one km. long and 7.9 m. to 8.3 m. deep, enters into the inner pool. Maximum draft allowed is 25 ft. at HW. Buoy markings and signals for safe entry and departure are available The dimension of the inner pool is irregular, about 500 m.×400 m. Overall depth is 7.6 m. at LLW, except for 100 m. wide strip along the 300 m. berth where the depth is 8.5 m.

The port consists of a quay for loading and discharging and one special jetty for tankers. The total length of the quay is 570 m. forming 4 berths of 120 m., 150 m., 150 m. and 150 m. respectively. The quay can receive vessels up to 180 m. in length with a draft of 25 ft. at HW. The quay is equipped with 4 electric shore cranes of 5 tons maximum lifting capacity each and two mobile cranes each of 30 tons capacity.

Discharging speed for bagged cargo is between 250 tons and 300 tons per hatch per day. For general cargo the discharging speed is about 150 tons per hatch per day.

At present, there are 21,660 sq.m. of cargo storage floor space:

Shed No. 1	45 m.×60 m.	2,700 sq.m.
2	96 m.×60 m.	5,760 sq.m.
3	50 m.×60 m.	3,000 sq.m.
4	50 m.×60 m.	3,000 sq.m.
5	25 m.×60 m.	1,500 sq.m.
6	45 m.×60 m.	2,700 sq.m.
7	50 m.×60 m.	3,000 sq.m.

and several open storage yards for heavy machinery and equipment. There are fuel tanks with a storage capacity of 16,000 cu.m. connected to the oil jetty by means of a pipeline system. A wireless station for communications, from ship to shore and vice versa, is also available.

Future Development: The development of Hodeidah Port includes:

1. Dredging:
   a. Deepening of the approach channel to 9.0 m. below MLW (Mean Low Water) with the provisions of a passing bay and deepening of the port basin to 9.0 m. below MLW. (Completed 1980).
   b. Deepening to a depth of 9.5 m. MLW alongside Berth No. 2 and No. 6 (completed).
   c. An area to the West of Berth No. 1 to a depth of 4.0 m. MLW.

Hodeidah Port has the following:

Berth No. 1, length 110 m., dredged to 8.0 m.
Berth No. 2, length 150 m., dredged to 9.5 m.
Berth No. 3, length 150 m., dredged to 9.5 m.
Berth No. 4, length 166 m., dredged to 10.0 m.
Berth No. 5, length 195 m., dredged to 10.0 m.
Berth No. 6, length 195 m., dredged to 10.0 m.
Oil berth for 15,000 d.w.t tankers dredged to 10 m.

2. Berth No. 6: 195 m. long berth with a 40 m. wide apron. (Completed 1982). Berth No. 6 is designed for container ships of: 22,500 d.w.t., length 204.0 m., breadth 31.0 m., draft 9.2 m., container capacity 1,522 units.

One container crane of 30.5 tons capacity is installed on Berth No. 6 and is able to load and unload between 30/40 containers per hour.

3. Slipway (completed 1981): 500 ton slipway next to the mechanical workshop. Slipway able to handle vessels 32 m. in length, 10 m. wide and 3.2 m. draft.

4. Paved Storage Areas (completed/available 1981): The concrete paving of open storage areas behind the 40 m. wide apron has approximately 80,000 sq. m.

5. Buildings and other services (completed/available 1981): Construction of service buildings include offices of the Port Corporation, Customs, Labour, First-aid with canteens, wash places and toilets.

6. Oil Terminal (completed/available 1981): 2 new breasting dolphins and 2 mooring buoys for handling tankers up to 15,000 d.w.t.

7. Floating Craft (completed/available 1981): A new 75 ton self-propelled floating crane has been provided.

8. Cargo Handling Equipment (completed/available 1981): 4 high level boom cranes, 1 port type mobile crane, 10 forklifts, 10 tonne trailers with tractors, 3 Ro/Ro tractors with goosenecks and Ro/Ro trailers.

9. Grain Silo Complex: The project under construction in Hodeidah port consists of a 20,000 ton Silo and a 14 stall bagging plant which has a bagging capacity of 200 per hour. The whole installation has a through put of 160,000 tons per year.

10. Water Mains (completed 1982): Extended to Berth No. 6 and fire mains will be from sea water and maintained with a 70 m. head by hydraulic accumulator.

Special Uses:

Berth No. 4 – grain unloading (40% berth occupancy).
Berth No. 6 – containers (with 30.5 ton container crane).

Container capacity will exceed 300,000 tons per year but will depe on the capability to empty containers and create an equivalent to t of the shipping.

Cargo must be carried by ships with a draft less than 9.2 m.

Arrival at Hodeidah/Ras Alkatheeb Ports:

Vessels arriving at Hodeidah Roads should anchor in the follow positions inside Buoy No. 2.

Lat. 14° 55' 58" N., Long. 42° 53' 53" E.

Masters should radio or cable Agent the following information at le 24 hours in advance:

(i) Exact ETA.
(ii) Draft – fore and aft.
(iii) Quantity of cargo on board and distribution.
(iv) GRT, NRT and LOA (When vessel is calling for the first time

Through Hodeidah Radio Station, Calling Sign: 4WD 500 kHz.

(Frequency from 0500 hrs. up to 1700 hrs. GMT). 72 and 48 ho prior notice of arrival can also be given through Aden Radio.

Pilotage on entry and departure is compulsory. Normally, no pilota is allowed after 1630 hrs., or before 0600 hrs. Hence vessels arriv in Hodeidah Roads after 1630 hrs. may not be piloted in until 0700 h the following morning. Likewise, vessels which do not sail be 1630 hrs. may not be piloted out until 0600 hrs. the following day.

Supply of fresh water and shipchandlering is available.

Documents:

4 copies of Cargo Manifest.
2 copies of Freight Manifest.
1 copy of Bill of Lading.

(These should be airmailed to Agent after departure of vessel fr port of loading.)

11 copies of Cargo Manifest.
1 copy of Freight Manifest.

(To be handed over to Agent by Master on arrival of vessel.)

Port Formalities:

1. Doctor.
2. Immigration.
3. Customs.

FOLLOWING TO BE STRONGLY OBSERVED BY ALL MASTE CREWS OF VESSELS CALLING AT HODEIDAH:

1. Sale of wines and spirits prohibited.
2. Discharging water onto quay and dismantling ships' engines at be not allowed.

In addition to above, Masters/Crews should be advised to take seri note of all prohibitions stipulated in the Port Tariff, see "General" bet first port – "Fines".

SHIPMASTER'S REPORT: May 1982.

I came in and berthed at No. 6 Berth at 8.5 m. draft and discha via vacuvators direct into lorries and managing a rate of 3,000 t Pilot reckoned 29 ft. maximum can be taken in.

Other points in "Guide" seem accurate, but with the Chart B.A. 3 being too small I cannot see many Masters bringing a large ship the recommended anchorage position. I anchored 3 cables N.N.E the No. 2 Buoy in better water.

PURSER'S REPORT: August 1982.

Requirements:

1 Maritime Declaration of Health. (Any country's (preferably Ara accepted suitably amended).
1 Vaccination List (ship's form).
10 Crew Lists (ship's form).
2 Bonded Stores Lists (ship's form).
1 Crew Effects List (ship's form).

Sundry Customs and Agent's forms were brought aboard on ar These required the usual information regarding draft, fuel, water, tonnages, etc.

Customs and Port Authorities were very particular that cargo tonna were accurate as per Manifest when completing forms.

Customs sealed both bond and beer rooms, but placed no restr on quantities in bars and cabins with the proviso that alcohol wa sold or given to locals. An additional quantity of bonded items allowed to be removed before sailing.

Courtesy Ensign: Supplied in the U.S.A. and not marked to show w was top. It should be flown with the red stripe uppermost.

Mail: The Agent advised that mail both in and out of the country slow and unreliable.

Laundry and Chandlery: Both services available but not used.

Navigation: The Master advises that navigational marks could change due to berth extensions and port improvements. A con crane is at present under construction.

SHIPMASTER'S REPORT: April 1984.

Pilotage: Ships can enter or sail out of harbour at anytime, if Agent strong request. All the buoys in the channel as well as the appro including the Sea Buoy are lit.

Berthing: Observed a ship entering with 30 ft. draft and Pilot con that vessels can enter up to 30 ft. draft.

Stevedores: Bagged cargo discharging rate increased to up to 3 provided that receivers are able to supply sufficient trucks in tim

The stevedores no longer request drinking water from the s they drink bottled water supplied from shore.

SHIPMASTER'S REPORT: April 1990.

1. There is no Fairway Buoy (Fairway Buoy is indicated on B.A. Chart No. 1990).
2. There is no Buoy No. 2 (Port Authorities instructed vessel to anchor inside Buoy No. 2 in Lat. 14° 55' 44" N., Long. 42° 53' 42" E. for registration).
3. Authorities/Agent instructed vessel to anchor by Buoy No. 2, but this was unsafe as the depth is 7.7 m.
4. Due to shallow water in anchorage position (inside Buoy No. 2), 2 vessels collided when one of them was trying to anchor.
5. A vessel anchored in the position indicated and ran aground.
6. Our vessel, which berthed port side to at Berth No. 4, grounded forward with a draft of 32 ft. 5 in.
7. The maximum depth in the anchorage position, which was checked, was 9.8 m., 3 hours after high water.
8. No ship's certificates were requested by the Port Authorities or the Agent on arrival.
9. No written permission given by Port Authorities for painting ship or load line or for boat drill.
10. Two crew members required cholera vaccinations, but these were not done.
11. A vessel was given verbal permission to paint ship's marks, and after painting was fined U.S.$ 3,000.00.
12. The Master of a vessel was jailed for refusing to instruct his crew, to discharge bulk cement from the hold, which were the remains of bags torn by the stevedores.
13. The cook on a vessel was shot by the gangway watchman, for refusing to prepare him food at 2300 hrs.
14. The Port Authority/Agent debited the vessel for one or two shore cranes daily, even though the shore cranes were not working.
15. The evacuator for discharging bulk wheat was damaged by the stevedores, due to bad handling, and the vessel was delayed 32 hours, until a bank guarantee of U.S.$ 200,000.00 was given (actual cost of damage was about U.S.$ 5,000.00).
16. Attention of all Masters and Owners is drawn to the permissable arrival draft which is 32 ft. (salt water). For every inch over 32 ft. the vessel is fined U.S.$ 3,000.00.
17. This vessel was penalised for 5 inches, and had to pay a fine of U.S.$ 18,000.00 without official receipt from the Port Authorities.
18. For further fines and restrictions, please see "General" before first port – "Notice".

CHIEF OFFICER'S REPORT: June 1994.

Approaches: Approaches to Fairway are generally clear without much traffic density and/or fishing crafts. Outer Anchorage for deep draft vessels is not declared by port, but vessels drawing more than 8.0 m. draft normally anchor between 1 mile to 3 miles N.W. of the Fairway. Some vessels are found anchored very far from Fairway as per Master's wish. There is no restriction regarding that by the port. Within 3 miles from Fairway, depths of between 14 m. to 21 m. are available. Strong S.W. winds are experienced in March/April, but the anchor holding ground is good.

VHF: Port Control keeps 24 hour watch on Channel 16, but generally calling vessels do not get reply on VHF during the hours of darkness. The reply on VHF is heard only when Port Control wants to contact the vessel for something. The enquiries regarding berthing instructions are not answered by Port Control, and they advise vessel to contact Agents by telex. All information regarding berthing, etc., is obtainable only through the Agents.

Pilotage: Pilot boards the vessel near Buoy No. 11. Vessels generally do not get much advance notice to proceed to Pilot Station. The requests by vessels to have advance notice to get engines ready are not taken care of. Also it has been frequently noticed that orders to proceed to Pilot Station are very often postponed, many times in some cases. If at short notice the vessel is not able to reach Pilot Station at given time, fine is imposed and/or berthing is cancelled. Masters are warned that Pilots are inexperienced and care must be exercised during their pilotage to avoid problems.

Fresh Water: Fresh water is available in port at U.S.$15.00 per tonne. Ships are advised to avoid receiving fresh water from the port as it is saline and unconsumable by crew. Also, the fresh water is not fit for use in engines. Water rationing should be commenced on arrival anchorage, if long stay is expected.

Fines:

1. Arrival Notice: Notice of Arrival must be given 24 hours prior to vessel's ETA.
   Fine of U.S.$120.00 for non-receipt of cable/notice by Master via Hodeidah Radio Station for vessel's arrival.
2. Flag: Fine of U.S.$200.00 for non-hoisting Yemen National Flag.
3. Permissible Draft: Maximum allowed arrival draft for Channel Entrance and alongside is 32 ft.
   Any over-draft on arrival, a fine of U.S.$3,000.00 per extra inch. International misdeclaration of draft by Master will be fined double.
4. Dumping Rubbish within Quays and Port Areas: Fine of U.S.$250.00 will be imposed. Master/crew of vessel or Agents are compelled to remove rubbish.
5. Spilling dirty liquids or fuels within port limits, vessel and Agents will be responsible in accordance with environment pollution regulations.
6. If Pilot boarded vessel for sailing under request of Master/Agents, and found vessel not ready, fine of U.S.$50.00 per hour will be imposed.
   In case tugs have been ordered by Pilot to attend for assistance, transport charges will be applied.
7. If Pilot proceeded to anchorage for berthing and found not ready, thus cancelling operation, full pilotage will be charged.
8. Vessel not allowed to change positions either at anchorage or alongside without prior permission, which will result in imposing fine according to vessel's size.
9. Any misdeclaration of particulars of vessel or cargo onboard by Master, fine of 100% of port dues/tolls.
10. If vessel sails from anchorage after having registered without clearance, fine of U.S.$1,000.00 will be imposed.
11. Fine of U.S.$120.00 for non-fixing of rat guards.
12. Fine at U.S.$0.50 per meter of LOA per hour to vessel, if it exceeds time allowed for discharge. Port Authorities reserve the right to remove such vessel to anchorage after 48 hours of exceeding allowed time.
13. Distribution of cargo in vessel's holds is essential where minimum 30% of total cargo for discharge in each hold. Any excess of 30% in stowage, fine of U.S.$1.00 per ton will be imposed.
14. Port Authorities reserve the right to apply any fine deemed necessary after approval of Board of Directors, and to increase or decrease the fine shown in this by-law accordingly to the extent of offence.
15. If any crew members' Shore Leave Pass is lost, a fine of U.S.$200.00 per lost Shore Leave Pass will be imposed.
16. If the gangway is opened after 0200 hrs., the Port Customs will impose a fine of U.S.$1,400.00.

Draft Restrictions: The port is very strict about overdraft. Maximum draft allowed alongside is 32 ft. (9.75 m.). There is a fine of U.S.$3,000.00 per inch of extra draft. Vessels drawing exactly 32 ft. draft or a little less are warned that they must insist that the Boarding Pilot checks the draft and get a letter regarding draft signed by him. In the port, it is very common practice to declare vessel's overdraft even if they are not.

This vessel, which is a bulk carrier, carried 28,500 tonnes of wheat from U.S.A. U.S. silo figures showed 28,500 tonnes of cargo. As per ship's calculation, we had 28,560 tonnes of cargo on board. Arrival Hodeidah, draft was 31 ft. 11 in. forward and 32 ft. 00 in. aft with no list. The drafts and densities were frequently checked during long stay at anchorage to avoid problems in port. The only mistake done was that we did not insist on Berthing Pilot checking the draft. The reason was that we had decided to call Lloyd's Register Surveyor alongside to declare our draft and cargo figures. Alongside Berth No. 3/4, things went the way that we could not imagine. After berthing, when we checked the draft, we found vessel tilted to starboard showing much lesser draft on port and about 6 in. more, i.e. 32 ft. 06 in. draft on starboard. This was not at all expected. We checked the sounding by hand lead and came to the conclusion that vessel was touching bottom on port side and was afloat on starboard side, due to which she was tilted to starboard. This was high water time. Later, Port Authorities boarded 3 hours after high water and found 3 in. overdraft on starboard side for which they wanted the vessel to sign. It was refused, and they refused to start the cargo work. Later, at high water, Lloyd's Register Surveyor was called, who also concluded that vessel was touching bottom on port side due to which draft was unreliable. Port was asked to cast off the vessel and check draft a few meters away from the berth, but they never agreed to it and insisted that vessel had to pay U.S.$9,000.00 for 3 in. overdraft. They did not even agree to Lloyd's Register Surveyor's report. After discharge, silo computer figures showed 293 tonnes short loaded cargo which was not possible. Finally, P&I Club came into picture, gave them bank guarantee to get port clearance.

Therefore, all ships are again advised to:

(a) Insist that the Pilot checks draft before boarding and signs a document regarding confirmation of not being overdraft.
(b) Get a draft survey done before commencement of discharge to avoid any disputes about short landing, which is very common.

Customs: Customs are quite strict in Hodeidah. There is no restriction on keeping any amount of alcoholic drinks in your cabins or in ship's bars. The only instruction given is that it should not be sold or offered to locals. In any case, offering drinks to locals cannot be avoided in my opinion, because the cargo work, as well as ship's stay alongside, will not be smooth, if drinks, cigarettes, etc., are not offered to those directly involved in ship's cargo work or other things. Also, there is no restriction on books, publications and movies in other languages and countries, as long as they are kept in cabins and not in common places.

Shore Leave: Shore leave is allowed with Shore Passes. Crew intending to go ashore must get out of the port's main gate before 1800 hrs. After 1800 hrs. you are not allowed to go out. There is no restriction for entering the gate at anytime, but generally taxis are not allowed to proceed beyond the gate and up to the vessel after 2200 hrs.

Shipchandlers: Stores and provisions are available, but their price list is about three times the market rate. Self-shopping for large quantities of provisions/stores, etc., is not allowed.

Facilities in the Town:

1. There are a good number of international telephone booths in the telephone exchange, where cards are available throughout the day and night, except between 1800 hrs. and 1900 hrs. The booths are available for calls throughout 24 hours.
2. There are two good hotels and restaurants, (a) Ambassador and (b) Bristol, where a wide variety of food, as well as alcoholic drinks, are available. Alcoholic drinks are not available and not allowed anywhere else in the town.
3. A large attractive park is open to public and is a good place for children to play. There is also a long beach area which is good for picnics, etc., but has no lighting arrangement along the beach.

Public in general are honest, reliable and well mannered. The population includes Yemeni and a few Indians and Pakistanis.

Other facilities, like video parlours for movies in English, Arabic, Indian and few other languages, are available. Currency is Yemeni Riyal, and official exchange rate is approximately 12 Riyals to U.S.$1.00.

AUTHORITY: Ports and Marine Affairs Corporation, P.O.Box 3183, Hodeidah, Yemen. *Telex:* 5565 Mawani Ye. *Contact:* Captain Ali H. Elhabory, Chairman, Captain Ali H. Sharaf, Director-General, Captain Abdullah A. Rajab, Harbour Master.

AGENT: The Hodeidah Shipping & Transport Co. Ltd., P.O.Box 3337, Hodeidah, Yemen. Tel: 2403/4/5. Cables: "Hodship". Telex: 5510 (Hodeidah) and 2218 (Sana'a). Answerback: "Hodship". Branches at Mocha, Saleef, Taiz and Sana'a.

MOCKA: 13.17 N. 43.10 E.

Also see "General" before first port.

Mocka New Port opened in June 1979, with equipment for loading and unloading.
TUGS: 2 available.
BERTHING: 350 m. of quay for vessels of up to 26 ft. draft (Depth 27 ft). Vessels may berth simultaneously. Cargo is discharged direct onto trucks or onto open area. New sheds are under construction.
CRANES: 1×18 ton mobile crane.
FUEL: Not available.
TIME: GMT plus 3 hrs.

REPORT: August 1979 (Updated 1986).

The project of constructing Mocka Port has been in execution since April 1978. The construction was completed during April 1979 and the port was officially opened to International traffic in June 1979.
Location: Mocka is connected to Hodeidah by a road of 240 km. out of which 45 km. is asphalt surfaced. Mocka is also connected to Taiz, by a road of 110 km.
Jetty: The port consists of a jetty of 150 m. in length and 35 m. wide with a draft of 8.5 m. during low tide. This jetty can accommodate 2 vessels at a time, each of 150 m. length, on both sides and a Ro/Ro vessel at the head. A protecting jetty for breakwaters is also constructed for controlling the force of strong waves. It is 750 m. in length and 15 m. wide with various depths from 5 m. to 3.5 m. This jetty is constructed for the purpose of protecting the main jetty and can receive coasters and lighters of aforesaid drafts.
Anchorage: The dimension of the manoeuvring area, for vessels securing at berth and departing from the main jetty, is 420 m. The length of the channel leading to the manoeuvring area is 2,000 m. with a draft of 28 ft. 5 in. during low tide, whereas the draft during high tide is about 30 ft. Vessels calling at Mocka should anchor at the following position: Lat. 13° 20' 01" N., Long. 43° 13' 02" E.
Storage of Cargo: The reclaimed area for storage of discharged goods consists of 300,000 sq.m. 4 storage sheds (60 m.×50 m.).
Future Developments: There are plans for building other jetties together with protecting jetties in the near future.
Bunkers: Bunkers, at present, are not available at this port. Any vessel calling at this port is required to supply fresh water for drinking purposes to all labourers during stevedoring operations.
Radio: Vessels calling at Mocka are advised to contact Agent through Hodeidah Radio Station, call sign, 4WD, 500 kHz (frequency from 0500 hrs. up to 1700 hrs. GMT), as, at present, this port is not equipped with a wireless station. It is proposed to establish one during 1979.

SHIPMASTER'S REPORT: August 1980.
Vessel: 6,000 d.w.t., 104 m. LOA. Discharged 2,000 tons of RBD palm oil.
Port Limits: None defined, however vessel is in port limits and 'arrived' once anchored within the anchorage marked on B.A. Chart 1955.
Documents: 1 copy Personal Effects Declaration, 1 copy Stores List, 1 copy Inoculations and Vaccinations and at least 10 copies of Cargo Manifests, 3 copies of Crew List.
Anchorages: Vessel anchored safely in a position with the North Fort Barge 103° True −1.74 miles. Vessel's max. draft was 20 ft. and there was 30 ft. of water below the keel at 1 hour before low water. It is inadvisable to proceed further South, especially at night due to the placing of unlit channel marking buoys by the port.
Pilotage: There are presently two berths, one on either side of a finger wharf. The Pilot boards at the anchorage and brings the ship alongside one of these berths. There are 3 Pilots in Hodeidah and 1 in Mocka.
Max. Size and Restrictions: Max. permissible draft is 26 ft. salt water and max. LOA permissible is 500 ft.
Radio: None. The port operates VHF on Channels 16 and 14. There are no fixed hours and the port radio is in operation only when the port wishes to communicate with the vessels.
Radar: None.
Tugs: 2 tugs assist vessels for berthing and unberthing. We were assisted by the 'Markaron' (2,000 h.p.).
Cranes: None. There are mobile cranes available with the prior arrangements of the ship's Agents. Otherwise ship's gear is mainly used.
Stevedores: None in the strictest sense. Labour is recruited by the Agents and made available on board.
Tankers: There is no facility for discharging petroleum cargo.
Density: 1025.
Fresh Water: Not available.
Fuel: Not available.
Fire Precautions: None.
Consuls: None.
Repairs: Not available.
Dry Docks: None.
Surveyors: None.
Watchmen: None.
Customs Allowances: Bonded stores are not sealed. Master is verbally informed not to make any issue from the bonded stores without the Customs permission. All officers and crew who declared their quota were allowed to keep same.
Repatriation: Possible, but local Agent has no knowledge of how to effect it.
Airport: None.
Time: GMT plus 3 hours.
Shore Leave: Allowed. The town is situated about 4 km. from the jetty. There is no entertainment that seamen can find in this town and it is not advisable to be ashore after dusk.
ID Cards: None are issued but ship's personnel going ashore have to carry their Seaman's Book or Passport.
AUTHORITY: Ports and Marine Affairs Corporation, Hodeidah, Yemen.
Contact: Abdelkader Abyadh, Manager of Mocka Port.
AGENT: See "Hodeidah".

MUKALLA (Khalf): 14.31 N. 49.09 E. (See P

SHIPMASTER'S REPORT: August 1984 (Updated 1989).

PORT LIMITS: See "Gulf of Aden Pilot" (No. 64).
DOCUMENTS: See "Aden".
APPROACHES: The lighthouse is visible at 18 miles.
PILOTAGE: Compulsory for all vessels proceeding to and from the of Khalf. Call Pilot on VHF Channel 16. Vessels to display interna signals day and night.
ANCHORAGES: Pilot Book as mentioned above gives suffi information. A good practice during July each year (when S.W. mon is at its strongest) is to drop a second anchor in the morning a heave it home again at about 1900 hrs. To keep second ancho during the whole time of port stay is inadvisable as direction of tu on wind/tide is unpredictable and thus might end up with chains fo
RESTRICTIONS: Entering/leaving:
Anchorage: None.
New Port: Daytime only. During S.W. monsoon only betw 0600 hrs. and 1100 hrs. and max. LOA 75 m.
MAX. SIZE: Ship's normally accommodated at Khalf Port up to 14 drawing max. draft of 8.5 m. Larger ships could be accepted if permis granted in advance by the Port Authority.
HEALTH: As ship arrived from Aden, no formalities whatsoever.
RADIO: All communication before arrival/after departure Aden Mukalla via Aden Radio (70A). This radio station is working satisfac

Once in port (either at anchorage or alongside) it is forbidden t ship's radio and/or telex.

Sending cables/telexes via the Agency is time-consuming.
TUGS: At least 1 tug, and probably 2 when port is open for shipp
BERTHING: 2 alongside berths for up to 10,000 Summer 3 alongside berths for coasters, depth up to 5.0 m.
CRANES: 14 mobile cranes, 3 – 10 tons capacity.
STEVEDORES: Work throughout 24 hours.
MEDICAL: Local hospital available but only a few facilities.
DENSITY: 1026.
FRESH WATER: Will be available in 1989.
FUEL: Will be available in 1989.
REPAIRS: Not available.
CONSULS: None.
SURVEYORS: Available.
FRESH PROVISIONS: Not available.
GANGWAY/DECK WATCHMEN: Not required, no reports of pilfe of cargo and/or ship's stores.
HATCHES: Once open, not necessary to close again except for s Climate: Warm/humid but no rainfall.
CUSTOMS ALLOWANCES: Bonded stores were sealed on arriv specific rules, no search parties of Customs.

On departure: No check of seals.
REPATRIATION: *Crew Change:*

Out-going: Via Mukalla Airport to Aden (6 times a week except Fri then either via Jeddah or Dubai/Kuwait to ultimate destination.

In-coming: Very difficult as visa required and not easy to obtai
Note: Flights Mukalla-Aden and vice-versa may differ from printed tables.
AIRPORT: Located at Rayan, 29 km. East of Mukalla.
BANKS: National Bank of Yemen. Local currency: Dinar.

On presentation of passport-receipt, U.S.$ (and only this curr can be exchanged for Dinars (approximately U.S.$3 for 1 Dinar).

It is very difficult to obtain U.S. dollars in exchange for Dinars.
STORES: Not available.
SHIP SUPPLY SERVICE: See "Aden".
SHORE LEAVE: In Mukalla (as well as in Aden) when passing Cu Gate, Passport is exchanged for receipt by the Immigration Offi duty. When returning from shore leave this receipt is again exch for Passport.
Note: It is difficult to make Officials understand that crew membe or visitors from abroad are not in possession of a receipt, which a crew change extra time consuming (Charterer had to wait 3 before he was allowed to proceed to the ship).
DELAYS: At present congestion may occur during the S.W. Mo period.

In future congestion may occur as infrastructure of the new port much to be desired (Roads to/in/from the port, direct delivery e
GENERAL: *Transit Time Airmail Post:*

Mukalla-Europe: Minimum 2 weeks, maximum 3 weeks.
Europe-Mukalla: Minimum 2 weeks, maximum 3 weeks.
Agency: National Shipping Co., P.O.Box 8039, Mukalla, Cables: "Natship Mukalla" (via Aden Radio).
Importer: National Company for Home Trade, 5th Government Mukalla.

SHIPMASTER'S REPORT: April 1985.

PORT LIMITS: The port limits extend in a 270° direction from Ras for 2.5 miles, thence 000° along Long. 49° 07' E. to the coast.
APPROACHES: Charts B.A. 3784 and 10.

Prominent terrain affords reasonable radar positions. consideration should be given to night-time arrival if without ra to the total absence of navigational aids at both the port and coastlines. The white house at Point Ras Marbat and the 4 tow above the town are charted and conspicuous from seaward.
ANCHORAGE: For vessels over 10,000 d.w.t. all cargo is ha the anchorage which may be closed from May to October d exposure to the S.W. Monsoon. Holding ground is reporte variable. Reasonable anchorage obtained in 27 fathoms in Lat. 14° 30.8' N., Long. 49° 08.3' E. approximately 5 cables of rocky projection on which part of town is built. Requests will to anchor closer to the shore to reduce barge transit time.

PILOTAGE: Pilot boards from launch, off the breakwater.
RESTRICTIONS: Berthing during daylight hours only.
MAX. SIZE: Max. size 10,000 d.w.t. Max. draft 8.5 m.
VHF: Channel 16 for Port Authority, call sign "Mukalla Harbour Master".
Agent can be contacted by calling Mukalla Harbour Office on Channel 16.
TUGS: One Voith Schneider tug of 2,000 h.p. Reportedly to be replaced by 2×1,000 b.h.p. tugs shortly.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
No. 1	177.25	9.15
No. 2	184.00	9.15
Fisheries	160.00	4.50

Turning Basin: Width 250 m. Depth 10 m.
Harbour Entrance: Approx. width 200 m. Depth 11 m.
Lighters: 4×200 tonnes, 4×60 tonnes and 2×400 tonnes, all plus or minus 10% subject to swell conditions. Lighters are discharged either at Khalf Harbour or at town quay located on West side of town, rocky projection in position Lat. 14° 31.5' N., Long. 49° 08.2' E. Town quay is restricted in size and served by mobile cranes.
Stevedores: Labour is available 6 days a week, Saturday to Thursday inclusive.
Morning shift: 0700 – 1230 hrs. Afternoon Shift: 1300 until lighters are full.
The afternoon shift is unpredictable and subject to lighters being available.
Medical: Local hospital affords basic medical requirements.
Fresh Water: Not available.
Fuel: Not available.
Shore Leave: Restricted by curfew to between 0800 – 1200 hrs. and 1600 – 1900 hrs. All persons going ashore are required to exchange Passport for local pass at Immigration.
GENERAL:
Harbour: Khalf Harbour, recently completed and as yet uncharted (See "Plan") provides 2 commercial jetties and a fisheries jetty.
Swell: Reportedly maximum 20 cm. in S.W. Monsoon.
Provisions: None available with the exception of individual purchases of fruit or poor quality vegetables available from market stalls ashore. Fishing good from ship's rail and crayfish, etc. obtainable from local fishing boats.
Launch: By prior arrangement with Agent only. Special dispensation can be obtained from Harbour Master to utilise ship's lifeboat. Barges can be used if other arrangements do not materialise.
Communications: By cable only. Telephone system is reported to be unreliable.
Port Officials: Immigration and Customs Officials board on arrival. Passports or Seaman's Cards are sighted. Bond Locker and Beer Room sealed but sufficient released for shipboard consumption.
Usual port papers required.
Agency: The National Shipping Co., Mukalla, Yemen. Cables: "Natship, Mukalla". Telex: None, but reported to be planned.
DEVELOPMENTS: The second stage development of Khalf Harbour will include:
Ancillary buildings, administration offices, workshop, transit sheds, surfacing and drainage, water and bunkering facilities will be made available.

AUTHORITY: Yemen Ports Authority. *Contact:* Ahmed M. Basaleem, Port Manager. Captain Salem Awad Saleh, Assistant Harbour Master.

NISHTUN: 15.50 N. 52.12 E. (See Plan)

DOCUMENTS: See "Aden".
PILOTAGE: Compulsory. Manoeuvring during day time only. There is a lighthouse, range 28 miles, flashing 10 sec. in position Lat. 15° 49.0' N., Long. 52° 12' E. Also the breakwater tower has a flashing green light.
ANCHORAGES: Ships waiting for berthing normally anchor 4 – 5 cables S.E. of the breakwater tower and clear of the harbour entrance.
MAX. SIZE: Maximum size of ship that can be accommodated is up to 3,000 d.w.t., 90 m. LOA and 5.0 m. draft. For ships over such size special permission should be obtained from Port Officer and Director of Marine Affairs.
VHF: Vessels approaching Port of Nishtun can communicate with Port Authority by using Channel 16 for calling during official working hours 0700 – 1400 hrs. (local time) .
BERTHING: Length of quay 220 m.
CRANES: 2×3 tons – 17.5 tons mobile cranes.
MEDICAL: Limited facilities available.
FRESH WATER: Available in small quantities.
FUEL: Not available.
AIRPORT: Located at Al-Gaidah, 40 km. to the East of Nishtun.
WEATHER: *Monsoon:* During S.W. Monsoon waves may break over breakwater. Swell is created in basin so extra precautions by ships' Masters regarding mooring and securing the ship against the quay are required and extra ropes or wires are necessary.
AUTHORITY: Yemen Ports Authority (See "Aden").

RAS ALKATHEEB: 14.55 N. 42.53 E.

Also see "General" before first port.

The Port of Ras Alkatheeb is situated 14 km. from the main city of Hodeidah and connected by a gravel road which is in the process of being resurfaced and broadened with two traffic lanes on the same alignment, thus providing a first class road transport link between Hodeidah and Ras Alkatheeb. Also see "Hodeidah".
BERTHING: The port has a berth 270 m. in length and 27 m. wide, pontoon type, with ships berthing on either side. This port can receive vessels with a max. draft of 26 ft. at high tide. Vessels can be secured to barges and coasters with a draft of 14 ft. which can be connected to the shore, thus enabling ships to discharge directly onto waiting trucks. Said pontoon is mainly used for bagged cargo on direct delivery basis.

Presently, this port does not have shore crane facilities and all unloading is done with ship's own gear.
Storage and Delivery: Due to lack of storage facilities at this port, delivery at present, is given directly under the hook.
GENERAL: The port is not a commercial port.

SHIPMASTER'S REPORT: November 1980.
1. Port does not accept Vessel's Registration until vessel is anchored between Buoy No. 1 and No. 2. This as per the Port Radio VHF station.
2. Buoy No. 2 is placed about 6 cables N.N.W. of charted position.
3. Do not attempt entry at night since buoys are unlit and there are many uncharted stranded wrecks visible only during daytime.
4. Tugs available: 4×700 b.h.p. and 3×1,800 b.h.p. Pilotage only during daytime.
5. Vessel berthed at Ras Khatib pontoon. Max. draft 8.0 m., total effective length of pontoon 270 m.
6. Port issues a directive to Agents giving estimated time to discharge. If not completed, port charges at the rate of 4 Rials/per metre/per hour of stay extended.
7. Distance from Ras Khatib berth to town 15 km. Only 10 to 15 shore leave passes given to vessel, regardless of number of crew.
8. No chipping and scraping permitted but painting is allowed.
9. Fresh water inside port is $4/– per ton, at Ras Khatib $20/– per ton by barge.
10. Provisions available but expensive.
11. Repatriation possible but very difficult due to having to obtain permission from Saana.
12. Cargo work is fast, 260 tonnes of cement per gang per day. Normal shift 0730 – 1200 hrs. and 1500 – 2330 hrs.
13. As per "Pilot", there will be dredging carried out soon and also lighted buoys will be placed.
14. Ras Khatib light Fl. 3 sec. of very low power.
15. Yellow fever inoculation not compulsory unless coming from infected area.

RAS ISA MARINE TERMINAL: 15.08 N. 42.36 E. (See Plan)

LOCATION: The geographical location of the Ras Isa Marine Terminal, "FSO Safer", is Lat. 15° 07' N., Long. 42° 36' E.

Ras Isa Terminal is an Offshore Loading Terminal, located in the Yemen at the Southern end of the Red Sea, East of the Zubair Islands, and a little North of the port of Hodeidah. The Terminal consists of the purpose-converted Floating Storage and Offloading (FSO) Vessel "Safer". This vessel is 409,000 metric d.w.t., and continuously receives crude oil production from a pipeline on the seabed via an anchored fixed-turret mooring. The sub-sea pipeline to shore runs 4.8 miles to the N.E. at Ras Isa Peninsula. The Terminal is operated by Yemen Hunt Oil Company (YHOC).
DOCUMENTS: At present only 2 Crew Lists are required.
PILOTAGE: The pilot boarding area for the Ras Isa Marine Terminal is 2 miles Southward of the storage tanker, or boarding will be at anchorage as appropriate.

The Pilot will remain on board throughout the export tanker vessel's stay on the berth; therefore, suitable and adequate accommodation shall be provided for him on board the export vessel.
Arrival at Pilot Station/Anchorage: Means of access to the vessel by the Mooring Master shall be provided in accordance with the requirements of SOLAS, and early advice will be given by Ras Isa Marine Terminal that access should be provided. At night, the access area shall be adequately illuminated to provide for the approach and boarding of the Mooring Master, Agent, Cargo Surveyor and YHOC Representatives. The condition of entry into and use of Ras Isa Marine Terminal, and agreement for the hiring of tugs will be presented to the Master of the export tanker, and shall be signed by him on behalf of himself, the vessel and its Owners prior to departure from the Pilot Station/anchorage and commencement of berthing operations.

Usually the tugs and Berthing Master are automatically arranged through the export tanker's port Agent and YHOC, when export tanker is scheduled to berth.

Notice of Readiness is only signed for receipt by YHOC Representative. In no event shall a Notice of Readiness be valid or binding on the Terminal, unless and until such time as the export vessel, her tanks and equipment are, in fact, in every respect whatsoever, in the proper condition and operation to receive the cargo. Export tankers provided with a suitable landing area can be boarded by helicopter.

ANCHORAGES: Should it be necessary to anchor, then the vessel should proceed to the recommended tanker anchorage area defined by the following coordinates:

Lat. 15° 05′ N.,	Long. 42° 32′ E.
Lat. 15° 03′ N.,	Long. 42° 32′ E.
Lat. 15° 05′ N.,	Long. 42° 36′ E.
Lat. 15° 03′ N.,	Long. 42° 36′ E.

RESTRICTIONS: No restrictions for berthing day or night when port is open.

Strong Winds: When mean speeds exceed 30 knots on the Marine Terminal anemometer, ships will, depending on the wind direction and general weather synopsis, be alerted that cargo/deballasting operations may have to be suspended and hoses disconnected. The Terminal has the responsibility of determining when wind conditions are reaching the limit of the design criteria for continued operations.

MAX. SIZE: Maximum size of 307,000 d.w.t. tonnes is permitted at the "FSO Safer". Partially loaded tankers acceptable. Average water depth is 38.0 m.

HEALTH: At present no Declaration required.

RADIO: *Communications:* On receipt of instructions to proceed to Ras Isa Marine Terminal, then 72 hours, 48 hours and 24 hours prior, advise ETA and other details as listed in the Ras Isa Marine Terminal Regulations and in a standard telex sent by the Terminal to the vessel.

If vessel is scheduled to berth on arrival, be sure to advise the Terminal of any change in ETA to avoid excessive stand-by charges for the tugs.

Hodeidah Port Authority must be advised as mentioned above at Hodeidah Telex: 5565 Mawani, and via Hodeidah Radio (4WD) in addition to any telex contact, as they advise the Yemen Military Authorities, who maintain a radar watch on all vessels entering and leaving Yemen waters.

YHOC Marine, Hodeidah:
Telephone: 967-3-217994.
Telex: 5685 YHOCMA YE.
Fax: 967-3-226153.

YHOC, Sana'a:
Telephone: 967-1-416080, Ext. 2643 or 2218 (via operator).
Telex: 4013 YHOC YE.
Fax: 967-1-416079.

FSO Safer – Ras Isa Marine Terminal:
Telephone: 967-1-416080, Ext. 2380.
Telex: Inmarsat Atlantic 1473102 SAFA X.
Fax: 967-1-416080, Ext. 2264.
VHF: Terminal Channel 74.
Tugs Channel 74.

VHF: *Export Tanker/Terminal Communication:* When the export tanker is at anchorage, communications between the storage tanker and the export tanker will be established on Channel 74.

Anchorage/Mooring Master Boarding Area: When within VHF communication range, Masters of export tankers should ascertain berthing prospects from the Terminal.

TUGS: Two suitable tugs are ready for each lifting, and are for export tanker account.

BERTHING: *Alongside Mooring/Unmooring Arrangements:* Should the export tanker be moored alongside, mooring will be on the starboard side of the "FSO Safer", according to following standard mooring plan: 4 headlines, 2 forward breast lines, 2 forward springs, 2 aft springs, 2 aft breast lines, 4 sternlines. Fendering between the two vessels consists of 5 large fenders.

For mooring/unmooring operations, the service of two tugs will be necessary. Export vessels should provide either synthetic mooring lines or mooring wires with synthetic tails. Synthetic ropes should be stored on drums or wrapping drums. Masters of export tankers are to be advised that the actual requirement of the mooring system may be subject to variation from time to time, depending on the environmental condition.

Tandem Mooring/Unmooring Arrangements: "FSO Safer" is also equipped with a Tandem Mooring System, which will be used if the weather conditions do not allow an alongside mooring, particularly in Winter time. The export tanker has to be equipped with a chain stopper on the bow, and shall be in overall conformity with the OCIMF "Standards for Equipment Employed in the Mooring of Ship's at Single Point Mooring", latest edition. The Terminal mooring hawser and chain arrangement does not allow for mooring with snotters nor with Smit Bracket, only an export tanker equipped with chain stoppers (OCIMF B 3 in. U3 chafing chain). The Terminal is permanently equipped with a floating 20 in. hose with 2×16 in. tails. Before any tandem mooring attempt, there should be a meeting between export tanker and Terminal personnel to establish procedures, responsibilities and supervisory roles. Refer to Ras Isa Marine Terminal Regulations for further information.

LOADING: *Transfer Operations:* The "FSO Safer" is equipped with 4×16 in. transfer hoses with a maximum loading rate of 100,000 bbls./hr. for alongside loading and 55,000 bbls./hr. for Tandem loading, and 1×20 in. transfer hose with 2×16 in. tails for tandem loading. At all times during the transfer operation, a responsible deck officer shall be in charge of operations, either on deck or in the control room. On vessels with a central control room from which all operations are controlled, a deck watch in contact with the control room is required to continuously patrol the cargo deck, and monitor the manifold area of the export vessel. At any time during the transfer operation, the rate can be reduced as requested by the Master or responsible officer of the export tanker. Early Departure Procedures are normally practised at the "FSO Safer".

The official quantity and quality of the crude oil delivered to the export tanker shall be determined by the Terminal, and shall be final and binding on the export tanker and her Owners and Charterers.

Hose Handling: Hose connection/disconnection will be carried out by the export tanker's crew, who at all times will be under the control of responsible deck officers. The export tanker will be required to have ready a derrick with a minimum SWL of 15 tons at the port manifold area for the handling of the Terminal hoses. For further information refer to Ras Isa Terminal Regulations.

Cargo Information: Oil loaded at Ras Isa Terminal is Marib Light with an average API gravity of about 50°. The loading temperatu vary from 85°F in the Winter to 100°F in the Summer months.

Deballasting Operations: "FSO Safer" has no ballast reception no disposal facilities, and therefore, export vessels are required to with clean ballast suitable for pumping directly to the sea. Export ve arriving with ballast unsuitable for pumping to the sea may be rej for loading, or will be required to keep that portion of their b unsuitable for discharge to the sea segregated on board. YHOC w accept any claims from vessels unable to meet such requirement

It is strictly against the law to pollute the waters of Yemen. Any Ma and his vessel's Owners, may be subject to prosecution by Yem such pollution does occur.

Simultaneous Deballasting and Loading of Cargo Tanks: This pra is essential. Vessel has to be ready at all times to manoeuver, an only alternative is to load partial cargo first. Such operation is do the sole risk of the export vessel, its Master and Owners, and the stringent care and attention shall be taken by the export tanker. E tanker will hold the Terminal, its parent companies, subsidiaries affiliates, harmless from any and all claims, demands, dama liabilities, costs, fines, and expenses, of every kind whatsoever, a out of, on account of, or in any way connected with the simultan deballasting and loading of the export tanker.

Inert Gas Systems: All export tankers loading crude oil at the M Terminal must have an effectively working Inert Gas Syste compliance with SOLAS Convention, and the Master shall confirm b berthing that the Inert Gas System is working correctly, i.e. mainta positive pressure on all tanks with the oxygen content of the iner less than 8% by volume. On arrival alongside, export tankers w asked to depressurise tanks sufficiently to allow up to 3 ullage po be open at any one time for the purpose of gauging samp waterfinding, temperature taking, tank inspection, etc., but ullage must be re-secured before cargo or ballast handling is commen Export tankers equipped with Vapour Lock tank dipping/soun devices are not required to depressurise the tanks when gau temperature taking and water finding. During deballasting, the IGS be capable of producing sufficient inert gas at 8% or less oxygen q to prevent air from entering the tanks. If the IGS is not oper deballasting from cargo oil tanks will not be allowed to commen during deballasting, the IGS fails, the deballasting must be stopped the plant is again operational. If this repair is likely to take more 24 hours, the ships' Owners and/or Charterers must be contacted a safe deballasting/loading plan should be agreed by both parties, b operations are resumed. When loading an inerted tank, the inert displaced must be vented through the ship's vent system and not u ports.

Maximum Allowable Pressure: The export tanker must never excee maximum allowable pressure on its cargo piping system, and make the loading rate is fully agreed.

MEDICAL: No doctor, dentist or clinic, however, in emergen Terminal will attempt to assist.

DENSITY: 1027.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: At Sana'a.

REPAIRS: No facilities available.

REPATRIATION: No facilities available.

AIRPORT: Hodeidah and Sana'a.

SHORE LEAVE: Not permitted.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

GENERAL: *Flags:* The national flag of Yemen shall be perma displayed by vessels at the Ras Isa Marine Terminal.

Alcohol: Masters are advised that sale of alcoholic beverages to Na Citizens is strictly forbidden, and are warned of the s consequences of offering such drinks to Terminal staff who may the vessel.

Agency: The Terminal does not perform any vessel agency fun Vessels calling at Ras Isa Marine Terminal are required to arrang own agency representation from an agency operating in Hodeida

WEATHER: The winds in the area are usually light and genera from Western/Northern quadrants in the Summer, while in the W from October to April, the prevailing winds blow from So quadrants, building up strong swells, which force the Terminal the Tandem Mooring System. The existing currents are very wea

SAFETY: The Ras Isa Marine Terminal Safety Check List is bas the recommendations of the "International Safety Guide for Oil T and Terminal" (ISGOTT).

HELICOPTER: *Helicopter Operations/Precautions:* Helicopter s for embarking/disembarking a Pilot, or any other personnel fro export tanker and any other vessel, is available, but subject to ava of a helicopter. Transfer of personnel by helicopter from ships within the Terminal area may be carried out only in eme (i.e. evacuation of injured crew member), and subject to availab helicopter. The helicopter service will be for account of the export Voice contact with helicopter is possible, because all are provid VHF radio equipment. Ensure the selected landing area on bo vessel is clear. Ensure all operational requirements on deck ar guidelines issued by the International Chamber of Shipping "Guide to Helicopter/Ship Operations".

SECURITY: *General:* The Terminal will take prudent and reas security measures, consistent with security threats and risk in each particular situation.

Security Area: The security area covered is indicated by the area on the chart. Throughout the vessel's stay alongside, a watch shall be maintained. The gangway security watchme ensure (a), unauthorised persons are excluded from the (b), authorised persons are logged on and off the ves (c), if necessary, conduct checks of baggage and packag brought on to or taken off the vessel.

It is important that the Terminal advise the Master as soon as possible of any special circumstances which might necessitate special security precautions. Conversely, the Master of the vessel should also inform the Terminal of the security status procedures on board in accordance with the Vessel Security Guidelines. Export tankers, requiring urgent services (Owners' items), should establish contact with local port Agents, at the port of Hodeidah, for delivery offshore or at the Holding Anchorage, which, if the latter is utilised, should be reported to "Ras Isa Terminal – Safer", via telex or fax for clearance to use this anchorage. Any authorised representative of the Terminal shall have the right to board any vessel within the Terminal area at any time, for the purpose of ensuring that regulations are being observed. As a condition of entry into the Terminal area, the export tanker and any other ship, must agree to vacate the berth promptly on being requested to do so by the Terminal.

SHIPMASTER'S REPORT: May 1988 (Updated 1994).

NOTE: This report was received prior to receiving new operating procedures above.

Ras Isa Terminal is an offshore loading port located in the Yemen at the Southern end of the Red Sea, East of the Zubair Islands and a little North of Hodeidah (See B.A. Chart No. 143).

The Terminal consists of a purpose-converted Floating Storage and Offloading (FSO) vessel, FSO 'Safer'. This vessel is 400,000 tonnes d.w.t. (ex-'Esso Japan'), and permanently moored in position Lat. 15° 07' N., Long. 42° 36' E. The 'Safer' is under the Yemen flag, and permanently connected by pipeline to the production field via a turret-mooring (6 anchors), and submarine line to shore at Ras Isa, 4.4 miles to the N.E. Production Field is some 420 km. inland, in the Marrib area of Yemen, and production is understood to be some 150,000 barrels per day. 'Safer' takes production on a continuous basis and supplies export vessels as required.

Product is Yemen Marib Light Crude; typical API, 39.0 to 41.0, typical temperature at loading, 30°C to 38°C, dependent on local sea temperature. The 'Safer' is on a swivel mooring system and will normally lie head to wind, with some influence from tide. Terminal is operated by a Yemeni/American combine, the Yemen Hunt Oil Corp. (YHOC), and vessel is operated (at time of writing) with Italian, Yemeni and British officers and crew, together with American supervisors and Yemen Government representatives. Product suppliers are Yemen Oil and Mineral Resources Corporation. (YOMINCO).

Communications/ETA: (See Appendix "A").

On receipt of instructions to proceed to Ras Isa, then 72 hours, 48 hours and 24 hours prior, advise ETA and other details as listed. Hodeidah Ports and Marine Affairs Corporation (Hodeidah Port Authority) must be advised via Hodeidah Radio (4WD), in addition to any telex contact, as they advise the Yemen military authorities, who maintain a radar watch on all vessels entering or leaving Yemen waters. Likewise on departure, vessel must advise Hodeidah Port Authority (per format supplied by Pilot) to be marked-up on military radar screen – otherwise vessel may be intercepted; also via 4WD on 500 kHz.

'Safer' Sat. Telex 1473102 Safa-X (IOR); after initial and 72 hour messages, only requires updated ETA. On approach use VHF Channel 74.

On receipt of ship's message, 'Safer' will respond with nomination and request ship's details (See Appendix "B").

YHOC Marine: Telex 4013 or via 4WD to YHOC Marine Sanaa.

Port Authority: Telex 5565 and via 4WD.

YHOC Marine, Port Authority and Agents require message per Appendix "A" to be repeated in each ETA notice.

Approaches and Anchorage: See B.A. Charts No. 143, 548, 542 and Appendix "C" and "Plan".

Approach to Ras Isa Terminal is straightforward and clear of dangers. However, due to lack of soundings and age of survey, it would be prudent to approach from seawards rather than coasting.

From North: Follow usual courses down Red Sea, to position 15° 30' N., 41° 45' E., 4.5 miles S.W. of Jabal at Tair. Thence course 120° T., distance 52 miles gives a clear run to the Holding Anchorage, passing 7 miles N.E. of Quoin and Haycock Islands in the Zubair group. Once into soundings, least depths are 40 m. – 49 m. Clematis Shoal will lie approximately 11 miles to the North of track when some 17 miles N.W. of Terminal.

Rashshah Island, 4 miles North of Terminal, is low and sandy and has a light (3M) Fl. 10s. 8 miles; both island and light are very poor, both visually and as a radar echo and will not be sighted until within 6 miles of terminal, if at all. Terminal ('Safer'), is well lit and a good radar target, and was located at 14 miles. There is a disused SPM to the East of 'Safer', which may have a tug lying close-by, these echoes tend to confuse the actual terminal position.

From South: Leaving Abu Ail Channel, course should be made to position 14° 25' N., 42° 30' E. (avoiding Avocet Rock), before turning North towards Holding Anchorage. Least depths on this approach appear to be 31 m., but survey soundings are old. On approach good fixed positions are necessary, due to Penguin Shoal to West, and S.E. Patches to East, the latter being actually in vicinity of anchorage.

Holding anchorage is established approximately 3.2 miles to S.W. of 'Safer'; vessels may enter and leave from/to sea without pilot, but the total area from shore, out to anchorage is restricted, and vessel must be under pilotage within this area. Depths in anchorage average 38 m. to 44 m., mud/sand bottom, holding-ground good.

Berthing and Operations: See "Plan".

Pilots (2) are British. There are 2 hired tugs (1×40 ton and 1×60 ton bollard-pull), and tugs lines are used. Tugs are not ideal as they are primarily salvage tugs. Berthing daylight only, unberthing any time, dependent on weather conditions; if wind speed above 20 knots terminal is usually closed for berthing. Any size of vessel up to 400,000 tonnes d.w.t. can be accommodated. Depth at terminal is 33 m.

Berthing is vessel's port side to 'Safer' starboard side. Terminal prefer all wire moorings, but accept rope headlines and sternlines. Tails must be removed from wires. Moorings are 4 headlines/wires, 2 breast wires, 2 spring wires, 4 sternlines/wires, 2 aft breast wires, 2 aft spring wires, – usual firewires required. Usually springs first, followed by breasts, followed by head/stern lines. 'Safer' then supplies 2 'shore' wires to fo'cstle, and one 'shore' wire to poop. Messengers are required. Tugs make fast in 'push-pull' position on starboard forward main deck and aft main deck for berthing, and on long lines starboard bow and starboard quarter on sailing. Tugs lines are very heavy.

While alongside, vessel must maintain starboard accommodation ladder in lowered position. Current international safety rules, Check Lists, Regulations and procedures are in use, and practised. IGS must be positive and always less than 8%. Vessel must arrive with clean ballast, and ballast samples are laboratory tested before deballasting allowed. Portable radio is supplied by Terminal for inter-ship communications.

'Safer' will normally supply 2×16 in. hoses, using combination of ship's lifting gear and her own crane. Her max. rate is 70,000 barrels per hour. 'Safer' provides inter-ship gangway and connects/disconnects hoses.

'Safer' has cargo metering equipment, but this is still at proving stage, and vessel will 'ship-stop'.

Documentation usually takes 3 to 4 hours after completion. Pilot and any surveyors will stay aboard vessel loading. Tugs stand-by while operations are in progress.

Ras Isa commenced operations in December 1987 and 'Safer' came on stream in March 1988. There are currently an average of 6 export liftings per month from the terminal. As at present time, there are no port or customs or health formalities; ship's Agent requires 2 copies Crew List, and pilot asks of state of health. It is understood that the usual formalities will be instated in the near future, in which case the usual rules for entry into Muslim Arab countries are expected to apply.

The Yemen flag must be flown. It consists of red-white-black horizontal stripes, flown with red stripe uppermost.

There are no facilities or services available. No bunkers or water or repairs. It is apparently possible in urgent cases to obtain services via ship's Agent from Hodeidah, to the holding anchorage, with terminal permission. This would be very expensive as Hodeidah is some 30 km. away down the coast. Transport to/from 'Safer' is by launch or helicopter, Agent boards vessel on arrival. Pilot issues Port Clearance and takes off any timesheets and arrival/sailing figures for Agent if requested. Terminal will do their best to assist if urgent medical attention required, but in general vessel must be totally self-sufficient in this port.

'Safer' has 5 large Yokohama fenders and sundry smaller fenders and protection is good. Vessel's berthing (ballasted) trim must not exceed 3.0 m., with propeller immersed.

A comprehensive port-information book is issued to each arriving vessel. On boarding, Pilot will require Master to sign an indemnity absolving Pilot/Terminal from almost everything, and also pilotage timesheets, port log and tugs time of hire.

APPENDIX A: See "Note" at beginning of Shipmaster's Report.

Export tankers shall advise their ETA upon departure from its last load or discharge or other port or if at sea as soon as orders received to proceed to Ras Isa and repeat at 72, 48 and 24 hours in advance of arrival via Hodeidah Radio Station to the cable address "YHOC Marine Sanaa Telex No. 4013". Vessels equipped with Inmarsat satellite communications may address their telex(s) to "YHOC Marine" Inmarsat Telex No. 1473102 (IOR) and shall call the terminal on VHF Channel 16 when within range (then VHF Channel 74 for working).

For your information Ports and Marine Affairs Corporation, Hodeidah requires the following information from vessels stemed for Ras Isa Terminal to be sent to them either by telex (5565 Mawani YE) or via Hodeidah Radio (4WD) 72/48/24 hours prior to vessel's arrival:-

AA ETA Ras Isa Terminal.
BB Nationality of ship.
CC Summer deadweight.
DD Length overall.
EE Number of crew and state of health.
FF Cargo required.
GG Arrival draft – fore and aft.
HH Name of Agents.

Master tanker to adhere to these requirements, under copy to Agent to avoid imposition of fines.

APPENDIX B: See "Note" at beginning of Shipmaster's Report.

We hold your nomination for approximate ..... bbls at 60° F. Yemen Alif Crude approximate API 40.5.

Following information needed:

AAA Cargo quantity you able to load.
BBB Last cargo carried and if crude, source of origin.
CCC Quantity and grade of any transit cargo on board.
DDD Quantity of ballast and estimated deballast time.
EEE Quantity and type of slop onboard to lot of segregate on board.
FFF Maximum acceptable loading rate.
GGG Arrival draft (trim not to exceed 10 ft. or 3 m. by stern).
HHH Deepest sailing draft.
III Advised ability to simultaneously load and deballast with double valve segregation throughout.
JJJ Confirm latest edition of I.S.G.T.T. Safety Guide and OCIMF Ship-to-Ship Transfer Guide are onboard.

Repeat your ETA 72, 48 and 24 hours in advance of arrival to:

YHOC Terminal (via Inmarsat Indian Ocean Telex No. 1473102 Safa X).

Port Authority (Telex 5565 Mawani YE).

When within range contact YHOC Marine on VHF Channel 16 working Channel will be 74.

On arrival have your pilot ladder ready on starboard side for Berthing Master boarding and your port boom (SWL rating of minimum 10 tons) rigged for 16 in. hoses handling purposes.

Confirm your inert gas system is in good working condition. Maintaining oxygen content less than 8% by volume in cargo tanks.

Operational/Safety Check List as per OCIMF Ship-to-Ship Transfer Guide will be followed when VHF contact will be established. Please report also full name of Master.

Signed ..../Cargo Custody Transfer Coordinator
Ras Isa Marine Terminal

APPENDIX C: See "Note" at beginning of Shipmaster's Report.

On arrival vessel has to anchor at the holding anchorage. The area designated as the holding anchorage for vessels waiting for loading at Ras Isa Marine Terminal is located to the Southwest of the terminal in following position: (N.B. Vessels may only enter this area from sea, or sail to sea, without Pilot. Any other movement must be under pilotage.)

15° 05' N. 42° 32' E. 15° 03' N. 42° 32' E.
15° 05' N. 42° 36' E. 15° 03' N. 42° 36' E.

The permanent floating storage and offloading terminal (FSO) "Safer" (400,000 d.w.t.) is located approximately 4.8 nautical miles offshore Ras Isa in position:

Latitude 15° 07' North Longitude 42° 36' East
in the Red Sea territorial waters of the Yemen.

SHIPMASTER'S REPORT: June 1989.
NOTE: This report was received prior to receiving new operating procedures above.

General: Ras Isa Marine Terminal is similar to ship-to-ship oil transfer, so no documents (i.e. Stores List, Bonded Store List, etc.) were requested. However 4 copies of the Crew List are required. Repairs, fresh water, crew repatriation and shore leave are not possible.

When vessel arrives at the Pilot boarding station (Anchorage area), the Pilot, Loading Master and Agent come on board by helicopter by launch. The Pilot and Agent remain aboard until ship's departure. Two British Pilots employed and one on duty. Two tugs assisted with berthing and unberthing operations.

Information required prior to arrival: ETA upon departure from last port and repeat 72/48/24 hours in advance of arrival via Hodeidah Radio Station to the cable address "YHOC MARINE SANA TLX4013". Vessels equipped with Inmarsat communications may address their telex "YHOC MARINE Inmarsat No. 873-1104125" and shall call the terminal "SAFER" on VHF Channels 16/74.

The Agent requests the following information to pass to the terminal, this may be sent 3 days in advance.

1. Cargo quantity able to load (we loaded Marib Light crude oil, API 41.1, temperature 96°F.).
2. Origin of last cargo.
3. Quantity of dirty ballast, and deballasting time (if any need to pump to shore, estimate time via × 16 in. hose, maximum 70 p.s.i. discharge pressure, shore tank capacity 50,000 tons).
4. Quality and quantity of slops.
5. Maximum acceptable loading rate (storage tanker able to transfer 20,000 tons per hour).
6. Arrival draft (trim not to exceed 10 ft. or 3 m. by stern).
7. Maximum sailing draft.
8. Advise ability to simultaneously load and deballast with double segregation throughout.
9. Confirm latest editions of ISGOTT (International Safety Guide for Oil Tankers & Terminals) and OCIMF Ship-to-Ship Transfer Guide are onboard.

and additional items as follows:

Distance bow to manifold.

Helicopter landing area (helicopter has two engines and is large, takes about 20 persons).

Rig pilot ladder on starboard and 16 in. hose pick-up derrick on port side (SWL 10 tonnes).

I.G.S. works properly and all tanks including ballast tanks oxygen less than 8 percent by volume.

Mooring wires: Take off rope tail, this is extra ordinary request due to bad weather, the terminal had experienced rope tails breaking.

The Agent is requested to pass the following to the Port Authority:

1. ETA Ras Isa.
2. Vessel nationality.
3. Summer deadweight.
4. LOA.
5. Number of crew and confirm all healthy.
6. Quantity of cargo request for loading.
7. Arrival draft.
8. Name of Agent.

AUTHORITY: Yemen Hunt Oil Company, as Operator, P.O.Box 481, Sanaa, Yemen. *Tel:* Hodeidah 216080. *Telex:* 4013 YHOC YE. *FAX:* 967-2-216079. *Cables:* YHOC Sanaa, Yemen.

Ras Isa Marine Terminal, P.O.Box 3913, Hodeidah, Yemen. *Tel:* 967-3-217994. *Telex:* 5685 Yhocma Ye. *FAX:* 967-3-226153. *Contact:* Ahmed Kulaib, Marine Manager.

SALEEF (Salif): 15.18 N. 42.41 E.

Also see "General" before first port.

Saleef Port is a natural port on the Red Sea, approximately 80 km. North of Hodeidah Port. Two routes, one round the North end of Kamaran Island and the other around the South end provide suitable access to the harbour.

As prevailing winds are generally Southerly or Northerly, vessels are able to approach the berth from downwind. This is important as vessels will probably have to berth without tug asistance. Initially, mooring facilities are designed for 50,000 d.w.t. vessels and consists of a wharf head 20 m. wide, 93 m. long with two dolphins. A 10 m. wide trestle connects the wharf head to the shore. Facilities are designed to absorb the berthing impact of a ship approaching with a velocity component of 15 cm. per second perpendicular to the berth face and for a 50 tons mooring line pull.

Future developments: A French consulting firm has been awarded the contract to submit a report on future developments of this port.

SHIPMASTER'S REPORT: December 1979.
Acknowledgements: Most of the information has been gleaned from local Agency representatives and Capt. A. Saeed, Harbour Master.

Reference has been made to Red Sea Pilot and various BA Charts. Local written information is unavailable for the area concerned.

General: Salif lies some 60 km. North of Hodeidah, it is a natural deepwater harbour sheltered by Kamaran Island.

Since 1976 the port has enjoyed moderate expansion and can now boast a modern jetty capable of berthing ocean going vessels; other pontoon type berths are available, these being linked to the shore by small stone jetties. At present the port can accommodate two vessels of up to 200 m. length with a draft of 12 m.

Salif is geared for the export of bulk salt and the import of grain and some general cargo. In the near future a further pontoon type berth is due to come into operation to be used solely for the import of bulk cement. A bagging plant and silo have been constructed to handle the additional cargo.

This report is mainly directed to the facilities associated with the import of grain, however where possible relevant information has been included which could prove useful to other vessels trading in the area.

Documents:

6 Crew Lists with Passport numbers.
2 Bonded Stores Lists.
2 Personal Manifests.
2 Vaccination Lists.
3 copies Cargo Manifest.
Local inward forms made out on arrival.

Approaches: (BA Charts: 543 and 548). Recommend approaching around the North end of Kamaran Island, as mentioned in Red Sea and Gulf of Aden Pilot, page 390.

The lighthouses stand out well, but at night they are not lit (December 1979). The only difficulty in making Salif, in daylight, is passing to the South of N.W. shoal light, the channel at this point being about one mile wide. At night the lighthouses prove quite good radar targets, and the various islands etc. show up quite well. Once around the top of Kamaran Island course can be set down Kamaran Passage to the anchorage area off Ras el Salif. Charterers frequently advise that passage is possible South of Kamaran Island, however this is not advisable; the leads mentioned on the chart are very difficult to see and there is no room for error.

Anchorage: No specific area designated but anywhere in the vicinity of Salif Jetty. For vessels waiting for the wheat berth it is best to anchor about 0.75 miles West of Ras el Salif. Good holding ground in about 14 fathoms of water. For vessels with poor radar it would be best to anchor outside Kamaran Island until daylight, when passage can be made in safety.

Weather: See "Red Sea Pilot" for information. At Salif the wind usually picks up during the day and this can delay berthing if the strength is above Force 4.

Pilotage: Pilot boards in anchorage area from medium sized launch. Yemenese Pilot with limited English.

Daylight pilotage only.

Berthing: Vessels berth, at the bagging plant pontoon, head to wind. The pontoon consists of a flat topped barge made fast to a small stone jetty; it is well fendered with car tyres. The offshore anchor is used whilst coming alongside and a launch runs various ropes ashore to posts set on the land. Five ropes are required either end and it is necessary to join the first few together as considerable lengths are initially run. The bagging pontoon can only accommodate one vessel at a time. See "Shipmaster's Report – May 1982".

The general cargo and salt exporting jetty lies some distance to the South of the bagging plant. This pier can take one vessel of up to 200 m. in length. Facilities at this berth are an improvement over the pontoon, however for the import of grain type cargoes, it is not so efficient, it being necessary to bag the cargo by hand. Both berths can take vessels with up to 39 ft. draft.

Buoys are at present being laid to the North of the bagging pontoon and these could prove an obstacle for vessels berthing. The moorings are being laid to assist vessels making fast to the new cement pontoon (See "Projects").

Quarantine/Health Regulations: Doctor boards on arrival, either at anchorage or alongside. No health forms as such. Certificates not required unless vessel from infected area when Yellow Fever and Cholera certificates are needed. No derat facilities.

Customs: Usual Islamic laws in force. Bond not sealed and apparently no objection for crew to consume spirits/beer on board. On no account must alcohol be given/sold to local Yemenese.

Immigration: Passports are inspected on arrival. (Harbour Master acts as translator for Immigration Authorities.) Shore leave granted with passes for Salif area only. Special permission has to be given to proceed outside local area, i.e. Hodeidah.

For crew repatriation, passports are taken to Sanaa by Agent for necessary visas to be arranged.

Medical Facilities: One doctor resides in Salif, Yemenese and speaks English. He will attend the ship rather than the patient visiting him. The nearest hospital is in Hodeidah.

Port Operations (Bagging Plant): Foremen and workers are hardworking. The foremen reside in caravans close to the bagging plant whilst most of the stevedores come from Salif.

The method of discharge is to load a number of diesel driven evacuators on deck and by various pipelines, these are connected to a storage hopper situated on the pontoon/barge. The hopper is connected to a small bagging plant and by means of conveyors the sacks are loaded onto road transport.

Discharge rates per 24 hours worked between 1,600 tonnes and 1,850 tonnes. Charter Party rate indicated about 750 tonnes per day. The takeaway rate from the hopper appears to be adequate with plenty of road trucks available. The grain is shipped immediately to different parts of the Yemen.

It is usual to carry sufficient bags to enable the complete discharge of the grain to go unhindered. The bags are baled and discharged onto the pontoon at regular intervals.

Ship's gear is required at each hold to sling the pipes that lead from the evacuators into the hatch. It is also required for discharging the gunnies and for loading the evacuators (1.5 tonnes). The evacuators appear reliable but spillage of diesel results during re-filling etc.

Fresh Water: Available but expensive. Supplied by road tanker at 15 tonnes a time, it is necessary to use ship's pump for pumping the water aboard. Agents require ample notice prior to supplying water.

Fuel: Heavy oil and diesel oil not available unless barged from Hodeidah.

Stores: Not readily available; fresh stores difficult to obtain.

Agency: The main Agency lies some 60 km. away by track, and the ship is attended by a runner who commutes between Hodeidah and Salif. Considerable delays result before ship's business can be completed and it is necessary for everything to be in writing; repatriation, in particular, is difficult for the organiser as well as the traveller.

Communications between Salif and Hodeidah are non-existent, a telephone line exists, but this is out of order. It is however possible to communicate directly through Portishead Radio and sometimes the only way to get messages out.

Local currency and American Dollars are obtainable from the Agents. It is difficult to obtain the money from the Agents and generally it is best to arrive with sufficient cash on board to cover any expenditure.

To arrange repatriation it is necessary to allow at least 6 days. Visas have to be obtained from Sanaa and tickets arranged. If pre-paid tickets have been sent from U.K., then they must arrive in ample time. The airport at Hodeidah has regular connections with Sanaa which in turn is linked into most air routes via Paris. Transportation from the ship to Hodeidah is by Land Rover or similar four wheel drive vehicle.

Port Regulations: Nothing in writing. The Harbour Master is the person to approach if anything required. Apparently Salif is designated a military zone and this is the reason no written information is available.

Gangway: The vessel only lies alongside for a distance of about 80 ft. amidships and consequently a pilot ladder is used instead of a gangway or brow. If this causes any difficulty, ship's lifeboat can be used as a ferry between gangway and shore.

Watchmen: Supplied by local Police/Army. They remain aboard during vessel's stay and keep pilferage to a minimum. They also keep close watch on any alcohol that may be obtained by local Yemenese.

Shore Leave: See "Immigration".

Garbage: No facilities for taking garbage away from the ship; best to dump waste food etc., whilst retaining cardboard boxes, and plastic containers.

Repairs: Possible to immobilise main engines, as once on the berth it is unlikely to shift. No repair facilities ashore.

Time: GMT plus 3 hours (no change).

Flag: Yemen Flag must be flown at all times. Red, white, black horizontal stripes with a black star in the white section.

Consuls: Situated in Hodeidah or Sanaa. Harbour Master available for Noting Protest, etc.

Tugs: None available for berthing though frequently tugs operate in the area towing barges, pontoons, etc.

VHF: Situated in port office but hours of working very flexible. The Harbour Master normally calls any vessel up shortly after anchoring.

Fire/Ambulance: None available.

Projects: A new pontoon berth, similar to the grain berth, is being constructed about 0.25 miles to the North. Silos have been erected close to the shore and are capable of storing 9,000 tonnes of finished cement. A bagging plant has also been constructed next to the silos. It is intended that cement be shipped, in bulk, and with evacuators discharged into the silos.

SHIPMASTER'S REPORT: May 1982.

We were in Saleef recently with 39,127 tonnes wheat – ship 182.08 m. long. The following are changes to information in the Guide.

The barge – pontoon berth with bagging plant no longer exists and apart from cement boats all ships now berth at jetty by Salt terminal.

Minimum water we found there in 18 days' stay was 18.5 m.

Ship's gear must be used and grain is dumped on wharf and bagged in situ, being taken away by lorries. Rate erratic, between 900 t.p.d. and 2,000 t.p.d.

Vessel has to vacate berth for car carriers and salt loaders.

No shore leave permitted.

Bond is now sealed. No restrictions on what is kept out.

NOTES

Please also advise Shipping Guides Ltd.

Yugoslavia

BAR: 42.05 N. 19.03 E. (See Plan)

PORT LIMITS: Seaward limits of the port defines a line drawn between "Voluica" Light and Ratac Point.

DOCUMENTS:

On Arrival:

5 copies Cargo Manifest (for discharge).
Certificates for Hazardous Cargo Transport.
Originals of Vessel's Certificates.
2 copies Health Declaration.
1 copy General Declaration.
5 copies Crew List.
5 copies Passenger List.
5 copies Crew Personal Effects.
3 copies Stores Lists.
1 copy Animal Pets Aboard.
1 copy Certificate of Financial Insurance on Civil Liability for Oil Pollution – only foreign ships carrying more than 2,000 tons of oil.
3 copies List of Hazardous Cargoes loaded on board and Cargo Plan for Hazardous Cargo (1 copy).

On departure:

5 copies Crew List, if any change.
List of Hazardous Cargoes, if loaded and Certificate of Stowage.

PILOTAGE: Advance notice 24 hours through ship's Agent. Pilot boat blue hull, white deck house, with letter "P" on each side. Pilot boards off West Breakwater. Use international signals to call Pilot. Pilot may be contacted on VHF Channel 16, working on Channel 6.

ANCHORAGE: Safe anchorage West and N.W. off West Breakwater. Anchoring not allowed nearer then 0.5 mile off Breakwater.

RESTRICTIONS: Vessels, including tankers, enter/leave port by day and night. Depth entrance 14 m.

No restriction on LOA and beam. Foreign nuclear ships enter only with special permission. Leaving or entering port for foreign tankers not allowed if not having said Certificate.

MAX. SIZE: Fully loaded vessels up to 12.5 m. draft.

RADIO/VHF: Bar Radio, call sign YUW, 500 kHz and 516 kHz. Radio telephony on 2182 kHz on 2 metre band and on Channel 16.

Agents can be contacted through Bar-Radio on VHF.

Port Authority on VHF Channels 16 and 12.

Tugs on VHF Channel 6.

TUGS: 2 tugs with twin 594 kW engine.

BERTHING: Berth assigned at Agent's request or Receiver's/Shipper's, both for liners or tramps, at the daily meeting of the Harbour Board.

3,500 m. of berthing space and able to accommodate up to 20 ocean-going vessels.

CARGO HANDLING FACILITIES: Available for all kinds of general cargo, containers, pallets, Ro/Ro, bulk, fuel oil and chemical cargoes. Regular passenger service to Italy and from May – October to Greece.

Grain silos with 30,000 tons capacity with covered Vacuvator.

STEVEDORES: The Port Enterprise "Luka Bar" is the sole stevedoring company. Work is done Monday to Friday in 2 shifts: First shift 0600 hrs. – 1400 hrs. Second shift 1400 hrs. – 2200 hrs. Third shift can be ordered at daily meeting, paid as overtime. Saturdays, Sundays and holidays may be worked on overtime.

MEDICAL: Medical care available at Medical Centre at Bar.

TANKERS: New oil berth can accommodate tankers up to 80,000 d.w.t., draft limit 12.5 m. Bunkers from local bunker station. Tank cleaning, pumping of slops and gas freeing not permitted in port.

Tankers must be ready to leave port at 30 minutes' notice, at any time and at request of Port Authorities.

DENSITY: Sea water.

FRESH WATER: Available from hydrants on quay. It is also possible to supply fresh water in the roads.

FUEL: Can be obtained from local bunker station or by fuel barge. All grades available.

CONSULS: None.

REPAIRS/DRY DOCKS: Dry Docks at Shipyard "Veljko Vlahovic", Bijela, 36 miles from Port of Bar, capacity of about 130,000 d.w.t. and 35,000 d.w.t., available for all types of deck and engine repairs. Minor damage can be repaired while loading/discharging.

SURVEYORS: Representative of Yugoslav Register of Shipping at Tivat (80 km.).

GANGWAY/DECK WATCHMEN: Available at Master's request.

OPENING/CLOSING HATCHES: Normally performed by crew, or as per Charter Party.

CARGO GEAR: Mobile Shore Cranes: 6×5 – 6 tons, 3×3 tons, 3×8 tons, 2×20 – 30 tons, 3×12 tons for bulk cargoes. Forklifts of 1 ton up to 40 tons capable of handling containers and Vacuvators. 1×40 ton container crane. If not agreed in C/P, loading and discharging is by shore cranes.

CUSTOMS ALLOWANCES: Yugoslav Customs Regulations apply.

REPATRIATION: From Bar by bus, train (International Lines), and ship.

TIME: Central European Time, GMT plus 1 hour. Summer time kept from March to October (date fixed annually).

SERVICES: Compass adjuster at Bijela (100 km.), RDF representative at Bar. Other electronics repairs via Agent.

HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 13th, November 29th and 30th. Work can be arranged on Sundays and 2nd day of two-day holiday.

POLICE/AMBULANCE/FIRE: Police Tel. 92; Ambulance Tel. 94; Fire Tel. 93.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Collection service is performed daily whilst alongside, by special trucks. Charges are from U.S.$ 17.70 to U.S.$ 64.95 per day, depending on tonnage of vessel. Should collection only be required every second day then charges increase by 50%. Contact Tel: 085-12-332 or 085-12-022, Extn. 609.

WASTE OIL DISPOSAL: Anti-pollution service exists, using floating boom, skimmer and other equipment. Collection service is carried out using drums and tanker trucks. In the near future a barge and oily water separator will be in use. This service is carried out by PIOB. Tel: 085-12-332 and 085-12-022, Extn. 609. Telex: 63139. Fax: 12-213.

SEAMAN'S CLUBS: None.

CURRENCY: Yugoslav Dinar (YUD).

AUTHORITY: Lucka Kapetanija Bar, Obala 13, Jula 18, 85000 Bar, Montenegro, Yugoslavia. *Tel:* (085) 11-382. *Telex:* 63188 Luckap. *FAX:* (085) 11384. *Cables:* Lucka Kapetanija Bar.

AGENT: Jadroagent – Bar. Obala 13, Jula 6, P.O.Box 10, 85000 Bar, Montenegro, Yugoslavia. Cables: Jadroagent Bar. Tel: (085) 11-195, 11-194, 11-193. Telex: 63141 Yu Jadrag. Fax: (085) 12751.

KOTOR: 42.27 N. 18.36 E.

PORT LIMITS: Imaginary line between lighthouse at "Prcan" and lighthouse at "Sv.Stasije".

DOCUMENTS:

Cargo Manifest.
Crew List.
Passenger List.
Stores List.
Crew's Effect Declaration.
Dangerous Cargo Manifest.

Valid Vessel's Documents: All documents required by the relevant international conventions for given type of the vessel and given trade.

PILOTAGE: Pilotage is compulsory for vessels above 500 g.r.t. Pilot available 24 hours a day. Notice of ETA 24 hours in advance. Contact through Channel 16, through the vessel's Agent or directly to the Port of Kotor.

ANCHORAGES: West and S.W. of the lighthouse on the quay at Kotor in 14 m. – 17 m. Good holding ground.

RESTRICTIONS: No restrictions regarding the time of vessel's arrival at port and no restrictions related to tide, bridges, etc. Maximum vessel's draft which can be accommodated in port is 13.0 m.

MAX. SIZE: Due to the port configuration, there are no restrictions regarding the length and breadth of the vessel. Max. draft is 13.0 m.

HEALTH: Illness reports to be made on arrival of the vessel in port. Any serious disease, or communicable disease to be reported before arrival, and approval is to be given by Port Authorities before the vessel is berthed.

RADIO: Port has no radio communication equipment.

VHF: Vessels calling at Kotor can contact Kotor Port Authority via Channel 16.

RADAR: No port radar equipment.

TUGS: Port has no tugs of its own, but tugs are available from the shipyard at Bijela in the vicinity of the port on request.

BERTHING: Port consists of 3 wharves, two in Kotor and one in Lipci for tankers. They are divided as follows:

Berth	*Length* (m.)	*Depth* (m.)
No. 1 Riva I	150	12.8
No. 2 Riva II	100	10.0
No. 3 Riva III	250	6.8 – 8.0
No. 4 Rijeka I	80	7.0
No. 5 Rijeka II	70	5.0
No. 6 Lipci	100	7.0

Open storage area at wharf is 4,000 sq.m., and closed storage space is available in Grbalj at distance of 5 km. from Kotor.

CRANES: Port has no cranes, but in special circumstances cranes and other cargo handling equipment could be hired from companies in Kotor.

BULK CARGO FACILITIES: Port is not equipped for handling bulk cargo.

SPECIALISED CARGO HANDLING FACILITIES: Port has no specialised cargo facilities.

BRIDGES: No bridges effect navigation to or in the port.

STEVEDORES: The recognised working hours are from 0700 hrs. until 1500 hrs., Monday to Friday, holidays excepted. Port can organise and provide all services required by port users.

MEDICAL: Full hospital facilities are available.

TANKERS: Tankers are served at special tanker terminal in Lipci. Storage of 12,000 cu.m. available. Arrangement is to be specially made with Jugopetrol Kotor.

DENSITY: 1025 – 1010, depending on the season.

FRESH WATER: There are 10 fresh water connections along the berths for water supply. Water can be taken 24 hours a day. Price varies between U.S.$1.00 – U.S.$2.50, depending on the season.

FUEL: Smaller vessels, having draft up to 5.5 m., can take fuel from the fuel station in the port. Larger vessels are supplied by truck.

FIRE PRECAUTIONS: Usual precautions for flammable cargo at terminal at Lipci. No other specific measures are imposed in the port of Kotor.

CONSULS: None.

REPAIRS: Only minor deck and engine repairs are possible in the port. For all types of repairs, there are 2 ship repair yards in the vicinity of the port. One in Bijela, at distance of 7 nautical miles, and the other in Tivat, at distance of 6 nautical miles.

DRY DOCKS: None.

SURVEYORS: Hellenic Register of Shipping has an office in Kotor. Surveyors from other classification societies are available from shipyard at Bijela and port of Bar, as well as the surveyors of "Jugoinspect" entitled to perform all types of cargo inspections.
GANGWAY/DECK WATCHMEN: Not required, but could be provided on request.
OPENING/CLOSING HATCHES: Normally by crew.
CUSTOMS ALLOWANCES: Regulated by national regulations.
CARGO GEAR: All cargo operations preferable by ship's gear.
REPATRIATION: All facilities are available.
AIRPORT: Nearest airport is at Tivat, at a distance of 5 km. from the port. Regular service to Belgrade throughout the year with connections worldwide. During the season, regular service worldwide.
TIME: GMT plus 1 hour. GMT plus 2 hours from 1st April until last week in October.
HOLIDAYS: New Year's Day; Labour Day; Veteran's Day (4th July); The Day of Montenegro (13th July); Republic Day (29th and 30th November).
POLICE/AMBULANCE/FIRE: Local telephone numbers are: Police 92, Ambulance 94 and Fire Brigade 93.
EMERGENCY CO-ORDINATION CENTRE: In case of any kind of emergency, the nearest Port Authorities should be contacted.
TELEPHONES: Telephone connection could be arranged to the vessel on request.
SERVICES: All services need to be arranged in advance with Port Authorities.
BANKS: Jugobanka – Kotor, Benovo b.b. 85330 Kotor. Tel: +381 82 16250. Fax: +381 82 16368.
STORING: Stores are delivered to the vessel only by trucks which could proceed alongside. Forklift can be used. Full assistance available.
SHIP SUPPLY SERVICES: A number of ship suppliers operate in this region, supplying ships with whatever they need.
SHORE LEAVE: Crew members and passengers are welcomed ashore without any specific procedures.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Garbage disposal in plastic bags, drums and garbage container is available on daily basis or according to the need of the vessel.
WASTE OIL DISPOSAL: Waste oil disposal is available by trucks, but arrangement is to be made at least 24 hours in advance.
SEAMAN'S CLUBS: None.
CURRENCY: National currency is Dinar. U.S.$ 1.00 = 4.48 Dinars. Exchange rate varies on a daily basis.
REGULATIONS: No unusual or specific regulations are in force in the Port of Kotor.
DELAYS: No delays expected.
GENERAL: Cargo is served in the port of Kotor on irregular basis and according to the circumstances, while the port is designed and tailored for pleasure yachts, passenger and cruising vessels for which there are all types of facilities.
AUTHORITY: Lucka Kapetanija Kotor, 85330 Kotor, Montenegro, Yugoslavia. *Tel:* +381 82 14950. *FAX:* +381 82 13053.

Port of Kotor, Commercial Enterprise, Port of Kotor, Park Slobode 1, 85330 Kotor, Montenegro, Yugoslavia. *Tel:* +381 82 16987. *FAX:* +381 82 14974. *Contact:* Nikola Konjevic, General Manager.

ZELENIKA: 42.27 N. 18.35 E.

DOCUMENTS: See "Bar".
PILOTAGE: Pilot boards at entrance of the Bay of Kotor, near point Punta Ostro. In bad weather Pilot boards at anchorage.
ANCHORAGE: Good ground for anchorage S.W. of Zelenika, about 0.25 miles off port light in about 27 fathoms.
MAX. SIZE: Port of Zelenika damaged by earthquake and temporarily closed, vessels berth at the passenger quay at Herceg-Novi.
HEALTH: Radio Agent requesting Free Pratique, 24 hours before arrival. For vessels over 500 g.r.t. Pratique is given at the anchorage. For small ships and yachts, Pratique is given at Herceg-Novi.
TUGS: None. In cases of necessity can be ordered from shipyard at Bijela.
BERTHING: The berth is assigned through the Agents giving notice 24 or 48 hours in advance. At present there is berthing for small ships only at the passenger port at Herceg-Novi.
STEVEDORES: State stevedoring company.
MEDICAL: Nearest hospital at nearby town of Herceg-Novi.
FRESH WATER: Available from hydrant on the passenger quay at Herceg-Novi.
FUEL: Nearest bunker station is at Bar.
CONSULS: None.
REPAIRS: Any kind of repairs including dry docking at nearby shipyard at Bijela.
DRY DOCKS: Floating dock lifting capacity 10,000 tons, LOA 184 m., length over keel blocks 165.6 m., inside free breadth 25.5 m.

Floating dock lifting capacity 33,000 tons. LOA 252 m., length over keel blocks 235 m., inside free breadth 44 m.

The yard is about 4 miles East of Zelenika. The yard has 1,300 m. of fitting pier.
OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores.
CUSTOMS ALLOWANCES: About 40 cigarettes and 0.5 litres wine/spirits per man per day.
CARGO GEAR: Loading, unloading performed with ship's gear.
TIME: Central European Time. GMT plus 1 hour. Summertime kept.
HOLIDAYS: January 1st and 2nd; May 1st and 2nd; July 4th and 13th; November 29th and 30th. Work can be arranged on Sundays and on 2nd day of two-day holidays.
POLICE/AMBULANCE/FIRE: No direct connection, in case of necessity call Agency, Tel. (082) 81-456 Jadroagent or (082) 81-261 Jugoagent.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes issued by local police.
AUTHORITY: Lucka Ispostava Zelenika.

AGENT: Jadroagent, Medunarodna pomorska i saobracajna agencija, Poslovna jedinica, Bijela. Tel: (082) 81-456. Telegraphic address: Jadroagent Bijela.

NOTES

Please also advise Shipping Guides Ltd.

Zaire Republic

GENERAL:

ETA: It is essential that any change of vessel's ETA should be transmitted sufficiently in advance in order to avoid short shipments of cargo.

Matadi is only a transit port where cargo is not stored in order to avoid congestion.

Imported cargo is immediately re-forwarded to the interior while export cargo is only brought to Matadi a few days before the ETA of the vessel for which it has been booked.

Therefore, in order to make the cargo available at Matadi, shippers need a notice varying according to the cargo concerned, but which cannot be less than 2 weeks as is the case for coffee.

Agents at Matadi and Boma have been instructed to inform Port Authorities latest 4 days before berthing of inward cargo tonnages.

Non compliance with this provision may result in berthing delay.

PILOTAGE: Vessel should cable ETA 24 hours before arrival to the Harbour Master. Cable address: "Maritime Banana" via Banana Radio.

Pilotage compulsory for all vessels over 500 g.r.t. bound for Boma and Matadi.

Ships bound for Matadi and/or Boma must take a Pilot at the Pilot Station at Banana (at the mouth of the Zaire River). Pilot station at Banana can be contacted directly by radio (VHF).

In order to increase the safety and to facilitate the navigation on the river the Regie des Voies Maritimes have decided that in case a vessel is not equipped with a VHF installation the Pilot will bring one on board, for which a charge is made.

The following rules must be observed at the request of the Regie des Voies Maritimes for embarking and dis-embarking of Pilots.

If gangway is rigged astern on the port side it is compulsory to use the pilot ladder.

If gangway rigged amidships on port side it is recommended that the pilot ladder is used in combination with the gangway.

Pilots requesting only the gangway do so at their own risk.

Theoretically sailing from Matadi/Boma is only authorised if vessel can reach Banana by 1800 hrs. at latest since navigation on the Zaire river is normally limited to daylight hours.

With regard to the trim the pilotage services ask Masters to comply with following rules:

Maximum draft 12 ft. aft; 2 ft. forward.

DOCUMENTS: *Ship's Documents required on arrival:*

Clearance from last port.
7 Crew Lists.
3 Lists of Arms and Ammunition.
7 Passenger Lists.
1 List of stowaways.
2 Crew Declarations.
3 Lists of Ports of Call.
2 Stores Lists.
1 International Tonnage Certificate.
1 International Load Line Certificate.
1 Derat Exemption Certificate.
1 Cargo Ship Safety Equipment Certificate.
1 Certificate of Registry.
1 Radiotelegraphy Certificate.
1 Construction Certificate.
1 Certificate Form on Board.
Free Pratique.

Documents required for disembarking passengers and discharging cargo:

A. To be received by mail at least 8 days before ship's arrival:
(1) Cargo:
  3 Freight Manifests
  8 Cargo Manifests
  5 copies of Bills of Lading
  6 copies of Stowage Plans.
(2) Passengers:
  1 Accountancy
  3 Passenger Lists, for passengers for the port/or in transit.
B. To be received by ship's bag at ship's arrival at quay:
(1) Cargo:
  1 Freight Manifest
  4 Cargo Manifests
  3 copies of Bills of Lading.
(2) Passengers:
  1 Freight Manifest
  4 Passenger Lists for passengers for the port and/or in transit.

It is most important that stowage plans be available before vessel's arrival. Vessel's operations are indeed delayed to the next shift if same are only remitted upon arrival.

DRAFTS AND CURRENTS: Drafts on Zaire River are influenced by seasonal water levels and by the state of dredging. They have been varying over the last 5 years from 21 ft. to 26 ft. and are presently (March 1994) as follows:

Inwards: High Water: 21 ft. 00 in.
Outwards: High Water: 22 ft. 00 in.

The authorised drafts are notified regularly by the Port Authorities.

The currents of the river and from berth to berth as well as in Matadi and Boma vary and depend upon the high and low levels of the water sometimes with adverse currents and still waters.

For proceeding to Matadi and according to the season vessels must have a speed of at least 10.5 to 11 knots, especially to pass the "Devil's Cauldron" about 3 miles before Matadi. 12-13 knots or greater sometimes requested for a 10-15 minute period.

HEALTH: Ship's crew must have an International Certificate of Vaccination against yellow fever and cholera.

RADIO: Banana Radio, 9PA.

Telegraphy – medium wave: 0430 – 2030 UTC.
500 kHz.
Working frequency: 489 kHz.
Listening frequency: 480 kHz
512 kHz.
Traffic list each hour + 00 of each hour during service hours.

Telegraphy short waves: 0500 – 2000 UTC.

Traffic list at:
0500/0700/0900/1100/1600/1900: 8445.0 kHz
0600/0800/1200/1400/1700 : 12660.0 kHz
1000/1300/1800 : 22431.0 kHz
1500 : 17184.8 kHz

Reserve frequency for medium wave: 6491.5 kHz

Remarks: This frequency is used for traffic when QRN appears on 489 kHz.

Reserve frequency: 8546 kHz.

Listening on 8, 12 and 16 MHz, Channels 5, 6 and 15. On 22 MHz, Channels 3, 4 and 9.

Each Channel is monitored during 1 minute in a scanning system and this, during 15 minutes following traffic list (same frequency band as traffic list) after 15 minutes, the receiver is blocked on Channel 6 (4 on 22 MHz) until next traffic list.

Telex on Request

Paired frequencies:

Code 34646 (This is not definite since it must be allocated by UIT).

9PA:	8714 kHz	Ship:	8353 kHz
	13078.5 kHz		12498.5 kHz

Telephony: 0430 – 2030 UTC

Listening:	2182 kHz	2182 kHz
	4125 kHz	4125 kHz
	6215.5 kHz	6521.9 kHz
	8257 kHz	8780.9 kHz
	12392 kHz	13162.8 kHz

Telephony Short Wave: 0430 – 2030 UTC.

Traffic list at:

0430/0630	on 6521.9 kHz	– listening 6215.5 kHz.
0530/0830/1030/1530	on 8753 kHz	– listening 8257 kHz.
0730/0930/1430/1930	on 4419.4 kHz	– listening 4825 kHz.
1130/1630	on 13162.8 kHz	– listening 12392 kHz.
1230/1730	on 17294.9 kHz	– listening 16522 kHz.
1330/1830	on 22658 kHz	– listening 22062 kHz.

Telephony VHF: 0430 – 2030 UTC.

Channel 16. Simplex Channels. Duplex Channels.

Remarks:

1. Telephone connections are possible and Agent accepts telegrams in telephony.
2. Other available frequencies for telephony:

Banana Radio/9PA	*Ship*
4357.4 kHz	4063.0 kHz
4382.2 kHz	4087.8 kHz
8777.8 kHz	
8762.3 kHz	8238.4 kHz
13181.4 kHz	12410.6 kHz
17350.7 kHz	16577.8 kHz

3. Radio beacon continuous.

Frequency: 315 kHz. Call Sign: BAN.
Position: Lat. 05° 53' 24" S., Long. 12° 17' 48" E.
Power: 1kW.
Antenna: Omni-directional.
Range: 350 miles (daylight).

BRIDGES: *Bridge on River Zaire:* It is advisable to sound whistle on approaching bridge, to warn small canoes in the fairway.

FUEL: Must be ordered from Petrozaire at least 48 hours before required. Normally supply of gasoil, light and heavy fuel is effected at Banana between Buoys 12 and 14 ex-barges with: minimum quantity – 250 tons; maximum quantity – 800 tons (total barge quantity).

Smaller quantities can also be supplied in Matadi or Ango Ango.

STEVEDORES: The ONATRA (Office National des Transports) – public institution, has the monopoly of the handling, stevedoring and transit operations at the ports of Matadi and Boma.

At each berth the responsible "Pier Master" remains in constant contact with the Chief Officer during the whole operation.

Working shifts are as follows: 1st. shift: 0630 – 1430 hrs.; 2nd shift 1430 – 2230 hrs. overtime; 3rd shift: 2230 – 0630 hrs. overtime.

Work must be ordered the day before vessel's arrival. However, if gangs are available, work can still be ordered the day of vessel's arrival but latest at 0930 hrs. during week days.

In principle no work is done on Sundays, holidays and during the night. If required same has to be ordered by writing 1 working day in advance before 1000 hrs. Port Authorities will then decide according to the situation at that time.

According to the situation of the Port, the Authorities can also order labour 24 hours per day Sundays and holidays included.

At Boma there is no third shift – however on special request, work can eventually be granted until 2400 hrs.

At Matadi work during third shift will only be ordered upon special request from vessel.

For all stevedoring operations the use of shore cranes/dock labourers is compulsory. It is only in particular cases such as handling of containers/"heavy lifts" or prolonged (electrical) breakdowns that Port Operators can authorise use of vessel's equipment.

GENERAL: The following telex was received from an Agent in 1994.

Quote:

"Commercial calls for discharging and/or loading cargo in Zaire are subject to vessel's Owners and/or Operators, having been granted "Approved" status by Zairese freight office "Office Zairois de Gestion du Fret Maritime – OGEFREM", after signing a "Contrat d'Adhesion" and making U.S.$10,000 deposit as security for compliance with Zairese Maritime Rules.

Cargoes loaded abroad for discharge in Zaire are subject to a waiver to be obtained at port of shipment with the local OGEFREM representatives. The waiver is evidenced by "Attestation de Reservation de Cale – A.R.C.", copy of which together with a copy of the Freight Manifest must be remitted by the vessel's Agents to OGEFREM office in the Zairese port of discharge. Vessels carrying cargoes to Zaire without A.R.C. are imposed with a penalty of 20% of the freight which, if not paid immediately, is deducted from the deposit, and the Owners are invited to complete it to reach again U.S.$ 10,000, pending which the Owners "Approved" status is suspended and their vessel's calls are not authorised."

Unquote.

Quay Practices:

The Zaire courtesy flag must be hoisted by foreign ships during daytime.

In view of the proximity of the town, the use of whistles, sirens and similar signals is forbidden, except on special occasions.

Safety nets must be put between ship and quay at each of the working hatches and beneath the gangway.

No rubbish whatsoever may be thrown overboard.

Official Language:

The official language used by the Port Authorities and Administration is French.

Cargo plans:

According to ONATRA's instructions, stowage plans of ships calling at Matadi/Boma must be issued in such a way that they show clearly where all goods loaded for Matadi/Boma in several ports are located. This enables ONATRA to have, at once, a clear view of each vessel and to study, before ship's arrival, the discharging/loading possibilities.

Those stowage plans must reach Agent before ship's arrival.

Vessel's loading/discharging operations will only start during the next shift if stowage plans are remitted upon vessel's arrival. A request can be made to shift the vessel to a more convenient berth depending upon the cargo concerned.

With regard to cargo loaded, ONATRA does not issue stowage plans and Masters should consequently be instructed to draw up stowage plans themselves for transmission to corresponding discharging ports.

It is customary not to moor ships at Matadi/Boma between 2200 hrs. and 0600 hrs. They remain at anchor.

Important Notices:

In connection with manifests for Matadi/Boma cargo:

1. Liner Terms Cargo:

According to the General Rules and Tariffs stowing, unstowing, loading, discharging rates are applied on weight/measurement, whichever is the highest irrespective of the freight unit.

The Port Authority ONATRA instructs therefore that:

(a) The Freighted Manifest remitted to them must show three columns detailing respectively weight and volume and freight unit (freight tons) of each cargo/bill of lading.

(b) At the bottom of each page a summing up of tonnage/weight, tonnage/volume and freight units (freight tons) should be mentioned.

(c) The last page of the manifest shall contain a separate recapitulation of weight tons, volumes and freight units (freight tons) showing thus the respective totals of each item.

Corrections or additionals added by the Agent at Matadi/Boma by hand or with typewriter are not accepted by ONATRA.

ONATRA is fully implementing the regulations and, for vessels whose manifests are incomplete or incorrect, a penalty, which may reach 1,000% of the stevedoring costs (or 10 times) is charged.

2. F.I.O. Cargo:

The same information is to be supplied as for Liner Cargo but, in addition, the manifest and B/L must clearly mention that cargo is carried on free out terms.

BANANA: 06.01 S. 12.25 E.

DOCUMENTS: See "General" before first port.

APPROACHES: In view of the strong current, and in view of the fact that the lights of the navigation buoys on the river do not always work properly, night navigation is practically impossible. Tankers, therefore, arriving at night, or in times of congestion, are recommended to anchor approx. 5 miles West of Moita Seca Light in approx. 10 fathoms, about 12 miles from Stella Buoy.

PILOTAGE: River can be entered direct from sea in deep water. Pilot (not compulsory) will board vessel from 0600 hrs. with Authorities at Pilot Station located one mile South of Banana Point.

The position of the flare of the SOCIR Refinery at Moanda is:

Lat. 5° 57' 51" S.
Long. 12° 25' 07" E.

The flare is visible during day and night and may be a good bearing for vessels approaching river.

Sailing from "Stella Buoy" at 0600 hrs. vessels with a speed of up to 14 knots must pass Bulabemba before 1400 hrs. and vessels with speed in excess of 14 knots by 1500 hrs.

MAX. SIZE: Tankers up to 35 ft. draft may discharge at buoy moorings. Also see "Berthing – Commercial Port".

HEALTH: Quarantine Officer boards at sea buoy. Free Pratique usually granted as soon as Maritime Health Declaration completed. Valid cholera and yellow fever inoculations required for all crew members.

RADIO: *Tankers:* At least 3 days' notice required to Agent (ETA and draft only) and to Harbour Master, "Maritime Banana" (ETA only). It is necessary to transmit these notices via another shore station (e.g. Cape Town Radio, Libreville Radio, etc.), as the Banana Radio Station can only be reached 2 days prior arrival. Close advice on changes in ETA necessary to prevent delays in waiting for Pilot and lighters.

Radio Banana (9PA) – see "General" before first port for details.

BERTHING:

Commercial Port:

The commercial port consists of a landing space of approximately 2,000 sq.m. in front of a warehouse with approximately 2,500 sq.m. storing room.

ONATRA, the Port Authority, has no cranes and the port equipment is extremely limited. Any discharging and/or loading must therefore be done by ships' gear.

With a draft of more than 17 ft. (indicative) cargo operations to be performed at anchor between Buoys No. 12 and No. 14. Barges and gangs are then supplied on request.

With a draft of less than 17 ft. (indicative) vessel can berth at ONATRA wharf inside Banana Bay.

Length of the wharf: 75 m.

DENSITY: Brackish to salt.

FRESH WATER: Not available.

FUEL: Must be ordered 48 hours in advance from Petro-Zaire. Bunkering takes place between Buoys No. 12 and 14. Gasoil, light and heavy fuel oil available. Barge capacity 800 tons, minimum order 250 tons.

MEDICAL: Doctor available for emergency only. No dental or hospital facilities.

TANKERS: Tankers remain at anchor between Buoys No. 12 and 16 on the river, anchorage being agreed upon by the Master and the local suppliers' representative who will have received the advice of the Pilot. Since there is no mooring buoy and in view of the strong currents it is recommended to use both anchors while main engine to remain on standby.

Cargo Operations: Tankers discharge into/load from cargo barges moored alongside either side. These barges (three in total) have a capacity of 1,650 long tons or 2,050 cu.m. and can receive the cargo at a rate up to 400 t.p.h. Under normal conditions the refinery will handle these barges per shift of 12 hours. Cargo operations are effected continuously day and night during Sunday and holidays, in shifts from 0600 – 1800 hrs. and from 1800 – 0600 hrs.

Sailing: Tankers sail without Pilot and may leave any time.

Moanda Terminal: To notify his arrival, Master to call M.V. "Afran Zenith" by radio. Vessel will then proceed to single buoy mooring berth with following particulars:

Depth: 57 ft.
Position: Lat. 5° 57' 50" S.
Long. 12° 08' 19" E.

where loading will take place.

The storage tanker is moored in position:

Lat: 05° 57' 30" S.
Long: 12° 06' 00" E.

No tank-cleaning facilities. Barge available for dirty ballast reception limited to 2,000 cu.m. per trip which occasionally and on special request can be put at disposal by the refinery.

Also see "Shipmaster's Report".

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

SHORE LEAVE: Shore leave is presently not allowed due to lack of communications; only in urgent cases may a crew member join one of the refinery tugs. There is no entertainment whatsoever ashore.

GENERAL: During stay of tankers at anchorage the discharge and/or loading operations are constantly supervised by representatives of the refinery, who are to be accommodated on board and to be provided with meals.

SHIPMASTER'S REPORT: September 1985.

Location: Moanda Oil Terminal is operated by the Zaire Gulf Oil Company. It is located about 10 miles offshore from Zaire. It consists of a SPM in position Lat. 5° 57' 50" S., Long. 12° 08' 19" E. in about 75 ft. of water. Crude oil is transferred to the export tanker at the SPM from the storage tanker "Afran Zenith" of 95,185 d.w.t.

Wind and Swell: Wind and swell are mostly from a Southwesterly direction with a heavy swell from March to September. The tidal range in the vicinity of the berth is 6.9 ft. The current in the area is a composite of the effect of the general Northwesterly drift and the outflow of the Zaire River. This results in a current of 3 – 4 knots or more in a Northerly at Westerly direction. In view of the foregoing, Masters of vessels calling at the terminal are advised that under no circumstances are engine repairs permitted within terminal limits.

Communications: Vessels bound for Zaire are required to advise their ETA:

(a) Via COMSAT to Master m.v. "Afran Zenith" GZOL 1242403; or
(b) Via telex or radiogram to the main office of the vessel's Agent in Kinshasa who will pass over the information to Zaire Gulf Oil Company (ZAGOC) and to their local office at Moanda.

ETA messages to be sent 72, 48 and 24 hours before arrival at the terminal and should contain the following information:

(a) Name of vessel.
(b) ETA in GMT (Zaire time is GMT plus 1 hour).
(c) Name of Master.
(d) Estimated arrival draft, fore and aft and displacement.
(e) Time for discharging clean ballast, if any.
(f) If vessel proceeding to any port(s) prior to Moanda and if so delays anticipated.

A 24 hour watch is maintained on VHF Channel 16 on "Afran Zenith" and contact is usually possible at a distance of 20 – 30 miles.

Dirty Ballast: No facilities exist for receiving dirty ballast and all tankers must arrive with clean ballast.

Cargo Information: Oil loaded at the Moanda Terminal is Zaire composite crude with an average API of 31.5. The loading temperature will vary from 80°F – 85°F and is fairly steady throughout the year. The loading rate is about 30,000 bbls.p.h.

Approach to Anchorage/Mooring Master Boarding Area: If vessel is required to anchor, the recommended tanker anchorage is within a circle 0.5 miles in diameter and its centre is located in a position 5 miles due West of the SPM. Owing to the presence of oil wells and submarine pipelines vessels should not enter into the area bounded by lines joining the following positions:

(a) Lat. 05° 46.5' S., Long. 12° 12.5 E.
(b) Lat. 05° 49.5' S., Long. 12° 09.0 E.
(c) Lat. 06° 00.0' S., Long. 12° 09.0 E.
(d) Lat. 06° 00.0' S., Long. 12° 18.0 E.
(e) Lat. 05° 53.5' S., Long. 12° 18.0 E.

The ZAGOC Mooring Master Boarding Area is 3 miles due West (Lat. 05° 57.30' S., Long. 12° 06' E.) of the storage tanker "Afran Zenith"or boarding will be at the anchorage as appropriate.

Accommodation: During vessel's stay at the terminal the Mooring Master, Loading Master, Agent, Surveyor and 4 men for the hose gang will stay on board.

Mooring Arrangements: Mooring operations are only undertaken by day under normal weather conditions. Unmooring operations can be undertaken at any time. The following preparations are required on the export tanker:

(a) 4 mooring ropes, minimum length 220 m. and size 9 in., buoyant lines if possible e.g. polypropylene, in good condition.
(b) 2 suitable heaving lines of appropriate length.
(c) 2 mooring lines aft for securing a tug to realign the vessel to the buoy if necessary.

Hose Connections: 1×16 in. hose is connected to the ship's manifold.

Bunkers: Not available.

Fresh Water: Not available.

SHIPMASTER'S REPORT: April 1987.

Vessel discharged at Banana and Ango-Ango.

Approaches: Wide open with very deep water approach. Vessels can anchor at either side of the river mouth in 20 fathoms. Pirates do not appear to be a problem. The very small amount of traffic using the Congo indicates that there will be no problems with regard to crowded anchorage.

Pilotage: River passage is during daylight hours only. The Pilot boards off the Banana Creek Channel, and the lightening anchorage is between Buoys No. 12 and 14, however No. 12 Buoy is missing. A secondary anchorage is between Buoys No. 16 and 18, abeam of Crique Ariel Beacon. Both anchors with about 7 or 8 shackles will be used in either anchorage. The current is always out-flowing, so there is no fear of a fouled hawse on this visit. This vessel tried to anchor in the first anchorage, (vessels normally try the first anchorage, so as to be that much nearer to Banana for the lighters). Vessel started dragging anchors, so we hove up and moved into the second anchorage.

Officials: 14 officials boarded the vessel.

Documents:

8 copies Crew List.
6 copies Passenger and Mail List.
6 copies Stowaway List.
4 copies Cargo Manifest.
4 copies Ullage Report from Last Port.
6 copies Kroo Boy List.
6 copies Arms and Ammunition List.
6 copies Narcotics List.
6 copies List of Ports Visited.

Discharge: Lightering only at Banana.

The amount of lightering depends on the water available in the dredged sections further upstream, (all the cargo lightened has eventually to be taken up to Ango-Ango by the lighters).

On this occasion, we had to off-load into 5 lighters, to come up to 23 ft. draft (max. permissible draft up-river at this time). Only 1 tug was available so this meant 3 trips. No unloading took place between midnight and 0800 hrs. the next morning.

One pump was used, discharging to 1 barge each side simultaneously. The tug takes 2 barges at a time back to banana.

Passage to Banana and Ango-Ango: The passage to Banana takes 6 to 7 hours, and if vessel cannot arrive at Ango-Ango before 1700 hrs., then vessel will anchor at Boma. All passages take place during daylight hours.

The continuous outgoing river current can vary from 3 knots up to 6 – 7 knots, depending on rainy or dry season.

From Banana to Buoy No. 24, there is plenty of water and room to manoeuvre, etc. although it should be emphasised that here are very few aids to navigation which can be relied upon. The buoys throughout the river passage are very doubtful as to their position (they may have been moved as the channel moves, but no Notice to Mariners issued). The strength of the river current must make the mooring of these buoys very difficult, also many of them consist of oil drums fastened together.

There is a narrow channel section (dredged in parts) from Buoy position No. 46 to Buoy No. 78. Part of the new channel veers away from the dotted line on the chart, and goes off to the West of "Archipel des Tortues", up what appears on the chart to be a narrow creek. From here on there is no visual chart indication of where you are going. In the narrow parts there may be 2 buoys (oil drums) to go between, but even so there are quite a few severe turns. so there are quite a few severe turns.

From Buoy No. 86, you are back in soundings and there is plenty of water up to Boma. The Pilot changes at Boma.

We anchored overnight at Boma. The anchorage is opposite Boma town and is in a quiet stretch of water out of the current. Only one anchor is used (4 shackles), and as the current flow is always in the same direction, there is no reverse of heading, so although you are close to the South side of the river, the only problem will be if there is a sudden change of wind during one of the passing tropical downpours.

The passage from Boma to Ango-Ango is all in deep water, and is comparatively wide, although there is the occasional whirlpool, and navigation aids are sparse with a rocky shoreline.

Ango-Ango Berth Approaches: The approach is straightforward, although there are no mooring launches or tugs. The berth itself is in slack water. Normally, the vessel is put slightly ahead and off the berth, and the port anchor is dropped, with 3 shackles. The bow is then manoeuvred into the berth using engines and anchor, then head lines are sent ashore via shore messengers (the headlines may look like breast lines, and the breast lines like half springs), but be sure to get the correct lines as per plan (See "Plan"), they appear to have set messengers for each shore bollard, no springs are allowed on to the pontoon. The after lines are also sent via messengers, so be sure to organise with the Pilot as to which sequence is required, especially the springs being sent from aft, and the breast lines from the main deck.

Documents at Ango-Ango: The same number of documents as required at Banana are again required in Ango-Ango.

Discharge: The discharge is made via 2 sets of 2 × 6 in. lines connected via shore supplied "Y" pieces connected to ship's 8 in. manifolds. Both jet fuel and MOGAS were discharged simultaneously.

The departure is fairly straightforward, heaving off on the anchor, and there is plenty of room to swing vessel round in, especially with the bow being out in the current, and the stern in comparatively slack water.

The passage down river is, of course, much quicker with all the current with you.

AUTHORITY: Office National des Transports, ONATRA.

AGENT: See "Matadi".

BOMA: 05.51 S. 13.03 E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Port is situated on the right bank of river, about 44 miles above Pilot Station at Banana.

Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Sailing for Banana from 0600 hrs. till 1600 hrs. Sailing for Matadi from 0500 hrs. till 1600 hrs.

RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating river varies between 20 ft. to 27 ft. according to local conditions and should be checked with Port Authority in advance.

HEALTH: Quarantine Officer boards on arrival. All crew members require valid cholera vaccinations and yellow fever inoculation certificates.

TUGS: 2 tugs of 200 and 300 h.p. available to assist berthing.

BERTHING: Total quay length 450 m. with 3 berths alongside. Depth of water at the quay, 8 m. at low water. Maximum current at the berths is 3 knots.

STEVEDORES: See "General" before first port.

Port Equipment:

6 electric cranes on rails, capacity 3 – 6 tons.
2 steam cranes on rails, capacity 7.5 ton at 6 m. (5.0 ton at 10 m.).
5 banana conveyors.
1 electric crane, capacity 6 tons.
8 forklifts.
5 tractors and 40 trailers and carts.
1 Palm kernel elevator.
1 Automatic grab.
2 Hyster carry cranes.
7 barges, capacity 100 tons.
1 pontoon, capacity 75 tons.

FRESH WATER: Available from quays, suitable for drinking.

FUEL: See "General" before first port.

MEDICAL: Doctors and hospital facilities available.

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

GENERAL:

Exports: Logs and timber, plywood, veneerwood, coffee, cocoa, rubber, bananas, palm kernels, oils, cakes, about 8.8% of the total exports of the Zaire.

Imports: Various. About 2.5% of the total tonnage imported into Zaire.

Current at Quays: The currents of the river vary from berth to berth and depend upon the low and high level of the water with sometimes adverse currents and still waters.

Maximum speed at high level: 3 knots.
Minimum depth at the lowest level: 8 m.

AUTHORITY: Office National des Transport – ONATRA.

MATADI, (including Ango-Ango): 05.49 S. 13.27 E.

(See Plan)

DOCUMENTS: 7 days before arrival of vessel the following must be in the hands of the Agent:

4 Manifests (detailing explosives, general cargo, heavy lifts).
3 Stowage Plans.
6 copies of Bills of Lading.
1 Freighted Manifest.

On arrival:

Maritime Declaration.
Ship's Register.
3 Crew Personal Effects Lists.
2 Stowage Plans.
1 Freighted Manifest.
3 Lists of Ports of Call.
7 Passengers Landed.
7 Passengers in Transit.
5 Crew Lists.
5 Kroo Boys Lists.
2 Provisions Lists.
4 Individual Manifests.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Pilot boards at Banana Pilot station. Distance from Banana to Matadi about 75 miles. Sailing for Banana from 0600 hrs. – 1300 hrs./1400 hrs., depending on vessel's speed. Deadline for passing Boma 1600 hrs. Sailing for Boma from 0500 hrs. – 1600 hrs.

RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating Zaire River varies between 20 ft. and 27 ft. according to local conditions and should be checked with the Port Authority 3 days in advance. Berthing at Ango-Ango up till 1800 hrs. only.

MAX. SIZE: Controlled by draft in river. Max. draft Berth No. 1 is 23 ft. – 24 ft.

HEALTH: Quarantine Officer boards on arrival. All crew members require valid cholera and yellow fever inoculation certificates.

TUGS: "Viva" 1,700 h.p., "Inga" 850 h.p., "Boma" 250 h.p., "Banana" 600 h.p. and "Soyo" 220 h.p.

BERTHING: At Matadi. Total length 1,728 m.

Pier 1 – 149 m.
Pier 2 – 161 m.
Pier 3 – 155 m.
Pier 4 – 158 m.
Pier 5 – 156 m.
Pier 6 – 176 m.
Pier 7 – 188 m.
Pier 8 – 149 m.
Pier 9 – 167 m.
Pier 10 – 143 m.

Piers No. 5, 6 and 7 for full container vessels.
Minimum depth at Piers 8 and 10 is 10 m.
In addition there is a berth length 400 m. for barges.

At Ango-Ango: Length of pier 150 m. Presently used for discharging and loading flammable goods and explosives.

UNLOADING RATE: 800 tons to 1,000 tons of general cargo per day of 3 shifts.

CRANES:

44 Cranes (Electric and hydraulic) on rails	3 – 6 tons	
1 Derrick Fixed	*50 tons	(Pier 4)
1 Bridge Crane	5 tons	
6 Electric Cranes	3 – 6 tons	
2 Electric Cranes	10 tons	
3 Electric Cranes	6 tons	
1 Floating Crane	14 tons	

*Actual capacity 34 tons.

BULK HANDLING FACILITIES: Palm oil is stocked by 4 companies in Matadi, 3 of which have pipelines to a main quay. The palm oil installations of CCP are at Ango-Ango where ships must berth at Sep Zaire pier. Vessels handling Sep Zaire cargoes are given priority at this pier and in case of unavailability of berth, palm oil would be loaded by barge of 260 tons capacity at Matadi.

Palm kernel oil is also loaded at Berths No. 2 – 9 and Palm Oil at Berth Nos. 2 – 8 in Matadi.

P.L.Z. (Plantations Lever au Zaire) capacity	13,450 tons
AMATO-Freres	3,700 tons
MADAIL	2,340 tons
C.C.P.	3,627 tons

Cereals discharged by suction at Berth No. 9. Rate 1,000 t.p.h.

BARGES/EQUIPMENT:

Barges:

2 Pontoons N.T. 41 tons each
8 Pontoons N.T. 75 tons each
1 Lighter N.T. 91 tons
2 Lighters N.T. 99 tons each
1 Tankbarge N.T. 279 tons
19 Lighters N.T. 339 tons each
1 Lighter N.T. 438 tons
11 Lighters N.T. 487 tons each
1 Lighter N.T. 514 tons
1 Lighter N.T. 522 tons
10 Lighters N.T. 557 tons each
2 Landing craft 875 tons each

Equipment:

28 Tractors and 242 trailers and carts
71 Forklifts with a maximum capacity of 2,500 kilos
2 Roller bridges 30 tons
3 Fork conveyors
34 Platforms × 20 ft.
6 Platforms × 40 ft. (Unilock)
1 Pushwagon tractor
Grain Elevators (Midema)

DENSITY: Fresh water.

STEVEDORES: See "General" before first port.

MEDICAL: Doctors and hospital facilities available.

TANKERS: Discharge at Sep Zaire pier at Ango-Ango or Matadi. If lightening necessary before berthing, this can be effected at Ramler Buoy, 17 miles above Banana. No tank-cleaning facilities. No fresh water. Also see "Shipmaster's Report" dated September 1990.

FRESH WATER: Delivery aboard the ship through valves and at each pier. Maximum daily capacity 200 tons. Delivery takes place according to the quantity asked for and usually during night.

Delivery cannot be done at the loading berth of Sep Zaire at Ango Ango.

Suppliers need 48 hours' notice. It is therefore highly recommended that Masters cable their needs well in advance to Agent and/or through Owners.

FUEL: See "General" before first port.

GANGWAY/DECK WATCHMEN: Recommended.

Piracy: Acts of piracy have taken place in the port.

REPAIRS: Small repairs possible at railway workshop.

HOLIDAYS: *Legal Holidays in Zaire (Dates may vary):*

1st January	New Year's Day
4th January	Martyrs of Independence
1st May	Labour Day
20th May	Anniversary of the M.P.R.
24th June	Money Day
30th June	Independence Day
1st August	Parents' Day
14th October	Zaire Youth Day
27th October	Zaire Day
17th November	Army Day
24th November	Anniversary of the New Regime
25th December	Christmas

GENERAL: *Currents at the quays:*

The currents of the river vary from berth to berth and depend upon the high and low levels of the water with sometimes adverse currents and still waters. Difference between high and low level of the river is approximately 5.50 m.

Maximum speed at high level: 6 knots.

Minimum depth at lowest level: Minimum 8 m. at low water and minimum 10 m. at low water at the new Kala Kala quays.

Exports: Logs and timber (plywood, veneerwood), coffee, cocoa, rubber, copal, bananas, manioc, groundnuts, palm kernels, oils, cakes, fibres, cotton and copper.

Port Equipment and Accommodation: Matadi is the only Zaire port handling the despatch of export products originating from the interior and the import of products destined to Zaire (excluding Boma which is of minor importance and only serves the Mayumbe area).

About 90% of the tonnage in – and outward goes through Matadi at the head of the S.N.C.Z. railroad from Matadi to Kinshasa. The latter locality being a handling and concentration centre of the goods directed to or coming from Matadi.

SHIPMASTER'S REPORT: January 1981.

Documents and papers required on arrival Matadi:

7 Crew Lists.
2 Maritime Declarations of Health.
7 Passenger Lists (even if nil).
5 Ports of Call Lists.
4 Arms and Ammunitions Lists (even if nil).
4 Narcotic Lists.
3 Stores Lists.
2 Crew Customs Declarations.
1 Vaccination List (Cholera/Yellow Fever).
4 Animal List. (even if nil).

Following documents have to be shown to the Port Authorities:

Classification Certificate.
Ship's Register.
Derat Certificate.
Certificate of Tonnage Measurement.
Cargo Ship Safety Construction Certificate.
Cargo Ship Safety Radio-telegraphy Certificate.
Cargo Ship Safety Equipment Certificate.
International Load Line Certificate.
The official Log Book of the vessel and the Articles.

The number of crew written in the Crew Lists will be checked with the entries in the Articles.

Shore Leave: Each crew member receives a shore pass without particulars, which has to be returned before departure of the vessel. Fines will be imposed if shore leave pass is lost.

SHIPMASTER'S REPORT: August 1982.

As far as I could ascertain the only point in the Congo River where one can expect currents of 12 knots is in the "Devil's Cauldron" between Matadi and Ango-Ango. The rainy season is Jan./Feb. and the dry season June/July. The average current in the rainy season is 4 knots and in the dry 3 knots.

Tankers and other vessels who clear at Banana generally must go through the same procedure again at Ango-Ango or Matadi. A complete set of papers is expected as though it is the first entry into the country.

SHIPMASTER'S REPORT: September 1990.

Ango-Ango: Vessel discharged refined oil products.

There was no attempted theft whilst in this port. The people are as friendly as one could wish to meet, and having been ashore over the weekend, the "run ashore" could be described as excellent without any risk of violence, to any crew member. The Port Authorities and Officials, though numerous, were efficient and helpful, as were the Agent and the plant personnel. The plant itself was well run and efficient.

On arrival off Zaire, the vessel had to wait 5 days whilst cargo payment was finalised. This problem is, I believe, not uncommon.

Due to entries in the Pilot Book supplement, the vessel stayed offshore, in case of piracy. This is in fact wholly unnecessary, and on confirmation of entry we went into anchor.

I anchored about 2.5 miles West of Moita Seca. It is the end of the dry season at present. I estimated current was running at between 3 knots and 4 knots in the river, but at this anchoring position, there was little or no current. Good holding ground was found here in about 50 ft. of water.

Pilot boarded off Banana Creek at exactly 0600 hrs. There were no formalities conducted here. Vessel berthed at 1500 hrs. Our charts were corrected up-to-date, but the rapid changes of the river meant that the channel, as shown on B.A. Chart No. 634, has altered completely, and is doing so all the time. The channel was well buoyed, Pilots are Belgium trained and of good standard. Pilots change at Boma both inbound or outbound, but, I believe, will do the entire pilotage when a shortage of pilots exists.

The Ango-Ango Terminal is managed by a former Belgium ship's master, who is friendly and very helpful. Having read the entry in the "Guide", he informed me that he can supply all grades of bunkers. The pontoon system at the berth is the same, there is little strength to the current at the berth, though a counter current exists, causing sets off the berth. Berthing was much easier than I anticipated, though the ropes had to be tied together to reach the shore. The boatmen have a winch system to pull the vessel's ropes ashore, two at a time. Vessel made fast with 2 head ropes, springs, and 2 stern lines and springs. There was no problem with the vessel whilst alongside, due to the strong current in the river.

Fresh water was available by meter from the shore, but we were advised that it had to be boiled prior to drinking.

Pilotage is only by daylight. On departure, vessel must leave the berth by 1300 hrs., or wait till daylight the following day.

Fresh stores were abundant, other stores were available, including meat of a good standard. However, a lot of items are expensive. A chandler is available, but if there is time, I would suggest purchase of stores direct from Matadi market.

Discharge of oil products was about 300 tonnes per hour, but lube oil was slow with a high back pressure, and a discharge rate at times of only 80 cu.m./hr. was obtained.

Communications are poor. We had to keep owner's informed by the ship's telex. At no time were we, prior to arrival, able to communicate with Zaire by telephone or telex.

ETA, arrival details, etc. were passed by telegram to Banana Radio on 500 kHz., this station seeming only to be in range 3 days prior to arrival. However, this route seemed to be successful. I am informed that any telephone contact with Europe is impossible. Banana Radio will only pass messages.

Agent's Notice:

1. *Documents required from Master on Arrival:*
   - (A) Clearance of the last Port of Call.
   - (B) 7 copies Crew List.
   - (C) 5 copies Arms and Ammunition List.
   - (D) 7 copies Passengers List.
   - (E) 5 copies Crew Declaration (Personal Effects).
   - (F) 5 copies Ports of Call List.
   - (G) 5 copies Stores List.
   - (H) 4 copies Narcotics List.
   - (I) Ship's Certificates:
     - Load Line Certificate.
     - International Tonnage Certificate.
     - Cargo Safety Equipment Certificate.
     - Register Certificate.
     - Safety Construction Certificate.
     - Radio Certificate.
     - Derat Exemption Certificate.
   - (J) Loading/Discharging Documents.
2. *Documents required from Port Authorities on Arrival/Departure:*
   - Free Pratique.
   - Clearance.
3. *To be filled/signed by Master:*
   - 1 set of the Harbour Master's Declaration.
   - 1 set of "Arrival Conditions".

AUTHORITY: Office National des Transports – ONATRA, Port of Matadi. *Telex:* 21017 Onatra ZR. *Contact:* Port Director.

BUCHANAN
ORE LOADING QUAY

1. Minimum reach of shiploader outside fendered quayside = 4.50m
2. Maximum reach of shiploader outside fendered quayside = 23.0m (incl. throw)
3. Max. possible beam of ship with 5m symmetrical spout trimming across hatch = 43m
4. *Aftermost position of stern, when draft aft exceeds 9.0m*
5. *Foremost position of bow for acceptable mooring to anchor block*
6. Any hatch located *more than* 245.0m *from extreme stern must* be loaded before draft aft exceeds 9.0m
7. Min. advisable clearance under keel: $c = \frac{3B \text{ ft.}}{125}$ (B = ship's beam in feet)
8. Max. advisable draft (*cargo completed on high tide*) is 41½ – 42½ ft. depending on height of tide *and required clearance under* keel. Ships drawing 39 feet can be handled at all times
9. Free board height under shiploader should not exceed 15m

NOTE: Information on this drawing is given as advice only and does not constitute a guarantee, that ships of indicated max. dimension can always be loaded. In addition, several other factors like trimming, ballasting and deballasting, stresses in the hull etc must be taken into account by the owner or master of the ship.

BULLEN BAY

CURACAO OIL TERMINAL

THROUGHPUT:	Transhipment	1,200,000 barrels per day
	Refinery import	250,000 barrels per day

JETTIES:	1 – 500,000 DWT tanker jetty
	1 – 350,000 DWT tanker jetty
	1 – 250,000 DWT tanker jetty
	2 – 100,000 DWT tanker jetties
	1 – 70,000 DWT tanker jetty
	2 – Tugboat jetties

TOTAL TANK CAPACITY – 17,750,000 barrels

1 –	1,000,000 barrels capacity –	1,000,000
16 –	750,000 barrels capacity –	12,000,000
6 –	375,000 barrels capacity –	2,250,000
38 –	Small tanks capacity –	2,500,000

PIPELINES: Main track consists of 5 strings of 36" pipe. The jetties carry 2 strings of 36" pipe in a loop. The loading rate is up to 12,000 tons per hour. Tankers' discharge rate is up to 25,000 tons per hour.

DEBALLASTING: Capacity 4,000 tons per hour per jetty. Ballast treatment produces affluent of less than 20 parts per million (20 ppm) oil content.

TUG SERVICE: Two tugs of 4,500 h.p. with 50 tons bollard pull each. One tug of 2,500 h.p. with 35 tons bollard pull.

REFINERY AREA

NOTE:

1 No anchors to be used within shaded area (Except in emergency situations)

2 Discuss method of approach with Harbour office (Channel 14)

POLLUTION: A submersible oil boom has been installed enclosing the oil pier. Normally, the boom rests on the sea-bed, but when needed it will be raised to the surface using compressed air.

The oil boom and its system of anchorage will be damaged by vessels' anchors. In order to ensure that the oil boom is operable at all times, and to avoid expensive repairs, which will be charged to the ship responsible for the damage, great care should be taken in connection with manoeuvres along the Slagen pier, which will require the use of anchors.

The drawing of the pier shows the position of the oil boom and the anchorage system. Except for emergency situations, anchors should not be used within the shaded area.

All manoeuvres to and from berths should be discussed with the Harbour office (Slagen Harbour Radio, Channel 14). The Harbour Office will give you information regarding current strength and setting.

Approach to Berth 2, and Berth 3 if Berth 2 is not occupied, is facilitated by the fendered sliding front shown on the drawing.

Before anchoring tankers should contact Fahal control on VHF 12 for a designated anchoring position. In all cases tankers are required to anchor at least 2 miles west of Fahal Island and at least 2 miles clear of the Omani Coastline

Note 1. Pilot will advise boarding position on V.H.F. radio prior to arrival.
2. Vessels should not enter prohibited area unless accompanied by Pilot. If proceeding to anchorage pass northward of Fahal Island.

NOTES

(1) Horizontal Datum: Panama Colon Datum (PCB) depths referred to Mean Low Water (MLW) soundings in feet.

(2) Distance from Buoy No. 1 (Mole) to East Breakwater Light 2.0 Nautical Miles. Minimum Depth of Channel is 42 ft. MLW (MLW = 0.4 ft. PLD).

(3) Soundings in Manzanillo Bay (Vicinity of Coco Solo) including the Folk River Inlet are from DMA Chart No. 26068, 8th. Edition.

(4) Hydrographic soundings in the operating basin and canal access at Coco Solo were obtained in 1993.

(5) Local Rules for Prevention of Collisions (Colregs) apply in the navigable waters of Canal Operating Areas. For the purposes of these rules, those waters are defined as beginning South of a line joining the East and West Breakwater Lights, including the Port of Cristobal, but not the ports of Coco Solo and Manzanillo in Manzanillo

NORMAL CONNING POSITIONS

FIGURE 4

Notes:
1. On vessels without centerline cranes or any other centerline obstructions, visibility shall be measured along the centerline over the stem.
2. On vessels with centerline cranes or any other centerline obstruction, visibility should be measured along lines which are parallel to vessels centerline keel from Conning Positions No. 2 & 3 over vessel's bow.
3. Conning Positions No. 2 & 3 are to be at those windows in the wheelhouse which are the nearest windows to the centreline which will provide a clear unobstructed view ahead along lines which are parallel to vessel's centreline.

CATWALK

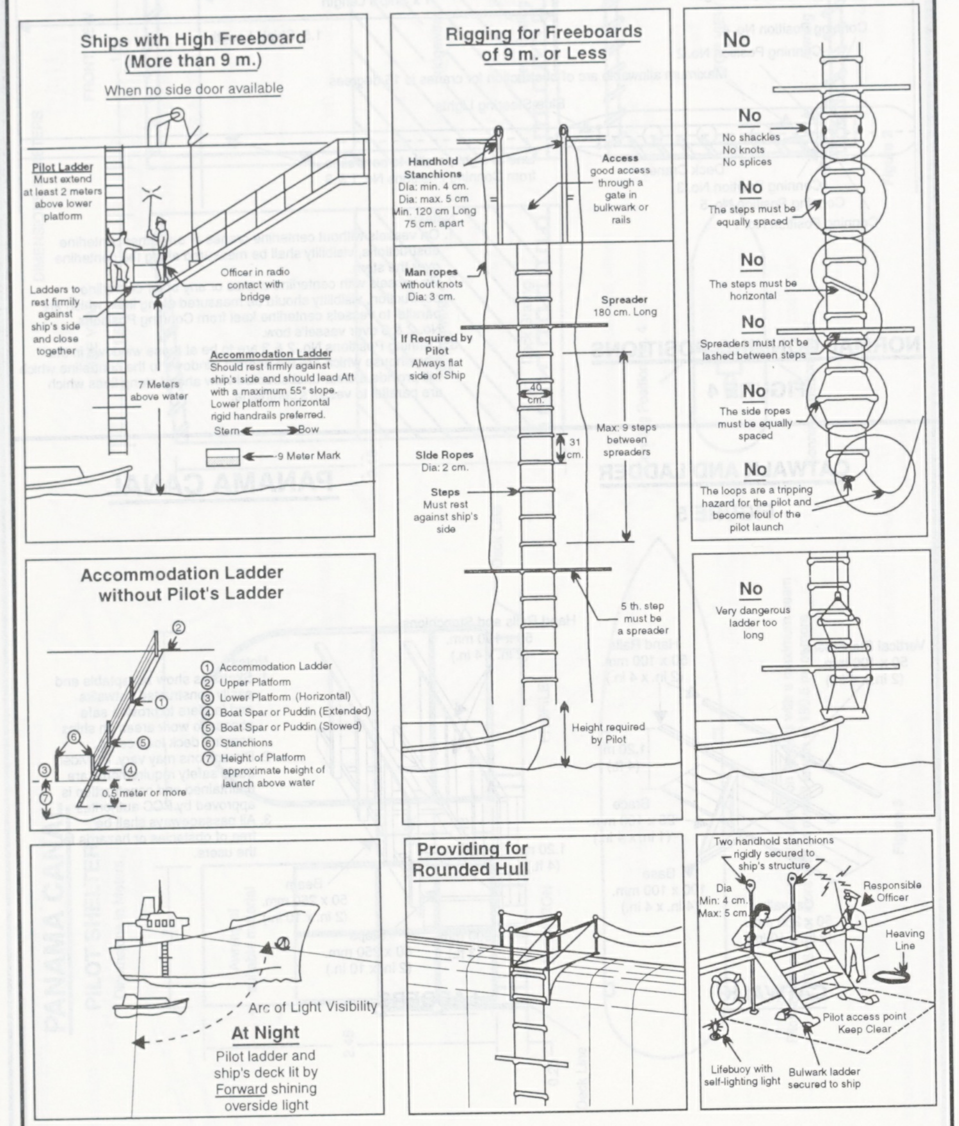
LADDERS

Notes:
1. Sketches show acceptable and easily constructed catwalks and ladders to provide safe access to work areas on ships carrying deck load cargo.
2. Dimensions may vary. Provided basic safety requirements are maintained and construction is approved by PCC authorities
3. All passageways shall be free of obstacles or hazards for the users.

PANAMA CANAL

PILOT BOARDING ARRANGEMENTS

IN COMPLIANCE WITH SOLAS REGULATIONS, ISO STANDARDS
AND CONFORMS TO THE STANDARD OF
THE INTERNATIONAL MARITIME PILOTS ASSOCIATION



Ships with High Freeboard (More than 9 m.)
When no side door available
Pilot Ladder
Must extend at least 2 meters above lower platform
Ladders to rest firmily against ship's side and close together
Officer in radio contact with bridge
Accommodation Ladder
Should rest firmly against ship's side and should lead Aft with a maximum 55° slope. Lower platform horizontal rigid handrails preferred.
Stern
Bow
7 Meters above water
9 Meter Mark
Rigging for Freeboards of 9 m. or Less
Handhold Stanchions
Dia: min. 4 cm.
Dia: max. 5 cm
Min. 120 cm Long
75 cm. apart
Access
good access through a gate in bulkwark or rails
Man ropes
without knots
Dia: 3 cm.
Spreader
180 cm. Long
If Required by Pilot
Always flat side of Ship
40 cm.
31 cm.
Max: 9 steps between spreaders
Side Ropes
Dia: 2 cm.
Steps
Must rest against ship's side
5 th. step must be a spreader
Height required by Pilot
No
No
No shackles
No knots
No splices
No
The steps must be equally spaced
No
The steps must be horizontal
No
Spreaders must not be lashed between steps
No
The side ropes must be equally spaced
No
The loops are a tripping hazard for the pilot and become foul of the pilot launch
No
Very dangerous ladder too long
Accommodation Ladder without Pilot's Ladder
① Accommodation Ladder
② Upper Platform
③ Lower Platform (Horizontal)
④ Boat Spar or Puddin (Extended)
⑤ Boat Spar or Puddin (Stowed)
⑥ Stanchions
⑦ Height of Platform approximate height of launch above water
0.5 meter or more
Arc of Light Visibility
At Night
Pilot ladder and ship's deck lit by Forward shining overside light
Providing for Rounded Hull
Two handhold stanchions rigidly secured to ship's structure
Dia
Min: 4 cm.
Max: 5 cm.

WIRE
SHACKLE
NYLON TAIL

PUERTO ARMUELLES

STAINLESS STEEL SHACKLE FOR LINES WITH TAILS

Tails, if used, should preferably be made of nylon line (3 strand construction should not be used) about 11 m. long overall, and have a breaking strength at least 25% greater than the MBL of the wire to which they are attached. They should be replaced at least every 18 months unless experience and/or inspection indicates more or less frequent replacement is necessary.

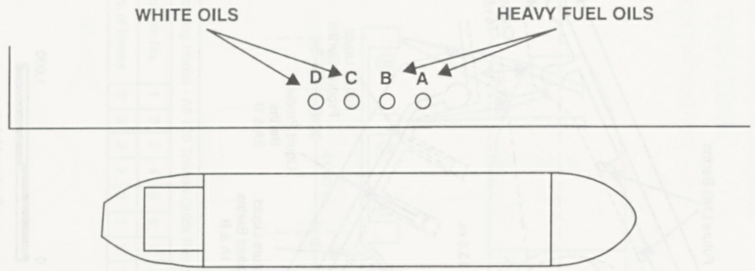
Maximum Acceptable Vessel Capacity 120,000 cu.m. - Minimum 30,000 cu.m.
S.W.
N.E.

Notes:
1. Vessels may moor in either direction but Masters must ensure that their vessels manifold arrangement is compatible with the jetty Chicksan booms arrangement as detailed in No. 4 below
2. Positions①are isolated mooring dolphins fitted with a small winch and 3 mooring hooks
3. Positons②are breasting dolphins fitted with a small winch and 2 mooring hooks
4. Position③is the loading platform fitted with Chicksan booms for:
   - Ⓐ Propane Vapour Return - 8 in. x 150 (ASA) flanges
   - Ⓑ Propane Liquid - 12 in. x 150 (ASA) flanges
   - Ⓒ Butane Liquid - 12 in. x 150 (ASA) flanges
   - Ⓓ Butane Vapour Return - 8 in. x 150 (ASA) flanges
   - Ⓔ Gasoline - 12 in. x 150 (ASA) flanges
5. Items④are Yokohama Fenders

MESAIEED

NODCO NO. 6



The Jetty has bollards spaced at 21.5 m. intervals. The jetty fendering consists of solid rubber, cylindrical fenders of 1.5 m. in length and 1.0 m. in diameter, spaced at 10.5 m. intervals.

Mooring Arrangements:

1. Vessels may moor in either direction at the Pilot's discretion.
2. The actual "tie-up" will be 3, 3 & 2 Fore and Aft. (3 Head/Stern Lines, 3 Breast Lines & 2 Springs)
3. Maximum permitted length overall 780 ft. (238 m.)
4. Maximum bow or stern distance to manifold 390 ft. (119 m.)
5. Maximum beam 45 m.
6. Maximum arrival displacement 60,000 tonnes.
7. Minimum depth of water at berth 13.00 m.

Extreme care should be taken to tend to moorings and gangway, especially in NW'ly winds.

Loading Arrangements:

1. A & B represent 8 in. loading arms for heavy fuel oil.
2. C & D represent 8 in. loading arms for other products (White Oil).
3. The pumping rates are as follows :-

Heavy fuel oils 1,200 cu.m./hour with two loading arms and 500 cu.m./hour with one loading arm.

White oils 1,000 cu.m./hour with two loading arms and 400 cu.m./hour with one loading arm

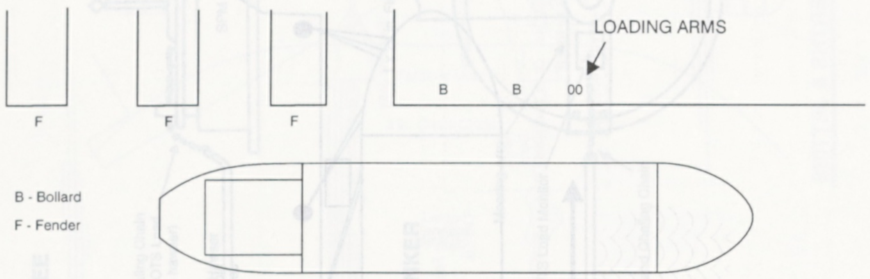
ETHYLENE LOADING BERTH

QAPCO No. 19



LOADING ARMS
B
B
00
F
F
F
B - Bollard
F - Fender

The jetty has bollards spaced at 17 m. intervals apart from those which are depicted separately on the above diagram. The jetty fendering consists of solid rubber, cylindrical fenders of 1.5 m. length and 1.0 m. diameter spaced at approximately 10.0 m. intervals, apart from those depicted separately on the above diagram.

Mooring Arrangements:

1. Vessels moor in either direction at the Pilot's discretion
2. The actual "Tie-up" is 3, 3 & 2 Fore & Aft. (3 Head/Stern Lines, 3 Breast Lines & 2 Springs)
3. There is no restriction on the L.O.A. because Ethylene tankers are all of a certain size, which can be accommodated quite safely at the present moment. As a general guide though, any vessel having a stern to manifold distance in excess of 94.0 m. should ask the terminal for further details prior to arrival.
4. Minimum depth of water at berth is 42 ft. (12.80 m.)

Loading Arrangements:

1. Liquid Ethylene is loaded through one Chicksan type 12 in. loading arm. On the North side of the loading arm there is a similar 6 in. vapour return arm. Flanges are class 150 ASA
2. Total development height of arms is 46 ft.
3. Maximum loading rate available 600 tonnes/hr.

MULTI-PURPOSE TERMINAL

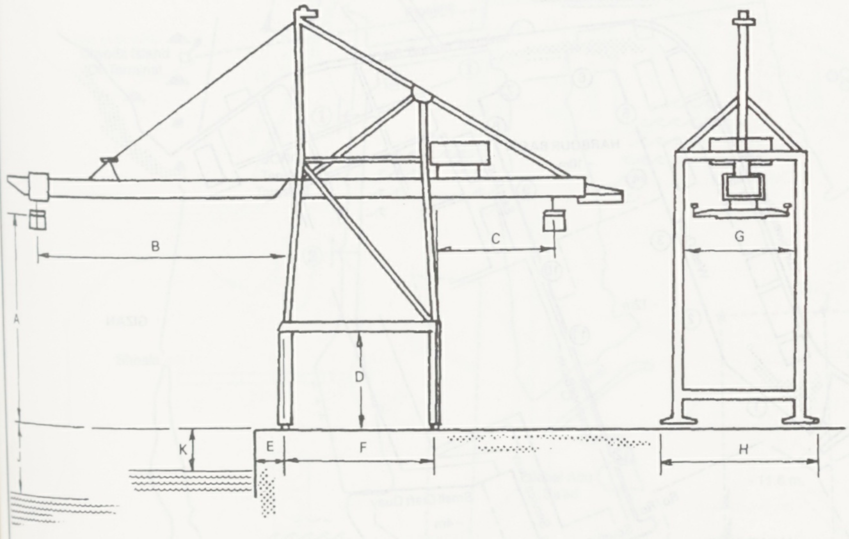
BERTH 22
CONTAINER GANTRY CRANES

TIDAL RANGE – FROM QUAY EDGE
J to Mean Low Water 4.31 m.
K to Mean High Water 2.55 m.

Cranes are self-sustaining i.e. fitted with electric generators
Cranes can be fitted with 20 ft. and 40 ft. detachable spreaders

A	Max. height of lift from quayside rail level to underside of 40 ft. Spreaders 20.715 m. Rail level to underside of 20 ft. spreaders 19.624 m.
B	Max. outreach from waterside rail to centreline of spreader 35.000 m.
C	Max. travel from waterside rail to inside of rear rail 18.000 m.
D	Min. portal clearance above rail level 10.700 m.
E	Distance from waterside rail to quay edge 2.000 m.
F	Distance between rails 20.000 m.
G	Clearance between crane legs – waterside 14.300 m.
H	Buffer to buffer distance 22.000 m. Capacity under spreader 30.5 tonnes.

Cranes are fitted with telescopic 20 ft. to 40 ft. spreaders



DAMMAM

CONTAINER TERMINAL

BERTHS 23 TO 27
CONTAINER GANTRY CRANES

A	Max. height of lift from quayside rail level to underside of spreader 26.00 m.
B	Max. outreach from waterside rail to centreline of spreader 35.00 m.
C	Max. backreach from landside rail to centreline of spreader 15.25 m.
D	Min. portal clearance above rail level 12.00 m.
E	Distance from waterside rail to quay edge 3.00 m.
F	Distance between rails 20.00 m.
G	Clearance between crane legs – waterside 14.95 m.
H	Buffer to buffer distance 24.15 m.
J	To mean low water 4.31 m.
K	To mean high water 2.55 m.

Capacity under spreader 40.0 tonnes.

ASESA TERMINAL
PLATFORM 6

No repairs to main engines allowed while vessels are alongside the pier.

Mooring ropes shown above are the safe minimum number for average weather conditions.

If necessary, additional mooring ropes may be required by the Pilot of ASESA Harbour Master.

Nylon ropes may be supplied by ASESA if any vessel does not have a sufficient quantity of suitable ropes for safe mooring.

Mooring ropes must be carefully tended to hold the vessel close to the dolphins at all times.

Mark to show forward limit of export tanker.

NOTES

1 Ropes number 1 & 4 forward and ropes number 1 & 2 aft are the main departure ropes. Ensure that these can be cast off last.

2 If ropes number 8 forward and number 7 aft cannot be used then rope number 4 forward and number 2 aft will have to be doubled up.

3 The mooring lay-out shown is the minimum requirement.

For vessels proceeding to Istanbul, or any other ports within the Sea of Marmara or Gulf of Izmit, pilotage is compulsory from the southern entrance. The same applies for vessels proceeding outwards. Pilotage is not compulsory for vessels proceeding from Gelibolu to Darica, but is compulsory within the Gulf of Izmit. For through traffic pilotage is not compulsory for the Bosphorous and Dardanelles

All pilot stations monitor V.H.F. channel 16.

Red ● 1 m. Red ● 1 m. Red ●

Harbour and Marina Closed

Neither Commercial nor Pleasure vessels are Permitted to proceed inwards or outwards.

Green ○ 1 m. Green ○ 1 m. Green ○

Marina Open (Harbour Closed):

Pleasure vessels may proceed to and from the Marina.

Commercial vessels requiring permission of Harbour Control are prohibited from entering, leaving or manoeuvring within the harbour.

Red ● 1 m. Red ● 1 m. Green ○

Harbour Open (Marina Closed):

All Pleasure vessels must clear the Outer Basin, Canting area and Approach Channel immediately.

Commercial vessels may proceed inwards or outwards after confirmation of permission by VHF radio from Harbour Control.

Notes:

All light signals are exhibited from the Harbour Control Tower and radio messages are transmitted on the VHF Channels 16, 14 & 12.

The Term Commercial vessel includes any large vessel which, in the opinion of the General Manager - Marine, requires a clear passage inwards or outwards.

All vessels are reminded of their obligations under the International Regulations for Preventing Collisions at Sea (1972). Particularly the rules concerning Sound Signals.

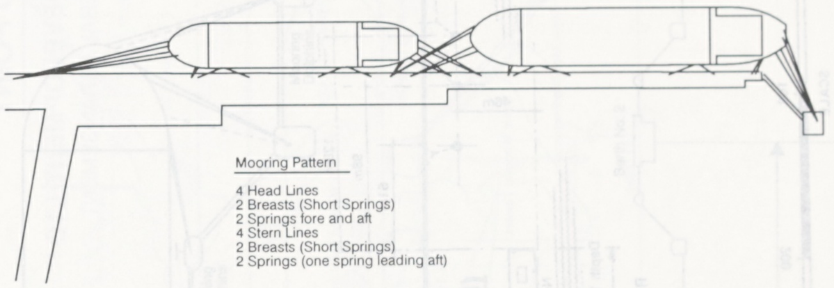
COAL VESSELS 30,000 DWT

ORE VESSELS 75,000 DWT

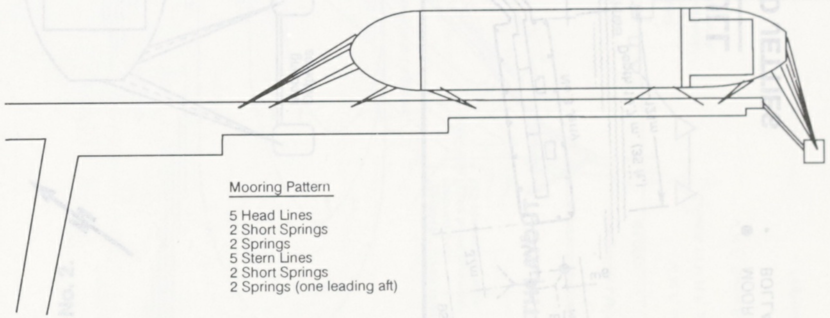


Mooring Pattern

4 Head Lines
2 Breasts (Short Springs)
2 Springs fore and aft
4 Stern Lines
2 Breasts (Short Springs)
2 Springs (one spring leading aft)

1. Tension winches should be checked at each turn of tide.
2. Ropes and wires should be kept tight, particularly at L.W. slack.
3. Advice on mooring, tugs, weather conditions etc, is available from the Jetty Control Office.
4. Ore vessels must at all times have an aft leading spring which must be kept tight so as to prevent any movement along berth.
5. Tugs are at the discretion of Master and Pilot(s).

ORE VESSELS 100,000 DWT



Mooring Pattern

5 Head Lines
2 Short Springs
2 Springs
5 Stern Lines
2 Short Springs
2 Springs (one leading aft)

For Guidance Only :
Immingham Bulk Terminal cannot be held responsible for ineffectually moored vessels.
This is the responsibility of the Master

MOORING PLAN - QUEENS DOCK

For 12,000 tons (and upwards) deadweight tankers berthed at Jetties 2,3,4,5

These are the minimum requirements which may be varied at the discretion of the Docks Supervisor/Berthing Master to suit the size of ship and existing or impending bad weather conditions.

Rope messengers are attached to the shore wires and are passed on board from the Jetty or attendant mooring boat.

Shore stern wire must not be shipped through the centre fairlead

NOTES

LENGTH LIMIT IS 1300 FT. OR MORE IF ADJACENT BERTHS ARE UNOCCUPIED.

SLIP DEPTH IS 27 FT. (REF.: MEAN LOW TIDE; 1985 SOUNDINGS)
MAXIMUM DRAFT IS 29 FT. WITH NORMAL TIDE.

DOCK ELEVATION IS 15 FT. ABOVE M.L.T.

193,920 SQ. FT. OF USABLE SHED SPACE.

OIL DOCKS 8 & 9

GENERAL NOTES FOR OIL DOCK 9

LENGTH LIMIT IS DETERMINED BY LENGTH OF SHIP BERTHED AT OIL DOCK 8; OTHERWISE THE 350' DIMENSION FROM CENTERLINE OF DOCK TO WEST END OF SLIP WOULD DETERMINE THE MAXIMUM LENGTH.

OIL DOCK 9 IS INTENDED FOR USE BY BARGES AND SMALL TANKERS.

TOP OF DOCK ELEVATION : 9.5' ABOVE MEAN LOW TIDE (0'-0")

NOTES

SHIP MAY BE MOORED HEADED IN EITHER DIRECTION.

MOORING LINES USED DEPEND ON SHIP'S POSITION.

BEAM UNLIMITED.

LENGTH LIMIT: 990 FT. SHIPS AT OIL DOCKS 4, 7 & 11 AT THE SAME TIME. LONGER SHIPS MAY BE BERTHED WHEN ADJACENT SLIP IS NOT BEING FULLY UTILIZED.

DOCK ELEVATION IS 16 FT. ABOVE MEAN LOW TIDE.

MISSISSIPPI RIVER
KEY PLAN

Mississippi River Crossing Channels

The project depth for crossing channels is 45 ft. for a width of 500 ft. to mile 150 AHP and 40 ft. above.

The controlling depths are published in Navigation Bulletins issued periodically by The New Orleans District Corps of Engineers, New Orleans, Louisiana.

Crossing channels may be marked by buoys during Low Water.

Pollution Reports

Report all spills of oil and hazardous substances to The National Response Center via 800-424-8802 (toll free), or to the nearest U.S. Coast Guard facility if telephone communication is impossible (33 cfr 153).

Warning

The Prudent Mariner will not rely solely on any single aid to navigation, particularly on floating aids. See U.S. Coast Guard Light List & U.S. Coast Pilot for details.

Caution

Mariners are warned that logs and other floating debris are constant dangers to navigations. Night travel by small craft is not recommended because of the hazard of floating obstructions.

MOORING ARRANGEMENTS FOR
50,000 DWT VESSELS & ABOVE

NOTE: Due to tidal currents, near proximity of passing vessels, and exposure of your vessel to Westerly winds, particularly in light condition, the following mooring arrangement is required.
Double spring lines to be used both forward and aft. Both forward and aft springs may lead through the same chocks at their respective locations, however, each spring line should be secured to a separate bollard on the dock.
The bow breast line deadman is approximately 137 m. from the vessel. A manila or synthetic line must be used as it is impossible to pull a wire to the shoreline here.
A shore messenger will be used to pull this line to the deadman.

UNION CHEMICAL DOCK & MINERALS DOCK

Flood and ebb currents are usually parallel to the dock at rates of 1.5 – 6 knots.

Gangway available on the dock.

Berth requires between 14 and 24 mooring lines. Extra lines can be hired from the Pilot Station if necessary.

- ● Quick release hook.

PALM BEACH

Legend:
The Port of Palm Beach is located on a saltwater sound known as Lake Worth and lies 1⅓ miles from the 37-foot contour of the Atlantic Ocean, to which it is connected by an artificial cut at the North end of Lake Worth known as Lake Worth Inlet.
(1) Entrance to the harbour is by a dog-leg channel running due West through the jetties and then turning Southwesterly to the terminals, 400 ft. wide, narrowing to 300 ft. in width as it continues across the lake another 3,000 ft., leading into a trapezoidal turning basin. (2) 1,400 ft. by 1,310 ft., adjacent to the port terminals on the West shore. Depth of the channel and turning basin is 35 ft. (3) Slip No. 1 is 690 ft. in length with water depth of 27 ft. (4) Slip No. 2 is 650 ft. in length with water depth of 35 ft. (5) Extension of turning basin with water depth of 25 ft. (6) Three Ro/Ro ramps and the New North Wharf, which together comprise 1,054 ft. in length.

Slip Tail
Barge Mooring

A Nylon slip tail with one eye splice only will be passed from the barge (or tug) to the ship and made fast in the manner illustrated here. The system is devised to minimize the rope work on the ships side and permit quick release in case of emergency.

RIVERHEAD

SUGGESTED MOORING PLAN - NORTH BERTH

The diagram above represents a suggested mooring arrangement for the North berth of the Northville Industries Corporation tanker platform at Riverhead, New York.

The ship plan represents a 30,000 to 40,000 d.w.t. handy size tanker with bridge amidship.

Mooring operations at Tosco are conducted as Follows:

1. With the vessel alongside the breasting dolphins, run spring lines fore and aft to maintain desired position. Spring line leads must provide adequate scope.
2. The launch will carry a messenger from the mooring dolphins to the bow or stern to run head, stern, and breast lines. The line crew will work one end of the ship at a time, as requested by the Master.
3. Each mooring line should be secured to an individual set of bitts. Placing two lines on one set of bitts by taking round turns should be avoided.
4. All lines must be tight, and the mooring plan adequate for all anticipated weather conditions before the transfer arms will be connected.
5. The ship's gangway is not used at this terminal.

RIVERHEAD

SUGGESTED MOORING PLAN - SOUTH BERTH

The diagram below represents a suggested mooring arrangement for the South Berth of the Tosco Industries Corporation tanker platform at Riverhead, New York.
The ship plan represents a 30,000 to 40,000 DWT handy size tanker with bridge amidship.

Mooring operations at Northville are conducted as follows:

1. With the vessel alongside the breasting dolphins, run spring lines fore and aft to maintain desired position.
2. The launch will carry a messenger from the mooring dolphins to the bow or stern to run head, stern, and breast lines. The line crew will work one end of the ship at a time, as requested by the Master.
3. Each mooring line should be secured to an individual set of bitts. Placing two lines on one set of bitts by taking round turns should be avoided.
4. All lines must be tight, and the mooring plan adequate for all anticipated weather conditions before the transfer arms will be connected.
5. The ship's gangway is not used at this terminal.

The dock is constructed of steel piles with a concrete floor and consists of a central platform and two breasting dolphins. Both the platform and the breasting dolphins have a wood faced steel pile fender system with moulded rubber impact energy absorber installed between the outer fender and the main dock structures.

SOUNDINGS AT MY KHE TANKER BERTH

Sounding:	Position:
40 feet	nr. 1
41	2
43	3
42	4
42	5
43	6
42	7
42	8
43	9
41	10

All soundings taken between 10.00 and 11.00am local time. At date of sounding there was a height difference of 2 meter between low and high water. Low water at 11.00 and high water at 06.15
Full moon 11th July 1976 at 20.09 local time,
Age of tide one day.
Bottom is clay and gives a good holding ground.

Algeria

BEJAIA: (This entry supersedes the entry on Page 5)

(See Late Plans)

LOCATION: Bejaia is located 260 km. East of Algiers and 300 km. West of Annaba.
PORT LIMITS: From Cape Bouak to Soumam River.
DOCUMENTS: Refer to Algiers.
PILOTAGE: Compulsory within pilotage zone between Cap Carbon to the West and Ras Attia to the East. Pilotage services are provided by the Port Authority. Pilot can be contacted through radio operator on VHF Channel 16, Tel: (05) 211344/45 or Telex: 83940. Pilot on duty 24 hours every day.

The Pilot boards at the limit of the Pilotage Zone from a modern fully equipped boat. The pilot ladder is usually placed on the port side.

Notice of Arrival is to be advised 24 hours prior to arrival to the Harbour Master through the ship's Agent.
ANCHORAGE: Anchorage in Gulf of Bejaia is designated by the Pilot or Radio Operator.

A dangerous area in the Western Part of the anchorage is marked by a red buoy.
APPROACHES: *Entrance:* The width of the entrance is 330 m.
RESTRICTIONS: No night movements for tankers with LPG or refined petroleum cargoes. No night berthing for tankers over 80,000 d.w.t., sailing is allowed.
MAX. SIZE: *Tankers:* LOA 260 m. Max. draft after loading 12.8 m. Max. draft for manoeuvring whilst in ballast 10.0 m.
Commercial Port: No restriction on length. Max. draft 9.3 m. (Max. draft after dredging in near future will be 10.0 m.).
HEALTH: Free Pratique granted by Brigade de la Sante Maritime after berthing. If suspected disease on board, Master must advise Port Control before entry.
VHF:

Bejaia Radio	Channel 16
Port Control	Channel 16
Agent – GEMA	Channel 13
Agent – NASHCO	Channel 16
Agent – HYPROC	Channel 16
Repair Company – ERENAV	Channel 14
Bunkers (Barge)	Channel 6
Pilots	Channel 12
Tugs	Channel 12

TUGS: 4 tugs available to assist with berthing, unberthing and movements inside the port, day and night (2×1,500 h.p. and 2×2,300 h.p.).

Tugs normally join in the roads and ship's lines are normally used.

Port Authority tug station can be contacted on Tel: (05) 21-16-77.
Tug Requirements: Under normal weather conditions.

Large tankers	4 tugs for berthing.
	3 tugs for unberthing.
Vessels up to LOA 100 m.	1 tug.
Vessels LOA 100 m. – 130 m.	2 tugs.
Vessels LOA 130 m. – 180 m.	4 tugs.

BERTHING: *Commercial Port:* 19 berths for general cargo with depth 6.1 m. – 9.3 m. One fully equipped berth for grain and one berth with Ro-Ro ramp.
BULK HANDLING FACILITIES: *Grain Pier:* 2×200 t.p.h. grain vacuvators. Max. draft 6.1 m. – 9.3 m.
Developments: Developments include a 30,000 ton silo, 2 additional berths and 2 additional grain vacu-vators (2×200 t.p.h.).
STEVEDORES: Operated by Port Authority.

Working hours are 0645 hrs. – 1900 hrs. daily, except Friday, which is a holiday.
MEDICAL: Two hospitals available. Private doctors and private hospitals also available. Service available through ship's Agent. Assistance according to the international conventions, under control of Algerian Coast Guards.
TANKERS: *Petroleum Port:*

Pier	*Max. Draft* (m.)	*Remarks*
No. 1	11.50	4×10 in. hoses for refined petroleum products.
No. 2	12.50	4×12 in. hoses. Max. distance stern to manifold 125 m.
No. 3	12.80	4×12 in. hoses. Max. LOA 260 m.
No. 19	6.5	For refined petroleum cargoes, general cargo and vegetable oil. 1×8 in. hose (petroleum). 1×8 in. hose (asphalt). Max. LOA 140 m.
No. 24	8.0 (Forward)	New quay for LPG, vegetable oils (4 in. hose) and general cargo. Submersible 4 in. hose for LPG. Max. LOA 150 m. Max. draft 9.3 m.

Max. pressure allowed 3.0 kg.
Loading rate up to 4,000 t.p.h.
Ballast: All dirty ballast to be discharged ashore; 2 hoses available at each berth, can receive ballast up to 2,000 t.p.h.

Vessels berthed at Piers No. 2 and 3 cannot discharge ballast simultaneously.

Clean ballast may be discharged to sea, only if vessel is in gas-free condition.

Thick slop residues may only be accepted subject to terminal operator's approval, but only in quantities of less than 100 tons.
DENSITY: 1025.
FRESH WATER: Available at Berths No. 2 and 3 in the Petroleum Port and all berths in the Commercial Port. Port watchman must be advised before connection. Loading rate about 15 t.p.h.
FUEL: Available at all Petroleum Port berths, subject prior arrangem

Also available by barge "Bordj Menael" from Aviation Marine capacity 1,000 tons.

Lubricants and intermediate fuels available, but prior notice thr Agent is necessary.
FIRE PRECAUTIONS: Anchors must be hove-up while vessel is mo in berth. For tankers, a fire wire must be provided fore and aft for use if necessary.

Tanker's firefighting equipment must be ready for use on fore main deck and under pressure.

4 tugs are equipped with firefighting apparatus and foam tanks.
REPAIRS: ERENAV: Engine repairs, steel repairs, pipe rep accommodation repairs. Tel: 22.81.84.

B.M. (Bejaia Maintenance): Engine repairs, radar and VHF repa

No repairs may be carried out on board without first obtainin Harbour Master's permission.
DRY DOCKS: One dry dock (180 m. × 30 m.), capacity 15,000 d
SURVEYORS: Representative of P&I Club available.

Private surveyors also available.
GANGWAY/DECK WATCHMEN: Recommended. The Harbour M may impose a guard on vessels carrying certain cargoes.
OPENING/CLOSING HATCHES: Normally by ship's crew.
CUSTOMS ALLOWANCES: As per Algerian Customs regulation
CARGO GEAR:

Mobile cranes up to 40 tonnes.
Forklifts up to 30 tonnes.
Tractors.

Load/discharge operations can be performed by ship's gear or s gear.
REPATRIATIONS: Can be arranged via Bejaia-Soumam.

International airport with flights from and to Algiers (H Boumediene Airport), Marseille, Lille and Lyon.

Ferry to Marseille, one sailing per week in Summer and 2 sailing month in Winter.
AIRPORT: Soumam International Airport, 5 km.
HOLIDAYS: New Year's Day (1st January); Independence Day; La Day; Aid Seghir; Aid el Kebir; Achoura; 1st November; Mouloud D
POLICE/FIRE/AMBULANCE: Fire: Bejaia Port Control on Channel 16 (24 hours) or Tel: (05) 21-13-44/45.

Protection Civile: Tel. 21-26-02, 21-26-03.

Ambulance: Tel: 21-18-07, 21-18-08, 21-18-93.
TELEPHONES: None available for placing on board. Teleph available at each tanker berth.
BANKS:

Credit Populaire d'Algerie (CPA). Tel: 22-00-73/74. Fax: 22-27-
Banque Exterieur d'Algerie (BEA). Tel: 21-15-30. Fax: 22-39-38
Banque Nationale d'Algerie (BNA). Tel: 21-20-85/8 Fax: 22-12-59.
Banque de Developpement Local (BDL). Tel: 22-0 Fax: 22-06-45.
Banque Agricole de Developpement Rural (BADR). Tel: 22-97-2 Fax: 22-05-74.

SHIP SUPPLY SERVICE: Available from 4 Agents.

AVICAT specialise in ship's supply services. Tel: 22-9 Fax: 22-91-04.

Ship's supplies available in the roads, by pilot boat or tugs.
SHORE LEAVE: Allowed by Immigration Police Control, prov seamen carry identity cards or shore passes.
GARBAGE DISPOSAL: Port Authority trucks and skips available requested by Agent.
WASTE OIL DISPOSAL: Service provided by ERENAV (R Company). Tanker trucks utilised for collection and removal, ship's A to make arrangements.
CURRENCY: Algerian Dinar. U.S.$ 1.00 = 55.00 Dinars (Septe 1996).
DEVELOPMENTS: Container Terminal to be fully equipped for Initial depth 10.0 m., later to be 12.0 m.

Dangerous goods area for storage and transit to be ready 1997

Two new pilot boats to be available March 1997.

Two new tugs on order.

Dredging operations in all Bejaia Port docks underway.

Also see "Bulk Handling Facilities".

SHIPMASTER'S REPORT: January 1987 (Updated 1996).

While anchored at Bejaia waiting to berth, the vessel was boarde the Algerian Coast Guard.

All ship's papers were correctly presented.

All trading certificates were valid.

The vessel was considered to have violated the Algerian regulations by failing to dip the ensign as a courtesy to the Alg Coast Guard cutter. This was the vessel's first visit to the port an having a copy of Algerian Port Regulations was not accepted a excuse so a fine was imposed.

All crew accommodation was searched and all soap in excess o tablet per cabin was confiscated.

SHIPMASTER'S REPORT: February 1989.
Vessel: 90,000 d.w.t.
Anchoring: Vessel anchored without a Pilot after contacting Port Co
VHF: Pilot on Channel 8.
Tugs: For berthing vessel used one tug on the starboard bow 2 ship's lines and one tug on the starboard quarter with 2 ship's l A third tug was used for pushing alongside.
Moorings: Vessel berthed port side alongside with 3 head lines, 2 b lines and 2 springs, forward and aft. The head lines and stern line the first lines sent to the shore.
Shore Passes: Immigration issue shore passes in exchange passports which are taken ashore.

SHIPMASTER'S REPORT: September 1989.
Fresh Water: When berthed at the oil jetty, fresh water is available between 0400 hrs. and 1100 hrs.
Officials: The following personnel boarded the vessel on arrival: The Agent, Shipper, Loading Master, Surveyor, 3 Customs Officers, 3 Immigration Officers, Doctor and 2 Port Control Officers.
Cargo Documents: The Cargo Documents are delivered on board after completion of loading. This can be from 10 minutes after completion to as long as 3 hours after completion.
Shore Passes: On our last visit to the port, shore passes were in short supply so we made extra copies. On this visit we used some of the copies we made and the Immigration officials asked us to hand over any blank copies we still had remaining.

SHIPMASTER'S REPORT: March 1994.
Vessel: 96,000 d.w.t. combination carrier operating in tanker mode.

Tugs available are of very low power and there is a very small Turning Basin inside the breakwater and close to the berth (S.W. of Berth No. 3 and S.E. of Berth No. 2). Due to above reasons, berthing in adverse conditions of wind and swell is very difficult and risky (All vessels have to be swung 180° in the Basin as, on Berth No. 3 always port side alongside and on Berth No. 2 always starboard side alongside).

Large ships always berth on Berth No. 3.

Cargo operations can be suspended and vessel can be shifted to roads with wind force going up to Force 4 or 5.

Any stores, charts, etc., sent to Bejaia can take as long as 7 days to clear Customs.

Shore leave not advisable at time of our visit.

AUTHORITY: E.P.B. – Enterprise Portuaire de Bejaia, Mole de la Casbah (B.P. 94), Bejaia, Algeria. *Tel:* (05) 21-18-07/08, 21-18-93. *Telex:* 83055 Epbj. *FAX:* (05) 22-25-79. *Contact:* Abdelkader Boumessila, Chairman/General Manager.

Harbour Master. *Tel:* (05) 21-13-44/45. *Telex:* 8394 CAPBJ.

Argentina

DIAMANTE: (Also see Page 51)

SHIPMASTER'S REPORT: May 1996.
Note: This report was received in September 1996.

Diamante is a small harbour situated at Km. 533 on the River Parana. In the first phase of up-river steaming, Pilot boarded at Recalada Pilot Station and dropped anchor in Zona Comun, off La Plata (B.A. Charts No. 1749 and 3561). Steaming time (at 13 knots) was 7 hours. Buoys in the Canal Punta Indio, Canal Intermedio and Paso Banco Chico are unreliable, and we had to depend solely on the local knowledge of Pilot. It was necessary for us to drop anchor at Zona Comun as the Buenos Aires Channel was closed for dredging. However, the Recalada Pilot in any case disembarks at Zona Comun, and Pilots for River Plate board here, which in our case were two Pilots.

We left Zona Comun Anchorage on 8th April 1996 at 2030 hrs., and vessel proceeded to enter Buenos Aires Channel at Km. 37 and then via Canal Emilio Mitre which branches off at Km. 12. The 45 km. stretch of Canal Emilio Mitre is a dredged channel with well lit buoys. This man-made dredged channel ends at Isla Zarate (B.A. Chart No. 1982A), and thereafter begins the remainder of the most arduous part of the passage up to Diamante, which is almost 486 km. of twists, turns and hairpin bends.

The Pilots use their own Argentine charts, as Admiralty charts give a General idea of direction, but cannot be used for navigation.

We dropped anchor off Km. 80 point on 9th April at 0322 hrs. Current was very strong (about 3 knots) flowing all the time down-stream. The current rate increases when there is a surge in the Amazonas River due to rain, and diminishes to a certain extent when the wind blows from South. Continuous Northerly wind reduces the depths in the river and converse is true when the wind changes to South and steadies for sometime. Astronomical factor does very little or nothing to cause rise and fall of tide. It is due to this reason, amongst many others, that Argentine Coast Guard controls the shipping movements in all River Plate, Rio Parana and all other rivers, and water levels are closely monitored continuously. The Pilots get their feedback on VHF from stations manned by Coast Guard.

The reason for dropping anchor at Km. 80 was to pass Campana/Zarate in daylight and also the overhead bridge (not shown in B.A. Chart No. 1982A), in approximate position Lat. 34° 06' S., Long. 59° 00' W. Our anchor position was very close to starboard bank, and obviously the close proximity of the thick bush hardly 75 m. away overlooking our bow was enough to give us a shudder. The Pilot mused over our immediate concern as to lack of swinging room and advised with strong conviction that vessel will always remain tide riden, due to incessant flow of 3 knots – 4 knots tide down-river.

We hove our anchor at 0542 hrs. on 9th April and continued navigation up-river following Rio Parana de las Palmas, and entered Rio Parana Inferior which begin at 230 km. (Corresponding to about 180 km. mark where Rio de la Plata ends).

Passage through these rivers was thrilling with occasional meeting of passing and overtaking ships, but these encounters are prearranged for a suitable time and location for good sea room, and to achieve this, liaison is maintained with Coast Guard, and if necessary, adjust speed. Very frequently, there are sharp turns and blind corners, as such, very good lookout and also equally good radar watch is very important. It is often a futile task to try to fix position by radar, as the coast line shown on the charts rarely conforms with reality, due to constant erosion and silting which alters the coastal features of the charted river banks and islets.

On 10th April at 0018 hrs. dropped anchor at Km. 458 to await day break to pass San Martin, and subsequently arrive Diamante in the morning. We hove up anchor at 0600 hrs. and resumed passage.

Prior to arrival Diamante, we had no information about the port, berth and other things except that max. depth in rivers was 7.035 m. (FW), which is subject to daily change, and max. depth alongside 8.23 m. (FW).

We berthed on the grain bulk pier at 1118 hrs. on 10th April. No tug was available for berthing which is customary for this port. We dropped port anchor and berthed starboard side alongside with utmost care. There is very little room to manoeuvre due to shoaling of the river bed. The strong down-river current was helpful in berthing as vessel responded to helm with minimum engine. Mooring lines forward and aft had to be sent a long distance ashore by boat, as such, one has to ensure that mooring lines are initially 200 m. or longer in order to reach shore. After putting 4 head lines ashore, the mooring boat proceeds aft to carry stern lines.

Upon berthing, many officials boarded. Customs officials were very strict about ship's stores and Personal Property Declaration, where every electronic item had to be mentioned by make, model and serial number. If there is insufficient space in the Personal Property Declaration, then the columns for electronic items should be endorsed "as per attached sheet". These additional sheets should be signed by the owner of the items so declared. One must be careful not to double declare any items, that is to say any item declared in the Personal Property Declaration should not be declared again on the additional sheet. All necessary forms should be obtained by prior arrangement from Buenos Aires Agent, who may supply same along with the Parana River Pilot who boards at Zona Comun. These forms include Stores List, Personal Property List, Maritime Declaration of Health, Crew Shore Pass (photocopy acceptable). Crew photo to be affixed on Shore Pass, and also require right thumb impression in the appropriate box of the Shore Pass.

Upon berthing, all hatches were inspected with meticulous precision. Our hatches were passed in one attempt as we had hosed down all hatches, removed all loose rusts and literally vacuum cleaned the hatches, specially in way of tween deck trackways and container shoe fittings on lower hold tank tops.

We loaded 5,480 tonnes of bulk maize in No. 4 (100% full) by 2 chutes. We had to stop loading several times to ensure proper trimming, especially behind the tween deck pontoons which were left in open position. A small "present" to foreman helped us to get good trimming, as we were desperate to get in minimum 5,400 tonnes as per Charter Party. Loading and trimming finished in about 12 hours, and on the morning of 11th April, we shifted from the grain berth to the only other berth for loading bagged rice, which is situated about 400 m. away. We had one tug for unberthing, and the same tug was used for berthing in the rice berth.

It is important to note that there are no regular tugs and Pilots available at Diamante. The tug requires 12 hours notice and comes from Santa Fe and Pilot comes from Rosario, who is in fact a Rosario Port Pilot and serves Diamante now and again. The maximum allowable draft for shifting was 7.6 m. as given by the Coast Guard, who strictly control navigation through the river and also berthing/unberthing operations. The Pilot, despite his knowledge of the harbour, is very much concerned with shoal depths within tens of meters away, and there are no buoys as such, so there is a great threat of touching bottom. However, we berthed alongside the rice berth with great care. We had to fall behind the berth by about a ship's length in order to drop port anchor (to facilitate unberthing at sailing time). We were unable to be properly alongside as the depth along the berth was 5.5 m. or less, so when we finally berthed, we were about 4.0 m. off the berth, and the jetty was about 20 m. short of our length. The berth wore the delapidated look of an abandoned and disused berth. There are no cranes or lights on the berth. It had only 3 storage sheds for rice.

Shipper wanted loading without any dunnage, mats or plastic, but it was finally agreed that shipper would provide only plastic to spread on the tank tops, ship's side and bulkheads, and necessary indemnity was obtained for any damage to cargo due to sweating.

Upon completion of loading rice cargo on 17th April, we were all ready to sail at 1600 hrs. (draft was 6.88 m. forward and 6.96 m. aft). Tug was made fast on port bow. All lines were let go, except one head line. Engine was put to dead slow and with helm hardover to starboard, the intention was to cant away the stern to port quarter. A short while later, we increased the telegraph to slow ahead and then to half ahead, but vessel did not move an inch.

The Harbour Pilot and myself agreed that vessel was aground alongside berth. The tug, which was fast on the port bow, shifted aft and made fast on port quarter in pulling position. As the tug pulled, the vessel broke off the ground and stern moved to port quarter, and shortly thereafter vessel was afloat. We turned around and proceeded down-river to final destination (Montevideo) without any further incident.

It is worth mentioning here that prior to sailing we had obtained an official Fax from Argentine Coast Guard (through Agent) that the maximum available depth at Diamante Roads on that day was 8.23 m. It is apparent that the actual depth alongside the rice berth on the jetty side is certainly less than 6.96 m. (which was our sailing draft). Therefore, any ship calling Diamante must make sure of the safe draft.

It is with no surprise that vessels transitting Parana River may sometimes be aground or touch the bottom, which is regarded as non-perilous due to liquid nature of mud on the bottom. But this sort of grounding needs to be covered by the Charter Party as a special N.A.A.B.S.A. Clause (not always afloat, but safely aground).

Diamante is a very small town, workshop facility of very small nature is available. There is no hospital with reasonable medical facilities. Fresh water is available alongside at a cost of approximately U.S.$2.50/ton. There is a bus service available to and from Buenos Aires (about 8 hours travel each way). Derat Exemption Certificate can be obtained. The Authorities come to the vessel from Santa Fe. The town is quite safe. Agent places a watchman onboard while cargo operations in progress.

Australia

EXMOUTH: (Also see Page 116) (See Late Plans)

DOCUMENTS: *Add:* Dangerous Cargo Manifest.
Manifest of Foreign Cargo onboard.

PILOTAGE: *Delete and substitute:* Pilotage is not compulsory. If required, Pilots are to be arranged privately from Fremantle. Boarding ground one mile East of pier, from the line launch.

APPROACHES: *Depth in Approach Channel at LWOST:* The approach shelves gradually from 18.3 m. – 12.1 m. The bottom is sand and shell.

ANCHORAGE: *Delete and substitute:* 1 mile N.E. of the pier.

RESTRICTIONS: *Delete and substitute:* Berthing/sailing during daylight hours only. Berthing carried out at slack water.

VHF: *Delete and substitute:* Maritime VHF radiotelephone (24 hours a day). Call "Exmouth Control" on Channel 16.

TUGS: None.

BERTHING: *Line 9 – Amend:* 3 shackles on deck.

DISCHARGING: *Delete and substitute:* 1×8 in. and 1×4 in. line for fuel oil. Permanent line on jetty connected to ship's manifold amidships with hoses. Shore line 300 mm. × 1 km. Max. back pressure 150 p.s.i. High rate of discharge (up to 1,200 cu.m./hr. due to empty shore tanks).

CRANES: There is a 17 tonne (maximum capacity) mobile crane available, its use is to be organised through the Commanding Officer, HEH.

STEVEDORES: Arranged through Commanding Officer HEH and carried out by HEH base support personnel.

MEDICAL: Limited medical and dental support is available through Exmouth District Hospital. The hospital has 15 beds, 2 doctors and 1 dentist available.

FRESH WATER: *Delete and substitute:* Very limited quantities of fresh water available through a 4 in. Camlock fitting, in an emergency.

REPAIRS: *Delete and substitute:* HEH can assist with emergency minor structural/mechanical repairs, but have very limited facilities available.

AIRPORT: The airport is situated approximately 30 km. South of Exmouth. Skywest Airlines service Exmouth on a regular basis.

TIME: There is no daylight saving in Western Australia.

HOLIDAYS: The following holidays apply throughout Australia:
New Year's Day; Australia Day; Good Friday; Easter Monday; Anzac Day; Christmas Day and Boxing Day.
Western Australia State holidays:
Labour Day; Foundation Day and Queen's Birthday.

POLICE/AMBULANCE/FIRE: Police Tel: (099) 492444. Ambulance Tel: (099) 491011. Fire Tel: (099) 491222.

EMERGENCY CO-ORDINATION CENTRE: State Emergency Service – SES available on Tel: (099) 49488.

TELEPHONES: Not available. There is a telephone on the wharf, which can be made STD, ISD upon request to Commanding Officer HEH.

SERVICES: Limited services available in Exmouth, i.e. mechanical, electrical.

BANKS: Westpac Banking Corporation, Maidstone Crescent. Tel: (099) 491213. Fax: (099) 492073.

Agents for Commonwealth Bank at Local Post Office, ANZ Bank at Newsagency.

STORING: See "Prelims".
1. Vessels can be stored by truck.
2. Trucks are allowed onto wharf.
3. Customs regulations if required would be from Perth/Port Hedland.

SHIP SUPPLY SERVICE: Not available.

SHORE LEAVE: Social activities limited. However, Exmouth has much to offer the camera buff with its scenic and wildlife attractions.

IDENTIFICATION CARDS: Desired as proof of identity if need arises.

GARBAGE DISPOSAL: *Delete and substitute:* Contact Exmouth Shire Council to arrange for pick-ups.

WASTE OIL DISPOSAL: Not available.

SEAMEN'S CLUBS: No Seamen's clubs in Exmouth. Local clubs include the Truscott Memorial Club, Golf Club, Lawn Bowls Club.

CURRENCY: Australian Dollar. AUS$1.00 = U.S.$0.80 (July 1996).

GENERAL: *Add:*
Tidal Data: Higher high water 2.0 m. Lower high water 1.4 m.
Reference: Australian National Tide Tables AHP 11.
Location: The pier is located 16 km. from the town of Exmouth.
Gangway: HEH does not have a gangway, ship to supply.
Customs: Customs clearance not available at Exmouth, this would need to be prearranged from Perth or Port Hedland.

AUTHORITY: *Delete and substitute:* Commanding Officer, Naval Communications Station Harold E. Holt (HEH), P.O.Box 125, Exmouth, WA 6707, Australia. *Tel:* (099) 493320, (099) 493374 (After office hours). *FAX:* (099) 491688. *Contact:* Commander J.F. Cooper, Commanding Officer.

WEIPA: (Also see Page 189)

PILOTAGE: *Add: Coastal Pilotage:* Pilotage services between Weipa and Torres Strait, or between Weipa and Darwin via Clarence Strait, are conducted by Pilots available from Australian Reef Pilots Ltd. and Queensland Coastal Pilot Service Pty.Ltd.
Also see "Torres Strait".

Brazil

ARACAJU: (Also see Page 250)

SHIPMASTER'S REPORT: November 1996.
Berth: Barra dos Cequeiros.
Location: Lat. 10° 50' 36" S., Long. 36° 55' 07" W.
Size: Maximum length 338 m., with 15 dolphins. Maximum allowa draft is 9.5 m.
Density: 1025 (average).
Communications: The Port Authority is located at Aracaju town. about 15 km. away. They are not watching on VHF Channe throughout 24 hours. Contact Agent by using VHF Channel Channel 69 is the working channel for manoeuvring.
Pilotage: Compulsory.
Transport: No public transport. To town by taxi is about U.S.$ 30.00 way.
Light Buoy System: System "B". There are 4 privately owned light bu marking the entrance channel and the Turning Basin.
Time: GMT minus 3 hours.
Fresh Water: Available. Supply by hose from the Terminal at a rat about 25 tons per hour.
Fuel: Not available.
Cargo Operations: Loading with one belt about 250 t.p.h. One sh crane for discharging bulk cargo with grab.
General: The Terminal is a jetty out from the shore, the East breakwater aligned 029° – 209°, with length about 600 m.

The swell from the Atlantic Ocean causes the ship to pitch and during the Winter season (May to October). It is advisable to use many lines as you can and longer lines than usual. Drop ancho safety.

PORTO TROMBETAS: (Also see Page 280)

SHIP'S OFFICER'S REPORT: December 1996.

The following telex was received from the Agent in Santana respect to the Amazon North Bar, Banco do Meio and Curua Buo Channel to Macapa (Fazendinha) Pilots.

Quote:
Please advise the following:
(1) Master's name.
(2) Total crew, including Master.
(3) Total Officers, including Master.
(4) ETA Fazendinha Pilot Station (Position Lat. 00° 04' 06 Long. 51° 06' 45" W.).

Remarks for North Channel – according to Navy Authorities:

Barra Norte of Rio Amazonas – Canal Grande of Curua – C No. 201 – Guarah Light – G 0004 – radar responder beacon (Raco inoperative.

Barra Norte of Rio Amazonas – Chart No. 201 – Bailique Lig G 0005 – radar responder beacon (Racon) – inoperative.

Barra Norte of Rio Amazonas – Canal Grande of Curuah – C No. 201 – present situation of Buoyage:
(A) Major Light-Float Amazonas No. 1 – G 0003 – Lat. 01° 34.12 Long. 49° 01.35' W. – extinguished.
(B) Light-Buoy Safewaters No. 2 – NRORD 16 – Lat. 01° 17.55 Long. 49° 27.72' W. – missing.
(C) Light-Buoy Curuah No. 3 – NRORD 36 – out of position – pre position: Lat. 01° 00.94' N., Long. 49° 41.12' W.
(D) Light-Buoy Curuah No. 4 – NRORD 40 – out of position – pre position: Lat. 01° 00.29' N., Long. 49° 40.52' W.
(E) Light-Buoy Curuah No. 6 – NRORD 44 – out of position – pre position: Lat. 00° 58.80' N., Long. 49° 42.17' W.
(F) Light-Buoy Curuah No. 12 – NRORD 56 – out of position – pre position: Lat. 00° 54.32' N., Long. 49° 47.35' W.

We herewith transmit buoy positions for the North Bar:

Amazonas No. 1 (AM-1):	White light,	Lat. 01° 34.12' N., Long. 49° 01.35' W.
Aguas Seguras No. 1:	White light,	Lat. 01° 25.40' N., Long. 49° 22.20' W.
Aguas Seguras No. 2:	White light,	Lat. 01° 17.55' N., Long. 49° 27.72' W.
Aguas Seguras No. 3:	White light,	Lat. 01° 09.64' N., Long. 49° 33.33' W.
Curua No. 1:	Red light,	Lat. 01° 02.39' N., Long. 49° 39.52'
No. 2:	Green light,	Lat. 01° 01.78' N., Long. 49° 38.93'
No. 3:	Red light,	Lat. 01° 00.93' N., Long. 49° 40.96'
No. 4:	Green light,	Lat. 01° 00.20' N., Long. 49° 40.46'
No. 5:	Red light,	Lat. 00° 59.31' N., Long. 49° 42.54'
No. 6:	Green light,	Lat. 00° 58.61' N., Long. 49° 42.01'
No. 7:	Red light,	Lat. 00° 57.65' N., Long. 49° 44.12'
No. 8:	Green light,	Lat. 00° 57.05' N., Long. 49° 43.52'
No. 9:	Red light,	Lat. 00° 56.04' N., Long. 49° 45.66'
No. 10:	Green light,	Lat. 00° 55.26' N., Long. 49° 45.24'
No. 11:	Red light,	Lat. 00° 54.88' N., Long. 49° 47.88'
No. 12:	Green light,	Lat. 00° 54.02' N., Long. 49° 47.65'
No. 14:	Green light,	Lat. 00° 53.78' N., Long. 49° 48.00'

Also note lighthouse positions:

Bailique	Lat. 00° 59.41' N., Long. 49° 56.79' W.
Ilha do Parah	Lat. 00° 52.80' N., Long. 49° 59.27' W.
Ponta do Ceu	Lat. 00° 46.09' N., Long. 50° 05.71' W.
Santarem	Lat. 00° 38.81' N., Long. 50° 05.68' W.
Taia	Lat. 00° 39.23' N., Long. 50° 17.57' W.
Carolina	Lat. 00° 26.67' N., Long. 50° 27.77' W.

Espirito Santo	Lat. 00° 15.66' N., Long. 50° 31.30' W.
Pedreira	Lat. 00° 19.05' N., Long. 50° 37.05' W.
Pau Cavado	Lat. 00° 11.34' N., Long. 50° 47.17' W.
Fugitivo	Lat. 00° 10.21' N., Long. 50° 54.97' W.
Fugitivo	Lat. 00° 07.17' N., Long. 50° 55.10' W.
Macapah	Lat. 00° 05.02' N., Long. 51° 01.16' W.
Caixa d'Agua	Lat. 00° 02.26' N., Long. 51° 03.27' W.
Caixa d'Agua	Lat. 00° 01.39' N., Long. 51° 03.52' W.
Cascalheira	Lat. 00° 01.35' S., Long. 51° 03.69' W.
Chagas	Lat. 00° 01.43' S., Long. 51° 02.23' W.
Ilha de Santana	Lat. 00° 04.02' S., Long. 51° 10.17' W.

Unquote.

Ship's Officer's Remarks: Radio beacon no longer at Pto. do Ceu, but at Canivete (3935), Lat. 0° 30.57' N., Long. 50° 24.86' W., 310 kHz, CN AZA, 200 miles. This is also apparently a DGPS correction beacon, but as we do not know the frequency, have been unable to verify this.

SUAPE: (Also see Page 314) (See Late Plans)

LOCATION: The DTNEST/GENEST-I/Suape Terminal is situated near the extreme Eastern coast of Brazil, about 25 miles South of Recife (capital city of the State of Pernambuco), in position Lat. 08° 23' 50" S., Long. 34° 57' 30" W.

PORT LIMITS: The port limits comprise the maritime area between Lat. 08° 22.0' S. and Lat. 08° 25.0' S., the line of reefs (natural breakwater) and Long. 34° 55.0' W. (Nautical Chart No. 906 – DHN).

Charts: DHN: No. 900, 906 and 930.

HO: No. 528 and 3978 (British Admiralty Charts).

DOCUMENTS: *Documents required for Clearance:*

8 copies Crew List.
8 copies Stores List.
3 copies Personal Effects List.
8 copies Passenger List (if any).
2 copies Cargo Manifest.
2 copies Bill of Lading.
2 copies Health Declaration.
8 copies Narcotics List/Medicine Chest.
Clearance from the last port.

The following information is to be sent to Agent prior to arrival:

Call Sign.
Gross and Net Tonnage.
Ship's Service Speed.
Break Horse Power (BHP).
Draft.
Number of Crew.
Master and Officers names.
Time of Arrival.
Port of Loading and Departure Date.
Amount of Cargo for Suape.
Amount of Cargo in Transit.

PILOTAGE: Inward or outward pilotage is compulsory for all vessels calling at Suape. Any movements within the port limits must also be made under pilot assistance. Pilots for Suape are available by request through the ship's Agent 24 hours before vessel's arrival. They can also be requested via VHF Channels 16 or 13. If vessel is provided with a cell/mobile telephone, the Pilot may be requested directly through Recife telephone number (081) 4245010.

Pilot Boarding Station: Vessels either from the South or the North are required to wait at the pilot station in any position within one mile from breakwater head. Pilot boards 0.7 miles – 1.0 miles N.E. of breakwater head (Pilot waiting point Lat. 08° 23' 12" S., Long. 34° 56' 45" W.).

Pilot Ladder: Vessels are required to have a clean and efficient pilot ladder fitted with spreaders and manropes safely and secured rigged, ready for the Pilot to immediately embark and disembark on the side of the vessel and of sufficient length to reach the Pilot's boat. A lifebuoy with safety line and self-igniting light shall also be available at the pilot ladder head, and an officer in VHF contact with the bridge. Vessel shall afford a "Good Weather Lee", and shall reduce speed as directed by the Pilot, in order to effect the safe embarkation or disembarkation of the Pilot. Pilot ladder to be 1.0 m. above water.

APPROACHES: Approaches to the port can easily be made as very good land marks are available, and the entrance of the port can be safely reached from any direction. There is a lightbuoy marking the Sitiba Shoal, bearing 117° from the breakwater light head. Cape Santo Agostinho Lighthouse is an outstanding aid for navigators, as it can easily be identified from 24 miles. For details see List of Lights, Brazilian Navy publication DH-2.

ANCHORAGE: There is no officially appointed site for anchorage. Vessels may anchor with Cape Santo Agostinho Lt. bearing 330° at a distance greater than one mile from the Suape breakwater head.

Vessels are not allowed to drop anchor inside port limits.

Also see "Safety".

Notice of Readiness: N.O.R. is usually tendered at the time the vessel anchors in the anchorage area, or at the time the vessel is berthed – as soon as the last mooring line is made fast – whichever occurs first. Ultimately, the N.O.R. is accepted at the time the vessel is in all respects ready to operate.

RESTRICTIONS: Mooring operations are normally restricted to daylight hours.

MAX. SIZE:

Berth	*Length* (m.)	*Depth** (m.)	*Max.Draft* (m.)	*Max.LOA* (m.)
A (West)	162	14.0	13.00	190
B (East)	162	14.0	13.00	190
WR	224	15.0	13.90	250

* Current depths along both Berths (A (West) and B (East) still to be officially confirmed by DHN – Brazilian Navy Hydrographic Office.

HEALTH: Vessels must keep the Quarantine flag "Quebec" hoisted until Free Pratique is granted by Port Health Authority.

If any infection disease is suspected, ship's Agent is to be advised before vessel's arrival.

VHF: The Terminal Communication Centre is located in the DTNEST Control Room with permanent watchkeeping on VHF Channel 16, and another designated channel previously agreed with Terminal Operators. Arrived vessels bound for the Terminal will inform time of arrival and anchor position, in event of berthing delay.

TUGS: Tugs and towing services for assisting vessels arriving, departing, berthing and unberthing at Suape facilities are provided by a private towing company. Under normal operating conditions, 2 tugs are required to assist in berthing or unberthing on the pier. The use of 2 tugs is mandatory at the pier and at the LPG storage tanker for small vessels. For mooring large LPG carriers, 3 tugs are necessary, according to the local administration authority regulations. Two tugs are stationed at Suape on a 24 hour basis. Given sufficient prior notice, a third tug from Recife can usually be made available on request. Vessels should have good quality ropes, as tugs are not provided with their own towing gear. Two tugs will normally attend each berthing and each will have a minimum of 1,200 h.p. and a bollard pull of 15 tons. In accepting the service of supplied tugs, the Master of the vessel shall remain solely responsible for the safety and safe navigation of his vessel and for compliance with all applicable laws, rules and regulations.

The following tugs are usually available: "Sagitarius", 1,680 h.p. (22.00 tons BP); "Taurus", 1,680 h.p. (20.72 tons BP); "Aquila", 1,010 h.p. (17.95 tons BP); "Saveiros", 1,200 h.p. (16.45 tons BP) and "Uranus", 1,200 h.p. (15.80 tons BP).

All tugs are fitted with Kort Nozzles.

BERTHING: The Terminal comprises 3 mooring sites, namely a product pier with 2 berths ("A" West and "B" East), and the "WR" Berth which is an LPG floating storage facility, namely a fully refrigerated gas carrier moored to the sheltered side of the port breakwater.

Products handled on Berths "A" West and "B" East: LPG, Ethanol, Petrol, Aviation Spirit, Diesel Oil, Paraffin and Jet Fuel.

Products handled on Berth "WR": LPG.

Mooring Priority: By and large, vessels which depend on tide to manoeuvre will proceed first, followed by the passenger vessels, oil tankers, chemical products carriers and general cargo ships.

Berth "A":

Location:	Internal (inner berth) of the oil pier – West side.
Length:	162 m.
Depth:	10.5 m.
Hoses:	3×8 in. ASA 150 flexible hoses.
Reducers:	See "Appendix".
D.w.t.:	30,000 tons.
Loading Arms:	1×8 in. for LPG Liquid (pressurised) (300 ASA). 1×6 in. for LPG Vapour (pressurised) (300 ASA). 1×12 in. for Jet Fuel (150 ASA). 2×10 in. for Petrol, Diesel Oil, Paraffin, Aviation Spirit and Jet Fuel (150 ASA). 1×10 in. for Ethanol (150 ASA).

Remarks: All arms are fitted with quick release devices.

Berth "B":

Location:	External (outer berth) of the oil pier – East side.
Length:	162 m.
Depth:	11.5 m.
Hoses:	3×8 in. 150 ASA flexible hoses.
Reducers:	See "Appendix".
D.w.t.:	30,000 tons.
Loading Arms:	1×8 in. for LPG Liquid (pressurised) (300 ASA). 1×6 in. for LPG Vapour (pressurised) (300 ASA). 1×12 in. for Jet Fuel (150 ASA). 2×10 in. for Petrol, Diesel Oil, Paraffin, Aviation Spirit and Jet Fuel (150 ASA). 1×10 in. for Ethanol (150 ASA).

Remarks: All arms are fitted with quick release devices.

Berth "WR":

Location:	LPG Floating Storage Vessel "World Rainbow".
Length:	224 m. LOA.
Beam:	34.6 m.
Manifold to Bow:	108 m.
Manifold to Stern:	115 m.
Between Manifolds:	2.0 m.
Manifold above W/L:	14.0 m. – 17.0 m.
Fenders:	2×Yokohama type 6.70 m. × 3.30 m. 2×Yokohama type 5.50 m. × 2.50 m.
Hoses:	2×8 in. ASA 300 flexible hoses.
Reducers:	2×8 in. ASA 300 to 12 in. ASA 150.
Cargo Temperature required:	Fully refrigerated. Propane −42°C. Butane −2°C.
Cargo Tank Pressure required:	Below 0.06 kg./sq.cm.
Discharge Rate:	700 t.p.h. each hose/grade simultaneously.

Mooring: Avoid open fairleads. All wires should be provided with rope tails. In case vessels to be discharged are fitted with a booster/heater, they may eventually be requested to pump heated LPG straight to pressurised shore tanks (across the storage tanker manifold) through a 6 in. 300 ASA hose providing product at +5°C against a back pressure of around 12.0 kg./sq.cm. Daylight berthing only, normally head-in, port side to.

Auxiliary Mooring Gang Service: Terminal mooring gang is available for berthing and unberthing vessels on pier. Mooring of LPG carriers on the storage tanker is usually carried out by ship's crew.

Appendix: Reducers available on Berths "A" and "B":

Quantity	*Diameter* (in.)	*Pressure* (p.s.i.)
3	10/8	150/150
1	6/4	300/150
2	8/4	300/150
1	4/4	300/150
3	8/6	300/300
1	8/8	300/150
1	6/4	300/300
1	8/4	150/150
1	10/8	300/300
1	8/6	300/150
1	12/12	150/150
1	8/6	150/150
1	10/10	150/150
1	6/6	300/150
1	3/3	150/150
1	4/3	300/150

GENERAL CARGO FACILITIES: There is a commercial quay to the West of Berths "A" and "B" with length 343 m. and depth alongside 14.0 m. on external side and 8.0 m. on internal side for vessels up to 80,000 d.w.t. Max. draft 14.0 m. Ro-Ro and refrigerated facilities for containers available. The quay is operated by Suape Port Authority, Suape-Complexo Industrial Portuario, Rod. Pe 60 km. 10, Engenho Massangana, 1 Pojuca – PE – Brazil, CEP 55.590.000.

CARGO OPERATIONS: *Procedures and Requirements on Arrival:* The following information is required on arrival:

Name and vessel's call sign.

Home port (flag).

Cargo grades.

Cargo layout onboard indicating which one is to be discharged and which one is to remain on board.

If the ship is equipped with inert gas system, inform its operational conditions.

Any damage to engine, machinery or hull liable to cause any delays to manoeuvres and safety of other ships, or affect the environment, personnel or property.

Draft on arrival.

Draft after loading/discharge is completed.

Any leakage in hull, bulkhead, valves or pipework prone to provoke pollution or to affect operations.

Any repair which may result in delay to the start of loading/unloading.

Manifold details, including type, diameter and connection material to be used.

The time to tender Notice of Readiness is considered the time the vessel reaches the anchorage area. The Notice of Readiness will be accepted at the time the tanker is in all respects moored and ready to operate.

Products Transfer Device: Loading arms are to be connected by Terminal's Operators with assistance from the ship's personnel.

Ship's manifold flanges must be specified in accordance to international patterns.

Flange's faces, functions and gaskets must be clean and in good order.

Effort must be made to avoid any kind of spilling through connections.

All loading arms must be drained before being disconnected.

Vessel's mooring system must be well arranged and in good order, being frequently inspected to avoid movements which may exceed the operational limits of loading arms.

Discharging/Loading Operations Procedures: Special attention should be given to Safety Tanker/Terminal Check List. Each item should be verified and continuously supervised while operations are underway.

All doors and outer ports should be kept closed.

Total vigilance on deck and engine room, as well as a sufficient number of crew men, should also be provided on board in regard to emergency situations or changes of operational conditions.

At night-time, adequate display of light in the connection area of loading arms should be used.

Two towing wire ropes should always be hanging at the water's surface, so that the tugs can easily make fast, should an emergency arise.

Prior to the beginning of any operation, at least 2 fire hoses should be connected to hydrants on main deck (one forward and the other aft of the cargo valve manifold). A third canvas hose with NPU nozzle and 2 mechanical foam containers should be ready near the pump room, preferably on the catwalk. The fire extinguishing main system should always be kept under pressure.

Vessels at the Terminal must maintain engines and propulsion system in readiness to leave the berth under full power on short notice.

Radio equipment and radar should not be used while vessel is berthed.

Ship-to-shore communication has to be kept in perfect readiness and performed by VHF or telephone.

All cargo tank lids and ullage ports must be kept closed while vessel is undergoing ballast operations.

Ullage plugs must also be kept well closed, unless needed to be maintained open on account of operational reasons. In that case, flame screens must be kept over ullage plugs.

Vessels equipped with inert gas system (IGS) should open their ulla
plugs only when operations require.

All entrances of the central air-conditioned equipment and
mechanic aeration system should be adjusted to avoid penetration
gases, if possible by means of air recirculation into all closed space

In case of stormy weather with electrical discharge, the unload
operation must be stopped, whether or not the vessel is inerted.

During loading/discharge operations, as well as ballast operatio
special attention should be paid to avoid all kinds of oil spilling by s
valves.

Scuppers are to be well plugged, sealed and kept in that condit
until the transfer operation and ship's unberthing are completed.

The number of boats alongside and their laying time are to be reduc
to a minimum, according to ship-to-ship security rules. Likewise, the u
of objects and tools which may cause sparks is also forbidden.

No gas freeing operation is allowed while vessel is berthed.

All guidelines and recommendations from ISGOTT (Internatio
Safety Guide for Oil Tankers and Terminals) are to be complied wit

MEDICAL: Recife is well served by doctors and dentists. First aid c
be obtained in the nearby town of Cabo de Santo Agostinho. Shi
Agent to make arrangements.

FRESH WATER: Fresh water can be supplied, with no restrictions,
Berths "A" and "B". Max. rate 70 cu.m./hr.

FUEL: Bunker "C" fuel oil is not available. MGO/diesel oil may
supplied by truck in very small amounts.

Orders for marine lubricants should be placed well in advance throu
the ship's Agent, but subject to confirmation.

CONSULS: Most maritime nations are represented in Recife.

REPAIRS: Maintenance repairs or services which do not affect the saf
of the Terminal can be effected, after agreement with the Terminal. T
vessel must be ready to move by her own power in case of emergen

SURVEYORS: *Petroleum Inspectors:* SGS, Caleb Brett, Chas. Mar
Saybolt and other inspectors may be contacted through ship's Agen
Classification Societies: Non-exclusive surveyors may be contac
through Classification Societies Headquarters in Rio de Janeiro
Santos.

TIME: The local time is GMT minus 3 hours throughout the year. Dayli
Saving Time (Summer time) is not applicable in this part of Brazil.

HOLIDAYS: *National Holidays:*

1st January, New Year's Day.

21st April, Tiradentes (Hero of Independence).

1st May, Labour Day.

7th September, Independence Day.

12th October, Our Lady Aparecida – Patroness of the Nation.

2nd November, All Soul's Day.

15th November, Republic's Day.

25th December, Christmas Day.

Carnival: Normally occurs in February, sometimes in March.

Holy week: Occurs either in March or in April.

Corpus Christi: Occurs either in June or in July.

GARBAGE DISPOSAL: Dry garbage may be discharged if vess
request the Agent to arrange collection and transportation.

WASTE OIL DISPOSAL: There are no facilities for collecting waste
from bilges in Suape. Overboard discharge of waste oil is stri
forbidden.

SAFETY: *General Safety Rules:*

1. Anchorage inside the port limits (evolution basin) is prohibited.
2. Under exceptional circumstances, vessels may anchor inside p
   area, but a formal permission from the local Navy Authority (Capita
   dos Portos) must be obtained through the ship's Agent 24 hours
   advance.
3. Vessels arriving from abroad will be visited by Port Authorities (Hea
   Police, Customs) as soon as mooring is completed.
4. Vessels awaiting berth at anchor are not allowed to be cleared
   Port Authorities.
5. Mooring of large LPG carriers (import vessels) are carried out dur
   daylight hours only. Three tugs are necessary for this manoeuvr
6. All ship's movements inside port limits, irrespective of ship's size
   type, must be performed under tug assistance.
7. Anchorage areas have sand and mud bottom, providing good hold
   power. Nevertheless, keeping a close watch is a sound practi
   specially under strong E.S.E. stormy winds, when the current can
   strong enough to make the anchor drag.

WEATHER: *Tides:* The datum used is based on the Mean Low Wa
Spring Level, and all depths are quoted in meters. Locally, the diur
tide rise is approximately 2.0 m. at Springs and 1.0 m. at Neaps. M
detailed descriptions of tides can be found in Tide Tables (Brazilian Na
Hydrographic Office – DHN publication No. DH-29).

Currents: Due to the configuraton of the coastline and port basin, curre
prevail with flood tide setting toward South and ebb tide setting tow
North.

Sea State: Waves in the anchorage area result from the prevailing w
force, direction and duration. If the wind blows from E.S.E., the avera
wave height is about 1.0 m. – 1.5 m.

Weather Conditions: Weather conditions is Suape and its vicinities m
be considered as fair. During Winter, rain falls intermittently.

Winds: The prevailing wind is from the East as Suape is located in
Trade Winds belt. Winds of any strength tend to create short steep se
which develop with the intensity and duration of the wind, specially th
coming from the North.

Rain: The period of the most rainfall concentration (Winter) is from Ma
to June (maximum of 390 mm./month in June). In the Summer per
(October to December), the rainfall decreases to about 48 mm./mo
in November (minimum).

Atmospheric Pressure: Atmospheric pressure average is about 1012
Relative Humidity of Air: Yearly average relative humidity of air is 8
Temperature: Annual atmospheric temperature average is 26°C, a
varies from 17°C (minimum) in the Winter to 35°C (maximum) in
Summer.

Visibility: Visibility is generally good to excellent, but can be sever
reduced by rain.

GENERAL: *Ballast Disposal:* Brazilian laws are very strict as far as pollution is concerned. Heavy fines will be imposed on vessels for the violation of pollution laws. No dirty ballast shore reception facilities are available in Suape.

Barges: There are no barges in Suape.

Cash Advances: Can be obtained in local currency through ship's Agent, if advised beforehand.

Charts and Nautical Publications: Some nautical charts and publications are accessible at the local Brazilian Navy Office in Recife. Ship's Agent is to be contacted in advance.

Compass Adjusting: No compass adjusters are available at Suape.

Derat: There are derat companies in Recife. Services are to be requested through ship's Agent.

Explosion and Fire: In case of explosion or fire onboard of a moored vessel, all steps should be adopted in accordance with the best evaluation by the Terminal and vessel's representatives for emergency procedures. Usually in this case, the vessel must be unberthed.

Inert Gas System (IGS): According to SOLAS 74/78 Convention and Amendments, vessels are requested to carry an inert gas plant. Cargo tanks must be fully inerted and pressurised with inert gas at a percentage of O_2 below 8% before start of operations, and must keep such condition throughout the operation. The Terminal must be informed of any problem with the inert gas system.

Oil Pollution: Brazilian laws are very strict with regard to the pollution of coastal waters. In case of any pollution or risk of spill by crude oil, bunker, diesel or other products, either from the ship or from the Terminal, vessel must give immediate alarm to the Terminal, which has the following equipments available for prompt use:

135 m. of floating barrier.

1 oil skimmer for recovering 30 cu.m. of heavy fuel per hour.

10 absorbing cylinders.

2 marker buoys.

1 pilot boat and 2 tugs on stand-by for any emergency. Call Channel 16 on VHF radiotelephone.

All involved costs will be for the Shipowner's expense, since there is no doubt which vessel has provoked the spill. To reach that goal, Petrobras will evoke to international laws and schemes whose purpose is to appoint responsibility for sea pollution oil damages.

Likewise, injury to someone else and damage to environment will be penalised according to the same international schemes, including waste spilling and garbage release.

The Port Authorities (DPC and Port Captaincy) will impose fines foreseen by law.

Remark: Pollution presently is foreseen by Law No. 7347 of 24.7.85 as a crime, subject to imprisonment and heavy fines.

Launch Service: Launch service is usually provided by the pilot boat. Services may be arranged through ship's Agent if prior notice is given. For the gas storage tanker moored on the breakwater, a launch service is provided by the Terminal.

Laundry Service: 24 hour laundry service is available in Recife. Ship's Agent is to be contacted well in advance.

Mail: The nearest post office is located in the city of Ipojuca, about 15 km. from the pier.

Platform Ladder: The berthing pier is not fitted with a platform ladder. The ship's accommodation ladder or gangway is to be used.

Provisions: Local shipchandlers are available to supply limited quantities of provisions, and may be contacted through the ship's Agent.

Ship's Stores: Deck, engine and cabin items can be requested in advance through the ship's Agent. There are many ship suppliers in Recife.

OPERATOR: Petroleo Brasileiro S.A. – Petrobras, Rodovia PE-60, Km. 10, s/n, Suape, Ipojuca, Pernambuco, Brazil, CEP 54500-000. *Tel:* (081) 5276222. *FAX:* (081) 5271150. *Contact:* Richard Ward, Superintendent of DTNEST.

Canada

GASPE: (Also see Page 354)

SHIPMASTER'S REPORT: August 1996.

Chart: B.A. No. 1163.

Approach: Th approach to Gaspe is well defined, with the Gaspe Peninsular and Cape de Gaspe on its Southern tip with a conspicuous lighthouse.

Leading lights on a bearing of 307° through the two buoys at the entrance to the haven show up very well (24 hours) at a distance of about 10 miles.

Racon on the rear leading light is not operating. The two buoys mentioned above mark the channel into Havre de Gaspe, passing Pte. de Sandy Beach (a sand pit). During the ice season, November to April, both buoys are removed and the starboard hand buoy, marking the shallow water off Pte. de Sandy Beach, is replaced by an unlit ice spar. This spar can be detected by radar at about 5 miles. Once inside the Bay, plenty of water is available.

Pilotage: Not compulsory, and not taken by regular ships. If required, the Pilot comes from Matane on the St. Lawrence coast and costs CDN$600.00 plus expenses for each pilotage (CDN$1,200.00 in/out).

Pilot normally boards by fishing boat off Pte. de Sandy Beach and is ordered through the Agent well in advance.

During the ice season, the Master must have at least 2 seasons ice experience before he can pass through the Cabot Strait into the St. Lawrence and Gaspe without a Pilot, otherwise an Ice Pilot/Adviser must be embarked, normally off Halifax, dropping him outbound.

ECAREG: Mandatory Canadian reporting system, inwards/outwards by telex/fax as per ALRS H3600. Local arrival report and permission to sail through Canadian Coast Guard Station – Riviere au Renard on VHF Channels 16/24. The Agent usually sends the Outward Clearance, but check, permission to sail is mandatory from Canadian Coast Guard.

Notice of Readiness: Practice of the port is to tender N.O.R. passing Pte. de Sandy Beach.

Berthing: Berthing/unberthing normally 24 hours, except in the ice season, when daylight movements preferable.

Wind is generally out of N.W., with little current.

Tide: Springs 3.0 m., Neaps 2.5 m.

In fog, the wharf shows up well on radar. Wharf lights not conspicuous. However, the Agent will point his car fog lamps seawards at end of wharf in fog to assist, flashing same, if required.

Agent can be contacted on VHF Channel 10 when rounding Pte. de Sandy Beach. He has a portable set in his car.

Actual berthing manoeuvre will depend on ship type, and if berthing inside or outside of the wharf.

The approach has plenty of room to line up, be careful of being set down onto the beach, if berthing inside.

If inside, putting the ship's starboard shoulder gently on wharf knuckle and levering vessel round seems to be a good method.

Vessels generally berth heading West.

Weather: Wind normally blows from the N.W.

Summer mild with plenty of rain, under influence of depressions North and South. July and August are the hotest months. Winter temperatures very variable. The Winter of 1993 was severe with temperatures to −30°C, but 1994/1995 was milder. Ice season from December through to April. Exact time depends on conditions. Winter weather can be very stormy with the passage of continuous low pressure areas over the region.

Ice breaker assistance is often necessary in Gulf of St. Lawrence and when berthing/unberthing at Gaspe. For ice advice/requirements, the Annual Summary of Canadian Notice to Mariners and relevant Admiralty Sailing Directions should be consulted together with Canadian Coast Guard Ice circulars.

Masters not holding an Ice Pilot Permit must use the services of a Licensed Ice Advisor embarked/disembarked off Halifax.

Tugs: Not available.

Time: GMT minus 4 hours (Eastern Time). Daylight Saving Time as per U.S.A. (See ALRS).

Radio: No local VHF station (Agent on Channel 10 when vessel expected – call 'Robert').

Nearest Canadian Coast Guard Radio Station is at Riviere au Renard (VCG) ALRS 7090, used for ECAREG and public correspondence.

Wharf: Position: Lat. 48° 49.5' N., Long. 64° 26.3' W. and aligned 275° – 095°.

Depths alongside: North side – West (shore) to East – 10.3 m. sloping to 13.6 m. Chart Datum.

South side – West to East – 3.6 m. sloping to 12.6 m. C.D. (for vessels with length of 120 m., minimum depth of 8.3 m. available).

Vessel's of 120 m. length, 20 m. beam with draft 8.0 m. can safely berth inside (South).

North side – maximum berth length 180 m.

South side – maximum berth length 175 m.

Well fendered along all faces with plenty of mooring bitts.

North face of berth used for discharge of Copper Concentrate. Both sides load Sulphuric Acid. North face for discharge of refined oil products (Diesel, gasoline, heating oil).

Solid concrete construction owned by Government of Canada.

Wharf also used by Canadian Fishery Research and Inspection vessels. Fishery Department has large office at Gaspe.

Water about half fresh, dependant on rain. If draft check is necessary, take density.

Cargo: Copper concentrate is discharged with a mobile grab crane into trucks.

Sulphuric Acid is loaded through an 8 in. pipeline from two storage tanks about 1 km. behind the wharf. Line manifold is below the wharf roadway through manholes.

An 8 in. flexi-hose is provided by Noranda, Owners of the facility, and connected using ship's crane and crew.

Acid loading rate of around 550 tonnes/hr.

Shore tonnages are expressed in short tons.

Total Gaspe shore tank size is 20,800 tonnes with similar capacity at Murdochville production facility, some 100 km. from Gaspe.

Very careful inspection of vessel's tanks is carried out before loading as to cleanliness and humidity. Loading will not be carried out into damp tanks.

Tonnage loaded is based on ship's figures.

Temperature of the acid varies depending on ambient.

Loading of acid and discharging of concentrate normally commences at 0630 hrs. and then continues until completion.

Facilities: Fresh water available from wharf stand pipe. Drained down in Winter, prior notice then required.

Fuel: Only MDO. No HFO off wharf. HFO has to come from St. John, N.B., by road tanker, and is very costly.

Small repairs can be undertaken. Otherwise there is a ship repair facility with dry dock near Matane in the St. Lawrence, a few hours away.

Provisions readily obtainable from supermarket near at hand or through local ship chandler.

Public telephone box at end of wharf.

Doctor, dentist, etc., all in Gaspe, about 2.5 km. from Sandy Beach Wharf.

Agent: Agence Maritime Calypso. Tel: (418) 368-3648, (418) 368-5813 (After office hours). Fax: (418) 368-7134. Telex: 0142236. Mr. Robert Lagace – very helpful and seems to control most aspects of local operations. Office at end of wharf together with Harbour Master (who runs local taxi company).

Customs: Vessel not normally visited. Agent handles all formalities. Papers required:
3 copies Crew List on Canadian Form.
2 copies Crew Declaration on Canadian Form.
2 copies Ship's Stores Declaration on Canadian Form.

Crew List has to be faxed to Agent from previous port or from vessel at least 2 working days prior ship's arrival. Canadian Department of Transport has inspection office at base of wharf, and local Inspector conducts regular Port State Control Inspections.

General: Local people predominantly French speaking.

A small provincial town with reasonable shopping, restaurants and bars.

Tourist orientated in Summer.

Winter sports facilities with Ski Doo runs.

Easiest and quick walk into town is along rail track (not at night due to bears).

Transport: Good road system connects with Montreal and Maritime provinces.

Local airport with twice daily services to Montreal (Dorval) and services to Maritimes.

Rail link, with a passenger train every 2 days, connecting with Halifax/Montreal main line.

NEWCASTLE: (Also see Page 347)

SHIPMASTER'S REPORT: September 1996.

Charts: B.A. No. 2034. Canadian Charts No. 4911 and 4912.

Approach: Pt. Escuminac Lighthouse is conspicuous 3.5 miles East of Escuminac Harbour.

Green buoy marks shoaling water off Pt. Escuminac.

Pilot: From April through to December, Pilot boards 2 miles North of Escuminac Harbour in position Lat. 47° 07' N., Long. 64° 52' W., from a white fishing boat out of Escuminac Harbour.

From December to April (during ice season), Pilot boards either off Sydney, Cape Breton Island or Halifax, depending on ice conditions. Arrangements made through Agent who will advise boarding position.

Pilot disembarks in same positions.

VHF: Call Miramichi Pilot on Channel 16 and 11. Pilot monitors VHF When a vessel is due.

Pilot advice can be obtained from "Chatham Dispatcher" on Channel 11.

Local Canadian Coast Guard Station – Sydney, as ALRS.

Channel: Distance from Escuminac Pilot Station to Newcastle is 34 miles. In Summer, transit is about 3 hours, but in Winter, it can be much longer, depending on ice conditions.

Daylight transit in and out only, due to leading lights, and buoys often being extinguished.

Minimum channel width is 90 m.

Maximum draft for vessels with pollutants, according to Canadian Coast Guard, is 23 ft. 6 in. (FW) and for other vessels 25 ft. (FW).

Sheldrake Channel range is the shallowest section, 11 miles below Newcastle.

About 4 ships per month call at Miramichi River.

From 1996/1997 ice season, Canadian Coast Guard will charge for ice breaker assistance in Miramichi River.

Anchorage: The anchorage off Escuminac Pilot Station is exposed.

Ice: During ice season, all river channel buoys are replaced by ice spars.

Ice breaker assistance generally required.

At night, if river transit has not been completed, vessel stops and ice closes in around vessel, keeping vessel in position.

Tugs: None available.

Berths: Berths in Miramichi River:

Public berth at Chatham Marine Terminal has not received vessels for 3 years (0.7 miles below Chatham Bridge).

Tanker berth just above Chatham Bridge used by product tankers supplying adjacent storage facility.

Atlantic Board Mill at Bushville, 1 mile above Chatham Bridge, presently not used, but expected to reopen early 1997.

Newcastle Marine Terminal (head of navigation) used for the loading of paper products and discharge of kaolin clay slurry, both products from/for the paper mill 2 miles West of the town.

A general cargo type berth with clay slurry piping and tanks is located at the S.W. end of the berth. The berth is very well fendered. Vessel berthed starboard side to head in. Moorings were 2-2 each end. Berth reported to have 28 ft. (LW) alongside.

Density: 1000 (LW), 1003 (HW).

ECAREG: As for all Canadian navigation, mandatory reporting is necessary (as per ALRS Vol. 1).

Chatham Dispatcher (VHF Channel 11) will pass ships berthing report to Canadian Coast Guard.

Cargo: Discharge of clay slurry is through 2×6 in. rubber hoses into quay side manifold. Connections by Camlock couplings. Discharge rate in Summer at 500 tonnes/hr., but in Winter it is slower. In fact, in Winter, care must be exercised that product does not become frozen, therefore discharge must be continuous.

2×5,000 tonne tanks for clay slurry at S.W. end of wharf.

On completion of discharge, ship's tanks washed with fresh water into shore slop tank.

Kaolin slurry is trucked to paper mill, 2 miles S.W. of town.

Ship's crew do connection.

Facilities: Fresh water available at berth.

Usual medical and dental facilities.

Fuel by tanker truck from St.John, N.B.

Newcastle itself has a good range of shops very close to the berth and a shopping mall about 10 minutes away by taxi.

Public telephone just inside Dock Office.

Customs: Customs Officer boards about 1 hour to 2 hours after berthing. From 1997, Agent will handle formalities.

Documents required (all on Canadian forms):
3 copies Crew List.
2 copies Stores List.
2 copies Crew Effects Declaration.
2 copies Inward Declaration.
2 copies Outward Declaration, even if coastwise.
3 copies Cargo Manifest.

Transport: Chatham Airport is about 6 miles N.E. of Newcastle. Flight to Montreal twice a day.

Main Halifax/Montreal rail line passes just West of Newcastle with daily service to Montreal and Halifax.

PORTNEUF, Quebec: 45.41 N. 71.53 E.

LOCATION: Located on the North shore of the St. Lawrence River, abou 65 km. from Quebec City, at Lat. 45° 40' 52" N., Long. 71° 52' 39" Navigation season is 12 months a year with occasional ice breake assistance.

PILOTAGE: Compulsory.

RESTRICTIONS: The channel is dredged to a depth of 10.7 m.

RADIO: Quebec Radio (Call sign "VCC").

TUGS: Available.

BERTHING:

	Length (m.)	Depth (m.)
Section 1	85	10.7
Section 2	29	7.0
Section 3	31	2.0

CRANES: Available.

MEDICAL: Services available locally and in Quebec City.

DENSITY: 1000.

FRESH WATER: Available on request.

FUEL: Available by truck.

REPAIRS: Minor repairs only.

DRY DOCKS: Major shipyard at Lauzon (Quebec), 35 nautical miles the East.

SURVEYORS: Mr. Gilles Marcotte, Harbour Master.

AIRPORT: Quebec City (65 km.).

TIME: GMT minus 5 hours in Winter, GMT minus 4 hours in Summe (First Saturday of April to last Saturday of October).

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Queen Day (4th Monday in May); 24th June; 1st July, Labour Day (1st Monda in September); Thanksgiving Day (2nd Monday in October 11th November; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 911.

AUTHORITY: Transport Canada, Harbours and Ports, 901 Cap Diaman 4th Floor, Quebec (Quebec) G1K 4K1, Canada. *Tel:* (418) 648-501 *FAX:* (418) 648-7980. *Contact:* Daniel Leclerc, Ports Operatior Services.

Local Authority: Mr. G. Marcotte, Harbour Master.

QUEBEC: (Also see Page 380)

SHIPMASTER'S REPORT: August 1996.

Berth: No. 50 (Intertank).

Chart: B.A. Chart No. 319.

Approaches: Report into ECAREG and Escoumins VTS, as per ALR NP 286/3 H3590/H3600, H3700.

Approaching Escoumins, the Racon just North of the pilot station not conspicuous. It gets lost in the land clutter, but was identifiable 6 miles.

Pilotage: St. Lawrence Pilot Authority Pilot Station at Escoumins. Ship are advised by Escoumins VTS Channel 9 as to boarding procedur Pilot boards by fast blue hulled cutter, 0.8 miles from pilot station. ALR and Sailing Directions are not clear as to Escoumins/St. Lawrenc pilotage procedure.

The St. Lawrence pilotage area is South of line from Pointe de la Cro (Escoumins) to Saint Simon sur Mer on St. Lawrence South shor approximate line 120° – 300° from Escoumins.

If pilotage is likely to be over 11 hours to Quebec, then 2 Pilots w board.

Normal transit Escoumins to Quebec is about 8 hours, depending tide and speed restrictions.

At Quebec, a Docking Pilot is normally engaged, boarding off Bu K160, just South of Ile d'Orleans. On departure, River Pilot unberth vessel (according to Agent, this is normal practice).

Anchorage: Anchorage can be found approaching Escoumins Pi Station at Ile du Bic (B.A. 307), 5 miles N.E. or 8 miles S.W. of the islan in 17 m. and 20 m. respectively (under Escoumins VTS control).

Emergency river anchorages can be found (under St. Lawrenc pilotage).

Channel: Maximum draft to Quebec is 15.5 m. F.W. at high water, 11.5 m. F.W. at any tidal state.

On leaving Escoumins Pilot Station for sea (after dropping Pilot) at position Lat. 48° 19' N., Long. 69° 23' W., vessels must report to Escoumins VTS on Channel 9, ETA at Checkpoint '5B'. This is not clearly indicated on B.A. No. 312 or ALRS Vol. 6.

Tugs: A number of powerful tugs are available at Quebec. Tugs' lines used. Tugs are compulsory if wind speed over Force 5. Due to wind speed, we used one tug (our vessel 8,000 d.w.t.).

Berth: Bulk Liquid Chemicals: Intertank, Section 50 – off Saint Charles River. Length of Berth 700 ft., dredged to 11.9 m., but Agent reports 12.2 m. MLW. Flat faced concrete quay with floating fenders. Vessels can berth either side to.

Density found to be 995 LW, 997 HW. Agent advises a lot of layering, and density varies from berth to berth.

Tidal range 18 ft. Springs. At L.W., small ship's main deck well below quay level.

Quick and straightforward entrance to St. Lawrence.

Cargo: Following products handled from adjacent tankage (both import and export): Hydrogen Peroxide, Sulphuric Acid, Caustic Soda, Paraffin, LEB, Methanol, Molasses, Tallow, Gas Oil.

Most products through 6 in. rubber hoses from quay manifold, about halfway along length.

There can be up to 40 tonnes in shore line to drain onboard after shore tank valve is closed.

Sulphuric Acid loading rate 600 tonnes/hr.

SGS Surveyors in close attendance.

Ship's crew couple up. Ship's hose crane required.

Loading Master in adjacent office, but English is poor.

Facilities: Fresh water available through meter from Port Authority, arrange through Agent.

Gangway easily landed, but has to be turned in at low water.

Stores truck can get right alongside vessel.

Two telephones adjacent to vessel.

All usual facilities of a large city.

Chandler used: Lighthouse Trading. Fax: (418) 657-3711. Telex: 05 24134. Tel: (418) 657-3767. Fair priced, but delivery not prompt.

Customs: Agent handled all inward documentation.

Ship prepares following Canadian forms:

3 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Stores List.
2 copies Inward Declaration.
3 copies Cargo Manifest.

Customs Search Squad boarded us about 8 hours after berthing. They checked Bond/Log Book/Certificates and interviewed Canadian National as to National Service, and searched his cabin.

Chile

CORONEL: (Also see Page 430) **(See Late Plans)**

SHIPMASTER'S REPORT: September 1996.

Port Limits: Correct, as on Chart No. 3082.

Documents:

7 copies Crew List.
5 copies Stores List.
5 copies Bonded Stores List.
4 copies Personal Effects List.
4 copies Narcotics List.
3 copies Passenger List.
2 copies Arms List.
Last Port Clearance.

Pilotage: Pilot comes from San Vicente and boards 1 mile S.W. of Punta Puchoco. Agents are responsible for transporting Pilots from San Vicente to Coronel, so Agents should be kept well informed of ETA. Agents are on VHF Channel 16, and Pilots normally work on Channel 9.

Anchorage:

Lat. 37° 01' 53" S., Long. 73° 10' 18" E.
Lat. 37° 01' 53" S., Long. 73° 09' 48" E.
Lat. 37° 02' 06" S., Long. 73° 10' 18" E.
Lat. 37° 02' 06" S., Long. 73° 09' 48" E.

Restrictions: No official restrictions have been issued so far for the berth.

Max. Size: LOA 220 m. Max. draft 14.0 m.

Health: If coming from outside Chile, then Health Clearance to be done on arrival.

Radio: Nearest station "Talcahuano Radio".

VHF: See "Pilotage".

Radar: Only for naval use.

Tugs: Normally 2 tugs are used. One tug comes to assist in berthing and unberthing from San Vicente, and the other tug comes from Lirquen.

Berthing: The President of Chile inaugurated the new general cargo berth in August 1996. We berthed at this berth in September 1996.

The berth is a finger pier where vessels can berth on the North or South side (See "Plan").

Vessels berth "Bow to sea" and use offshore anchor. On the North side, vessel will be port side alongside, and on the South side, vessel will be starboard side alongside. Headlines are passed to the dolphin 60 m. seaward of the pier, and stern lines are passed to the bollard situated on the road bridge connecting the pier with the mainland. There is considerable swell experienced at the berth, especially in the Winter months, so vessel has to take great care and regularly check her mooring lines.

We were in port for 5 days, and it was towards end of Winter, during which we broke 8 mooring lines due to continuous surging of the vessel. Our vessel was made fast with 4 headlines, 2 breasts, 2 mooring rope springs and 2 wire springs (30 mm. wire). Similar number of lines were used aft. However, this port is considered to be safer than San Vicente or Lirquen.

Length of Pier: 172 m.
Breadth of Pier: 31 m.
Length of roadbridge joining pier with mainland: 350 m. (approx.).
Area of wood pulp and paper warehouse: 8,700 sq.m.
Area of dry lumber/general warehouse: 2,500 sq.m.

Also vast open area on reclaimed land in front of pulp warehouse for storing logs or sawn timber.

Specialised Cargo Handling Facilities: No facilities available. No shore cranes. Vessel uses own gear to load forestry products and at times other general cargo.

Stevedores: Agents arrange stevedores, who come from San Vicente, along with trucks and forklifts.

Density: 1025.

Fresh Water: Available through pipeline on pier at rate of 30 tonnes/hr. Cost U.S.$ 0.40/tonne.

Fuel: Available by road tanker.

Consuls: Argentina, Brazil, Denmark, Ecuador, Italy, Peru, Great Britain and Sweden, in Conception (20 km.).

Gangway/Deck Watchmen: Necessary, as possibility of theft.

Airport: About 30 km. away with daily flight to Santiago.

Time: GMT minus 4 hours.

Holidays: The only times when stevedores do not work are from 1530 hrs. on 24th December to 1530 hrs. on 25th December, and 1530 hrs. on 31st December to 1530 hrs. on 1st January.

Police/Ambulance/Fire: Police 133. Ambulance 711916. Fire 132.

Telephones: No shore telephones available, but Agent can place mobile telephone on board.

Identification Cards: Passes are issued by Immigration on arrival, and are required for crew going ashore.

Garbage Disposal: A lengthy procedure has to be followed and authorisation required.

QUINTERO: (Also see Page 440)

SHIPMASTER'S REPORT: June 1996.

Las Ventanas: Las Ventanas is the name of the bulk mineral loading Terminal in Quintero Bay. The pilot boarding position is Lat. 32° 45.0' S., Long. 71° 31.9' W. Berthing at Las Ventanas berth is only in daylight hours, but sailing outward can be at any time. For position of the Terminal refer to B.A. Chart No. 1314, but it is better to refer to equivalent Chilean chart, which is of a larger scale.

Las Ventanas Terminal is a private berth and handles only export of bulk minerals. The principal exports are copper concentrates and coal. The berth extends into the sea like a causeway built on dolphins. There are 4 berths, 2 on each side of the causeway. Approximate length of the causeway is 400 m. – 500 m. The available depth is 11.0 m. aft, but about 10.0 m. forward (we berthed at No. 2, port side alongside with bow facing shore and stern facing sea). On completion of loading, we were drawing 8.7 m. forward and 9.6 m. aft.

The berth for loading concentrate has a fixed loading arm connected to the overhead conveyor. The lower conveyor is for coal. The vessel has to be moved up and down the berth by warping with the mooring winches/windlass, in order to position the chute in the right hatch. The shifting is done by the Terminal crew under the supervision of ship's staff. The loading rate of concentrate is 1,000 tonnes/hr. On completion of loading, the Terminal lowers a small bulldozer by mobile crane to trim and level the cargo. We loaded 5,470 tonnes in one hatch, which took about 7.5 hours to load and about 1.5 hours to trim/level.

The greatest problem we experienced was the swell emanating from the vast expanse of the Pacific, lashing the shores of Chile, Peru, Ecuador and Panama. Since there is no breakwater in Quintero Bay, the swell with its deep trough flows past the Las Ventanas Terminal, causing the ship to roll and pitch. At times, it is difficult to keep the vessel securely alongside. The chances of mooring ropes chaffing and eventually parting cannot be rules out. Due to the swell, it is very difficult to read the ship's draft accurately.

Port Control seems to switch on the VHF about 30-45 minutes prior to the ship's ETA. It is possible that they attend/respond to the VHF call all the time during the day. The communication problem cannot be avoided if you are not able to speak some Spanish. However, the Pilot contacts the vessel directly from his portable VHF and advises the time when the vessel is to be at the pilot ground. It is better to approach at a very slow speed, but always ensure that you have good steerage, as the following swell may violently sheer the vessel off course. A traffic separation scheme exists, but when the vessel is inbound, the shore is just about half a mile on the starboard side. Never attempt to go beyond the pilot position, as there may be some ships at anchor or moored to the SBM.

There are 2 tugs available for berthing/unberthing. One of the tugs (Ultramar) is a huge tug with excellent power and manoeuvrability. On approaching the berth, we dropped starboard anchor when almost abeam to the seaward end of the pier, and finally ended up paying out 8 shackles in water. The causeway is built on the dolphins which are about 30 m. apart, and it has very good fenders. It is a problem to lower the gangway, as the dolphin may be too far for the gangway to land upon. Even if one is lucky to be at the right position for the gangway, but this prospect may no longer be possible when the vessel has to position itself under the fixed chute during loading. The Agent and

Authorities are accustomed to boarding by pilot ladder, which should be constantly tended to prevent any damage.

Fresh water is available alongside at a cost of U.S.$ 1.02 per ton, and pumping rate is about 40 t.p.h.

No bunkers or fuel are available.

Shipchandler is available.

This port is a paradise for making telephone calls. A person with a mobile telephone boards, and you can call anywhere in the world at a price of U.S.$1.00 per minute. All hands on board telephoned home at reasonable cost.

People's Republic of China

GENERAL: (Also see Page 448)

MOORING MASTER'S REPORT: November 1996.

Editor's Note: The Mooring Master berths vessels at:

Huizhou Terminal.
Liuhua Terminal.
Lufeng Terminal.
Xijiang Terminal.

Report: There are various platforms, pipelines, cables and other obstructions, but FPSO names, positions, Terminal names, Operators and VHF working channels are as below. At this time, no charts are correct.

I do not work at "Sheng Kai". To the best of my knowledge, they have a 12 in. hose connection where others are 16 in., 10 tonne SWL for lifting gear where others are 15 tonne SWL.

You will find details of FPSO's in Clarkson's.

"Nan Hai Sheng Li", ex-Mega Eagle 134,000 S.d.w.t. Liuhua Terminal, operated by Amoco. VHF 74, working Channel 8. Position: Lat. 20° 51' N., Long. 115° 41' E.

"Nan Hai Fa Xian", ex-Agip Campania, 254,654 S.d.w.t. Huizhou Terminal, operated by CACT. VHF 13, working Channel 69. Position: Lat. 21° 22' N., Long. 115° 24' E.

"Nan Hai Kai Tuo", ex-Java, 152,405 S.d.w.t. Xijiang Terminal, operated by Phillips. VHF 71, working Channel 68. Position: Lat. 21° 18' N., Long. 114° 57' E.

"Nan Hai Sheng Kai", ex-Sea Queen, 123,894 S.d.w.t. Lufeng Terminal, operated by JHN. VHF 12, working Channel 77. Position: Lat. 21° 36' N., Long. 116° 09' E.

Prior to mooring the Export Tanker, Master must sign "Conditions of Terminal Use", which basically says that the ship is responsible for anything that goes wrong throughout the lifting.

All FPSO's are secured on location by a turret mooring system, *all berthing is in Tandem onto stern of FPSO.* Helicopters are normally used for winching the mooring team on and off the Export Tanker, daylight hours only. Berthing takes place in daylight only, vessel may unberth during darkness, but will need to await daylight, and possibly other operations, before helicopter is available to take off mooring team. Boat transfer will be used if conditions are suitable and may be done at night. The *winching area should be on the port side and be suitable for Super Pumas.* Helicopter can land on Export Tanker if all conditions suitable for such operation. Normal practice is to board Export Tanker at a time which will let all operations be finished during daylight the following day. Mooring team flies out from Shekou in China.

Four people will stay onboard the Export Tanker (the Mooring Master, 2 Chinese helpers, and the CCIB Government Surveyor). Occasionally, there could be an extra person doing training. All documentation, including Port Clearance, N.O.R. and Protests are done by Mooring Master. No Agent, Customs, Port Authority, Health or State personnel normally board. The Mooring Master will have approved ship's answer to the Terminal Questionnaire, and can reject vessel prior to berthing if any serious discrepancies are found, he will also report as to the suitability of the vessel for further liftings.

Equipment box(es) will be loaded onto Export Tanker after the mooring team board. Condition of Export Tanker lifting gear is very important, as it may be used in very poor weather conditions, both to transfer the equipment box and to work the hose. *Power guys* should be provided, a ship with Manilla runners and no back-up preventers is a nightmare, operable in the Summer, but not during Monsoon and Typhoon conditions with maybe 15° roll (each side) on berth, when lying to current and across sea and swell. See "Lifting Equipment Recommendations" below.

No tugs as such are available for berthing, the Export Tanker being brought into position for mooring on main engine only. Two AHTSV's provide hose handling and mooring support, and these operations usually dictate whether berthing takes place. On approach to FPSO, the messenger transfer from supply boat is by rocket gun (Export Tanker having long heaving line ready in case of malfunction). Same AHTSV usually then goes to make fast on stern as Export Tanker continues to approach FPSO and then holds position on stern during loading, tug uses own gear including messenger, a heaving line being sufficient to be passed from Export Tanker (at this time Export Tanker will require crew forward and aft, then hose connection will take place immediately after all fast). N.O.R. accepted at all fast. Forward winch must be rated *at least 15 tonnes*, and be able to accept all of messenger onto drum by straight pull or via suitable roller leads.

Vessel must provide a *200 tonne SWL chain stopper* and is secured by a single 76 mm. chain and associated equipment. The area is subject to severe rip tides and Solitron activity which may set the Export Tanker towards the FPSO, even in very strong winds. In Autumn 1996, the chain stopper (rated at 300 tonne SWL) of a 140,000 S.d.w.t. Export Tanker parted under load due to rip tides, winds at the time were 15 knots. Mai engines should be ready for use at all times, and may need to be use astern for periods of time. In event of failure of stern tugs gear (in wor case, half onboard AHTSV and half onboard Export Tanker with propell fouled), it is prudent that Export Tanker has best mooring line ready pass, and also have a good length of fire wires flaked out and secure on deck, heaving line ready.

Hose connection is done by Export Tanker crew, aided by moorin helpers and supervised by Mooring Master. Connection is by Camloc to 150 ANSI dimensions, a slip hook is fitted at hang-off chain. Expo Tanker may have to receive a water flush before and after loadin operations. This information should be provided to Consignee and Expo Tanker by each Terminal, as and when required. As a rough guide, a allowance of 300 cu.m. should be enough. Any definite details regardin cargo heating or handling after loading does not come from the Moorin Master.

All documentation is usually done prior to vessel sailing. Time take depends on sampling method for API/density/BS & W, etc., FPS paperwork may be completed before hose disconnected or could tak several hours. As a guide, the Export Tanker should be ready to let g about one hour after cargo is completed, and a hard copy of cargo figure will either come over by messenger from the FPSO prior to unmoorin or will be brought over later by boat.

The Liuhua Terminal, operated by Amoco, has a cargo history of H_2 SO_2, and Mercaptan content making closed loading, suitable equipme and proper crew training essential. Nine knots of current have bee recorded on seabed at this location during Solitron activity. 230 tonn pull-on hawser on 64,000 S.d.w.t. Export Tanker, Autumn 1996, wi little wind or sea.

LIFTING EQUIPMENT RECOMMENDATIONS OCIMF & SC TERMINALS: Ships should be provided with lifting equipment havin SWL's as follows:

The SWL of the lifting gear should be established in accordance wi the requirements of the ship's Classification Societies, and shou include a normal allowance for impact load.

25,001 to 60,000 S.d.w.t. – 10 tonnes.
60,0001 to 160,000 S.d.w.t. – 15 tonnes.
Over 160,000 S.d.w.t. – 20 tonnes.

The lifting equipment should be able to achieve the appropriate SW when plumbing a point 1.0 m. outboard from the ship's side over the f length of the manifold. It should be able to provide a clear lift above th deck of at least 10.0 m. to any manifold connection.

The lifting equipment fitted shall be able to operate as follows:

(a) To top and lower under load and be fail-safe in the event of pow loss when topping or lowering.
(b) *To slew both ways by power (not manually) under load, both whe topping and lowering and when not topping and lowering.*
(c) The hook and runner should run free without manual interventi under condition of no load.
(d) To lift and lower at a rate at the hook of *10.0 m. and 15.0 m. p minute under load*, and approximately 20.0 m. – 30 m. per minu under conditions of no load.
(e) To operate smoothly during lifting or lowering to a fineness control of 1 in. at the hook. The equipment should have a simil smoothness of operation when slewing (this recommendation particularly important for safety of operations when matching hos to the manifold, etc.).
(f) To be operated from a central control position for all functions lifting and lowering, topping and lowering and slewing (it desirable that the control position be duplicated at the ship's si to enable the Operator to see all stages of the operation).
(g) To *present the hook* or shackle *on a single part of wire* at t water's edge. This recommendation is aimed to minimise t danger to personnel, either in a workboat, or ashore, from a lar block with several turns of wire close to them. As an inter measure, a suitably sized 3.0 m. pennant may be fitted under t block.
(h) *The emphasised items are essential for safe and controll operation at the South China Sea Terminals. All Terminals are open seas and subject to Monsoons and Typhoons in season.*

Further Guidance Notes:

Hook must have safety latch.

Export Tankers will at times have to operate lifting gear in *very rou seas and high winds.* Equipment box and hose will be picked-up fro a supply boat manoeuvring close to ship's side, these vessels have cra barriers. The hook must travel far enough outboard to reach both sup vessel and out over crash barrier to pick-up point. Hook must be safety type to prevent lift from inadvertently coming off during operatio and must be present on a single part at water's edge for safety and ea of use by supply vessel crew. During these operations, the speed gear is very important since if too slow, the supply boat is alongsi longer than necessary, and there is a very real chance that the lift w get caught in crash barrier, as the supply boat rises and falls in sea a swell. The derrick should be able to raise hose to securing position single lift even with safety pennant on block.

FANGCHENG: (Also see Page 466)

SHIPMASTER'S REPORT: September 1996.

Pilotage: There are 6 Pilots available at the port. Pilot embarks from 3,200 h.p. tug. Pilot ladder required 3.0 m. above water. Call Pilot VHF Channel 16, working on Channel 6. Pilot boards at anchorage large ships and at Buoy No. 1 for small ships.

Fairway: Charted depth is 7.5 m., but said by Pilot to be 8.0 m. In Chinese edition of port guide it is declared as 8.0 m. There is a Shore Pilot Guide who can supervise the ship's position in the Fairway between Buoy No. 1 to Buoy No. 5. This station is controlled by the Navy, but available on Pilot's request.

Anchorage: One "waste" mooring buoy exists 5 cables S.W. of Pilot Buoy (Buoy No. 0). This mooring buoy is yellow without a light, and is not marked on B.A. or Chinese charts. Special care should be taken when approaching anchorage at night.

Waste Oil Disposal: Not available at this port, but a barge from port of Beihai can be ordered at a charge.

Agents: Two agencies at this port: Penavico and Sinoagent. Agent speaks very good English and is helpful in every respect.

VHF: Channel 16 for calling. Fangcheng Radio, Penavico and Sinoagent all stand-by on this channel. After connecting, Fangcheng Radio works on Channel 9, Penavico on Channel 68 and Sinoagent on Channel 12. Fangcheng Radio listens 24 hours, but Penavico and Sinoagent only during office hours, so Fangcheng Radio will ask them to contact vessel.

Quarantine: Upon arrival, Animal and Plant Quarantine Officer and Health Quarantine Officer will board together with Agent. Both Quarantine Officers will hand over 3 – 4 papers for different kinds of treatment, which are not necessary for ship's Master to sign. They are for the purpose of making money only. Master can refuse them, and Agent will give good advise at that time.

Garbage Disposal: Collected every morning, and spraying treatment by Health Officer is compulsory. Master will be advised by Agent.

LIUHUA TERMINAL: 20.50 N. 115.42 E.

(See Late Plans)

LOCATION: The Liuhua Terminal is located in the waters of the People's Republic of China, approximately 150 nautical miles S.E. of Hong Kong.

(1) Floating Production System (FPS) "Nan Hai Tiao Zhan" (Nan Hai Challenge), located offshore at Lat. 20° 49' 32.328" N., Long. 115° 42' 0.662" E.

(2) An offshore loading berth Floating Production Storage and Offloading (FPSO) "Nan Hai Sheng Li" (Nan Hai Victory), located offshore at Lat. 20° 35.305' N., Long. 115° 40' 59.913" E.

(3) Water depth at the location is approximately 290 m.

Both the FPS and FPSO are permanently anchored to the sea bed by an anchor leg mooring system.

DOCUMENTS: The following documents are required when calling at the Liuhua Oil Terminal for all foreign flagged vessels:

(a) Crew Lists.
(b) Lists of Ports of Call.
(c) Copies of Cargo Manifest.

PILOTAGE: *Mooring Master Pick-up Area:* The Mooring Master and his mooring crew, including one person from the Chinese Commodities Inspection Bureau (CCIB), will board the Lifting Vessel at the waiting area (See "Approaches"). Depending on weather conditions and following instructions from the Mooring Master, the vessel will be allowed to proceed to the berth.

Also see "Berthing".

APPROACHES: *Waiting Area:* The designated waiting area for vessels awaiting loading at the Liuhua Terminal is an area 2 nautical miles in radius, centred at Lat. 20° 44' N., Long. 115° 38' E. No anchorage is possible due to the water depth.

Navigational Aids: Masters are advised that navigation within the Terminal Zone will only be undertaken in the presence of the Terminal Mooring Master. As the Terminal is in the proximity of the Hong Kong Shipping Lane, radar surveillance will be operated from the field stand-by vessel. This does not relieve the Master of the Lifting Vessel of his responsibility for the safety of his vessel.

Terminal Restricted Zone: Lifting Vessels are prohibited from navigating within the Restricted Zone at the Liuhua Terminal at any time unless a Mooring Master is on board. The Restricted Zone is bounded by the lines connecting the following points:

(1) Lat. 20° 45' N., Long. 115° 38' E.
(2) Lat. 20° 45' N., Long. 115° 45' E.
(3) Lat. 20° 54' N., Long. 115° 45' E.
(4) Lat. 20° 54' N., Long. 115° 38' E.

Hydrographic Chart Information: Vessels are referred to the appropriate Hydrographic Office publications, Admiralty publications and official charts for the approaches and navigational aids to the Liuhua Oil Terminal. Caution is required when navigating near the Terminal, since oil installations and marine activities may be encountered in the area.

Notice to Mariners: The international merchant shipping Notice to Mariners "M" Notices will advise Shipowners and Masters of the extent and operations being undertaken in the Liuhua Oil Field.

HK MARDEP is giving on Navtex, twice a week, the position of rigs and FPSO's operating in the South China Sea.

ANCHORAGE: No anchorage is possible due to the water depth.

RESTRICTIONS: The Liuhua Oil Terminal is operated on a continuous basis, 24 hours a day, 7 days a week, weather and circumstances permitting.

Vessels will be moored in daylight hours only, loaded at any hour, and unmoored at any time, weather and circumstances permitting.

MAX. SIZE: 35,000 d.w.t. – 140,000 d.w.t. Max. LOA 265 m. Max. beam 50 m.

HEALTH: The rules governing the Quarantine of Lifting Vessels are the same as those found in other parts of the world.

RADIO/VHF: *Initial Communications:* ETAs for Liuhua Oil Terminal *must* be sent in writing for all vessels to the Agent, the Operator and by radio to the FPSO.

Radio communication with the FPSO can be established through the marine band channels, and a working frequency chosen once contact has been made.

Call sign of the (FPSO) "Nan Hai Sheng Li" is: ELQK4.

1. Inmarsat – B (Pacific Ocean):
   Fax No. = 872/873-3636-34320
   Telephone No. = 872/873-3636-34310
   Telex No. = 582/583-3636-4350 NHSL X
2. Inmarsat – C (GMDSS Station (Pacific Ocean):
   I.D. No. = 582-4636-97410
3. Radiotelex (ARQ):
   Selcall No. = 25054 ELQK X
4. 2,182 kHz Watchkeeping Receiver.
5. SSB/DSC, VHF /DSC (GMDSS Station):
   MID No. = 636009993
6. Helicopter VHF Radio:
   Frequency = 118.0 – 136 MHz

Providing Estimated Time of Arrival (ETA) and Other Information: It is important that Lifting Vessels establish contact with the Operator when 4 days distant from the Liuhua Oil Terminal and maintain such contact until just prior to arrival at the Liuhua Oil Terminal. Lifting Vessels should send an ETA message to the Operator not less than 96 hours prior to arrival at the Liuhua Oil Terminal, providing the following information:

(1) Vessel's Name, Nationality, Owner, Port of Registry and Call Sign.
(2) The Estimated Time of Arrival in local time (GMT plus 8 hours).
(3) The Quantity of Crude Oil to be Loaded.
(4) The Estimated Sailing Draft.
(5) The Last Port of Call.
(6) Next Port of Call (if known).
(7) Whether the Lifting Vessel has a clean Bill of Health.
(8) A copy of the "Lifting Vessel Nomination Fax" can be required by FPSO (see below).

While it is the responsibility of the Lifting Vessel and her Owners to ensure that she is properly equipped, Lifting Vessel should include in its ETA message any special equipment request. If able to do so, the FPSO will endeavour to provide such equipment.

Further ETA messages should be sent to the Operator when the vessel is 72 hours, 48 hours and 24 hours distant from the Liuhua Oil Terminal, confirming or giving notice of any change in the 96 hour ETA and at any other time after the 24 hour ETA message, when a change by more than 2 hours occurs in the ETA. The 24 hour ETA message should include a positive statement regarding the Lifting Vessel's readiness to load on arrival.

Ship-to-Ship Terminal Communications: The FPSO vessel is equipped with VHF radiotelephone using international frequencies and maintains a radio watch on VHF Channel 16 and designated channel. Not less than 12 hours prior to the Lifting Vessel's ETA at the Liuhua Oil Terminal, the Lifting Vessel is required to maintain a radio watch on VHF Channel 16 when in range. Masters are recommended to use this facility as soon as the Lifting Vessel is within range, since such communications are the best means of avoiding delay in the mooring of the Lifting Vessel. During the loading operations, all communications between the vessel and Liuhua Oil Terminal shall be under the supervision of the Mooring Master. The Mooring Master will advise the Master and Officers regarding the emergency whistle signals set up for use in the event the VHF radiotelephone units become inoperative. The use of the Lifting Vessel's radio station and/or battery charging equipment is prohibited during cargo loading operations. Satellite communications will be permitted at any time.

Radio Watches: While at the designated area awaiting the loading berth, Lifting Vessels should maintain a listening watch on VHF Channel 74, and if contact breaks on this VHF channel, the listening watch should continue on the nominated marine band channel with the FPSO. Chiwan Radio 4,434.6 kHz by day, and 2,512 kHz by night, or as directed by the Mooring Master.

Note: Liuhua 11-1 Crude Oil has Hydrogen Sulphide Gas (H_2S) in concentrations significant enough to be a toxicity concern for personnel. It is therefore mandatory that Lifting Vessels be properly equipped and vented prior to the vessel's arrival at the Terminal loading facilities.

The following is information required by the Liuhua Terminal for vessel nominated to lift crude oil at the Liuhua facilities:

1. Date
2. Vessel's Name
3. Date Delivered
4. Place
5. Summer d.w.t. (Max. 140,000, min. 35,000) tonnes
6. Summer Draft m.
7. Light Displacement tonnes
8. Total Displacement tonnes
9. LOA (Max. 265 m.) m.
10. Beam (Max. 50 m.) m.
11. Draft on Arrival (as per MARPOL '73/Rule 13) F...... A......
12. Manifold Height over SBT Draft (Max. 16.5 m.) m.
13. Flag State
14. Nationality Master .... Officers .... Crew ....
15. Total Number Officers and Crew on Board
16. Officers Ability to Speak/Understand English: Good/Fair/Not Good

17. Are Officers/Crew familiar with Tandem Mooring? Yes/No
18. Are Officers/Crew trained and certified in H_2S Safety? Yes/No
19. Is Vessel properly equipped to handle H_2S concern? Yes/No
20. Is Vessel a Segregated Ballast Tanker? Yes/No
21. Percentage SDWT Vessel can maintain with
    segregated Ballast only %
22. Helicopter Winching Area as per ICS Guideline
    on Port Side? Yes/No
23. Bow Chain Stopper(s): One/Two SWL...... SWL......
24. Bow Chain Stopper Type (Tongue or Hinged Bar)
25. Bow Chain Stopper Chain Size (54 mm. OR 76 mm.) mm.
26. Bow Chain Stopper Fitted with Chain Straightener Device? Yes/No
27. Bow Chock Opening(s): One/Two (600 mm.×450 mm.)
    ......mm. ......mm.
28. Distance between Bow Chocks (2 m. – 3 m.)
29. Distance between Bow Chock and Chain Stopper
    (2.7 m. – 3.7 m.) m.
30. Distance between Chain Stopper and Fairlead (4.5 m.) m.
31. Empty Storage Drum on the Winch (for 9 in. 200 m. line) Yes/No
32. Type of Storage Drum (undivided/split)
33. Pedestal Fairlead in line with Winch Storage Drum Yes/No
34. Winch Rated Pull (min. 15 tonnes) tonnes
35. Does Equipment comply with OCIMF Recommendations? Yes/No
36. Port Boom/Crane (Min. marked 15 tonnes) SWL tonnes
37. Lifting Equipment suitable to operate in Open Sea
    Conditions? Yes/No
38. Lifting Hook fitted with Safety Latch Yes/No
39. Presentation Flange at Manifold to be 16 in. ANSI 150 Yes/No
40. Distance Bow to Centre Manifold (Max. 150 m.) m.
41. Distance Presentation Flange inboard from
    Ship's Side (4.6 m.) m.
42. Height of Presentation Flange Centre
    above Deck (max. 2.1 m.) m.
43. Spacing between Centre of Presentation
    Flange (2 m. – 2.5 m.) m.
44. Manifold Material (should be steel) Yes/No
45. Hose Support Curvature not less than 150 mm. Yes/No
46. Pressure Gauges and Thermometers at Manifold? Yes/No
47. Maximum Freeboard during Loading m.
    (should never exceed Freeboard on Berthing)
48. Do Manifolds and Associated Equipment comply
    with OCIMF Guidelines Yes/No
49. Does Vessel have IG System Yes/No
50. Can IG System maintain less than 8% Oxygen
    at all times? Yes/No
    (Vessel will be rejected if Oxygen percentage
    in cargo tanks more than 8%).
51. Pressure Relief Valve Setting mm./WG
52. Without Breaching Tanks can Vessel be:
    Sampled? Yes/No Ullaged? Yes/No
    Water cut? Yes/No Temperatures taken? Yes/No
53. Initial Loading Rate ....MTPH ....BPH
54. Maximum Loading Rate ....MTPH ....BPH
55. Topping-off Rate ....MTPH ....BPH
56. Vessel able to Receive/Segregate:
    ......cu.m. Line Flush Water prior Loading Cargo Yes/No
    ......cu.m. Line Flush Water after Loading Cargo Yes/No
57. Is Vessel loading on top on Slop Tanks and what Quantity
    is she able to receive in each Slop Tank
58. Main Engine(s) Type BHP
59. Manoeuvring RPM ahead: Full .... Half .... Slow .... Dead slow ....
60. Manoeuvring RPM astern: Full .... Half .... Slow .... Dead slow ....
61. Limit Time Astern minutes
62. Time from Stop to Astern seconds
63. Maximum Number of consecutive Starts
64. Expiring Date of TOVALOP Certificate
65. Expiring Date of Crystal Certificate
66. Vessel Telex: . . . . . . Fax: . . . . . .
    Name and Contact Number of Owner/Operator

Any other comment:

TUGS: 1×12,000 h.p. and 1×8,000 h.p.

BERTHING: *Mooring Arrangement:* The FPSO is a converted tanker whose principle dimensions are:

Length: 258.00 m. Breadth: 44.00 m.
Depth: 22.90 m. Draft (Summer): 17.00 m.
Deadweight: 140,000 tons

The FPSO is permanently installed by a 10 point spread mooring system, with each point secured directly to the seabed by a high holding power anchor.

The FPSO is free to weather vane around her mooring and the FPSO is capable of accepting vessels between 35,000 S.d.w.t. and 140,000 S.d.w.t. The FPSO is equipped with anchorage lights and lights on the bow and on the stern showing Morse letter "U", as required under Maritime Law (Regulations for the Prevention of Collisions at Sea).

Operator's Facilities: The Operator's administrative offices are located in Chiwan. The Operator's facilities for the laboratory testing of crude oil are located onboard the FPSO.

Mooring Master: Lifting Vessels to be moored at the Terminal will be boarded by a Mooring Master at the customary waiting area (See "Approaches"). The Mooring Master will be provided by the Operator and will act as the Loading Master during the loading operations. Lifting Vessels will not be allowed to approach or depart from the loading berth without the assistance of the Operator's designated Mooring Master. The Mooring Master will advise the Lifting Vessel's Master on the approaches to the loading berth, the operation of mooring and unmooring and in all other operations within the loading berth area. The Mooring Master will be in direct charge of the portable VHF radiotelephone, and all ship-to-tug and ship-to-FPSO communications will be by VHF radio.

The Lifting Vessel's Oil Record Book shall be made available
inspection by the Mooring Master on his arrival. All manoeuvring of
Lifting Vessel within the loading berth area shall be performed by
Lifting Vessel personnel as directed by the Lifting Vessel's Officer-
charge and in accordance with the procedures advised by the Moori
Master. The vessel, whilst being manoeuvred, shall remain the s
responsibility of the Lifting Vessel's Master. The Lifting Vessel's Mas
must be on the bridge at all times while the vessel is manoeuvring.

The Lifting Vessel is required to have a clear area, possibly on p
side, for winching on and off the Mooring Master and his crew
helicopter, in accordance with Guide to Helicopter/Ship Operations
published by the International Chamber of Shipping). The winching a
manoeuvring zone should have a diameter suitable for an Aerospati
332L Super Puma type helicopter. In the event that the sea conditi
are favourable, an efficient pilot ladder fitted with spreaders a
manropes, safely and securely rigged, ready for the Mooring Master
embark and disembark on either side of the vessel, may be used
advised by the Mooring Master. Adequate lighting must be rigg
overside for night operations, with lifebuoy, safety line and self-igniti
light, together with a rope messenger for the Mooring Master's docum
case and bags. The Lifting Vessel shall afford a "good weather lee" a
shall reduce speed as directed in order to effect a safe transfer
personnel.

Whenever, as in the case of large Lifting Vessels in light conditi
the freeboard exceeds 30 ft., the accommodation ladder shall also
used in conjunction with the pilot ladder and shall be lowered to ab
12 ft. above the water with the pilot ladder rigged immediately adjac
to the bottom platform of the accommodation ladder. A mechanical h
of an approved type can be an acceptable alternative to a conventio
pilot ladder. A mechanical hoist that relies on a single wire shall not
considered acceptable. If in the opinion of the Mooring Master, the p
ladder is not safe, the Mooring Master may refuse to board the Lift
Vessel, and any delay caused by such refusal shall be for the Lift
Vessel's account.

In any event, the primary method of transfer for the Mooring Mas
will be by helicopter, and such operations will be at the discretion of
Helicopter Pilot and the Mooring Master.

The Lifting Vessel shall provide food for the Mooring Master and
crew, including the CCIB representative while on board the Lifting Ves
and shall accommodate the Mooring Master in the Pilot's cabin. Sho
the Lifting Vessel not be equipped with a Pilot's cabin, the Moori
Master and the CCIB representative shall be accommodated in a ca
equivalent to that of an officer on the Lifting Vessel. The Mooring Mas
shall have access to the bridge and/or control area of the Lifting Ves
including the cargo control room, and such areas shall not be locked
otherwise arranged as to prevent immediate entry at any time by
Mooring Master. Lifting Vessel's Master should give any assista
requested by Mooring Master relevant to oil lifting operations.

Lifting Vessel Equipment: Prior to the berthing of the Lifting Vessel a
after helicopter operation, the lifting equipment on port side of the Lift
Vessel should be fully rigged. Due to the sea conditions, it should
able to slew both ways by power and not manually and have a lift
and lowering rate at the hook between 10 m. and 15 m. per minute un
load conditions, and 29 m. – 30 m. per minute under no load conditio
The derrick or crane should be swung outboard so as to clear
manifold and ensure that it is ready to handle the basket of tools a
hose handling equipment, as well as the floating hose string on the p
side. The mooring arrangement and equipment should be prepared
the bow. One storage drum should be made empty on the bow to reco
the hawser messenger. Anchors should be secured on their stoppe
warping winches and windlass in good working order at all times dur
the lifting operation. A tug will be in attendance at all times during
loading operation, moored to the stern of the Lifting Vessel. The winch
on the poop deck must be in full working order, and efficient stopp
must be readily available to"stop off" the mooring line from the tug.

The Lifting Vessel's manifolds must be rated by an approv
Classification Society and in compliance with OCIMF "Standards
Manifold and Associated Equipment". The derrick or crane must
capable of lifting the cargo hoses safely and efficiently from the Sup
Vessel deck over the rail to the Lifting Vessel's manifold. The Lift
Vessel must have an adequate supply of stud bolts, nuts, gaske
wrenches and big hammers to connect the cargo hose, but the prima
method of hose connection will be with a 16 in. Camlock connecto
the tail end hose. If in the opinion of the Mooring Master, the Lift
Vessel is not equipped with adequate mooring or loading facilities
lines or gear, the Mooring Master will inform the Lifting Vessel's Mas
and in such event, the Lifting Vessel will not be brought into the load
berth until the facilities and equipment are deemed satisfactory by
Mooring Master, and any delay caused by such unsatisfactory facilit
and equipment shall be for the Lifting Vessel's account.

Mooring Operations: As the FPSO operates a tandem mooring syste
the Operator will provide the services of Support Vessels to assist
the mooring and unmooring of the Lifting Vessel. During the lift
operation, a tug will be permanently moored to the stern of the Lift
Vessel to assist in maintaining tension and reduce fish tailing in
mooring arrangement between the FPSO and the Lifting Vessel. T
tug will be based at the loading berth and will operate under the dir
control of the Mooring Master. Another Supply Vessel "Fifi" will pa
the hose end to the Lifting Vessel and will remain standing-by dur
lifting.

The loading berth is in open and unsheltered waters; therefore, fr
the time the Mooring Master boards the Lifting Vessel until the Lift
Vessel has loaded her cargo and the Mooring Master has disembark
full power must be available at all times on deck machinery and
Lifting Vessel's engines, steering machinery and other manoeuvr
equipment must likewise be maintained in a constant state of readin
with full power for immediate use, so as to allow the Lifting Vessel
manoeuvre in an emergency, or so as to allow the Lifting Vessel
depart from the loading berth at any time so directed by the Moor
Master.

Note: The Lifting Vessel berthing and disconnecting thresholds are assumed to be 2.5 m. waves height for berthing and 3.5 m. – 4.0 m. for disconnecting. These values are for guidance only, and the Mooring Master, in conjunction with the FPSO's Offshore Installation Manager, the Lifting Vessel's Master and the Supply Vessel's Master will review the mooring criteria on a case by case basis. Anyway, disconnection should be done when a pull of 200 tons or more is recorded more than 5 times in one hour.

The Lifting Vessel's personnel should be at their stations and alert at all times during mooring, unmooring, hose handling and cargo loading operations. Where Lifting Vessels are equipped with an electric clutch control to the propeller shaft, such Lifting Vessels must disconnect the electrical clutch control and the manual clutch control so that there will be no possibility of the engine engaging the propeller shaft while the Lifting Vessel is moored. A constant watch in the engine control room, cargo control room and on the bridge shall be provided at all times. An additional watch shall be kept at the loading manifold and on the bow mooring at all times.

Berthing: Nominations to load crude oil will normally be accepted, and the loading berth will be assigned to a Lifting Vessel in the order of its arrival, provided the Lifting Vessel has a nomination for crude oil valid at the time, and is in all respects equipped and ready to moor and conduct cargo operations. In the event that mooring is delayed on account of weather, the Lifting Vessel will keep its position in line. Should the Lifting Vessel be required to leave the area on account of weather, the Lifting Vessel should keep in radio contact with Liuhua Oil Terminal, in order to make the Lifting Vessel available as soon as the weather moderates. The Operator reserves the right to load Lifting Vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other Lifting Vessels in line. For example, should weather make it necessary for a specific Lifting Vessel waiting mooring to vacate the area, the Operator may load another Lifting Vessel which arrived at Terminal after the specific Lifting Vessel, but before the return of the specific Lifting Vessel, which was waiting in line ahead of the other Lifting Vessel.

LOADING: *Loading Berth:* Lifting Vessels are loaded by means of a single hose string length 945 ft. This hose string will be of the floating type and be connected to the FPSO at the port side aft. To allow for the handling of this hose string, which is a nominal 20 in. diameter by the smaller Lifting Vessels, the outboard (Lifting Vessel end) 3 lengths of hose, the two tail and one rail hose length portion of the string, will be a nominal 16 in. diameter. The presentation flange on Lifting Vessel should be 16 in. ANSI 150. Hose string configuration and equipment will meet the standard recommended by Oil Companies International Marine Forum (OCIMF) and detailed in their publication "SPM Hose Ancillary Equipment Guide".

The FPSO is loaded by means of a submarine pipeline, consisting of 2×13.5 in. production lines and 1×6 in. well test line, which run from the FPS and are directly connected by a fluid rise system terminating at the FPSO in the turret.

Loading Rate: The crude oil transfer from the FPSO to the Lifting Vessel is by pump, and the maximum flow rate for on-spec crude oil is 30,000 barrels per hour, or approximately 4,500 tonnes/hr. at a minimum temperature of 100°F (38°C) and a maximum temperature of 150°F (65°C).

It is required that only dry clean oil, free from water, by pumped from the on-spec cargo tanks, through the Marine Loading and Measurement Unit (MLM) to the Lifting Vessel, and that the Lifting Vessel will receive oil at the maximum loading rate from the FPSO having due regard for safety for all operations. It is also required that any shipboard impediment (such as "Y's" or mud boxes) to the flow of crude oil into the Lifting Vessel be removed prior to the arrival of the vessel at the loading berth. One reducer only is allowed between hose and distance piece.

Connecting Hoses: After the Lifting Vessel has been securely moored, the cargo hose will be brought alongside with the help of the tug and hoisted to the Lifting Vessel's rail amidships by the Lifting Vessel's derrick/crane, which shall be certified for a minimum SWL of 15 tonnes and clearly marked on the boom. The cargo hose is 1×16 in. hose fitted with a 16 in. butterfly valve and a Camlock spool with ANSI 150 flange. The Lifting Vessel should have adapters and fittings on board so as to enable such cargo hose to be connected to the Lifting Vessel's presentation flange at manifold. The raising and lowering of the cargo hose will be conducted by the Lifting Vessel. All hose connecting and disconnecting will be performed by the Lifting Vessel's crew as directed by the Lifting Vessel's Officer-in-charge, under the supervision of the Mooring Master. The Mooring Master will remain onboard as Loading Master during the entire time the Lifting Vessel is at the loading berth. Particular care should be taken during all phases of operations to avoid damage to the cargo hose and its fittings. A breakaway coupling is inserted between the fourth and the third hose from the Lifting Vessel end for emergency. No Cargo Vapour System Recovery at the Terminal.

Arrival and Notice of Readiness: Upon or after arrival at the FPSO or at the Terminal waiting area, when ready in all respects to conduct mooring and cargo operations, the Lifting Vessel shall tender its Notice of Readiness to the Operator. The Lifting Vessel shall promptly confirm the Notice of Readiness in writing, if first given verbally. Laytime shall commence upon the expiration of 6 hours following the acceptance of such Notice by the Operator, provided that the Lifting Vessel has been nominated to load cargo and the Terminal holds such cargo nomination, and further provided that the Mooring Master has deemed the Lifting Vessel to be in all respects ready to moor and load. The Notice of Readiness will be accepted only between the hours of 0600 and 3 hours before sunset, but will not be accepted at any time when the Liuhua Oil Terminal is closed. If, however, the Lifting Vessel is moved to the loading berth without delay after having arrived at any time and the Lifting Vessel is in all respects ready to moor and load in the opinion of the Mooring Master, the Notice of Readiness will be accepted at the time that the vessel is all secured. Laytime shall continue until the cargo hose has been disconnected from the Lifting Vessel's manifold. Laytime lasting time is 36 hours.

Responsibility: Prior to the commencement of any cargo loading operation, the Mooring Master and the Officer-in-charge of the loading operations for the Lifting Vessel shall engage in a pre-loading conference to formulate a loading plan and to ensure that the Lifting Vessel is in all respects ready to load. No cargo loading shall take place without the concurrence of the Mooring Master, which concurrence shall not be given until the pre-loading conference and the Operational/Safety Check List has been completed. The Lifting Vessel's Master shall remain responsible for the safety of the Lifting Vessel and all operations on board the Lifting Vessel at all times. The Mooring Master will advise the Officer-in-charge of the loading operations for the Lifting Vessel with respect to the loading pressures and hazards, but the Mooring Master will not direct any aspect of the loading, except as may be necessary to protect the loading berth and related facilities and equipment. The manipulation of the Lifting Vessel's valves is the direct responsibility of Lifting Vessel's personnel. The Mooring Master shall have the right to refuse to commence or suspend cargo loading operations or to require the Lifting Vessel to unmoor and depart from the loading berth at any time when the mooring plan, preloading plan or the safety requirements and regulations set forth herein are not being followed by the Lifting Vessel or at any time the Mooring Master believes or becomes aware of the existence of any other reason which in his opinion shall require the suspension of the mooring or the loading of the Lifting Vessel. All time lost in such circumstance shall be for the Lifting Vessel's account.

Valve Control: The incoming oil stream is controlled on the FPSO, and the Lifting Vessel's valves must not be closed at any time against the incoming oil stream. Closing of an inlet valve on the lifting tanker may create an excessive pressure which may damage the hoses or other terminal facilities and the parting of the breakaway coupling. Frequent checks of the cargo loading must be made by Lifting Vessel personnel during the loading operation so that a reduction in the loading rate, before topping of the final tank or tanks, may be arranged through the Mooring Master by the Officer-in-charge of the loading operations for the Lifting Vessel. A normal stand-by warning should be given about 20 minutes before the shut-down of the loading operations. Upon the request from a Lifting Vessel to shut-down the loading operations, a minimum of 3 minutes will be normally required to stop the flow of crude oil. Lifting Vessel's personnel shall be responsible for the call to stop the loading of the Lifting Vessel. When cargo has ceased to flow, the proper valves on the FPSO will be closed and the Lifting Vessel's manifold valves may then be closed. Special attention on valves opening and closure should be paid if hose flushing is scheduled. Lifting Vessel and their Owners shall be held liable for any damages or pollution caused by failure to properly comply with this sub-section or any other provision in these Port Rules and Regulations.

Emergency Signal: The emergency signal employed at Liuhua Oil Terminal shall be the continuous blast on a vessel's whistle. Should normal ship-to-terminal communications fail, the emergency signal must be sounded by the Lifting Vessel. Steam or air should never be shut off from the whistle of the Lifting Vessel during loading. Whenever the emergency whistle signal is used, all loading operations will be shut down until communications can be established with the vessel giving the signal. For this reason, it is requested that Lifting Vessels in the area refrain from using their whistles for other than essential purposes, and that the use of the "continuous blast" whistle signal be reserved for emergency purposes only. All crew members who stand a deck watch during the transfer of crude oil are expected to know the emergency shut-down signal.

Code Flag: During all cargo loading operations, the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours, and an all-round red light shall be displayed during the hours of darkness. The red light should be of a character as to be visible at a distance of at least 2 nautical miles.

Terminal Stops: Request for the FPSO to stop the flow of crude oil at a predetermined tonnage (shore stop) must be made in writing to the Operator, and will be deemed to include the statement and understanding that the Operator will not be responsible for (1) any errors, costs or claims arising from such request, and (2) any crude oil loaded in excess of that requested cannot be pumped back aboard the floating storage vessel. Some delays in stopping the flow of crude oil are always incurred when such a stop request is made.

Line Flushing: At the discretion of the Operator, the loading hose may be kept in water, and line flushing may be required prior to and on completion of the lifting operation. The Lifting Vessel will be advised of this operation prior to its arrival, and the agreed amount of water to be passed through the hose string by the FPSO. Displacement of the loading hose and associated pipework is approximately 1,466 bbls. (for the hose string only it is 338×4=1,352 bbls.).

BALLAST: *Terminal Rules and Precautions:* There are no facilities for the offloading of dirty ballast. Clean oil-free ballast from segregated ballast tanks (SBT) only may be discharged overboard from the Lifting Vessel while in the Liuhua Oil Field area. It is the responsibility of the Lifting Vessel Master to see that no oil (crude, bunker, diesel, bunker C, slop, residues, contaminated ballast water, or oily bilge water) is pumped or spilled overboard from the Lifting Vessel. All deck scuppers must be plugged tight, and adequate drip pans with sand and sawdust must be provided where necessary on deck for use at all times, especially when disconnecting hose, in order to prevent any such loss of oil overboard.

Lifting Vessels must have sufficient ballast or cargo as per Rule 13 of the International Convention for the Prevention of Pollution from Ships 1973, as modified by the Protocol of 1978 related thereto (33.3% minimum of its Summer deadweight, propeller completely submerged and trim not to exceed 3.0 m. for a safe manoeuvring). The Mooring Master may refuse to permit the mooring of any Lifting Vessel not in compliance with these requirements until the vessel takes on sufficient ballast and/or alters her trim to meet these requirements.

As soon as practicable after arrival, Lifting Vessel ballast tanks will be inspected for evidence of oil in ballast, and during the discharge of ballast, a similar inspection will take place. If evidence of oil appears at either of these inspections, the Lifting Vessel must vacate the loading berth. All time lost resulting from such condition shall be solely for the Lifting Vessel's account.

Any Lifting Vessel required to vacate the loading berth, having discharged dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. Lifting Vessels must tender a new Notice of Readiness upon their return and the Lifting Vessel will be entered for loading upon the Operator's acceptance of the new Notice of Readiness.

Lifting Vessels will be rejected if O_2 percentage of inert gas in one or more tanks is found to be more than 8%.

Lifting Vessels must keep a constant watch on the side of the Lifting Vessel from which clean ballast is being discharged for any indication of water discoloration or oil sheen. Discharge of ballast must be immediately suspended, should there be any indication of discoloration or sheen, and the Mooring Master shall be immediately informed of such. An investigation of any such discoloration or sheen shall be carried out by the Lifting Vessel, and the findings reported to the Mooring Master. Discharging shall not resume without permission of the Mooring Master.

If during any inspection or during the process of loading, it is revealed that a Lifting Vessel's tank(s) is (are) not oil-tight, the Lifting Vessel will be rejected by the Mooring Master and refused further loading until satisfactory evidence of effective repairs is submitted, and the Lifting Vessel is duly certified by Lloyd's Register of Shipping, American Bureau of Shipping, or another similarly recognised classification society.

In addition to the lights usually displayed, Lifting Vessels are required to illuminate the Lifting Vessel and the waters around the Lifting Vessel with all available and suitable searchlights and floodlights during the discharge of clean ballast and the loading of crude oil during the hours of darkness and restricted visibility. Such illumination must be to the satisfaction of the Mooring Master, and must be undertaken so as to assist in the loading operations, and in order that any incidental oil spillage on the surface of the sea may be readily detected and appropriate action taken. Lifting Vessels unable to illuminate the sea satisfactorily may not discharge ballast or engage in the loading of crude oil during the hours of darkness, and any such delay shall be for the account of the Lifting Vessel.

Simultaneous Loading and Deballasting: Lifting Vessels equipped with segregated ballast will be required to discharge segregated ballast and load oil simultaneously, subject to the approval of the Mooring Master. CBT tankers are not permitted at Liuhua Terminal unless ballast retained on board.

Pollution Damage and Environmental Liability: The Lifting Vessel, its Master, Owners and Charterers shall be liable for any pollution damage and fines/penalties applicable for any pollution caused by or emanating from the Lifting Vessel in the waters and territory of the People's Republic of China to the full extent provided under Chinese Law. Every Lifting Vessel, to be acceptable for berthing and loading, must possess a current and valid TOVALOP Certificate, evidencing its enrolment in TOVALOP and a current Certificate of Financial Responsibility issued by her flag administration and the Owners, Charterers or Purchasers of the cargo must be a member of Cristal Ltd., with full Cristal coverage to be applicable as evidence of financial responsibility in the event of a pollution incident.

MEDICAL: *Emergency Medical Assistance:* Lifting Vessels requiring emergency medical assistance should contact the Liuhua Oil Terminal by VHF radio and supply the necessary pertinent information which will be passed on to the vessel's Agent. Neither medical nor hospital facilities are available at the Liuhua Oil Terminal.

Also see "Repatriation".

FRESH WATER: Available from supply boats in an emergency.

FUEL: Not available.

REPAIRS: The Masters of Lifting Vessels loading at the loading berth are advised that the loading berth is located in open and unsheltered waters, and under no circumstances may engines be shut down for repairs while the Lifting Vessel is at the loading berth or at Waiting Area. There are no facilities for making repairs to a Lifting Vessel at Liuhua Oil Terminal, and no repairs will be allowed at the Liuhua Oil Terminal.

SURVEYORS: No cargo inspectors or marine surveyors are based in the area, but inspectors and surveyors from the CCIB will be present at all liftings to verify the quality and quantity of the cargo being lifted.

REPATRIATION: In an emergency, the crew can be landed in Hong Kong (for non-Chinese nationality) or Shenzhen (for Chinese nationality) for medical treatment or for emergency repatriation. This arrangement can be made through the vessel's Agent, and Liuhua Terminal will give necessary emergency assistance.

TIME: Local time is GMT plus 8 hours.

GARBAGE/WASTE DISPOSAL: The dumping of garbage, sewage and refuse overboard within the Liuhua Field is prohibited, and there are no facilities for receiving such at the Liuhua Oil Terminal.

SAFETY: The Lifting Vessel's personnel shall adhere to all safety precautions generally followed in the marine industry, as well as all requirements and regulations set forth in the Port Rules and Regulations, the latest edition of "International Safety Guide of Oil Tankers and Terminals" (ISGOTT), and the applicable chapters of the latest edition OCIMF "Ship to Ship Transfer Guide". Any safety precautions, requirements and regulations imposed by the Operator, including those set forth in the Operator's Fire Regulations and Smoking Restriction (not reproduced), and disregarded by the Lifting Vessel's Master, Officers or crew will be considered a just cause for rejection of the Lifting Vessel, and all expenses and delays related thereto shall be for the Lifting Vessel's account. While the Lifting Vessel is moored or within the vicinity of the loading berth, the Lifting Vessel's personnel and the Lifting Vessel's operations must comply or be in accordance with all safety requirements (some of which are reproduced hereunder):

(M) Not less than one licensed Deck Officer and 2 seamen shall be on duty, alert, available and in charge of the operations on deck at all times while the Lifting Vessel is at the loading berth.

(N) Not less than one Engineer shall be on duty, alert, available and in charge of the engine room at all times while the Lifting Vessel is at the loading berth.

(O) A member of the Lifting Vessel's crew, not one involved in any wa with the loading operation, must be stationed on the bow of th Lifting Vessel while the Lifting Vessel is at the loading berth, ar a constant watch must be maintained on the mooring.

(P) A licensed Deck Officer of the Lifting Vessel, not one involved any way with the loading operation, must be on watch and statione on the bridge of the Lifting Vessel while the Lifting Vessel is at th loading berth. He should be in radio contact with the crew membe at the manifold and on the bow.

(T) All loading operations shall be suspended during electric storms the vicinity of the Lifting Vessel.

(U) The Lifting Vessel must be equipped with a fully operational ine gas system. Prior to the commencement of any loading operation all empty Lifting Vessel cargo tanks and tanks carrying cargo mu be under positive pressure and fully inerted with gas having a oxygen content of less than 8%.

(V) No stores may be handled by crane on the weather deck while Lifting Vessel is loading cargo, except at the discretion of th Mooring Master.

(W) *Lifting Vessel Preparedness – Hydrogen Sulphide Gas: Liuh 11-1 Oil Field crude has hydrogen sulphide (H_2S) gas concentrations significant enough to be a toxicity concern f personnel. It is therefore mandatory that Lifting Vessels be prope equipped, and their personnel trained and certified in H_2S safe prior to the vessel's arrival at the Terminal loading facility.*

Although the crude is classified as sweet regarding sulph content, hydrogen sulphide gases remain entrained in the oil a offer concern during loading, hauling, unloading and gaugi operations.

WEATHER: *General:* The Operator can advise of the following gener environmental characteristics for the area bounded by the Liuhua C Field, but the navigator is referred to the published sailing directions f the area for more detailed information on the climate, weather, win tide, current and sea.

Climate: The climatology of the South China Sea is the result of a mixtu of environmental conditions generated by several different physic disturbances. In addition to the intense, but fairly short-lived conditio associated with tropical cyclones, there is the seasonal reversal of win known as the monsoons. These winds blow in response to the differen in temperature between the land mass and the surrounding water. Duri the Winter months, high pressure dominates over the Asian land ma and in the Liuhua area. A N.E.'ly airflow persists from October throu March, with the strongest winds during the November to January tin period. This period of time is known as the Northeast Monsoon.

Monsoons: Monsoon winds blow in response to a pressure gradie caused by the difference in temperature of the Asian land mass and th adjoining Indian Ocean and South China Sea. During Spring, the Asia land mass warms more rapidly than the adjoining oceans, resulting a lower pressure on land than on the oceans. The resulting surfa gradient directs wind flow from water to land. The mean resultant wi flow is from the S.W. The flow during Summer is moist and unstab resulting in periods of showers and thunderstorms. During Autumn, t land mass cools more rapidly than the adjoining oceans causing reverse pressure gradient with a mean resultant wind flow from the N. During Winter, wind is from the dry Asian land mass, picking up son moisture as it moves over the South China Sea. This results in typica stable air masses with light, steady rain and infrequent showers.

Monsoon winds are extremely persistent in direction in all month except the transitional months in Spring and Autumn. Monsoon wi intensity varies from week to week due to atmospheric instabilities. Thu there will be a few days of intense wind and waves, followed by relatively mild period.

Typhoons: Typhoons are tropical cyclones with low central pressure a counter-clockwise winds in the Northern Hemisphere. The frequency typhoons in the Western Pacific is several times more than in the Atlant

Typhoons, like hurricanes, are difficult to predict with certainty. Rece studies on their formation and movement suggest some trends. F example, tropical storms do not develop if the sea surface temperatu is below 26°C. Also upper level winds seem to steer them more th the surface conditions. Once typhoons have recurved under the influen of a approaching cold front in late Autumn, they do not loop and tu back.

The Liuhua Field being 150 nautical miles E.S.E. of Hong Kong along a major "typhoon alley" towards Hong Kong. The season tropical cyclones for Hong Kong is primarily June through Octob although gale force winds (in excess of 34 knots) associated with t passage of tropical cyclones have been recorded as early as 19th M and as late as 12th December.

Currents and Solitons: The South China Sea is influenced by 3 ma types of currents: (1) tidal, (2) oceanic circulation and (3) storm induce Tidal currents being driven by astronomical forces are always prese The oceanic circulation current is attributable to monsoon winds an branch of the Kuroshiwo which enters the South China Sea through t Luzon Straits. Storm currents are driven by local storm winds, eith typhoon or a tropical storm.

Soliton currents are of concern to the lifting operation, as their veloci time profile as well as direction can cause rapid through water chang and apply high loads to a moored vessel. Solitons approach from t N.E. to S.E., with peak velocities ranging from 1 knot – 4.5 knots for to 30 minutes duration. All lifting operations will be undertaken with tug moored to the stern of the Lifting Vessel to provide stern thrust.

GENERAL: *In-Field Helicopter Operations:* No helicopter operations the FPSO are authorised during mooring operation of a Lifting Vess due to the potential danger of the hawser if breaks under exceptio strength during mooring. Helicopter operations to the FPSO during lifti operations are authorised, subject to FPSO's OIM authorisation.

In-Field Vessel Operations: Owners and Masters of Lifting Vessels a reminded that they will be operating in the restricted area of a developi oil field, and as such, there is likely to be extensive boat activity in t field. The Mooring Master will advise the Lifting Vessel of any operatio on-going in the field to which the approach or departure of the Lifting Vessel may be affected.

Flag: Lifting Vessels are required to fly the flag of the People's Republic of China on the foremast during daylight hours whilst loading at the Terminal.

Government Officials: Governmental officials, such as representatives of the CCIB, are present on board the Lifting Vessel during the lifting operation. It is expected that the Lifting Vessel will provide food and accommodation for these officials.

Ship's Agent: The Operator does not perform any vessel agency functions. Lifting Vessels calling at the Liuhua Oil Terminal must arrange for their own Agent, as indicated below.

China Marine Shipping Agency, Shenzhen Branch,
2 Bihua Road, Shekou, Shenzhen,
People's Republic of China.
Post Code: 518067 Shenzhen, China.
Tel: (86) 755 6691216 or 6685805.
Fax: (86) 755 6692455.
Telex: 420815 AGTSZ CN.

Contraband: The Operator prohibits unauthorised craft from coming alongside Lifting Vessels while at the loading berth without the permission of the Mooring Master. To avoid the possibility of undesirable items getting aboard Lifting Vessels, it is recommended that the Mooring Master prohibits any such craft from coming alongside while Lifting Vessels are at or in the vicinity of the loading berth.

Supplies: There are no provisions for loading supplies, bunkers or lubricants at the Liuhua Oil Terminal. Any questions concerning the loading of bunkers, lubricants or any other requirements should be handled through the vessel's Agent.

SHIPMASTER'S REPORT: September 1996.

The vessel was fixed to load a cargo from this Terminal, the Charterer were Chevron with Caltex in the equation, possibly as sub-charterers. The vessel arrived on 10th, and the laydays did not commence until the 13th.

The Terminal is a weather vaning FPSO converted oil tanker called "Nanhai Shengli" of approximately 130,000 d.w.t., fixed in position Lat. 20° 50.4' N., Long. 115° 41.5' E., in approximately 300 m. of water. The vessel approached from the East, and the Terminal was radar conspicuous from about 20 miles with a semi-submersible rig and 2 supply/stand-by vessels in attendance.

There is no suitable anchorage in the vicinity, and the vessel drifted about 20 miles to the S.W. of the Terminal and experienced a set of about 2.5 knots in a N.W.'ly direction. Two days previously, there was a typhoon with 85 knots – 100 knots winds passing over the area, causing the abandonment of the FPSO, which probably accounts for the direction of the set.

Communications: Initially communications with the Terminal by telex was poor, but this was later found to be because the Terminal was abandoned, due to the typhoon.

The Terminal has both Sat B and Sat C installations and monitors the Pacific satellite.

Operators: The Terminal is operated by the Amoco Orient Petroleum Co. (Chiwan Office).

Agents: The Agents for this port are China Marine Shipping Agency, Shenzhen Branch. Their details are as follows:

Tel: 86 755 6685133, 6685387.
Fax: 86 755 6692455.
Telex: 420815 AGTSZ CN.

On approach to the Terminal, the FPSO was called up on Channel 16, and one of the supply boats answered, again possibly due to the fact that they were just re-staffing the vessel after the abandonment. Both the Terminal and the supply boats use Channels 6 and 74 as working channels. The personnel answering the VHF were British, and so there was no communication problem, and they were very helpful.

Pilotage: The Berthing Master and all shore personnel, a total of 6, joined by helicopter, being winched down onto the starboard side. All personnnel remained on the ship throughout loading and left again by helicopter. The Berthing Master is British and the others were Chinese nationals.

Customs: There is no Customs or Immigration, all paper work was prepared in advance, but nobody wanted to see it.

Berthing: There are 2 supply boats/tugs available at this berth.

"Huafa", 12,000 h.p. with 150 tonne bollard pull, and "Hua Jen", 8,000 h.p. with 100 tonne bollard pull.

The Pilot and shore gang board the vessel at a distance of 5 miles from the Terminal. On approach to the Terminal, one of the supply boats comes alongside and passes up 2 baskets of manifold equipment. The Terminal should always lie head to wind, and so an approach is made head to wind direct towards the stern of the FPSO.

When at a distance of about 0.5 miles from the Terminal, one of the supply boats is made fast aft using tug's line, and this remains fast for the duration of the ship's stay.

The ship is made fast to the stern of the FPSO using a 14 in. hawser with a standard chafing chain attached through the starboard AKD stopper. The second supply boat handles the messenger for the hawser, and when fast, brings the hose around to the manifold. For the duration of the vessel's stay, the engines are on immediate notice and were kicked on air about every hour.

The Terminal is very exposed, and throughout mooring and the vessel's stay, the vessel was rolling and pitching easily.

The FPSO is fitted with tension monitors, and the criteria for slipping the moorings in case of bad weather is 4 pulls of 200 tonnes or more in any one hour.

Hoses: There is 1×20 in. hose with a standard 16 in. flange made fast to the ship's port manifold.

Cargo: WARNING: The cargo is the worst aspect of this port. The nomination was 450,000 barrels (+/−5%). The cargo has an API of 22.0 and the loading temperature was about 44°C. The vessel was warned by the Loading Master that the cargo contained very high levels of H_2S, and that the shore hose handlers brought their own BA sets with them. The Loading Master said that on occasions the H_2S levels had reached dangerously high levels, and on one occasion had reached 1,500 ppm. in the cargo tank. To this end, all personnel working on deck whilst cargo operations underway were issued with respirators, and during any time that the cargo system was breached for sampling, ullaging and temperature, then the ship's BA sets were used (please see details of Cargo Spec.). To reduce the exposure to H_2S, the ship's A/C fans were put on full recirculation, and all personnel warned that only those personnel required to go outside the accommodation should do so. During the berthing operation, H_2S could be smelt on the bridge wing and forecastle.

The H_2S details are:

Dissolved Hydrogen Sulphide, ppm. 20.
Evolved Hydrogen Sulphide, ppm. 50.

Another part, which was little unknown, was the Mercaptan Sulphur, ppm. 281.

During the vessel's stay, no H_2S readings were recorded on deck, but readings of about 4 ppm. – 5 ppm. were found at the manifold during disconnection. Throughout the vessel's stay, the wind was Force 5, which obviously helped to disperse any H_2S build-up.

The loading rate is a maximum of 30,000 bbls./hr.

The FPSO has flow meters, and due to the rolling and pitching, it was decided to have a shore stop.

Documents: On completion of loading, the hose is disconnected, and by this time the documents are ready. There are 15 copies of everything, and the Master must sign all copies. There are 10 documents to a set and the ship is given 2 sets, no original Bill of Lading is given to the ship, only a copy.

Departure: Prior to letting go, all the shore manifold equipment is passed down to one of the supply boats. Letting go is very straight forward, and the tug aft, in conjunction with the main engine, tows the ship away from the FPSO. Once about 0.5 miles clear, the tug is let go. The ship then drifted for about one hour to wait for the scheduled helicopter to go to the FPSO and then come to the vessel to take off all the shore personnel. During the helicopter operations, the wind was about Force 5, and with our winching area on the starboard side, the helicopter requested the ship to turn to put the wind about 4 points aft of the starboard beam.

Liuhua Crude as loaded from Sheng Li FPSO: (Details of first cargo analysis). For guidance only:

Test	Results
Viscosity at 68°F, SUS	1,445
Viscosity at 100°F, SUS	454
Sulphur, % weight	0.24%
Dissolved Hydrogen Sulphide, ppm.	20
Evolved Hydrogen Sulphide, ppm.	50
Gravity API at 60°F	22.4
Pour Point F	+40
Total Acid Number, mgKOH/g.	1.50
Salt in Crude lb/1,000 bbls.	8.66
Mercaptan Sulphur, ppm.	281
Asphaltenes, % weight	2.4%
Water by Distillation, % Vol.	0.15%
Water and Sediment by Centrifuge, % Vol.	0.10%
Flash Point C	42°C
C2 % weight	0.05
C3 % weight	0.07
iC4 % weight	0.09
nC4 % weight	0.16
iC5 % weight	0.36
nC5 % weight	0.38
Cyclo C5 % weight	<0.01

Mercaptans are inflammable, water soluble gases and liquids having a very dissagreeable odour compared to rotten cabbage. They have been reported to exhibit extreme toxicity similar to, but less than H_2S. Effects and actions same as H_2S.

Tlv H_2S is 10 ppm.
SO_2 is 2 ppm.

Recommendations on Handling Liuhua Crude Oil Containing H_2S: No heating is required. The temperature of the oil will decrease by 2° – 4° in central cargo tanks and may be up to 8° in wing tanks during the voyage of 4 days – 5 days. This should not create any problems during discharge, due to the pour point which is about 4.4°C (+40°F).

Attention has to be paid to maintaining the pressure of the Inert Gas System. The pressure should not be allowed to go negative because the H_2S ppm. quantity in the vapour space of the tanks will increase due to low vapour tension. A pressure of 600/700 mm. WG is good to avoid an increase of H_2S. P/V valves should not leak.

The day before arrival at the discharge port, the pressure of inert gas should be brought to zero venting through the mast riser. The pressure should be risen again to 1,000 mm. W.G. Maintain for 15 minutes in this condition to allow the turbulence created by the new incoming inert gas to mix with H_2S already in the vapour space, and then bring the pressure again to zero through the venting riser. This operation should be repeated 8/10 times to reduce the H_2S ppm. quantity in the vapour space of the tanks. The full operation requires about 3 hours. Attention has to be paid to people on deck because H_2S clouds from the venting riser can drop on deck in dangerous levels of ppm.

Ullages, temperatures, dipping and samples have to be taken in closed system without breaching tanks.

Signed: Marine Superintendent.

Colombia

TURBO: (Also see Page 527)

PILOT'S REPORT: July 1996.

Documents:

Clearance from last Port.
5 copies Passenger List.
5 copies Personal Effects List.
5 copies Bills of Lading.
7 copies Manifest of Ship in Ballast.
4 copies List of last Ports of Call.
7 copies Crew List.
5 copies Stores List.
5 copies Manifest of Cargo for the Port.
5 copies Manifest of Cargo in Transit.
2 copies Yellow Fever Vaccination List.
2 copies Maritime Health Declaration.
5 copies Negatives: Mail, Passengers, Fire Arms, Animals, Dangerous Cargo, Stowaways and Plants.

If it is not the first voyage of the vessel to Turbo, it is a good idea to present to the Port Authorities a copy of the last Inward Clearance received here. This will result in a smoother Free Pratique.

Inward Clearance: Vessel must first proceed to Punta de las Vacas for official visit of Port Authorities to obtain Clearance.

Port Authorities: Harbour Master (Capitan de Puerto), Customs (DIAN), Immigration Police (DAS), Agriculture (ICA) and Health Department (Sanidad).

Pilotage: Compulsory. Pilot will board at pilot station at Punta de las Vacas once the vessel is cleared by Port Authorities. The pilot station works on a 24 hours basis, and keeps watch on VHF Channels 16 and 11. When sailing, Pilot should be informed at least 2 hours before departure time. Pilot will disembark at Punta de las Vacas after the ship anchors again. Engines must be completely stopped while Colombian Coast Guard Divers inspect the hull for hidden drugs in the sea chests (water intakes). This operation will last no more than 2 hours.

Entrance: As the coast line extends further West because of sedimentation of the muddy river waters, a 2 mile distance is recommended in the vicinity of Point Turbo and Southward. Ships approching Punta de las Vacas must be careful with small fishing boats and small ships crossing the gulf. Vessels can arrive at the pilot station at any time.

Anchorages: Arriving vessels must anchor at the pilot station at "Punta de las Vacas", in an area within the following co-ordinates:

(a) Lat. 8° 04' 24" N., Long. 76° 46' 45" W.
(b) Lat. 8° 03' 14" N., Long. 76° 46' 45" W.
(c) Lat. 8° 04' 24" N., Long. 76° 45' 48" W.
(d) Lat. 8° 05' 14" N., Long. 76° 46' 00" W.

No other Anchorage Area is allowed within territorial waters.

ETA: Vessels are required to report 72 hours, 48 hours, 24 hours and 12 hours before arrival.

VHF:

	Channel	Call Sign
Port Authority	16	Capitania
Navy	16	Apostadero
Coast Guard	13	Guarda Costas
Pilot Station	11, 16	Estacion de Pilotos

Maritime agents and shippers can be contacted by Channel 16, telex and fax.

Tugs: There are small tugs owned and operated by the shippers themselves. Sea tugs are available from Barranquilla and Cartagena (15 hours away).

Mooring: There are no docks or wharves in Turbo. Cargo operations are carried out from barges at two different Anchorage Areas assigned according to the season of the year (dry or rainy). The once employed "Baltic Moor" is no longer used. Caution is advised while navigating within the Anchorage Areas as tugs cross towing barges. During the dry season (December to May) and because of strong Northern winds (Force 5/6), ships anchor (4 shackles in the water) in an area close to Boca del Leoncito marked by the following co-ordinates:

(a) Lat. 8° 00' 18" N., Long. 76° 51' 33" W.
(b) Lat. 7° 59' 50" N., Long. 76° 51' 18" W.
(c) Lat. 8° 00' 18" N., Long. 76° 50' 45" W.
(d) Lat. 8° 00' 06" N., Long. 76° 50' 48" W.

When rainy season arrives (May to December), the anchorage place is changed to an area closer to the banana barges loading zone and off the mouth of Leon River:

(a) Lat. 7° 56' 48" N., Long. 76° 47' 48" W.
(b) Lat. 7° 56' 48" N., Long. 76° 46' 37" W.
(c) Lat. 7° 57' 28" N., Long. 76° 46' 20" W.
(d) Lat. 7° 56' 00" N., Long. 76° 47' 54" W.

There is little current in these Anchorage Areas.

Drafts: Vessels operating in the above named areas can have a maximum draft of 13.0 m., but a vessel with a draft of 18.0 m. can sail with caution in the Gulf of Uraba.

Cargo Operations: They are carried out at the Anchorage Areas with ship's gear from and to barges. There is a floating crane called "Draga Leona" that can handle a maximum of 12 tons. The banana cases come mostly in pallets of 48 cases (1.1 tonnes), and are embarked up to three at a time. In the cargo holds of the ships, these pallets are stowed by small battery operated forklifts. Loading of bananas is made by shippers (Banacol, Banadex, Proban, Sunisa and Uniban) and is quick and efficient.

Medical: There is a hospital for general medicine. Special cases can be sent to nearby Medellin by plane. Dental services are available.

Fresh Water: There is no way to supply fresh water to ships.

Fuel: There are no facilities to supply bunkers.

Certificates: The following valid Certificates are required:

Register.
Cargo Gear Inspection.
Load Line.
Pollution Policy.
Sanitary Declaration of Health.
Cargo Ship Safety Equipment.
Cargo Ship Safety Radio and Radiotelephony.
Cargo Ship Safety Construction.
Derat.

Provisions: There are shipchandlers that can supply all kinds of fre and canned food. Orders should be made upon arrival for chandlers have time enough to obtain them.

Sludge Reception: There are no facilities. Heavy fines are imposed the recently created Ministry of Environment on ships pumping balla or oily waters.

General: Close to the Anchorage Areas, there used to be a Colombi Coast Guard ship that can be contacted through VHF Channels and 13. Drug smuggling and stowaways are a problem at the po P&I representatives should be contacted through the Agent, m Classification Societies representatives too.

It is possible to obtain through the Agent at the Port Captain's Offi the last edition of Colombian Nautical Chart No. 295 (B.A. No. 22 "Bahia Colombia", updated to January 1995.

Private security firms can be contracted in order to prevent stowawa thieves and unauthorised people coming on board. Vessels loading the United States are preferred by stowaways and drug traffickers.

Egypt

SIDI KERIR: (Also see Page 657)

SHIPMASTER'S REPORT: October 1996.

Berth: SBM No. 6.

Max. Size: 400,000 tonnes S.d.w.t.

Location: Lat. 31° 07.436' N., Long. 29° 38.289' E.

Depth: 32.0 m. (approx.).

Moorings: One line with chafing chain.

Hoses: 2×16 in. for cargo and 1×16 in. for ballast.

Connection is made on the port side by ship's crew. The ballast li is the forwardmost hose.

Loading Rate: 14,000 tonnes/hr. (Pilot's advice).

During our call, the maximum loading rate was 8,500 tonnes/hr.

Shore Line: Capacity 13,500 cu.m.

Ballast: Maximum pressure at manifold is restricted to 7 Bar, and w this pressure, the deballasting rate was 3,900 tonnes/hr.

Products:

Belayim Mix – API: 28.13. Temperature: 36°.
Ras Budran – API: 25.9. Temperature: 40°.

SUEZ CANAL: (Also see Page 658)

RULES OF NAVIGATION:

NOTICE: Suez Canal Authority Circular No. 1/96 (dated June 1996)

The Suez Canal Authority has decided that the limit time for arriva join the convoys will be on the basis of passing the following latitud

1. Port Said: South of Lat. 31° 28.7' N.
2. Port Tewfik: Tanker Group – North of Lat. 29° 42.8' N.
   Ordinary Group – North of Lat. 29° 48.33' N.

This Circular comes into effect as of 1st July 1996.

El Salvador

ACAJUTLA: (Also see Page 686)

(B) CBM **(See Late Plan**

LOCATION: The Coastal Technology Salvador S.A. Acajutla Termi Facility is located approximately 1.9 km. W.N.W. of Acajutla port.

The co-ordinates of the 5-point CBM facility are Lat. 13° 35' Long. 89° 52' W. The water depth at the mooring is 17.5 m., with sub-sea pipeline end manifold (PLEM) top elevation of 16.2 m. T PLEM is marked with a white buoy attached to the S.W. corner of PLEM. Additionally it is marked by a spar buoy indicating the curr condition directly over the PLEM. This location may be found on D Navigational Chart No. 21524.

The Mooring Master boards the vessel at anchorage located 2 mi South of the location.

Each of the 5 mooring buoys is lit with a flashing red light. The lig are approximately 4 m. above water level.

Dual sub-sea pipelines of 18 in. and 12 in. diameter for heavy fuel oil and diesel/aviation fuels respectively run from the PLEM to shore in a S.E.'ly direction to onshore storage tank facilities. Each line is clearly identified with markings on the hose buoys and flanges of the respective hose strings (The onshore facilities are not visible from the offshore location).

PILOTAGE: *Mooring Master's Duties and Responsibilities at a Submarine Terminal:*

1. Boards arriving vessel 1 to 2 miles off the mooring.
2. Evaluates vessel's equipment (anchors, mooring lines, cargo booms, deck winches, fairleads, bitts, etc.).
3. Ensures that all necessary preparations for mooring have been made (both anchors clear and ready to drop, mooring lines properly placed, starboard cargo boom topped-up, steam on deck mooring winches, wrenches, snatch blocks, handy billys, stoppers, etc., laid out and ready).
4. Describes (and sometimes sketches) the planned course of action to moor the ship, to the Master and Deck Officers who will be involved.
5. Manoeuvres the vessel into the mooring area.
6. Directs the dropping of anchors and running of lines to the mooring buoys.
7. Controls the actions of the mooring launch during mooring operations.
8. Directs the adjustment of the anchor chains and mooring lines, so that the vessel is properly positioned in the berth.
9. Directs the taking in of mooring lines and heaving up of anchors.
10. Controls the actions of the mooring launches while unmooring.
11. Pilots the vessel safely clear of the moorings.
12. Prepares and submits a log of his activities while on the vessel.
13. Portable radio working properly.
14. Enforces Government and Company operating and safety regulations.
    - (a) Vessel properly positioned and securely moored.
    - (b) Scupper plugs in place and drip pans in place under cargo hose connections.
    - (c) Portable radio working properly.

ANCHORAGE: An anchorage area is immediately to the South of the mooring.

MAX. SIZE: The mooring has been configurated and designed for vessels of up to 60,000 d.w.t.

Characteristics of the maximum vessel are as follows:

Usual particulars of vessels are:

Maximum Draft: 12.8 m.
Maximum Length: 231 m.
Vessel Tonnage: 60,000 d.w.t. *
Water Depth at Mean Low Water: 17.37 m.

* Equivalent to 73,000 loaded displacement tons.

RADIO/VHF: Communications to the Acajutla Terminal may be accomplished through normal telephone service or through the main office in San Salvador during normal working hours (0700 hrs. – 1800 hrs.). Marine communications will be directed through the Port of Acajutla on Channel 16. Communications during off-loading of cargo will be co-ordinated through hand-held UHF radios, which will be brought on board by the Mooring Master.

The Terminal facility operates 6 days per week, 16 hours/day (0400 hrs. – 2000 hrs.).

Contact List:

Acajutla Terminal:	011-503-887-3681. 011-503-887-7083. 011-503-452-3680.
San Salvador Office:	011-503-223-9293.
Shipping Agent:	(Telex).

The following information is required to be transmitted to the Terminal 5 days prior to arrival:

- (A) ETA at Acajutla Terminal.
- (B) Total cargo, barrels and tons at 60°F.
- (C) API gravity of cargo at 60°F.
- (D) Estimated cargo temperature on arrival.
- (E) Other pertinent vessel information requested by Coastal Technology.

The vessel's Master will confirm ETA by radio, telex or telephone, 48 hours and 24 hours prior to arrival.

Additional communication procedure for approaching vessels is as follows:

48 hours Notification of ETA, etc.:	Telex to Agent: El Salvador
24 Hours Confirmation:	Telex as above.
1.5 Hours before Arrival:	Call CEPA on Channel 16.
After Boarding by Mooring Master:	Coastal's Motorola hand-sets (UHF).

TUGS: A Port of Acajutla tug will be available at the Terminal during mooring and unmooring to assist, as needed.

BERTHING: *Tanker Details for Hose Configuration Analysis – Design Basis:*

Tanker size:	60,000 d.w.t.
Maximum freeboard:	10.0 m.
Height of ship's manifold above freeboard:	1.0 m.
Manifold distance inboard from tanker's side:	3.0 m.
Tanker loading/unloading position:	Amidships.
Tanker excursion during loading/unloading forward/aft:	± 10.0 m.
Tanker excursion during loading/unloading port/starboard:	± 2.0 m.
PLEM offset from tanker's side:	13.0 m.
PLEM offset from amidships:	20 m. – 40 m.
Water depth:	17.0 m.
Maximum tide:	1.0 m.
Maximum wave height during loading/unloading:	2.4 m.
Maximum current during loading/unloading:	0.6 m./sec.

Berthing Procedures: Exhibit "C" (See "Late Plans") illustrates the basic berthing procedures for the mooring. The detailed procedures can be modified to suit the conditions of wind, current, sea state, vessel size/loading, and the limitations of vessel's mooring gear.

In general, the following procedure is advised for berthing:

- (i) Vessel approaches the mooring, heading S.E.'ly and passing approximately 0.15 – 0.17 nautical miles West of the "E" mooring buoy.
- (ii) Starboard anchor is let go at Point A, as shown on Plan C, and 8 to 9 shackles of chain are paid out on the run, chain is then held.
- (iii) When starboard chain fetches up leading aft, port anchor is dropped as shown on Plan, and stern is worked into berth as starboard chain is held and the port chain is paid out to approximately 8 shackles, and the lines are run to the mooring buoys. Then both chains are adjusted as necessary to position the vessel properly in the berth.
- (iv) Wind and current will largely govern which mooring lines are run first.
- (v) A spar buoy is located over the PLEM to assist in current determination.

Mooring and Unmooring:

- (A) A Company Mooring Master will board vessel West of the Terminal or in the anchorage if anchored. The Mooring Master will advise the vessel's Master on approaching and departing the berth, mooring and unmooring. With the concurrence of the vessel's Master, this advice may take the form of directions to members of the vessel's crew. All manoeuvring within the mooring area shall be done only in accordance with the advice of the Mooring Master. In all cases, the vessel's Master shall remain solely responsible, on behalf of his vessel's Owner, for the safely and proper manoeuvring of the vessel. The vessel's Master and a qualified Deck Officer must be on the bridge at all times while the vessel is manoeuvring.
- (B) A mooring launch under contract to Company will deliver the Mooring Master and necessary equipment and the telephone instrument. In addition, the mooring launch tows the vessel's mooring lines to the mooring buoys and makes them fast as directed. Similarly, the mooring launch crew casts mooring lines off the buoys as directed on unmooring. A mooring launch remains alongside the vessel the entire time the vessel is in the moorings.

  It is expected that the vessel will provide berthing and messing facilities for the 5 man launch crew as well as the Mooring Master.

Mooring Gear: Owners and Charterers of vessels must consider the particular requirements for an open-sea, fixed spread mooring. These equipment requirements are significantly different from the requirements for vessels docking and handling cargo alongside a pier.

Mooring gear shall include both bow anchors and all ground tackle in good working condition and in size and quantity to meet either "Lloyd's" or "A.B.S." standards, even if they are in fact classified by other societies. The anchor windlass must be capable of operating at its rated speed, and adequate power shall be available to run the windlass at its rated speed at all times while in the moorings. Each anchor shall be equipped with no less than 10 shackles of chain.

Vessels should be equipped with sufficient synthetic lines or combination of wires and lines to run to each of the 5 buoys, plus additional lines to provide doubling up as required.

Wire on mooring winches should be at least 700 ft. in length, and should be of sufficient diameter to secure the vessel. Constant tension winches must be braked by means of a manual brake.

Synthetic fibre lines of dacron or polypropylene must be at least 8 in. in circumference and 720 ft. in length.

Note: Nylon lines are not acceptable.

Suitable stoppers must be provided to hang-off fibre lines.

The mooring stations should be equipped with properly located and functioning warping winches, fairleads, bitts and chocks.

Extra lines are required at each location in order to double up on lines to the buoys when wind or current conditions dictate.

The Mooring Master shall determine the suitability of the vessel's mooring equipment. Should the Mooring Master consider that the mooring gear is not adequate, the vessel shall not be brought into the moorings until the deficiencies have bee corrected.

Departure from Berth: The procedure for leaving the berth is conventional for such moorings and includes the following steps:

- (i) The valve is closed, the hose is disconnected, blinded and returned to the sea with boat assisting.
- (ii) Lines to buoys are slacked by the vessel's crew then released at the buoy by the mooring launch crew.
- (iii) Port anchor is heaved in first, while "D" line is held until the vessel's stern is clear of the buoys.
- (iv) Starboard anchor is heaved in last.
- (v) Mooring Master leaves the vessel after it is underway and clear of the mooring.

LOADING/DISCHARGING: *Cargo Master's Duties and Responsibilities at a Submarine Terminal:*

1. Supervises the lifting of the cargo hose, and ensures that it is properly secured at the deck edge.
2. Provides the vessel with radios, telephone, submarine hose valve handle, drain valve, gaskets and connecting deck hose (when necessary).
3. Supervises the connection of the deck hose to the ship's manifold and the submarine hose.
4. Acts as liaison between ship and shore in coordinating preparations for cargo handling operations by radio or deck telephone.
5. Ensures that all sea suction and overboard discharge valves are closed and lashed.
6. Checks to be sure that scupper plugs are in place.
7. Counsels vessel personnel on details of cargo handling during the loading or discharging operations.
8. Directs the adjustment of anchor chains and/or mooring lines during the cargo handling operation to keep the vessel properly positioned in the berth during changes in draft or weather conditions.

9. Keeps himself currently informed of any impending weather changes by means of broadcast reports and by observing local conditions.
10. Orders additional lines to be put out, when changing weather conditions indicate such action to be necessary.
11. Makes the decision as to whether or not cargo handling operations can safely continue when weather conditions worsen.
12. Directs the disconnecting and lowering of the submarine hose when cargo activities have been completed, or when weather conditions indicate that the berth should be vacated.
13. Prepares and submits a log of his activities while on the vessel.
14. Enforces government and company operating and safety regulations.
    - (a) Vessel properly positioned and securely moored.
    - (b) Scupper plugs in place and drip pans in place under cargo hose connections.
    - (c) Portable radio working properly.
    - (d) Spool above hose valve drained before blank flange removed.
    - (e) Hose connections properly made up. No leaks in the system.
    - (f) Pressure gauge installed on cargo manifold (when possible).
    - (g) Portable radio working properly.
    - (h) Adequate number of qualified personnel available at all times.
    - (i) Frequent surveillance of the water around the vessel for evidence of oil.
    - (j) Submarine hose illuminated at night to detect possible leaks.
    - (k) Close communication between ship and shore facility to control cargo handling.
    - (l) Anchor ball and "Bravo" flag displayed by day, and anchor lights displayed at night.
    - (m) Cargo handling area properly illuminated at night.
    - (n) Weather doors and ports on main decks kept closed and checked frequently.
    - (o) "No smoking on weather decks" regulation enforced.

Note: The Cargo Master is authorised to suspend cargo transfer operations in the event that acceptable safety procedures are not observed or if any other danger appears to exist. All vessels are expected to follow all safety regulations generally accepted and practiced in the marine transport industry. The bridge and/or control area shall not be locked or otherwise secured in any manner that would prevent immediate entry at any time by the Mooring Master.

Hose Handling: The vessel will be expected to have suitable equipment on deck and ready for making the connection to the submarine hose.

A lifting capacity of at least 5 long tons SWL is required.

Care must be exercised that no raising or lowering of the hoses is done unless and until the system is under a positive static head of approximately 50 p.s.i.g. at the inshore end of the lines. Failure to observe this precaution can result in kinking and severe hose damage.

The Terminal provides special gear, such as the chain fall, rope slings to support the hose, adapters and other fittings. The fittings are brought out to the vessel on the mooring launch which delivers the Mooring Master. IT IS THE RESPONSIBILITY OF THE SHIP'S CREW TO CONNECT THE SUBMARINE HOSE TO THE SHIP. The Vessel is expected to provide the bolts, nuts, gaskets and wrenches necessary to make the hose connection.

Preparation for Connecting Hoses: The readiness of the vessel to connect up and to commence cargo transfer operations in a timely and safe manner shall be confirmed by the inspection made by the Mooring Master and by completion of the Marine Terminal Declaration of Inspection (not reproduced) by the vessel's Master. The Mooring Master will present the Declaration of Inspection to the vessel's Master upon boarding.

CBM systems differ from other terminal mooring systems as they provide a complete fluid transfer link from PLEM to tankers without the need for floating hoses.

When no tanker is present, the hose string lies on the seabed and the end of the string is indicated by a marker buoy. A pick-up wire runs from the buoy to the end hose (referred to as the tanker rail hose), and it is this wire that is used to raise the hose string to the tanker's manifold.

Lifting and Connecting Hoses: After the Mooring Master has securely moored the vessel in the berth, the Cargo Master will supervise the lifting and connecting of the cargo hose following the general procedure set forth below:

A work boat is used to bring the buoy indicating the end of the string to a point below the tanker manifold. A lifting wire from the tanker derrick is attached to the end of the pick-up wire and hose gently lifted up the tanker's side.

The hose chain comes complete with a number of enlarged links along its length to allow the hose string to be lifted in several stages.

The tanker rail hose is lifted by the tanker's derrick to a height such that the end of the hose can be reached from the deck. The snubbing chain, which is attached to the end of the hose by the lifting lug opposite to the pick-up wire, is disconnected.

The hose is lifted higher until the snubbing chain can be attached to the bollard in front to the manifold. The rail hose can now be lowered towards the manifold with the snubbing chain supporting the weight of the remaining hoses.

Whilst on the seabed, the end of the hose string is protected by a blind flange. This spool piece is located between the end of butterfly valve/hose and the blind flange. This serves to protect hose end and butterfly.

The butterfly valve between the spool piece and the hose is then opened and locked in this position until loading is complete.

The tanker's derrick is used to support the rail hose to ensure that it remains clear of the tanker rail during loading.

Start/Stop Notice to Shore Personnel: At least 10 minutes' notice shall be given to shore personnel before starting or stopping cargo operations. The vessel shall notify shore personnel of any anticipated changes affecting pumping rates, such as stripping operations, switching pumps or crossing manifolds.

Procedure for Discharging: The cargo is discharged to the facility usi
the ship's pumps to transfer the product ashore uphill to the tank far
Shipboard cargo transfer action is taken by ship's person in charge
the advice of the Cargo Master. The sequence of operations for ea
transfer is controlled by facility personnel ashore.

It is important that the vessel maintains the product at the specifi
temperature and pressure at the ship's rail.

It is essential that the discharging sequence be carefully planned
that stripping and/or collecting of tank bottoms is going on during t
discharge, thus avoiding prolonged stripping ashore toward the end
the cargo discharge. The Cargo Master will review the plans to assu
that maximum practicable discharge rates will be attained consistent w
ship's safety.

SAFETY: *Personnel Safety Equipment:* Personnel safety equipment
be adequate, readily available, and clearly identified. The ship sh
ensure that lifebuoys are kept available in the vicinity of the pilot ladd
and the ladder will be kept at a proper height for safe boarding a
disembarkation. The vessel's fresh air masks and resuscitators shall
laid out in the readily accessible location ready for immediate use.
Firefighting Equipment: Firefighting equipment shall be in readine
throughout the vessel. Fire hoses with nozzles will be laid out
immediate use on the cargo deck.
Minimum Personnel Aboard: The vessel shall provide sufficie
personnel to moor, connect hoses, and conduct cargo operations safe
It shall retain sufficient personnel aboard (where shore leave is permitte
to disconnect hoses and unmoor vessel, in the case of bad weather
other emergency.

Not less than one Deck Officer and three other crew members sh
be on deck, alert and available at all times. No person under the influen
of alcohol, marijuana, or any drug, is to be allowed on deck.
Illumination of Vessel: The vessel shall be illuminated. The vessel sh
have sufficient illumination of all spaces and working areas associat
with transfer and mooring operations. This shall include all ladders a
passageways between key operating stations, such as the pump roo
and the well deck and ship's manifold. The Mooring Master sh
determine the adequacy of such lighting.

In addition, vessels transferring cargo during darkness will illumina
the sea area around the vessel to the satisfaction of the Mooring Mast
Illumination is required in order that any oil on the surface of the s
may be detected readily so that appropriate action may be taken in
timely manner. The vessel will also display anchor lights for a vessel
her class while at anchor awaiting berth or while in the mooring.
Dangerous Gas Hazards: The transfer of any product which may conta
dangerous concentrations of toxic gas, such as light Arabian cru
containing hydrogen sulphide, must be undertaken only with appropria
personnel safety precautions. The same precautions must be tak
when loading tanks which have previously held product containing su
dangerous gas.
Smoking: The Mooring Master shall approve all designated smoki
areas. No smoking will be permitted on deck while in the moorin
Smoking may be prohibited entirely at time by the Mooring Mast
Cigarette butts must not be thrown overboard or through portholes
any time.
Radios and Electrical Equipment on Deck: No radio (including porta
transistor radios) or electrical tool or appliance shall be used on de
unless certified for use in hazardous petroleum areas, and then o
with approval of the Mooring Master.
Tank Hatches and Ullage Plugs: Tank hatches and ullage plugs sh
be kept closed at all times, except when gauging, thieving or sampli
Doors, Portholes and Ventilators: Doors and portholes facing the m
decks shall be closed and remain closed. Ventilators shall be kept
proper trim to minimise fire and explosion hazard.

GENERAL:

REQUIREMENTS FOR
COASTAL ACAJUTLA CONVENTIONAL BUOY MOORINGS:

1. Certification Requirements: Vessels calling at this Terminal m
undergo a certification process to assure the vessel is suitably equipp
to call at this terminal. Certification for vessels will be valid for 3 ye
from date of issuance or from the last acceptable call. This genera
requires a detailed vessel inspection and review of inspection resu
Certification is generally limited to vessels 65,000 tonnes d.w.t. and le
The weight limit is 73,000 tonnes loaded displacement.

2. General Vessel Requirements:

- (A) All vessels are to have the capability of maintaining at least 3
of the vessel's deadweight, with the propeller fully immersed, a
a maximum trim of 5.0 m. by the stern, and a maximum freebo
of 11.0 m. at the manifold at all times while in the berth.
- (B) Only uncontaminated SBT ballast may be discharged at sea.
- (C) No cast iron is permitted in vessel's manifold valves and fittin
outboard from the last fixed rigid support to the deck.
- (D) Rail to manifold distance should be within a range of 2.0 m.
5.0 m.
- (E) Height of roll bar should not exceed bottom of manifold lines.
- (F) Bitts for hanging-off the hose chain, per OCI
recommendations, should be provided in the vicinity of
manifold.
- (G) Connection to the Terminal submarine hose should be ma
inside the manifold permanently installed drip containment tr
adding no more than one reducer, or "spool piece", to the vesse
design flange.
- (H) All ground tackle is to be in good working condition. Vessels m
have at least 10 shackles of chain on each anchor.
- (I) Each mooring winch is to be capable of having the first laye
wire or rope on the drum at a no-load speed of at least 40 met
per minute and a loaded speed of at least 12 metres per minu
Winch speeds shall be maintained during simultaneous operat
of one winch on the main deck aft, two winches on the stern a
one anchor windlass.

(J) All vessels are required to provide feeding and accommodation for one Mooring Master, one Cargo Officer and up to three mooring launch personnel for the duration of the visit.

(K) Vessels may be required to unberth and/or otherwise incur delay during adverse weather conditions. If not specified by Charter Party, time lost thereby shall not count as used laytime, and all costs, expenses, etc., of unberthing and reberthing shall be to the vessel's account.

(L) Vessels can be equipped with an operational searchlight on each bridge wing to assist in illuminating buoys during mooring and unmooring at night, and to shine onto the cargo hose area overboard for early detection of leaks.

(M) Hose boom capacity shall be a minimum of 7 tons. Cargo runners and topping lift must be wire rope. Cargo runner must be rove on winch drum. The vessel's cargo boom must be capable of lifting the end of the submarine hose to a height above the deck at least equal to the combination of the distance of the vessel's side to the manifold, the height of the manifold above deck plus 3 ft.

3. *Vessel Mooring Line Requirements:*

(A) Vessels shall be capable of presenting 4 primary lines on fixed winch drums and 1 primary 720 ft. loose line on poop deck centreline: 5 double-up 720 ft. mooring lines.

Lines locations are to be as follows:

	Port	Centre	Starboard
Main Deck Aft	2 (1 on Drum)		2 (1 on Drum)
Poop Deck	2 (1 on Drum)	2	2 (1 on Drum)

Mooring lines on drums on the main deck aft should be on separate dedicated winches with independent controls. If this is not possible, then a single winch with two drums, or use of another winch from a different location, may be acceptable. This determination will be made on a case-by-case basis following an assessment of the vessel, including configuration of the deck equipment and the ability to handle both port and starboard simultaneously. Mooring lines on drums on the poop deck are to be on separate dedicated winches with independent controls, if possible.

(B) Lines are to meet breaking strength requirements as follows:

Vessel Size	*Breaking Strength*			
d.w.t.	Wire	Primary Rope	Double-up Rope	Pendants
Less than 30,000	110,000 lbs or 49 tons	130,000 lbs or 58 tons	165,000 lbs or 75 tons	125% of Wire
30,000 – 65,000	130,000 lbs or 59 tons	165,000 lbs or 75 tons	165,000 lbs or 75 tons	125% of Wire

(C) All lines on the 4 winch drums are to be the same material. All other lines are to be of the same synthetic material. The line on a 5th winch drum on the poop, if fitted, is to be of the same wire or synthetic material as the rest of the lines.

(D) Lines may include rope pendants up to as long as the pendant and connecting shackle meet the breaking strength requirements for rope per above.

(E) No synthetic ropes with elongation over 15% at full breaking strength will be accepted. Pendants under 15 m. are not subject to this requirement.

(F) Aramid fibre ropes (Kevlar, Spectra) may meet wire breaking strength requirements if manufacturer-provided chafing sleeves are fitted. Right-hand laid nylon rope are not allowed.

(G) Mooring stations for each of the 10 lines are to be equipped with dedicated full strength, properly located, functioning fairleads and closed chocks. Each mooring station for ropes not on winches is, in addition, to be equipped with dedicated, full strength, properly located, functioning double horn bitts and warping winches. Warping heads on winches with wire drums are acceptable if properly located. Closed chocks are to be suitably sized for easily passing pendant connecting shackles if used.

(H) Constant tension winches must be braked by means of manual brake.

4. *Radio Advices:* Master must radio 7 days prior to arrival:

(1) 7 day ETA; thereafter 3, 2 and 1 days ETA's.

(2) Total cargo (bbls./tons) at 60°F.

(3) API.

(4) Estimated cargo temperature on arrival.

(5) The vessel must be capable of maintaining 125 p.s.i.g. at ship's manifold.

ACAJUTLA TERMINAL QUESTIONNAIRE

Coastal – Acajutla Conventional Buoy Moorings:
Position: Lat. 13° 35' N., Long. 89° 51' W.

Requirements:

Vessels calling this Terminal must undergo an approval process by Coastal Vetting Department.

Vessel inspection may be required.

Vessel must be a full "SBT" tanker.

Vessel size is limited to 73,000 tonnes loaded displacement.

Maximum draft 12.8 m.; max. freeboard 10.0 m.; max. LOA 231 m.

Maximum height of manifold above deck 1.0 m.

Maximum distance manifold inboard from side 3.0 m.

Minimum of 30% of d.w.t. to be maintained at all times.

Maximum trim of 4.3 m. by stern.

Owners and Charterers must consider the particular requirements for an open-sea, fixed spread multi-buoy mooring arrangement, and should be guided by OCIMF publication "Effective Mooring", pages 37, 38 and 39.

Owners to confirm:

(1) Both bow anchors shall be used during mooring. Both bow anchors to be in good working condition, and in size and quantity to meet either "Lloyds's" or "A.B.S." standards.

(2) Each anchor must have minimum 10 shackles of chain. Adequate power shall be available to operate the windlass at rated speed (minimum of 9.0 m./minute) at all times.

(3) Vessel to be equipped with sufficient synthetic lines (minimum of 10), or a combination of wires and lines to run to each of the 5 buoys.

(4) Mooring wires on winches should be at least 700 ft., with 10.0 m. synthetic tail. Constant tension winches must be manually braked.

(5) Synthetic fibre lines must be at least 720 ft. in length. The mooring station for each buoy shall be equipped with properly located and functioning chocks, fairleads and double-bitts to moor per Plan. A suitable mooring winch must be available for breast lines and another for stern lines.

(6) Minimum 7 tons SWL for boom/crane on port side.

(7) Ship's crew is responsible for connecting/disconnecting submarine hose to vessel. Tanker crane/derrick will be used to lift the submarine hose. A snubbing chain is secured to ship's bitts, cruciform of large padeye (Per OCIMF recommendations) on deck in front of port side manifold. The tanker boom/crane/derrick is used to support the rail hose (submarine).

(8) A 12 in. rail submarine cargo hose is connected to the ship's port side manifold. Vessel is to have necessary reducer, tools, etc. It is the responsibility of the ship's crew to connect the submarine hose to the ship. A Terminal Supervisor will be provided.

(9) Preference: Vessel should avoid to try final draining (stripping) of tanks at this Terminal, ship internal stripping of cargo tanks required to prevent air or gas from entering submarine hose.

(10) Shore hose is to be left pressurised with product or flush liquid as directed by Cargo Master.

AUTHORITY: *Operator:* Coastal Technology Salvador, Acajutla, El Salvador. *Tel:* (503) 887-3681, 887-7083, 452-3680.

Greece

SAINT NICOLAS: 38.22 N. 22.41 E. (See Late Plans)

DOCUMENTS:
8 copies Crew List.
4 copies Passenger List.
Cargo Manifest.
Bills of Lading.
3 copies Ship's Stores and Spares List.
3 copies Private Effects Declaration List.
1 copy Health Declaration.
Ship's Certificates.

PILOTAGE: Pilotage is compulsory. Vessel should advise ETA at least 24 hours before arrival through the Agent. Pilots are called with the assistance of the Port Authority (St. Nicolas Port Authority or St. Nicolas Pilot Station) on VHF Channel 12, 2 hours before arrival.

Pilot boards 0.5 miles West of the pier, unless Pilot orders another position due to weather conditions.

Pilot boat painted black with white deckhouse with the word "Pilot" painted in white letters on both sides.

ANCHORAGES: Recommended anchorages in positions Lat. 38° 22' 20" N., Long. 22° 40' 18" E. and Lat. 38° 22' 45" N., Long. 22° 39' 25" E.

RESTRICTIONS: Vessel may approach the berth from 0600 hrs. until sunset.

MAX. SIZE: Max. LOA 160 m., max. beam 22.0 m., max. draft 11.0 m. Max. airdraft for loading alumina 11.5 m.

HEALTH: Pratique is granted on arrival by Port Authorities.

RADIO: Contact possible through Hellas Coastal Radio.

VHF: Contact with Port Authority and Pilot made on Channels 12 and 16.

BERTHING: One pier with length 400 m. Max. draft 11.0 m. The South part of pier can accommodate tankers for discharging fuel or caustic soda. There is also a pneumatic conveying installation for loading alumina in bulk.

From the middle of the pier up to the North, there are 3 cranes installed (2 with capacity of 8 tonnes and the Northernmost with 12 tonnes capacity) to facilitate loading of aluminium and also discharging cargo of coke or tar pitch.

STEVEDORES: Shore gear is used. No requirement for gangs.

MEDICAL: 24 hours notice preferred if any medical requirements.

TANKERS: See "Berthing".

DENSITY: 1026 – 1030.

FRESH WATER: Available on pier.

FUEL: Available by trucks from Piraeus, ordered through Agent. Delivery to pier allowed from morning up to 1500 hrs.

FIRE PRECAUTIONS: No fire works or maintenance using fire on deck and/or in accommodation.

CONSULS: No local representation.

REPAIRS: No facilities for repairs. Painting of the freeboard area is prohibited to prevent sea pollution.

GANGWAY/DECK WATCHMEN: Master to appoint crew member.

OPENING/CLOSING HATCHES: Hatches are opened and closed by ship's crew.

CARGO GEAR: Shore facilities.

REPATRIATION: Can be arranged.

AIRPORT: Nearest airport at Athens, approximately 180 km.
TIME: GMT plus 2 hours. Late March to late September, GMT plus 3 hours.
HOLIDAYS: Work during holidays depends on Charter Party.
POLICE/AMBULANCE/FIRE: Available on pier.
TELEPHONES: Cardphone on pier and near main gate. Free transportation from pier to main gate.
IDENTIFICATION CARDS: Needed for crew going ashore.
REGULATIONS: There are general and specific regulations for the port of St. Nicolas.
DELAYS: Delays in loading or discharging not expected.
AUTHORITY: Port Authority of St. Nicolas.
Operator: Aluminium de Grece, Usine de St. Nicolas, Paralia Distomou, 32003 Beotie, Greece. *Tel:* (0261) 22661, (0267) 42502. *Telex:* 299660 ADGU GR. *FAX:* (0261) 22665. *Contact:* T. Petrou, Manager – Transport Department.

Guyana

NEW AMSTERDAM (Everton): (Also see Page 874) (See Late Plans)

SHIPMASTER'S REPORT: August 1996.
Cargo: Loading bauxite in bulk.
Documents: Vessel in ballast.
9 copies Crew List.
3 copies "Nil" Passenger List.
5 copies Stores List.
5 copies Crew Effects List.
1 copy Maritime Declaration of Health.
All Vaccination Certificates.
5 copies Drugs List (if any).
5 copies Bonded Stores List.

Port Authorities come on board after dropping anchor in Inner Roadstead or alongside the berth. Joint inspection team consists of 5-6 officials and Agent.

Pilotage: Through local Agent by telephone, as it is very difficult to connect with Guyana. When 30 miles from Georgetown, Quarantine Anchorage vessel may contact pilot station, call sign "Lighthouse" or "Georgetown Pilot Station". They maintain watch on Channel 16. One hour before Pilot comes on board, pilot station asks ship to heave up anchor and proceed to Buoy No. 1. After Pilot comes on board, vessel changes course to New Amsterdam. 30 minutes before entrance of New Amsterdam Canal, ship must inform Pilot and reduce speed for manoeuvring.

Vessel should order Pilot through ship's Agent in New Amsterdam, no branch pilot station.

Pilot launch of Georgetown Pilot Station has black hull and white superstructure with word "Pilot", and is named "M N Thompson".

Approaches: Canal width about 80 m. when proceeding to Inner Roadstead New Amsterdam. First and second pairs of buoys have steel bodies and are painted red; lights from sea, red to starboard and green to port. The other 8 pairs of buoys are wooden piles with numbers on body. Number of pairs is same (See "Plan"). After turning into river and after leading marks, the only 2 pairs of buoys are "12" and "13". After last pair of piles "13", the deepest place on Inner Roadstead at New Amsterdam is reached, where vessels may unload with max. draft 10.5 m. At this place, vessel drops starboard anchor (other chain secured on buoy). Send 2 additional ropes, from stern to buoy.

The river dredger "Presidente Cardenas" works all the time in the vicinity of the bar. Minimum depths on river and on bar (if average high tide) is 7.0 m., and from 1.5 miles from berth Everton to ferry line, depth is 7.0 m.

Radio/VHF: Watch not required but Master can arrange working hours with Agent on any channel.

During working hours, vessel may communicate with bauxite factory on VHF Channel 73, call sign "Everton Dock".

If Bidco Shipping are vessel's Agent, they may be contacted on VHF Channel 72 (Call sign "Bidco Shipping").

Tugs: No available.

Berthing: First ropes sent are shore springs from bow and stern. This vessel (9,000 – 10,000 tons displacement) used 2 lines, 2 springs and 1 breast line each end.

The berth is 20 m. long with wooden piles either side, and is suitable for vessels up to LOA 150 m. At low water, the depth is 10.0 m.

Loading: Factory has no scales.
Stevedores: Working is continuous if cargo is available.
Medical: Hospital in New Amsterdam, but medicines in short supply.
Density: 996 – 1010. Cargo Officer must check before calculating quantity of cargo on board.
Surveyor: "Bidco Shipping" is an independent surveyor.
Opening/Closing Hatches: By crew.
Time: GMT minus 4 hours.
Shore Leave: No restrictions.
Identification Cards: Not required.
Currency: Guyana Dollar. U.S.$ 1.00 = G$ 138.0 (August 1996).
Services: Boat available for painting draft marks fore and aft. Cost U.S.$ 20.00 – 30.00.
Piracy: According to local authorities, men in very small boats try to board vessels at night at Georgetown Outer Roadstead and New Amsterdam to steal ship's stores and items from cabins.

The Master can order policemen from Agent for the duration of stay.

India

PIPAVAV: 20.57 N. 71.31 E. (See Late Plans)

REPORT: September 1996.

1. Pipavav Port has a draft of 13.0 m., and vessels of 50,000 d.w.t. can enter the channel, that is to say Panama sized vessels with a length of 190 m., and beam of 35.0 m. – 40.0 m., can be berthed at the jetty.
2. The minimum depth will be 13.0 m. Also alongside the berth, the depth is 13.0 m.
3. Gujarat Pipavav Port Limited (GPPL) will be laying 5 general pipelines initially. These will be of 8 in., 10 in. and 12 in. diameter for the transportation of LPG/SKO and other like products. Additionally, there will be dedicated pipelines depending on the end user's product.
4. As regards to shore tanks, GPPL has adequate land available, which is exclusively for setting up tank farms. GPPL will also be setting up 2 tank farms of its own for black and white oil. Some LPG and SKO parties may set up tank farms at the site, depending on the LPG import/handling and transport into hinterland.
5. The dedicated LPG/POL/Chemical Jetty will be operational by December 1996. The distance of the pipeline from this Jetty to the tank farm area is 1.5 km. This set of pipelines will be constructed by GPPL.
6. GPPL is a joint sector undertaking between the Government of Gujarat and Sea King Engineers Ltd. GPPL is setting up an all weather sea port and a modern ship breaking yard at Pipavav.

Port Facilities: GPPL are constructing 3 terminals, one bulk, one breakbulk container handling and one dedicated LPG/POL jetty. The dry cargo jetty is 400 m. and 325 m. length, and the liquid jetty length is 250 m.

Cargo Handling Facilities:

1. Dry Cargo Terminal:
   (a) Ship to Stackyard.
   (b) Shed/Storing Space:
      (i) 5,000 sq.m. or more of covered storage for breakbulk cargo.
      (ii) 30,000 sq.m. paved open stackyard.
      (iii) 125,000 sq.m. open stackyard.
2. Liquid Cargo Terminal: Liquid discharging equipment (installed at jetty) at the rate of 800 t.p.h. to be provided, which will be connected to the private tank farms through common pipelines.

Development Schedule: The construction of all 3 terminals is being carried out by AFCONS and NEC. The bulk cargo Terminal will be operational by May/June 1996, and the second Jetty by August/September 1996, and the LPG Terminal is envisaged to be operational by December 1996.

Port Operator's advice received December 1996:

The first berth out of the four was inaugurated on 2nd November 1996, and the first ship called on 2nd November. We are booked for the next 4 months. The first berth is for handling bulk as well as break-bulk cargo. The remaining 3 Terminals, including one LPG Terminal, will be ready by March 1997. The other 2 berths for handling break-bulk and container cargo will be ready May/June 1997 respectively.

OPERATOR: Gujarat Pipavav Port Limited, 401 C, Poonam Chambers, 'A' Wing, Dr. Annie Besant Road, Worli, Mumbai 400018, India. *Tel:* 496-1654/55/57/58. *FAX:* 496-1659. *Contact:* B.S. Bhalerao, Corporate Advisor.

Italy

GIOIA TAURO: 38.27 N. 15.53 E. (See Late Plans)

LOCATION: Gioia Tauro is situated 15 nautical miles N.E. of Messina Strait Northern entrance on the West coast of Italy.
DOCUMENTS: Ship's documents: All documents required from SOLAS, MARPOL, Oil and other international conventions.
Anchorage Duties/Over-Duties.
Port State Control Certificate (Memorandum of Paris).
6 copies Crew List.
6 copies Passenger List.
Customs documents:
Manifest of Arrival/Departure.
Health documents:
Derat Certificate.
Seaman's Vaccination Certificates.
PILOTAGE: Vessels must contact Gioia Tauro's pilot station on VHF Channels 16/12.

Gioia Tauro Pilot Station: Tel: (090) 312544 (Main office is situated in Messina). Fax: (090) 310756.

The vessel must advise ETA at least 2 hours before arriving at the port.

The colour of the pilot boat is black with a white stripe of 20 cm. on both sides of the boat. The letter "P" or the word "Pilota" is painted on the hull.

Pilot approaches the vessel at 1 mile from the breakwater. In bad weather conditions, there are no particular areas for the meeting point, but the Pilot arranges the meeting point in accordance with the ship's Master's requirements. There is no special location for awaiting Pilots.
ANCHORAGE: Depth in the port is from 12.5 m. – 14.0 m.
RESTRICTIONS: Vessels are prohibited to drop anchor or wait within 1 mile from the port's breakwater.
HEALTH: The ship's Master must send a telex or fax to the "Sanita Marittima di Reggio Calabria" (Tel: (0965) 48379. Fax: (0965) 47056) asking for Pratique, a maximum of 12 hours and a minimum of 4 hours prior to arrival. If this procedure is not possible, the Master must request the medical visit on board through Agents.

RADIO: Messina Radio Station: VHF Channel 16 or HF 2,182 kHz.
VHF: Port Authority on Channel 16. Pilot on Channels 16/12. Tugs on Channel 12.
RADAR: No radar.
TUGS: 2×4,000 h.p. tugs ("San Ferdinando" and "Gioia Tauro") available 24 hours. Tugs are operated by Contug S.r.l.
BERTHING: All docks in the port are available for berthing (See "Plan").
(A) "Levante 1 Tratto" Dock (from BF1 to BF2): The dock is 1,250 m. long with depth from 13.0 m. – 14.0 m.
(B) "Levante 2 Tratto" Dock (from BF2 to BF3): The dock is 1,761 m. long with depth from 11.0 m. – 13.0 m.
(C) "Ro-Ro" Ramp No. 3 (from BF3 – BF4): The dock is 144 m. long with depth of 13.0 m.
(D) "Nord" Dock (from BF4 – B): The dock is 265 m. long with depth of 13.0 m.
(E) "Ponente" Dock (from C to BC1): The dock is 240 m. long with depth from 10.0 m. – 11.0 m.
(F) "Ponente" Dock (from BC1 to Ro-Ro Terminal Ramp): The dock is 270 m. long with depth of 10.0 m.
(G) "Ponente Ro-Ro Ramp No. 1 and Ro-Ro Ramp No. 2": The dock is 200 m. and 220 m. long respectively with depth of 9.0 m.
(H) "Ponente Fishing" Dock: The dock is 200 m. long with depth of 6.0 m.
Remarks: The Docks A, B and C are specially for container vessels.
CARGO HANDLING FACILITIES:
8 post-Panamax quay cranes.
28 straddle carriers.
10 tractors for multi-trailers.
3 travelling quay cranes.
The numbers of cranes are expected to be increased next year.
SPECIALISED CARGO HANDLING FACILITIES: *Container Terminals:*
Capacity: 1,000,000 TEUs.
Yard Capacity: 38,000 TEUs.
Total Surface: 1,000,000 sq.m.
Quay Length: 3,144 m.
6 Rail Tracks: 520 m. (each) = 3,120 m. (total).
No docks are available for LPG, chemical and petrol carriers.
Also see "Berthing".
BRIDGES: No bridges.
STEVEDORES: Stevedores work 24 hours in shifts. All communications must be sent to the Agent.
MEDICAL: Civil Hospital of Gioia Tauro. Tel: (0966) 52228. Medical specialists are available.
TANKERS: No facilities.
FRESH WATER: Available from the firm "Mariba", situated near the port (Tel: (0966) 501028).
FUEL: The Master must request permission to take fuel from the Port Authority, through Agents.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: Small repairs can be done, but must be authorised by the Port Authority. Large repairs are not possible, as there are no shipyards in the port.
DRY DOCKS: None (but 21 miles from Gioia Tauro, there are 5 dry docks, the largest is 256 m. in length).
SURVEYORS: The Italian Surveyor "R.I.Na" is located in Messina.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Normally by stevedores.
CUSTOMS ALLOWANCES:
(A) Tobacco Products: 200 cigarettes, or 100 cigarettes (cigars of maximum weight 3 grams per piece), or 50 cigars, or 250 grams tobacco.
(B) Alcohol or Spirits: Total 1 litre distil drinks and alcohol drinks with a degree over 22% Vol. denatured ehtylic alcohol of 80% Vol. and more,
or total 2 litres distil drinks and alcohol drinks, aperitives based on wine and alcohol, tafia, sake or similar drinks of a alcohol degree equal or inferior of 22% Vol., sparkling wines, strong sweet wines, and total 2 litres tranquil wines.
(C) 50 grams perfumes, and 1/4 litre eau de toilette.
(D) 500 grams coffee, or 200 grams extract of coffee.
(E) 100 grams tea, or 40 grams extract of tea.
CARGO GEAR: All cargo operations undertaken by shore gear.
REPATRIATION: Possible.
AIRPORT: Nearest airports to Gioia Tauro are Lamezia Terme Airport, approximately 65 km. North of Gioia Tauro, and Reggio Calabria Airport, approximately 60 km. South of Gioia Tauro.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st January; 6th January; 25th April; 1st May; 15th August; 1st November; 8th December; 25th/26th December.
Local holiday: 13th August (St. Ippolito Martire).
POLICE/AMBULANCE/FIRE:
Police Tel: (0966) 500666 or 113.
Ambulance Tel: (0966) 52203.
Fire Brigade Tel: 115.
EMERGENCY CO-ORDINATION CENTRE: Nearest Emergency Co-ordination Centre is Italian Coast Guard, 5th M.R.S.C. Reggio Calabria. Tel: (0965) 47907, 42795, 42530. Fax: (0965) 650090, 42542. Telex: 890071. National Emergency No.: 167.090.090.
TELEPHONES: Public telephones situated just outside the port.
SERVICES: All services are available through Agent.
BANKS:
Banca Commerciale Italiana, Via Roma 31, Gioia Tauro. Tel: (0966) 52293. Fax: (0966) 500430.
Banco di Napoli, Via Roma 41, Gioia Tauro. Tel: (0966) 500431.
Cassa di Risparmio di Calabria e Lucania S.P.A., Via Roma 52, Gioia Tauro. Tel: (0966) 52072, 51127.
Banca Popolare di Polistena, Via Trento, Angolo Viale Rimembranze, Gioia Tauro. Tel: (0966) 500589.
STORING: See "Prelims".
1. No, vessels can be stored only by trucks.
2. —
3. Yes.
4. Yes.
5. No particular regulations in force regarding storing other than the usual for all international ports.
6. Yes.
SHIP SUPPLY SERVICE: Available through Agent.
SHORE LEAVE: Crew members are allowed ashore with visa on Seaman's Passport obtained from Frontier Police.
IDENTIFICATION CARDS: Seaman's Books are not sufficient for shore leave. It is necessary to have shore passes available from the Frontier Police.
GARBAGE DISPOSAL: No garbage disposal available alongside. The garbage service is carried out from the following firms (through Agent):
Ecoservice S.A.S., Via Marinella No. 6 II Traversa, Crotone.
Multiser Vice Lavoro 2000, Via F. Sco Tripoldi 50, Gioia Tauro.
Ra-Di S.R.L., Via Roma 78, Palmi. Tel: (0966) 24924.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Italian Lira. U.S.$1.00 = Italian Lire 1,500 approximately (November 1996).
GENERAL: The main characteristics of the port: The port of Gioia Tauro has a channel-like configuration dredged parallel to the coast, and has a water surface of 171 hectares. It consists of a large Turning Basin (750 m. diameter), located to the South, which connects to the 3 km. long channel-like berthing area (minimum width of 200 m.), ending in a 500 m. wide Turning Basin to the North.

The port and its hinterland have an overall surface area of 644 hectares, which may be sub-divided into 3 parts: 171 hectares of water surface, 255 hectares of land, 218 hectares for industrial establishments contiguous to the port area; another area of 110 hectares of land at elevation +35 m. has been set aside for industrial establishments.
Sightseeing (Places of interest): Tropea, Scilla, Palmi, Reggio Calabria, Punta Stilo, Copanello, Soverato, Capo Vaticano, Isole Eolie, Gerace.
DEVELOPMENTS: Another berth may be constructed in the next 2-3 years.
AUTHORITY: Italian Coast Guard, Ufficio Circondariale, Marittimo di Gioia Tauro, Contrada Lamia, 89013 Gioia Tauro (RC), Italy. *Tel:* (0966) 52130, 501344. *FAX:* (0966) 52130. *Cables:* Circomare Gioia Tauro. *Contact:* Antonio Ranieri, Harbour Master.

Ivory Coast

LION TERMINAL: 05.02 N. 04.48 W. (See Late Plans)

SHIPMASTER'S REPORT: October 1996.

Vessel: LOA 220 m., beam 35.2 m., Summer d.w.t. 67,958 tonnes. Vessel arrived to load 336,000 bbls. of the Lion Crude Oil.
Location: The Lion Terminal is designed for loading crude oil cargoes on tankers. The Terminal is located in open waters of the West Coast of Africa off the coast of the Ivory Coast.
Terminal Area: The Terminal area is within a 1 mile radius of the FPSO (Floating Production oil Storage Offloading) "Red Teal", or the CALM Buoy.

Restricted area is the area within a 2 mile radius from the Lion "A" Production Platform.
Operation: The Terminal is operated by UMIC (United Meridian International Corporation) Cote d'Ivoire under licenses granted by the Government of the Ivory Coast. The Terminal is governed by the laws of the Ivory Coast.
Geographical Location of Facility: Lion Field, located in Block CI-11, Ivory Coast, lies 50 nautical miles W.S.W. of Abidjan, and 7.3 nautical miles offshore.

The main installations are located at Lat. 5° 02' N., Long. 4° 48' W..

Water depth varies from 64 m. in the North up to 71 m. in Southern area.
Terminal: The Lion Terminal consists of:
(A) One CALM type mooring and loading buoy with associated flowline and riser from Lion "A" Production Platform (which is situated approximately 900 m. S.W. of the CALM Buoy).
(B) One FPSO (Floating Production oil Storage Offloading) tanker "Red Teal" moored to the CALM Buoy.
Anchorage: The designated anchorage position is 1.5 miles N.W. of Lion "A" Production Platform.

Anchorage in any other location within Terminal boundaries is prohibited, unless special clearance is received from the Terminal Manager.
Pre-Arrival Information: A message will be sent to first time Lion Terminal bound tankers, approximately 48 hours prior to tanker's arrival, outlining arrival procedures and loading/planning recommendations.
Communications with "Red Teal":
VHF Calling Channel: 16. VHF Working Channel: 74
Satellite Tel: +871-663601310
Satellite Fax: +871-663601312
SSB: 8,039.5 MHz
Loading: Tandem lightering operations will be through 1×16 in. hose. Port derrick should be ready. Connection flanges of Camlock type coupling ASA ISO. Maximum rate will be 4,800 cu.m./hr.
Arrival: On arrival, make contact with the Master of "Red Teal" for anchoring advice. Mooring Master boards vessel to discuss operation upon arrival.
Tugs: Tug assists aft during loading. Tug's line used.

Japan

GENERAL: (Also see Page 1164)

HEALTH:

INFORMATION REQUIRED FOR RADIO PRATIQUE

The Master of a ship should send the following to the Chief of Quarantine Station by telegram via Agent:

1. Table of example to be used in the telegram.

Item	*Example*	*Remarks*
(1) To request Radio Pratique.	RPM	"RPM" means Radio Pratique message.
(2) Name and nationality of the ship.		Not requested in the telegram.
(3) Name of the first port with date of departure.	New York 1st Apr.	Year to be omitted.
(4) Ports of call with dates of departure within 15 days before arrival.	Honolulu 9th Apr.	Year to be omitted. Ports to be listed in order.
(5) Port and estimated time of arrival.	Hiroshima 25th Apr. 10.00	Use Japanese local time.
(6) Authority and date of issue of Derat Certificate or Derat Exemption Certificate.	Hiroshima 1st Jan. 88 Exemption or Hiroshima 1st Mar. 88 Derat	State as follows: 1) Name of issuing authority. 2) Date of issue. 3) Whether Derat or Derat Exemption.
(7) Number of crew and passengers.	Crew 25 PAX 3	"PAX" means passengers.
(8) Whether any person and (or) goods transferred from other ship during the voyage within 15 days before arrival or not.	YES or NONE	If so, give the following information: 1) Name of the ship concerned, last port and date of departure thereof. 2) Date and number of transferring person on and (or) goods.
(9) Whether any sick person be on board within 15 days before arrival or not.	YES or NONE	State "NONE" in case no sick person with the following symptoms has been on board, and if there is any sick person, give his name and symptoms in plain sentence. 1) Fever accompanied by prostration or persisting for several days, or attended with glandular swelling. 2) Any acute skin rash or eruption with or without fever. 3) Severe diarrhoea with symptons collapse. 4) Jaundice accompanied by fever.
(10) Whether any person has died on board other than a result of accident within 15 days before arrival or not.	YES or NONE	If there is any person dead, give following information in plain sentence. 1) Name and age of person dead. 2) Date of death. 3) The cause of death. (Name of sickness or his symptoms.)
(11) Whether plague has occured or been suspected among the rats or mice on board, or has been an abnormal mortality among them within 15 days before arrival.	YES or NONE	State "YES" in case any inactive rat or any dead rat has been found on board, inspite of not putting out rat poisons within 15 days before arrival. State "NONE" in case none of them has been found on board.
(12) Whether any cargo infected with quarantineable diseases or suspected thereof on board or not.	YES or NONE	State "YES" in case any cargo on board has been packed or loaded in the present infected area. State "NONE" in case none above nmentioned cargo on board.
(13) Whether a ship doctor is on board or not.	AL or NONE	"AL" means a doctor on board.
(14) Name of Captain.	J. Smith	

NOTE: In case "NONE" is applicable for items (8) to (12) or (8) to (13), you may state as follows:
(8) to (12) NONE AL or (8) to (13) NONE.

Typical messages covering the various items mentioned above are given below:
RPM New York 1st Mar. Honolulu 9th Mar. Hiroshima 25th Mar.10.00 Osaka 1st Jan. 1996 Exemption Crew 25 PAX 3 (8) to (12) NONE 13 AL J.Smith.

2. The ship which comes under the following items shall not be given the Quarantine Radio Pratique:

(1) The ship which has arrived from an infected area or a suspected infected area within 6 days (Plague and Yellow Fever), 5 days (Cholera).

(2) The ship which has transferred any person or cargo from other ships or aeroplanes which departed from the area shown in (1) within period in (1).

(3) The ship on which there is or has been within 15 days before arrival any case of disease which you suspect to be of an infectious nature and any person has died on board within 15 days before arrival.

Korea, Republic of

PYEONG TAEK: (Also see Page 1315) (See Late Plans)

SHIPMASTER'S REPORT: October 1996.
Charts: B.A. 1258, 1270 and 1271.
Sailing Directions: NP 32. 15.93 – No information.
Light List: Volume F.
Radio Signals: Volume 6(2) – No information.
Approaches: We arrived from Keelung. No particular problems as weather was fine with good visibility. Sailing directions mention numerous fishing boats, but these were not encountered. However, the notorious behaviour of local traffic, noted many times in MARS reports, was very evident at the TSZ off Huk To, and it seems to pay to assume that all other ships will not behave according to any rules. Ship had been advised that berthing would take place at slack water in daylight, and so we were ordered to anchor off Changan So Lighthouse to await the Pilot.

We anchored with Changan So Lighthouse 043°T × 2.1 miles. Nature of seabed as revealed on echo sounder gave some concern, as it appeared to be extremely rough, and we wondered if we could risk anchoring and perhaps getting the anchor fouled in some crevice. However, the bottom became smooth about 2 miles South of the chosen anchorage position.

Tides did not appear too strong and ship lay quietly.

Pyeong Taek Port Control contacted on VHF Channel 20, and they gave accurate pilot boarding information. Pilots were contacted on Channels 16 and 10.

Pilotage: Pilot boarded at 0900 hrs. Pilot boat is reasonably powerful, but very narrow. It has a white hull and superstructure. Pilot was efficient and safe.

Maximum draft at present is 13.0 m. – 14.0 m., but is under constant review.

The passage from anchorage to LPG berth is about 29 miles, and time from anchor aweigh to picking up tugs was just over 3 hours.

Once anchor was aweigh, course took ship West of Changan So and 1 mile North of P'ung Do, directly through the fish havens marked on the chart, which do not exist according to the Pilot, and then on to the buoyed approach channel. To the South, the port of Taesan was very busy, and there was a great deal of development in progress.

The West side of P'ung Do is being heavily quarried, and there is a continuous procession of barges to and from there. There are also various building works going on. A huge steel tower is going up on reclaimed land near Songmun Gak. Opposite Pyeong Taek, at Ch'ungch'ongnam Do, a new steelworks is half completed. This has a long loading/unloading wharf, which will be able to take heavy traffic when completed. Upstream from Pyeong Taek, extensive reclamation and building work is underway. A new bridge is under construction, and the intention is to build a large enclosed dock with locks similar to that at Incheon.

Reports such as this are thus liable to be rendered out-of-date very rapidly.

Berthing: Berth crew were not quite ready for us on arrival, and we anchored for 15 minutes.

Tide was almost LW slack.

Two tugs were used, the usual powerful and manoeuvrable Japanese type tug. They were well handled.

Ship berthed at the Eastern berth (of 3), which is an LPG berth.

Berthing was no problem with very little current, and ship was made fast port side to with 3 head/stern lines, 2 breasts and 2 springs. The berth is designed for large LPG vessels, and it was found that with this ship (LOA 179.8 m.), the aft fender was just at the run-in to the stern, which meant that the aft springs had to be run from the aftermost quarter lead.

Shore gangway used.

Berth is well fendered and reasonably tidy.

Western berth is being grit/blasted, while a new berth is being "shoe-horned" into the gap between the West and the middle berth.

Discharge: 8 in. Chicksan connection for Methanol. 3,000 tonnes discharged in 10 hours.

Departure: At present, ships handled only in daylight. At 0700 hrs., as we were singling-up, a thick fog bank rolled out from the land and visibilitiy reduced to about 30 m.

After waiting for 15 minutes, it was decided to leave. The poor visibility extended only 1 mile off the berth, and all was clear by the time we were off the steelworks.

Officials: Agent, Port Health and one Customs Officer boarded and cleared the ship in 30 minutes.

Agent remained on board throughout discharge.

Libya

GENERAL: (Also see Page 1362)

AGENCY: *Add:* Libya Shipping Agency, Awqaf Building, 5th Floor, P.O. Box 2563, Ahmed Rafiq Street, Benghazi, Libya. Tel: 00218-61-70923, 70842. Fax: 00218-61-70842. Telex: 50628 LY, 40103 LY.

Libya Shipping Agency act at the following ports and oil terminals: Benghazi, Ras el Mungar, Derna, Tobruk, Marsa el Hariga, Zueitina, Marsa el Brega, Ras Lanuf (Rasco/Veba Terminals), Es Sider, Misurata, Khoms, Tripoli, Bouri, Zawia and Abu Kammash.

Qatar

AL RAYYAN: 26.39 N. 51.33 E. (See Late Plans)

TERMINAL: Al Rayyan Marine Terminal is situated in the Southern part of the Arabian Gulf, approximately 35 nautical miles off the Northern coast of Qatar.

The geographical location of the Terminal is Lat. 26° 39' N., Long. 51° 33' E.

The approximate water depth at the Terminal is 27.0 m. at British Admiralty Chart Datum (Lowest Astronomical Tide).

Terminal Lay-out: The Terminal consists of a storage tanker which is moored to a Single Point Mooring buoy (SPM). Routinely, export tankers berth at the storage tanker in tandem mode; occasionally alongside berthing may be scheduled. The storage tanker receives Al Rayyan Crude Oil through a pipeline from a jack-up production facility, located 1,250 m. to the E.N.E.

The storage tanker is a modified oil tanker with a Summer deadweight of 172,000 tonnes and an overall length of 311 m. after conversion.

Tanker Loading Facilities: Routine loading of export tankers takes place through 1×16 in. floating hose string which is connected to the port side cargo manifold of the export tanker which is berthed behind the storage tanker. The overall length of the floating hose string is 300 m., and incorporates a breakaway coupling which functions as a mechanical pollution prevention device. All hoses are of a pollution protection design (double carcass).

Occasionally, loading may be scheduled with the export tanker moored alongside the export tanker.

DOCUMENTS:

2 copies Crew List.
2 copies Crew Effects List.
2 copies Ship's Manifest.
2 copies Maritime Declaration of Health.
1 copy Current MENAS Receipt (if applicable).
1 copy TOVALOP Insurance Certificate.
1 copy CLC Insurance Certificate.
1 copy Previous Port Clearance.
1 original Outward Port Clearance (issued at departure).

Ship's Appointed Agent: The ship's appointed Agent will not normally visit the vessel, due to the remote location of the Terminal.

The Pilot/Loading Master will assist in agency matters.

The Terminal Operator will collect from the Owner and forward to MENAS (Middle East Navigation Aids Services) the applicable fees when Al Rayyan Marine Terminal is the vessel's first port of call in the Gulf area.

Customs and Immigration: Government officials do not visit the vessel on a routine basis.

PILOTAGE: *Responsibility:* A Pilot is on board the vessel in an advisory capacity. The Master remains responsible for the overall safety of the vessel and stays in command at all times.

Upon completion of berthing, the Pilot will remain on board the vessel and function as Loading Master.

Pilot Boarding Location: The customary pilot boarding location lies 3 miles S.E. of the Terminal. Usually, the Pilot boards from a tug, but under rough sea conditions, the pilot transfer may be made by helicopter. The Master will be given sufficient advance notice when a helicopter landing is planned.

Pilot Transfer Arrangement (If by Boat): The pilot boading ladder must consist of a single pilot ladder, or a combination of a pilot ladder and an accommodation ladder, and be rigged on the starboard side of the vessel.

The entire arrangement must conform precisely with the applicable IMO Resolution.

In case of non-compliance, the Pilot will refuse to board until the situation has been rectified to his satisfaction.

A mechanical pilot hoist is not an acceptable means for personnel transfer.

Pilot Transfer Arrangement (If by Helicopter): Helicopter landing operations will not take place until the Master has acknowledged that the vessel has fulfilled the requirements of the "Guide to Helicopter/Ship Operations", published by the International Chamber of Shipping (ICS).

The Terminal Operator uses a twin engine helicopter for marine helicopter operations. Practices and equipment conform with the Guide.

ANCHORAGE: The designated anchoring position for waiting tankers lies 3 miles S.E. of the Terminal in a water depth of approximately 25.0 m.

APPROACHES: *Navigation and Approach:* Safe approach to the Terminal is from the North, passing 3 miles to the West of the Terminal and thence proceeding to a position 3 miles S.E. of the Terminal.

The Terminal is situated near busy shipping lanes, and Masters of visiting vessels are cautioned accordingly.

Attention is drawn to the existence of unmarked subsea wellheads and other areas of reduced water depths, which would be of concern to a deep draft vessel navigating near the Terminal. The appropriate British Admiralty chart for the area should be consulted.

Safety Zone: For safety purposes, an area around the Terminal has been declared closed for commercial shipping and fishing vessels of any size. This Safety Zone extends to a distance of 1 mile from the Terminal production facility, as well as the storage tanker "Ailsa Craig".

RESTRICTIONS: *Tanker Freeboard and Draft:* Al Rayyan Terminal is situated in a remote location and exposed to the weather.

For this reason, the Master of a vessel must ensure that the vessel maintains, while at the Terminal, a freeboard which is as small as practicable.

This can be achieved through judicious deballasting while loading.

A vessel which is unable to conduct simultaneous deballasting and loading will be required to load part cargo prior to deballasting or retain ballast on board.

In addition, a vessel in the berth must maintain a draft and trim condition, which would allow emergency departure from the berth at all times, if necessary.

Period of Terminal Operations: Terminal operations take place on a continuous 24 hour basis with the exception of tanker berthing activities, which are scheduled for daylight hours only, weather permitting.

Closure of Terminal: Unfavourable wind and sea conditions at the Terminal may from time to time affect tanker operations in general and berthing activities in particular. The Terminal will be declared closed for tanker operations when weather conditions deteriorate beyond the safe working limits of the Terminal, as determined by the Terminal Supervisor at that particular moment in time.

MAX. SIZE: The maximum permissible tanker size at the Terminal is 270,000 tonnes S.d.w.t.

The maximum vessel draft at the Terminal is restricted to 21.0 m.

RADIO/VHF: *General:* Local time is UTC plus 3 hours.

All communications and estimated times of arrival (ETA's) at the Terminal should refer to local time.

The Master of a vessel must send the estimated time of arrival (ETA) of his vessel to the Terminal Operator as early as possible, but not later than 72 hours, 48 hours and 24 hours prior to arrival, regardless of the fact that the vessel may still be at a previous loading port.

Failure to comply with the notification process may delay the actual loading of the vessel.

Tanker ETA's should be sent to both the following addresses:

ARCO Qatar Inc. (AQI)
Tel: 974-446390
Fax: 974-448092

Al Rayyan Marine Terminal FSU
(FSU call name "Ailsa Craig")
via Satcom link:
Fax: 873 or 871-1454263
Telex: 873 or 871-1454264

On receipt of the 72 hour ETA message, the Terminal Operator will send to the vessel a copy of the standard "Tanker Pre-Arrival Questionnaire" (See below) to which the Master shall respond as soon as possible.

When within calling distance, the tanker should contact Al Rayyan Terminal on VHF Channel 16.

After initial contact has been established, the Terminal will request the tanker to switch to the working channel (Marine VHF Channel 69) to exchange the following operational information.

The tanker is required to report to the Terminal:

(i) ETA in local time at a position 3 nautical miles S.E. of the Terminal.
(ii) Any vessel deficiencies which would affect mooring and loading operations.

The Terminal will provide the following details to the tanker:

(i) Pilot boarding time, boarding position and boarding method (boat or helicopter).
(ii) Reminder to rig the pilot boarding ladder on the starboard side.
(iii) Reminder to have ready for use on the port side 1×16 in. cargo manifold connection and the ship's lifting derrick or crane.
(iv) Any other operational information of importance.

While within the Al Rayyan Terminal area, the vessel shall maintain voice communication with the Terminal by marine VHF radio.

Tanker Operational Deficiencies: The tanker's Master must inform the Terminal promptly of the existence on board of an operational deficiency which will substantially affect the readiness and performance of his vessel and crew.

Tanker Notice of Readiness: A Notice of Readiness should only be tendered by the Master of a vessel when the vessel has arrived in a position 3 miles S.E. of the Terminal.

A Notice of Readiness is an undertaking that the vessel is in all respects ready to load, and that all of the vessel's equipment (including but not limited to tanks, pumps, valves and pipelines) is ready and fit to load Al Rayyan Crude Oil.

Acceptance of a Notice of Readiness by AQI is merely an acknowledgment of receipt of such notice, and does not constitute agreement by AQI that the vessel is in fact ready to load, or the acceptance of any other contractual terms and conditions.

A vessel, which is found not to be ready to load, notwithstanding having tendered Notice of Readiness, may be taken from the berth and directed to sea. All expenses incurred shall be borne by the vessel and the decision of the Terminal Supervisor shall be final.

Terminal Forms and Notices: The Master is required to sign a number of Terminal forms and notices. The Appendix contains specimen copies (not reproduced).

Lodging for Shore Personnel: The Master must provide lodging of a satisfactory standard for 3 Terminal personnel throughout the period that the vessel is berthed.

Tanker Pre-Arrival Questionnaire:

TANKER PRE-ARRIVAL QUESTIONNAIRE

To: Master of . . . . . .
From: ARCO Qatar Inc.

We confirm that we hold a nomination for your vessel to load . . . . U.S. barrels at 60°F plus/minus 5% of Al Rayyan Crude Oil with an approximate API of . . .° and a loading temperature of . . .°F.

Please contact Al Rayyan Marine Terminal on VHF Channel 16 when within radio range.

Please confirm as soon as possible the requested information to ARCO Qatar at one of their following numbers:

ARCO Qatar Inc.
Tel: 974-446390
Fax: 974-448092

Al Rayyan Marine Terminal FSU
via Satcom link:
Fax: 873 or 871-1454263
Telex: 873 or 871-1454264

(i) Ability to load nominated quantity.
(ii) Present ETA.
(iii) Previous port of call.
(iv) Arrival draft.
(v) Departure draft.
(vi) Deballasting time prior to loading, if any.
(vii) Maximum acceptable loading rate through one manifold connection.
(viii) Type and number of OCIMF standard bow chain stoppers.
(ix) Safe working load of derrick or crane.
(x) Suitable accommodation available for 5 Terminal staff.
(xi) Any vessel deficiencies which may affect berthing and loading operations.
(xii) Name of ship's Agent in Qatar, if any.
(xiii) Name of Master.
(xiv) Vessel call sign.
(o) Vessel official number.

TUGS: Tug available.

BERTHING: Mooring (Bow to Stern): This tandem berthing method is the routine practice.

The maximum safe working load of the entire mooring equipment system, which is in place between storage tanker and export tanker, is 200 tonnes.

Arrival Draft: Vessels must arrive on a draft which will allow for safe manoeuvring under various weather conditions with the propeller submerged, and a trim by the stern of not more than 3.0 m. A vessel with an insufficient draft or excessive trim will not be berthed until the draft condition has been corrected to the satisfaction of the Pilot/Loading Master.

Tanker Bow Mooring Equipment: Tanker bow mooring equipment must comply with the recommendations contained in the latest edition of the OCIMF publication "Recommendations for Equipment Employed in the Mooring of Ships at Single Point Moorings". The export tanker is berthed on 1×21 in. circumference mooring hawser, which is attached to the stern of the storage tanker. The Terminal will reject for berthing any vessel which is not fitted with one functional bow chain stopper (76 mm.) as prescribed by OCIMF.

Preparations for Berthing: At the time that the Pilot/Loading Master boards, the vessel shall have its port side derrick or crane ready to pick up hose connection ancillary equipment from the tanker tug. The Pilot/Loading Master will inspect the bow mooring arrangements upon boarding. He will also witness oxygen readings taken from a number of cargo tanks to ascertain that cargo tanks on board the vessel are indeed properly inerted. Berthing activities will not proceed when the oxygen contents is found to exceed 8% by volume. The Pilot/Loading Master will also verify that the vessel is equipped with a standardised manifold connection (See "Loading").

Prior to berthing, the vessel must complete the following preparations:

(a) Bow anchors secured in their hawse pipes.
(b) One winch spooling drum readied to accept the pick-up rope of the mooring hawser.
(c) 1×1 in. diameter messenger line rigged on the bow.
(d) One uncovered 16 in. manifold connection on the port side.
(e) One tow rope for the tanker tug laid out on the stern.

Pre-Berthing Operational Safety Inspection: Prior to berthing, the Pilot/Loading Master may choose to conduct a general operational safety inspection of the vessel, if he has reasons to believe that the vessel may be substandard or deficient in those areas which would make the vessel unacceptable to berth and load cargo at the Terminal.

Pre-Berthing Conference: Before proceeding to the berth, the Pilot/Loading Master will discuss with the Master operational and other matters related to the use of the Terminal. The Pilot/Loading Master will request the Master to brief him on vessel matters which are of importance for the safe conduct of berthing and loading operations.

Tug Assistance: One tug is available to assist the tanker throughout its stay at the Terminal. The tanker tug will assist during berthing and unberthing of the tanker. While the tanker is in the berth, the tug will remain connected to the stern of the tanker on a tow rope deployed from the tanker. The tug will tow continuously in order to maintain a safe distance between the storage tanker and the export tanker.

Safe Mooring Practices: A sizeable mooring winch storage drum must be used to heave on board the mooring hawser pick-up rope, which has a length of 150 m. and a circumference of 10 in. (diameter 80 mm.). The use of a winch warping head for this purpose is not permitted.

Mooring Operation: On final approach, but still at a safe distance from the storage tanker, the Pilot/Loading Master shall ascertain that astern engine movements are available promptly.

After the mooring chain has been connected in the bow stopper, the Pilot/Loading Master must satisfy himself that the stopper securing pin rests snugly across the stopper tongue or bar, thus giving it no opportunity to lift.

Emergency Towing Wires (Fire Wires): On completion of mooring, the vessel shall rig on its starboard side, 2 emergency towing wires of adequate strength and condition. One line must be secured on the bow and the other on the stern, with adequate slack on deck and with their eyes being maintained at water level.

Tanker Bow Watchkeeper: Immediately after mooring and until the vessel unmoors, a watchkeeper must remain positioned on the bow. The watchkeeper shall constantly monitor the position of the export tanker in relation to the stern of the storage tanker. He must be in radio contact with the Duty Deck Officer, so that he can immediately report any significant change in vessel position (distance off and direction). The Duty Deck Officer is required to notify the Pilot/Loading Master of such an occurrence without delay.

Mooring (Side by Side): This "alongside" berthing method is optional and may be used occasionally when the tandem mooring method is unavailable.

IMPORTANT NOTE:

Due to shortening of the original hull, the storage tanker now has a bow to cargo manifold distance of 130 m., while its overall length is 311 m. This means that on this vessel, the cargo manifold is located much further forward than usual.

Consequently, the overall length of an export tanker together with the distance between its bow and cargo manifold will determine whether, for this type of mooring operation, the storage tanker can remain connected to the SPM or not. Other factors, such as environmental conditions and vessel characteristics, will also play a role.

As guidance, an overall length of the export tanker of more than approximately 260 m. (typical size 125,000 – 130,000 tonnes S.d.w.t.) would probably necessitate the storage tanker to disconnect from the

SPM, in order to conduct the ship-to-ship mooring operation while underway. This will result in a temporary halt to oil field production.

The export tanker will berth on the starboard side of the storage tanker.

Reference should be made to the "Ship to Ship Transfer Guide", published by ICS/OCIMF. Operational practices must conform with this Guide.

Every aspect of this type of operation will be discussed in great detail with the Master prior to commencing activities.

Departure: *Timely Departure:* It is Terminal practice that a vessel unmoors as soon as practicable after disconnection of the loading hose.

Unmooring: Prior to unmooring, the tanker tug must be released from the stern. Great care must be taken when reducing the tug's engine power in readiness for slipping the tow rope, as the tanker may ride up to the storage tanker at this stage.

Letting go of the tanker tug may only commence when the tanker main propulsion is ready for immediate use.

Unmooring should take place immediately after releasing the tug.

Disembarkation of Pilot/Loading Master: The Pilot/Loading Master will leave the vessel only when the vessel is well clear of the Terminal area.

LOADING: Cargo Hose Handling: A tanker is expected to comply with the standard manifold arrangements which are contained in the OCIMF publication "Recommendations for Oil Tanker Manifolds and Associated Equipment".

Tanker Cargo Manifold Standard Dimensions: A vessel must present for loading one manifold connection flange of 16 in. nominal size (150 ASA).

Flange dimensions and drilling should conform to the common standard of ANSI B16.5 or BS1560 Series 150, or exact equivalent (See "Plan").

The Terminal reserves the right to refuse for loading a vessel which is not fitted with a standardised manifold presentation flange.

Cargo Hose Lifting Capability: The derrick or crane which is used by the vessel to lift and lower the loading hose must have a minimum safe working load (SWL) of 15 tonnes. It should also be able to provide a clear lift of 10 m. above the main deck over the manifold connection in use. The approximate hose weight to be lifted during hose connection is 10 tonnes.

Connection of Cargo Hose: Physical connection of the loading hose is performed by the vessel's crew under supervision of the Pilot/Loading Master.

Prior to hose connection activities, the Pilot/Loading Master will ascertain and confirm with the Terminal that stop valves at each end of the loading hose are shut.

The tanker end of the loading hose is fitted with a Camlock quick connect/disconnect coupling and a stop valve.

Consideration should be given to the insertion of 2 additional studbolts through the Camlock coupling flange connection as a form of security.

Security of Loading Hose: Once connected, the loading hose will be supported from the vessel's derrick or crane, using nylon slings.

In rough sea conditions, additional rope lashings shall be attached to the hose at the rail to prevent excessive fore and aft movement of the hose. This is especially important when the vessel is deeply laden.

Disconnection of Loading Hose: Physical disconnection of the loading hose is performed by the vessel's crew under supervision of the Pilot/Loading Master.

Prior to hose disconnection activities, the Pilot/Loading Master must confirm with the Terminal Control Room that the hose may indeed be disconnected, in particular when loading has been stopped from the Terminal. This is in order to establish that the vessel has received its nominated cargo quantity.

Care must be taken to ensure that the hose end blind flange is securely fitted in place before lowering the hose into the sea.

Upon disconnection, the loading hose must not be allowed to drift under the stern of the vessel. This may happen with smaller sized vessels. In such cases, the hose end pick-up rope shall be retained onboard and secured to a bollard at the manifold, from where it can be released by a member of the crew once the vessel has unmoored and gathered some stern way.

Cargo Operations: *Pre-Loading Conference:* A pre-loading conference will be held between the Pilot/Loading Master and the Master or Chief Officer.

The purpose of this conference is to review the Terminal Regulations, and to ensure that there is a complete understanding of all safety and pollution prevention procedures, as well as deballasting and cargo loading operations, emergency shut-down procedures, tank inspection requirements, cargo nominations and documentation.

It will also be brought to the attention of the Master that Al Rayyan Crude Oil contains hydrogen sulphide (H_2S).

The Master will be handed a "Material Safety Data Sheed (MSDS)", which provides important safety information about Al Rayyan Crude Oil.

Deballasting and loading of cargo cannot commence unless specifically authorised by the Pilot/Loading Master.

Combination Carriers: The ballast and cargo handling activities on board a combination carrier require safety precautions and operational practices which are in addition to those necessary for conventional tankers. Reference should be made to "ISGOTT".

Ship/Shore Radio Communications: The Pilot/Loading Master will provide, on loan to the Master, a portable radio which will remain on board throughout the vessel's stay in the berth. The radio is to be kept switched on at all times, so that tanker and Terminal personnel can maintain voice contact on the dedicated Terminal radio frequency. The radio must be used for operational communications exclusively. It must be used responsibly. Should the radio be lost or damaged while under the care of vessel personnel, then the cost of a replacement will be charged to the vessel's Owner. The Pilot/Loading Master must be notified if the radio seems to malfunction.

In addition, the vessel should keep its marine VHF Channel 69 available as a back-up means of communications. For this purpose, the vessel's wheelhouse must remain accessible and unlocked.

If all radio communications between the Terminal Control Room and the vessel are lost, then all operations shall be stopped until corrective action is taken, and communications have been restored.

Throughout all operations, a responsible ship's Deck Officer shall be on duty. At least 2 capable crew members shall be present on the cargo deck at all times and maintain voice contact with the Officer on watch.

Pre-Loading Tank Inspection: The Pilot/Loading Master does not inspect cargo tanks prior to loading or sign a vessel's "Dry Tank Certificate".

An independent cargo surveyor may witness the gauging of vessel's tanks prior to loading cargo.

Loading: Two loading pumps are available for loading. Each pump is rated at 3,500 cu.m./hr.

The Master is cautioned of the serious consequences of closing or throttling tanker cargo valves against the incoming flow of oil.

Sufficient crew shall be on deck to deal with the operation and security of the vessel.

The ship/shore communications system must be maintained in good working order and checked hourly by exchanging information on quantity loaded at that moment.

The cargo manifold connection and the cargo pumproom should be checked for leakage regularly.

The Duty Deck Officer must notify the Pilot/Loading Master when the vessel is ready in all respects to receive cargo. Cargo transfer will not be started unless tanker and storage tanker manifold locations are visually monitored.

Cargo loading will start at a slow rate until the vessel confirms that cargo is being received on board. At such time, the flow will be increased to the agreed maximum rate.

The vessel can reduce the loading rate at any time (e.g. for topping-off cargo tanks or towards completion of loading), but at least 15 minutes advance notice must be given to the Pilot/Loading Master on each occasion.

Tank Venting: The vessel shall ensure that venting of cargo tanks is done through the designated venting system of the vessel.

The atmosphere of inerted cargo tanks should not be allowed to become flammable when deballasting from cargo tanks.

Tanker Manifold Watchkeeper: A watchkeeper with a radio must remain stationed at the cargo manifold throughout loading of cargo.

Cargo Quantities and Commercial Documentation:

Cargo Measurement: Immediately after completion of loading, tanker cargo figures should be calculated by the Master or Chief Officer and communicated to the Pilot/Loading Master.

An independent cargo surveyor may witness tank measurements on board the vessel and perform his own cargo calculations.

The Bill of Lading figures are solely based on measurements and calculations carried out on board the storage tanker.

Cargo Documentation Package: The following cargo documents are included in the documentation package:

Bill of Lading.
Cargo Manifest.
Certificate of Quality.
Certificate of Quantity.
Certificate of Origin.
Tanker Ullage Report.
Tanker Time Sheet.
Tanker Notice of Readiness (TBP by incoming Tanker).
Master's Receipt for Cargo Documents and Samples.

It is Terminal practice that all cargo documents are completed and presented to the Master for his signature before the vessel commences its sea passage.

BALLAST: *Ballast Handling:* Deballasting may only commence after prior consent from the Pilot/Loading Master.

There are no dirty ballast reception facilities at the Terminal. Arriving vessels must have pumps, lines and ballast tanks clean.

It is an offence under the legislation of the State of Qatar to discharge polluted ballast water into the sea, and penalties apply in case of violation.

Cargo piping used for the discharge overboard of ballast must be clean and free of oil prior to arrival at the Terminal.

The tanker's Master must ensure that the vessel will not release oil overboard when opening sea valves in connection with deballasting or emergency ballasting.

A vessel with contaminated ballast will be required to retain such ballast on board at the exclusion of cargo.

A responsible member of the vessel's crew shall observe continuously the discharge of ballast water, day or night, and shall be in voice communication with the ship's Officer on watch.

Concurrent Loading and Deballasting: Should a vessel wish to deballast and load concurrently, then the Master must demonstrate to the satisfaction of the Pilot/Loading Master that there is a complete physical separation or at least a reliable two-valve segregation between ballast and cargo sections.

MEDICAL: Emergency treatment is available from the Terminal on a limited scale. Medivac by helicopter can be arranged for serious cases.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Not possible.

TIME: GMT plus 3 hours.

SAFETY: *Note:* Not all safety requirements reproduced hereunder.

State of Readiness: No repairs or work, which will make the tanker unable to move under its own power, may be commenced without the prior consent of the Terminal Supervisor.

In general, such consent will be refused as it is crucial that the vessel keeps ready its main propulsion, steering gear and other machinery required for unmooring and manoeuvring throughout its entire stay in the berth. Routine maintenance work, which would affect propulsion and steering systems and other essential equipment, is not permitted.

In case, where through force majeure, a vessel becomes immobilised while in the berth, the Master must immediately advise the Pilot/Loading Master, so that a decision can be made on remedial action, including suspension of operations.

During the onset of extreme weather, the vessel will be required to vacate the berth. Such measure is designed to protect both the Terminal facilities and the vessel, and will be the decision of the Terminal Supervisor exclusively. The vessel should be prepared to take on additional ballast water if insufficient cargo is on board for it to achieve a safe manoeuvring draft.

Inert Gas System (IGS): The tanker Master shall confirm before berthing that the IGS is working correctly, i.e. maintaining positive pressure in all cargo tanks with an oxygen content of not more than 8% by volume. The Pilot/Loading Master will check the actual oxygen contents in cargo tanks before the vessel proceeds to the berth.

If the IGS is not functional, then deballasting from cargo tanks cannot commence. If the IGS fails after deballasting from cargo tanks has already begun, then such deballasting must be suspended until the system has been made functional again. If repairs are likely to take more than 6 hours, then a safe deballasting/loading plan must be agreed between the Master and the Pilot/Loading Master before operations can resume.

Hydrogen Sulphide (H_2S): Al Rayyan Crude Oil contains hydrogen sulphide, and the Master must ensure that vessel personnel are aware of the toxicity of this gas and that precautionary measures have been taken. "ISGOTT" should be consulted.

Adverse Weather: When wind gust speeds reach 30 knots on the Terminal wind speed indicator, the vessel will be notified that deballasting and loading operations may have to be suspended, and the loading hose disconnected from the manifold and hung off the side of the vessel if conditions worsen. The Terminal Supervisor determines at which point wind conditions necessitate an actual halt of operations.

Alcohol and Drug Control: All visiting vessels must adhere to OCIMF guidelines concerning the control of alcohol and drugs for watchkeeping personnel.

Non-compliance will result in a suspension of all operations until the situation has been rectified.

On Board Shifting of Bunker Fuel Oil: The vessel shall request permission from the Pilot/Loading Master prior to the on board shifting of bunker fuel oil, if such an activity is necessary for operational reasons.

Vessel Garbage Disposal: Garbage generated by the vessel must be retained in plastic bags or receptacles, which are kept securely tied or closed. It is a punishable offence to dump garbage into the water.

GENERAL: *Weather Forecasting Services:* Local weather forecasts for the area of the Terminal, both short term and long term, are issued daily at 0945 hrs. The Terminal will provide the local forecast to vessel's Masters at their request. The weather forecast is also broadcast in a continuous transmission on VHF Channel 72. A voice recording of the weather forecast can also be accessed via local telephone number 974-366111.

Tidal Information: Daily tidal predictions are available from the Terminal. The maximum tidal range is approximately 160 cm.

Provisions and Stores: Not available.

Delete and substitute: Only draft marks and load line may be painted in port, but with Port Authority permission. Fines are imposed if other painting or maintenance carried out.

Thailand

MAP TA PHUT: (Also see Page 2082)

(See Late Plans)

(E) NATIONAL PETROCHEMICAL PUBLIC CO. LTD.

LOCATION: The Terminal is referred to as "NPC Terminal". The Terminal is owned and operated by National Petrochemical Public Company Limited (NPC). It is situated on the Eastern shore of the Gul of Thailand, approximately 220 km. from Bangkok, at Lat. 12° 38' 08" N. Long. 101° 08' 04" E.

The Marine Terminal consists of one berth for importation/exportatio and internal distribution of petrochemical/chemical products, which is located approximately 4.2 km. offshore and connected by a pipeline jetty to Buffer Tank Farm on shore.

PILOTAGE: Pilots must be ordered for both inward and outwar passages by the ship's Agent. VHF Channel 16 is always monitored. The Pilot uses a service boat to board arriving vessels or vessels a anchorage.

RESTRICTIONS: Berthing and unberthing daytime and night-time.

MAX. SIZE: Maximum 9,000 d.w.t. Minimum 1,000 d.w.t.

Max. LOA 170 m. Min. LOA 60 m.

The normal maximum draft for vessels arriving or departing from the loading platform is 8.5 m. This draft relates to depth in front of the loading platform, where the depth is 9.0 m. Chart Datum (LLW).

The existing depth allowance for underkeel clearance is 1.0 m.

Maximum draft for vessels arriving or departing can be stated as being 8.0 m., plus the height of the tide at that time.

VESSEL REQUIREMENTS:

1. Vessels must have been properly cleared and accepted by NPC Terminal. Only such liquefied gas and chemical vessels, which comply with the recommendations of IMO, and have a vali certificate relating to:
   (a) The code for existing ships carrying liquefied gases in bulk (Resolution A.329 (IX));
   (b) The code for the construction and equipment for ships carrying liquefied gases in bulk (Resolution A.328 (IX));
   (c) The international code for the construction and equipment o ships carrying liquefied gases in bulk (IGC) (Resolution MSC 5 (48));
   (d) The code for the construction and equipment of ships carrying dangerous chemicals in bulk (Resolution A.212 (VII));
   may operate at the berth.
2. Vessel must have given proper notices through the ship's Agent t the Terminal by facsimile, and Terminal approval given to procee to the berth prior to arrival. The Notices of Arrival should contain the following:
   (a) Name and call sign of the vessel.
   (b) ETA at NPC Terminal.
   (c) Vessel's particulars.
   (d) Details of cargo, such as quantities, etc.
   (e) Details of ship's manifold, including type, size and numbers.
   (f) Whether the ship has external impressed cathodic protection.
3. Vessel must be in good state of repair, and all equipment properly functioning prior to proceeding to berth. Vessel must be presente in every respect ready to load/unload product at temperature an pressure in accordance with notice.
4. Vessel will not be acceptable for loading/unloading unless the tanks to be loaded/unloaded and ship's piping are free of any liquid o vapour, which would knowingly contaminate or degrade the product

RADIO: See "Vessel Requirements" – No. 2 above.

TUGS: Tug service is arranged by the ship's Agent.

Tugs are required for mooring and unmooring operations.

The number of tugs employed will vary according to the size of the vessel and prevailing weather conditions. Under normal circumstances, one tug is required for vessels up to 110 m. LOA. Two tugs are require for vessels over 110 m. in the Monsoon season. At least one tug must stand-by in the vicinity nearby whilst vessel alongside.

Mooring Gang: Running of mooring lines and releasing of mooring lines, except in an emergency, is handled by mooring gang and is arrange by the ship's Agent.

BERTHING: *Berthing Details:* On the jetty, the fenders and fendering structures are designed to absorb at normal working stress levels, the energy impacted by vessels approaching the jetty at a maximum velocity of 0.25 m./sec. and a nearly parallel approach to the berth. Design is based on a 9,000 d.w.t. vessel.

Mooring Details: Depth alongside the jetty face is 9.5 m. LAT. Approximately 1.0 m. should be allowed for siltation.

Vessel sizes may vary from 1,000 d.w.t. to 9,000 d.w.t.

Smaller or larger vessels may be accommodated. However, specia approval must be obtained prior to scheduling.

Six mooring dolphins are provided to take the breast lines, and the head/stern lines from vessel. The spring lines are led to 2 breasting dolphins. The mooring dolphins are rigid structures consisting of circular piles with a concrete caps. The bollards are fixed on top of each mooring dolphin and breasting dolphin, and are capable of withstanding a stress of 50 tons each.

Berthing Procedure:

(a) Berthing/unberthing is permitted both daytime and night-time. The Government Pilot will board the vessel at anchorage area and will assist the Master in manoeuvring the vessel to berth.

(b) One or two tugs of adequate power will normally assist the vessel in berthing/unberthing. They will also stand-by in the vicinity nearby and ready to take the Master's or NPC's Loading Master's order regarding abrupt change in weather conditions.

(c) One or two mooring boats are used to send lines ashore.

IMPORTANT NOTICES:

All mooring equipment and lines must be in 1st Class working condition.

Synthetic tails without proper connection or spliced mooring lines are not allowed.

Mixed moorings are occasionally acceptable as long as they are not used in the same direction or to the same points.

While manoeuvring for berthing at NPC Terminal, it is essential that the vessel's engine performs promptly and accurately. It is recommended that trial engine manoeuvres are tested before the vessel enters the confines of the port.

Self-tension winches fitted with automatic rendering and hauling should not be used in automatic mode while the vessel is moored.

A sufficient number of personnel to deal with an emergency must be present on board the vessel at all times during the vessel's stay at berth.

While the vessel is at the berth, her boilers, main engines, steering machinery and other equipment essential for manoeuvring should be maintained in condition that will permit the vessel to move away from the berth at short notice.

All vessels, while lying alongside NPC Terminal, must strictly follow the Terminal's Rules and Regulations.

The maximum permissible drift parallel to the platform about the centre of the appropriate loading/unloading hose or arm is 2.0 m.

Wind Speed Limitation for Loading Arm Operation: As safety operations procedure, when the Terminal wind indicator indicates the wind is blowing at 18 m./sec. or more from any direction, the Terminal will take the following precautions/actions:

(a) Inform vessel's personnel to be alort on moorings.
(b) Stop discharging/loading.
(c) Drain loading arms.
(d) Disconnect loading arm.

The said limitation is to ensure that the disconnection of loading arms will be completed before the wind speed reaches the maximum limitation for operating conditions of the loading arms (21 m./sec.).

Emergencies:

(a) The berth is equipped with the E.S.D. system.

In an emergency, the Operator can push a single button to stop loading operations/discharging operations at the berth. This button will stop shore's loading pumps and closes all valves concerned.

It is imperative that a constant watch is maintained on deck while discharging. In case the emergency shut-down is activated, vessels have to *stop immediately all cargo pumps.*

(b) Emergency Release Coupling (E.R.C.) – All the loading arms are equipped with the emergency release coupling (E.R.C.) system, which hydraulically allows disconnection of arm flanges from ship's manifolds in the following cases:
(i) When loading arm travels over the disconnection alarm point.
(ii) When the emergency disconnection button is pressed at the loading arm control console on the gangway tower.

In the event of mishaps, the loading will be stopped by emergency shut-down sequence. The closing speed (5-30 seconds) is controlled to restrict surge pressure after disconnection, the loading arm will be returned to safety area and will be locked.

Ship's Manifold Requirements: No vessel's flexible hoses are allowed to be connected to the loading arms. Since the berth is equipped with loading arms of various types and sizes, they should be used in accordance with their own operating limits.

If the vessel's manifold is unfit for the loading arms after all possible attempts, the Terminal will reject the vessel.

Gangway: Gangway consist of gangway, bulwark ladder and turntable. Length of gangway is adjustable in order to be operated more safely. Hooking-up and unhooking of gangway is performed by jib crane.

Operation Conditions:

Weather conditions:	
Max. wind speed in operation	10 m./sec.
Vessel conditions:	
Max. deck height from platform	–0.75 m.
Min. deck height from platform	–9.55 m.
Gangway load conditions:	
Gangway	5 persons
Bulkwark ladder	2 persons
	(assuming 75 kgs/person)

Restrictions: When operating gangway, it is strictly prohibited to place persons and/or objects on it.

Loading limit must be strictly kept.

On operation of gangway, the maximum number of persons on bridge at one time must be 5 persons.

When any danger is expected due to strong wind, gust and others, do not operate.

Heavy walking on bridge should be prohibited and resonance by walking should be prevented.

Cathodic Protection: Impressed current cathodic protection system, if fitted, must be switched off at least 3 hours before mooring operations.

Firefighting Equipment: The firefighting system at the jetty consists of elevated and tele-controlled monitors. There are 2 monitors installed on the berth, one at the monitor tower and one at the gangway tower. The monitors are mounted at a sufficient elevation to cover the manifold from the smallest vessel when fully loaded (lowest tide) and the largest vessel at light condition (highest tide).

The monitors and the fire pumps are remote controlled and can be used with foam and/or water compound, and can also be used with dry powder.

Fixed water spray systems are provided for both monitor tower and gangway tower in order to protect them from heat radiation.

Several hydrants, portable fire and dry powder extinguishers are installed on the operating platform. All tugs are fitted with firefighting monitors for both water and foam.

LOADING/UNLOADING: *Cargo Calculations:* Sampling, ullaging and quantity calculations will be carried out after berthing, concurrently with Immigration and Port Health Authority formalities, or concurrently with the connection of loading arm. The calculations procedure will be attended by Customs Officials anad Terminal's representative.

Safety and Pollution Check Lists: Ship/shore safety and pollution check lists are to be completed jointly between vessel and Terminal's representative prior to loading or discharging. The Loading Master will coordinate cargo operations between the vessel and shore.

Cargo Operation Requirements and Restrictions: The following requirements and restrictions must be strictly complied with during discharge at NPC Terminal:

(a) Ensure that no water is pumped into the shore lines. All ship's sea suction valves must be closed and sealed before discharge.

(b) Ship's dirty ballasting is not allowed during discharge. However, separate ballast tanks may be used.

(c) Ballast may be discharged to the sea, and it is the Master's responsibility to ensure that the ballast is clean.

(d) Ship's mooring conditions.
   (i) It is the ship's responsibility to maintain a safe mooring at the berth at all times.
   (ii) The tension of mooring lines must be tight, and they must be secured to the satisfaction of the Loading Master.

   Any unsafe mooring equipment or conditions resulting in stopping cargo operations and possible loading arms disconnection, the lost and cost of loading arms disconnection will be for the ship's account.

   (iii) The offshore anchor is always required while approaching the berth. The anchor should not have less than 4-6 shackles in the water.
   (iv) In the event of unsafe mooring situation created by ship's negligence or by weather conditions, tug(s) might be necessary for assistance, as deemed by the Loading Master.

   The cost of the tug(s) will be for the ship's account.

Loading/Unloading Rates:

Product	*Max. Rate* (cu.m./hr.)	*Max. Pressure* (kg./sq.cm.)	*Temperature*
EDC	240	10.0	50°C max.
Ethylene	500	10.0	–103°C max.
Propylene	550	20.0	0 – 40°C
Butene-1	150	11.0	0 – 40°C
VCM	225	5.5	25 – 44°C
NaOH	100	7.0	20 – 50°C

Emergency: In case of fire onboard, discharging/loading operations must be stopped immediately. General alarm should be given to the Terminal for Terminal's assistance to vacate the berth.

In case the ship moved away from original mooring position, the following procedure should be conducted to protect the loading arms from being damaged:

(a) Stop cargo pumps.
(b) Close ship's manifold valve.
(c) Promptly utilise tug(s) for pulling/pushing the vessel in windward direction.
(d) Activate E.R.C. to release loading arm.

In the event of fire ashore:

All loading/unloading and/or ballasting operations must be stopped immediately.

Close all tank openings and batten down.

Prepare vessel for immediate departure.

Await instructions from shore.

Emergency escape:

(i) The vessel's offshore lifeboat shall be rigged ready for immediate lowering as an emergency escape.
(ii) A pilot ladder shall be rigged or positioned on the outboard side of the vessel ready for immediate lowering as a means of escape in the event of an emergency.
(iii) The NPC firefighting water monitors, controlled from the Jetty Control Room panel, will give a water spray cover to vessel's gangway if required as a means of escape in a fire situation.

Cargo Handled: Propylene, Butene-1, Hexene, Ethylene, EDC, VCM, NaOH.

Cargo Arms:

Size of ship's flanges: Propylene, Butene-1, Hexene: 1×8 in. (liquid), 1×4 in. (vapour). ANSI 300 FF.
Ethylene: 1×8 in. (liquid), 1×3 in. (vapour). ANSI 150 FF and ANSI 150 FF (vapour).
EDC: 1×8 in. ANSI 150 FF.
VCM: 1×6 in. (liquid), 1×3 in. (vapour). ANSI 150 FF.

Cargo Hose:

Size of ship's flange: NaOH: 1×4 in. ANSI 150.
Pumping rate: 100 cu.m./hr.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Storing:* Storing and victualling of vessels may be permitted during operations, but only with permission of both the Terminal Manager and the Master of the vessel, provided that:

(i) Access to the Terminal is not obstructed.

(ii) Cargo operations remain adequately supervised.

(iii) Cargo operations which may allow vapours to escape on deck, e.g. sampling, ullaging, deflexing, etc., are suspended.

(iv) Drums of oil, paint, steel plates, gas cylinders or any other heavy metal parts, which may cause a spark, should be landed on rubber or other suitable matting and not directly onto vessel's deck. These items must not be dragged or rolled along the deck.

(v) If an oil spillage occurs, the oil shall be disposed of by mopping up or by a method agreed by NPC's representative. Drip trays must always be used when pipeline connections are broken. Under no circumstances shall oil be washed overboard.

(vi) The platform crane is for hose handling and other purposes. It may only be operated by the Terminal personnel and may only assist in loading items of stores, provided that they are within the safe working limit of the crane, and the Terminal personnel are available to operate without detriment to other duties.

(vii) The appropriate document indemnifying NPC against all accidents has been signed.

(viii) The designated point for setting down of vessel's stores is at the discretion of the Terminal personnel.

(ix) If the above criteria are not met, NPC reserves the right to refuse permission.

Supply Vessel: No supply vessels are allowed alongside. All supply vessels used for victualling will berth at the small boat platform or shore small jetty.

Bathing and Fishing: Bathing and fishing will not be permitted from the platform and approaches or from the vessel whilst alongside.

WEATHER: *Tides:*

HAT	+3.50 m.	(highest astronomical tide).
MHHW	+3.00 m.	(mean higher high water).
MHW	+2.80 m.	(mean high water).
MSL	+2.20 m.	(mean sea level).
MLLW	+1.40 m.	(mean lower low water).
LAT	+0.50 m.	(lowest astronomical tide).

Tidal Currents: Pass from East to West during flood tides with mean velocities of 0.16 m./sec. and maximum velocities of 0.34 m./sec.

Pass from West to East during ebb tides with mean velocities of 0.13 m./sec. and maximum velocities of 0.23 m./sec.

Waves: The wind induced waves at the loading platform are mainly from South and S.W. directions. The maximum height of waves is 2.8 m. at wave period of 8 seconds.

Winds: The predominant wind directions are:

From the South during February to May.

From the S.W. during June to September.

From the North during October to January.

Mean monthly wind speed of 13.9 km./hr. or 3.9 m./sec., weak breeze.

Mean of maximum velocity of 135.3 km./hr. or 37.6 m./sec. Typhoon in November from the North.

Strong winds of more than 10 m./sec. are, however, very infrequent in the area, as are the occurrence of tropical storms.

OPERATOR: National Petrochemical Public Company Limited, 14/-1 Road, Map Ta Phut Industrial Estate, Tambon, Map Ta Phut, Rayong 21150, Thailand. *Tel:* (038) 683-796-8, 683-800. *FAX:* (038) 683-797. *Contact:* Booncherd Suwantip, Jetty and BTF Operation Department Director.

Turkey

GENERAL: (Also see Page 2120)

SHIP'S OFFICER'S REPORT: October 1996.

Transit Through Istanbul Straits:

1. Please see below a copy of our Agent's telex received prior to transit of the Dardanelles and Bosphorus.
2. When transiting the Straits, only the following documents are required:
   1 copy Crew List.
   1 copy Health Declaration.
   Ship's Tonnage Certificate and Derat Certificate are sited.
3. For Istanbul, when approaching from North, the Pilot embarks/disembarks vessel off Kavak Br. Light (about 1.0 – 2.0 nautical miles inside the entrance). When approaching from South, Pilot embarks/disembarks off Hydarpasa Breakwater.

Telex: Re – Transit Turkish Straits:

You are kindly requested to pass us the following report which is needed for the passage:

Confirm we will arrange Pilot for Dardanelles and Bosphorus.

For your guidance, as per new regulations in respect to the transit passages through the Turkish Straits, entered in force on the 1st July 1994, the following main important points have to be taken into consideration:

(AAA) A Traffic Separation Scheme, traffic separation lines and navigation lanes have been set in the Strait of Istanbul, Marmara Sea and Strait of Canakkale.

Diagram charts and coordinates of the Traffic Separation Schemes, prepared in accordance with the guidelines in the "Ships Routeing" publication of the IMO, are shown in Annex C of the "Routeing Guide", which will be put onboard upon the passage through the Canakkale Strait.

(BBB) IMPORTANT

The Owner or Manager of large vessels, which plan to effect passage through the Straits, shall provide information to the LCL Maritime Authorities on the vessel and its cargo at the planning state of the passage. The Authorities, taking into consideration the morphological and phycisal structure of the Straits, the vessel's dimensions and manoeuvre capacity, the safety of life, property, environment and the maritime traffic conditions, shall inform the applicants of the outcome of its review.

GUIDANCE

As per regulations, all vessels over 150 m. LOA are considered large vessels.

However, as per latest circular advice of the Ministry of Transport, Istanbul Area Directorate, application for passage is imperatively required for:

(1) All tanker ships over 150 m. LOA and

(2) Dry cargo ships over 200 m. LOA.

(CCC) Vessels transitting the Straits must give the following report to the Authorities, through their Agents, minimum 24 hours before their arrival:

Name of Report: Sailing Plan 1 (SP 1).

Vessel's name, call sign, flag.
Time (date and time).
Position (reporting position).
Sea speed (max. continuous manoeuvring speed).
Port of departure.
Date, time and point of entry into Traffic Separation Scheme.
Port of destination.
Pilotage requirement, i.e. Strait of Canakkale, Sea of Marmara, Strait of Istanbul.
Forward and aft draft (in meters).
Max. air draft.
Cargo (nature of cargo).
Defect/damage/deficiencies/other limitations.
Description of dangerous, nuclear and pollution goods.
Vessel's type/size:
1. LOA.
2. GRT.
3. Actual displacement (d.w.t.).
Any other useful information concerning the vessel.

(DDD) Vessels – on both directions passage – must contact the Traffic Control Stations or pilot stations minimum 2 hours before their arrival to the Straits entrance (Canakkale and/or Bosphorus), and report by VHF to the Traffic Control Stations as follows:

Name of Report: Sailing Plan 2 (SP 2).

Vessel's name, call sign, flag.
Position (bearing/distance).
Date, time and point of entry into Traffic Separation Scheme.
Pilotage requirement.
Position of the vessel.
Any useful information concerning the vessel.

(EEE) Straits navigation speed is restricted to maximum 10 nautical miles per hour over the ground for vessels proceeding in the Straits.

(FFF) Vessels navigating in the Turkish Straits shall continuously monitor the broadcast of the Traffic Control Centres and follow the Centres' instructions.

(GGG) Main Traffic Control Stations:

Turkeli Lighthouse Control Station (Bosphorus North).
Call name: Turkeli Control.
Position: Lat. 41° 14.12' N., Long. 29° 06.75' E.
VHF: Initial contact Channel 11, Operations Channels 12 and 13.

Kandilli (Bosphorus North).
Call name: Kandilli Control.
Position: Lat. 41° 04.50' N., Long. 29° 03.40' E.
VHF: Initial contact Channel 11, Operations Channels 12 and 13.

Ahirkapi Traffic Control Centre (Bosphorus South).
Call name: Istanbul Control.
Position: Lat. 41° 00.42' N., Long. 28° 59.17' E.
VHF: Initial contact Channel 11, Operations Channels 12 and 13.

Gelibolu Control Station (Dardanelles North).
Call name: Gelibolu Control.
Position: Lat. 40° 24.62' N., Long. 26° 40.93' E.
VHF: Initial contact Channel 11, Operations Channels 12 and 13.

Canakkale Traffic Control Centre (Dardanelles South).
Call name: Canakkale Control.
Position: Lat. 40° 09.07' N., Long. 26° 24.15' E.
VHF: Initial contact Channel 11, Operations Channels 12 and 13.

Mehmetcik Traffic Control Station (Dardanelles South).
Call name: Mehmetcik Control.
Position: Lat. 40° 02.57' N., Long. 26° 11.42' E.
VHF: Initial contact Channel 11, Operations Channels 12 and 13.

(HHH) Pilot Stations:
Rumeli Kavak:
Call name: Kavak Pilot.
Position: Lat. 41° 10.60' N., Long. 29° 04.40' E.
Tel: (212) 2420494, 2420374.
Fax: (212) 2421607.
VHF: Channels 16 and 71.
Istanbul:
Call name: Istanbul Pilot.
Position: Lat. 41° 00.70' N., Long. 29° 00.63' E.
Tel: (216) 3330533.
VHF: Channels 16 and 71.
Gelibolu:
Call name: Gelibolu Pilot.
Position: Lat. 40° 24.50' N., Long. 26° 40.95' E.
Tel: (286) 5661612.
Fax: (286) 5661611.
VHF: Channels 16 and 71.
Mehmetcik:
Call name: Canakkale Pilot.
Position: Lat. 41° 02.57' N., Long. 26° 11.42' E.
Tel: (286) 8446154.
Fax: (286) 8446295.
VHF: Channels 16 and 71.

GOLLUK: (Also see Page 2136) (See Late Plans)

PILOT'S REPORT: November 1996.
Pilotage: Available. Pilot can be contacted by VHF Channel 16. Usually berthing manoeuvrings in daytime, but vessels can sail any time, weather permitting.
Tugs: Not available.
Anchorage: Vessels can drop anchor at least 1 mile distance and N.W.'ly from the pier. Depth is approximately 20 m., bottom sand and mud.
Wind: Westerly wind blows daytime and land breeze at night-time during Summer. Northerly wind blows in Winter.
Tide – Current: No regular tide and current.
Density: Average 1027.
Transportation: Highway to all cities. Nearest airports at Bodrum (30 km.) and Izmir (180 km.).
Stevedoring: Vessels must use own cranes. Working hours are 0800 hrs. – 2000 hrs. in Summer, and 0800 hrs. – 2400 hrs. in Winter.
Fresh Water: Drinking water by trucks or by water connection on pier (rate 10 tonnes/hr.).
Fuel: Only diesel oil by trucks.
General: Population – 3,500. Services – Bank, post office (international calls), drug store, fish market, grocery store available.

Ukraine

EVPATORIA: (Also see Page 2154)

The following information was received in November 1996 and supersedes the information on Page 2154.
LOCATION: The Port of Evpatoria is situated on the Northern Coast of Evpatoriyskaya Bay of Kalamitskiy Bay (Western part of the Crimean Peninsula).
DOCUMENTS: The following documentation is required on arrival:
10 copies Crew List.
10 copies Passenger List.
5 copies General Declaration.
2 copies Crew's Effects Declaration.
2 copies Ship's Stores Declaration.
Cargo Documents.
Bills of Lading.
2 copies Cargo Declaration.
Health Documents.
2 copies List of Arms, Ammunition and Narcotics.
2 copies General Declaration of Crew Members and vessel's cash currency, valuables and objects limited for importation in to Ukraine (Tobacco, spirits, audio, video, etc.).
1 copy Derat Certificate.
1 copy Tonnage Certificate.
1 copy Certificate of Nationality.
1 copy Safety Equipment Certificate.
1 copy Safety Radio Station Certificate.
1 copy Safe Manning Certificate.
1 copy Pollution Liability Certificate.
Master's and Officer's Certificates of Competency, and Seaman's Books of Crew are sighted.
PILOTAGE: Compulsory for vessels over 200 g.r.t. The embarkation and disembarkation of the Pilot is carried out near the Reception Buoy in the vicinity of Karantinniy Cape. Pilot requires 12 hours notice. Pilot station monitors VHF Channels 16 and 14.
Anchorage for Pilot at Lat. 45° 10' N., Long. 33° 23' E.
APPROACHES: The port has an open roadstead that covers the area of Evpatoriyskaya Bay. Depths in the roads are up to 10.0 m.
ANCHORAGES: Anchorage No. 382 is situated 1.1 miles S.E. of Karantinniy Cape. Available depths are 10.0 m. – 12.4 m. Ground is sand and shells.
RESTRICTIONS: When wind speed from a Southern direction is more than 9.0 m./sec., vessels in the roads may be delayed.
MAX. SIZE: Maximum draft for cargo vessels is up to 4.5 m. and max. length 120 m. The restrictions for passenger vessels are 5.0 m. and 200 m. respectively.
RADIO/VHF: Port has communication equipment. Port Radio Station "Evpatoriya Radio 1" can be reached on 500 kHz, 445 kHz or VHF Channel 16. Pilots on VHF Channels 16 and 14.
ETA: Agents and Authorities should be kept well informed of the vessels' ETA and at least 24 hours prior to arrival.
RADAR: No shore based radar stations available.
TUGS: Port has 3 tugs: 1×315 h.p., 2×225 h.p. Number of the tugs depends on g.r.t. For vessels up to 500 g.r.t., one tug is required, and for vessels over 500 g.r.t., 2 tugs are required.
BERTHING: 4 berths are available in the port. 3 berths for passenger vessels (No. 2, 3 and 4), and one berth for cargo vessels (No. 5). Port is equipped with 2 cranes with capacity 5 tons for handling general, bulk cargo, steel products, etc. Warehouses and open storage facilities are available.
CRANES: See "Berthing".
MEDICAL: Medical assistance rendered immediately when required. Hospital facilities available.
FRESH WATER: Available.
DRY DOCK/REPAIRS: No major facilities at port. Mobile repair companies available. No berths dedicated for repair work.
GANGWAY/DECK WATCHMEN: Compulsory. Provided by ship's crew.
OPENING/CLOSING HATCHES: By crew.
REPATRIATION: Facilities exist for changes of crews and repatriation.
AIRPORT: Nearest airport is located at Simpheropol, a distance of 60 km.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.
HOLIDAYS: Official holidays are Sundays and the following calender dates: 1st and 7th January; 8th March; 1st, 2nd and 9th May; 24th August; 7th and 8th November; Easter (one day); St. Trinity (one day).
POLICE/AMBULANCE/FIRE: Police Tel: 02; Fire Department Tel: 01; Ambulance Tel: 03. Ordered through Agent.
IDENTIFICATION CARDS: Required. Shore passes issued.
GARBAGE DISPOSAL: Dry garbage collected into shore based containers.
AUTHORITIES: Port of Evpatoriya, 1 Pl. Moryakov, Evpatoriya, Crimea, 334320 Ukraine. *Tel:* (06569) 32106. *FAX:* (06569) 32076, 61249.
